3 would be a direct conflict with state law that would, in  
4 fact, be trumped by state law, but we don't have that here.

5 In addition, the 1917 laws, there was a comment  
6 early on that in order to cobble together our timeline, you  
7 need to take pieces out of time from the 1980's and import  
8 them back through time into the 1960's. No. Our argument  
9 is very simple. This is a continuous line of law from 1917  
10 -- 1917 through 1951 when it was revised all the way up to  
11 1965 when it was amended and restated and has not changed  
12 since then. It's a relatively simple argument at its face  
13 and doesn't require a lot of -- it doesn't require importing  
14 anything. It's a one continuous line that brings us to  
15 today.

16 To address the monopolistic character argument,  
17 with respect, there is no authority anywhere that has been  
18 cited in their brief nor mentioned here in oral argument  
19 that ever uses the word monopolistic to describe a utility  
20 as something necessary. In fact, the only place they're  
21 getting that from is a law review article which cannot be  
22 controlling on this court when compared with Supreme Court  
23 opinions and a statutory test.

24 And the monopolistic character is even more of a  
25 red herring because the *Bremer* case shut the door on that

1 argument. The *Bremer* case, as I've described before, had to  
2 do with a public wharf. The public wharf was not a  
3 monopoly. In fact, the plaintiff operated a private wharf  
4 right next to the public wharf. And the court found that  
5 that public wharf was a utility under the 1917 Remington  
6 code.

7 If monopolistic character were necessary, the  
8 court could not have found that because it was literally  
9 right next to a private competitor. So that argument has  
10 been as much -- as counsel wants to continue to bring it  
11 up -- that argument has been closed by *Bremer* which is the  
12 applicable Supreme Court precedent here.

13 I'll briefly address the interplay of 35.92 RCW,  
14 35.94 RCW which was mentioned here, though I believe it  
15 requires a bit more detail than I can say orally which is  
16 why we spent quite a bit of time in our brief discussing  
17 that. RCW 35.92 and .94 were not enacted at the same time  
18 as opposing counsel states. They were amended and restated  
19 at the same time in 1965, but they were not enacted in 1965.  
20 In fact, they were originally enacted back in the late  
21 1800's at different times in different bills.

22 There are specific municipal utilities called out  
23 in Chapter 35.92. That listing of municipal utilities in  
24 35.92 shows the Court what must be a municipal utility under  
25 35.94. But it does not limit the municipal utilities either

1 in 35.92 for that matter or for the purposes of the public  
2 vote provision in 35.94 to those listed utilities. There is  
3 an attorney general's opinion which is directly on point in  
4 this regard that specifically says that first class cities  
5 like the City of Tacoma may provide telecommunication  
6 services and telecommunication services provided by cities  
7 are public utilities. And that again should resolve the  
8 matter.

9 Additionally, as we went into length in the  
10 briefs, Chapter 35.92 and Chapter 35.94, the list of  
11 municipal utilities in 35.92 has never been the same as the  
12 utilities that the public vote requirement applies to under  
13 35.94.010. When they were first adopted, they were very  
14 different. There was street railways. There were all sorts  
15 of things in the initial 35.92 or the precursor to the  
16 35.92. But simply put, I won't spend any more time, I'll  
17 just generalize, but simply put, the provisions of the  
18 municipal utilities in 35.92 have never been conterminous  
19 with the surplus -- or excuse me, the provision in  
20 35.94.010. They're just not the same.

21 There's also been several discussions both by  
22 Mr. Shook and by the opposing parties about the City's  
23 intent when it first started this system. And while the  
24 City's intent is instructive because it's the opposite of  
25 what the City now claims it's doing, respectively the City's

1 intent of whether it was creating or not creating a  
2 municipal utility for the purposes of Chapter 35.94, its  
3 chartered, is simply irrelevant. The City does not get to  
4 choose whether it creates a municipal utility simply by  
5 saying, we didn't create a municipal utility here or saying  
6 on the other hand, we did create a municipal utility here.  
7 The intent in creation is not relevant to this Court.

8 Finally, I will cite a provision of RCW 80.04.050,  
9 which I'd like to bring up on the screen. Title 80 is the  
10 title that deals with public utilities outside of the  
11 municipal context. However, Title 80 has this provision in  
12 it. This provision says, application to municipal utilities  
13 and provides that nothing in this title, aka, Title 80,  
14 authorizes the public utility commission to make or enforce  
15 any order affecting rates, tolls, yadda, yadda, yadda,  
16 affecting any telecommunications line, gas plant, electrical  
17 plant system, sewage or water system owned and operated by  
18 any city or town or to make or enforce any order relating to  
19 the city of any telecommunications line, same list. But all  
20 other provisions enumerated here and applied to public  
21 utilities owned by any city or town.

22 The Supreme Court has interpreted this section to  
23 mean that the utilities -- the commission under this title  
24 does not apply to municipal utilities, aka, the things that  
25 are listed in this section, one of which is

1 telecommunications. And respectively, Your Honor, you don't  
2 even need to get here because again this doesn't control  
3 over 35.94.010 and Remington 1917. This is just further  
4 evidence that that's the case.

5 To sum up with my remaining time, Your Honor, I'd  
6 just say this: The Court has a simple statutory test that  
7 is in the current-day RCW 35.94.010 to apply. That test, as  
8 relevant here, means that anything is a public utility if it  
9 is similar or dissimilar to a telegraph plant -- telegraph  
10 or telephone plant or lines. Respectively, there's no way  
11 out of that definition for the City, which is why they've  
12 tried so hard to minimize it throughout their briefing and  
13 here today, that definition is the applicable definition in  
14 the RCW and it trumps every citation to authority that the  
15 City's cited because none of the other -- nothing else  
16 interprets the statute. In fact, the City hasn't even cited  
17 anything that interprets .040, the provision that it relies  
18 on. There's simply nothing cited by the City that  
19 interprets the relevant statutory pieces here. We have  
20 cited those and those support Mr. Bowman and Mr. Shook's  
21 motions for summary judgement.

22 And based on that, we request that the Court grant  
23 our motions, our partial motions for summary judgement, and  
24 deny the City's in its entirety. Thank you.

25 THE COURT: Thank you. Okay. I think you

1 reserved three minutes.

2 MR. CHRISTIE: I did, Your Honor. Thank you.

3 THE COURT: Let me know when you're ready.

4 MR. CHRISTIE: I'm ready.

5 THE COURT: All right. Go ahead.

6 MR. CHRISTIE: This is the statute that dictates  
7 the outcome of this motion, and it is RCW 35.94.040, which I  
8 talked about at the outset.

9 The language in .040 is not ambiguous and no one  
10 has asserted otherwise. It refers to any property. Any  
11 means all. No limitations. The test in .040 is that this  
12 property must be deemed surplus and no longer necessary, and  
13 that is what has been determined in this case and there is  
14 not evidence in this record that would permit you to  
15 determine that that decision was arbitrary and capricious.

16 I want to point out as well that CLICK! is not the  
17 asset. CLICK! is a business unit. It is a business unit of  
18 Tacoma Power. The Utility Board and the City Council have  
19 decided that they are going to end that business unit. The  
20 City Council and the Utility Board have the discretion to  
21 make exactly that decision.

22 If CLICK! ceases operation, what utility would  
23 still exist? The court got it right in *Coates*. They  
24 characterized exactly what these fibers are. They are  
25 surplus. They are excess. They were originally used

1 because they were additions -- they added value to the  
2 delivery of electric utility services. They're no longer  
3 needed for that. They have been deemed surplus and non-  
4 essential.

5 In terms of relevant case law, the *Bremer* decision  
6 is not the case to look at. *Bremer* was decided 30 years  
7 before RCW 35.94.040 was enacted. The statutory language at  
8 issue in *Bremer* is far broader than the language anywhere in  
9 35.94.020 or .040. And specifically in that case had  
10 language that talked about, quote, any similar or dissimilar  
11 utility or system. That's in the *Bremer* case. It has  
12 nothing to do with the analysis here.

13 The *Issaquah versus Teleprompter* case held that  
14 cable was not a utility. CLICK! is a cable network, even if  
15 CLICK! is a utility, it's the property that is being deemed  
16 surplus and .040 is the relevant statute to apply and  
17 evaluate. Thank you, Your Honor.

18 THE COURT: Thank you.

19 This is a decision that has weighed heavily on me  
20 for at least a couple of weeks going back and forth. And I  
21 wanted to explain a little bit in more depth the basis for  
22 my ruling because we do have media and members of the public  
23 present and I think it's important for people to understand  
24 what's happening in their court. So I'm going to do my best  
25 to give my full basis for the decision today.

1           This matter comes before the Court on the parties'  
2 motions for full or partial summary judgement. Summary  
3 judgement motions have the potential to end a case without a  
4 trial. So the standard that the parties must meet in order  
5 for such motions to be granted is very high.

6           Under CR 56, the rule governing summary judgement,  
7 a party must establish that no genuine issues of material  
8 fact exist that must be preserved for trial or the court  
9 must deny the motion.

10           The Court has reviewed hundreds if not thousands  
11 of pages in preparation for today's hearing. This includes  
12 multiple statutes, portions of the City Charter, relevant  
13 case law, and numerous briefs and supporting documents  
14 provided by the parties. The Court has also now heard oral  
15 argument by the parties.

16           Based on the Court's document review and the  
17 parties' oral arguments, the Court has come to some general  
18 legal conclusions. And this is more along the lines of a  
19 summary of the state of the law.

20           No. 1. First class charter cities such as Tacoma,  
21 have broad discretion when it comes to the exercise of their  
22 proprietary powers. These cities may exercise their  
23 business functions in much the same way as private entities.  
24 The operation of a public utility would be an exercise of a  
25 city's proprietary power.

1           No. 2. Applicable statutes and cases do not  
2 expressly define the term public utility.

3           No. 3. Current law does not expressly allow or  
4 prohibit first class charter cities such as Tacoma to  
5 provide telecommunication services.

6           No. 4. Current law also does not expressly  
7 require that cities provide telecommunication services only  
8 in the form of public utilities. In theory, cities could  
9 offer telecommunication services in the form of a municipal  
10 service pursuant to RCW 35A.11.020.

11           No. 5. The Tacoma City Charter Section 4.1,  
12 provides that the City shall possess all the powers granted  
13 to cities by state law to operate public utilities for  
14 supplying water, light, heat, power, transportation, and  
15 sewage and refuse collection. No expressed authorization to  
16 provide telecommunications services as a public utility is  
17 included in the charter.

18           No. 6, the Court of Appeals Division Two recently  
19 issued its unpublished decision in the case of *Coates*,  
20 *C-o-a-t-e-s, versus City of Tacoma* 2019 Westlaw, 671, 6311,  
21 this court notes that because the decision is unpublished,  
22 it is not mandatory authority. However, it can be  
23 considered as persuasive authority.

24           No. 7. In *Coates*, the Court of Appeals determined  
25 that the CLICK! Network is using the excess capacity of the

1 electric utility's existing infrastructure and is not a  
2 separate utility from the electric utility. The Court of  
3 Appeals characterized the CLICK! Network as a quote, unquote  
4 betterment of Tacoma Power.

5 No. 8. RCW 35.94.040 provides that when a City  
6 determines that any property originally acquired for public  
7 utility purposes is surplus to the City's needs and is not  
8 required for providing continued public utility service.  
9 The City, after a hearing, cause such property to be leased  
10 without the public vote that would otherwise be required  
11 under RCW 35.94.020.

12 No. 9. The Tacoma City Charter Section 4.6  
13 provides that the City shall never lease any utility system  
14 or parts thereof essential to continued effective utility  
15 service unless and until such disposal is approved by a  
16 majority vote. The Court must apply this law such as it is  
17 to the facts that have been presented.

18 The first question that must be addressed is  
19 whether the CLICK! Network is, in fact, a public utility.  
20 This issue was vigorously argued by all parties. Based on  
21 the Court's review of the evidence and hearing the oral  
22 argument that has been presented, the Court finds as  
23 follows:

24 No. 1. There is no dispute that TPU is a public  
25 utility.

1           No. 2. There is no dispute that the CLICK!  
2 Network is a telecommunications system that operates on the  
3 excess capacity of TPU's electric utilities existing  
4 infrastructure.

5           No. 3. There is no dispute that the CLICK!  
6 Network was never formally dedicated as a public utility.

7           No. 4. There is also no dispute that according to  
8 the City of Tacoma Ordinance 25930 the City's purposes in  
9 creating the CLICK! Network were to improve substation  
10 communications, automated meter reading, automated billing,  
11 automated bill payment, demand side management functions,  
12 provision of information to customers, distribution  
13 automation, remote turn on/turn off for electric and water  
14 customers, and City government communication functions, and  
15 to provide cable TV service, transport of signals for  
16 service providers offering telecommunication services, video  
17 on demand, high speed data and wired and wireless  
18 telecommunication services and internet access service. The  
19 first nine purposes are specifically related to provision of  
20 electric and water utility services.

21           No. 5. Ordinance 25930 cites directly to RCW  
22 35.92.050 for the City's authority to, quote, construct and  
23 operate works and facilities for the purpose of furnishing  
24 any persons with electricity and other means of power and to  
25 regulate and control the use thereof or lease any equipment

1 or accessories necessary and convenient for the use thereof.  
2 End quote.

3 No. 6. The components and equipment used to  
4 create the CLICK! Network were paid for with utility bonds.

5 No. 7. If the City had created CLICK! as a  
6 stand-alone public utility, it would have violated the City  
7 Charter Section 4.1.

8 Based on these findings, the Court concludes as a  
9 matter of law that the CLICK! Network is not a stand-alone  
10 utility.

11 The Court concludes as a matter of law that the  
12 CLICK! Network is property originally acquired for public  
13 utility purposes under RCW 35.94.040 and a part of a utility  
14 system under Tacoma City Charter Section 4.6.

15 The analysis does not end here.

16 Under RCW 35.94.040, in order for the City to be  
17 able to lease property originally acquired for public  
18 utility purposes without triggering a public vote, the  
19 property must be surplus to the City's needs and must not  
20 be required for continued public utility service.

21 Similarly, under the City Charter Section 4.6, in  
22 order for the City to be able to lease property that is a  
23 part of a utility system without triggering the public vote,  
24 the property must not be essential to continued effective  
25 utility service.

1           In this case, the City of Tacoma has already  
2 passed resolutions 40467, 40468, and U11116 finding that  
3 CLICK! is surplus and not essential.

4           And I want to be very clear on this, because the  
5 City has already passed these resolutions, the Court cannot  
6 simply substitute its judgement for that of the City  
7 Council's. The Court can only review the City's decisions  
8 using the arbitrary and capricious standard. In other  
9 words, the Court must decide if the council's decisions were  
10 willful and unreasoning or without consideration of and in  
11 disregard of facts or circumstances.

12           In all three of the resolutions, the City  
13 acknowledged that within four years following deployment of  
14 smart meters the meters began to fail causing communication  
15 errors, increased costs, increased repairs, and failures to  
16 measure electrical consumption. The City acknowledged that  
17 in the mid to late 2000's wireless technology overtook wire  
18 communication in the electric utility industry. More  
19 importantly for CLICK!, the City acknowledged that consumers  
20 shifted from predominantly cable programming services to  
21 internet access services while operational costs for CLICK!  
22 increased significantly. Put simply, the CLICK! Network had  
23 become outdated.

24           Based on these considerations, the City opted to  
25 change its business model essentially turning the operation

1 of the CLICK! Network over to a third-party cable TV and/or  
2 Internet access provider. The City declared that CLICK!'s  
3 assets and the excess capacity of the HFC Network were  
4 surplus to the needs of Tacoma Power and Tacoma Public  
5 Utilities and were not required for or essential to  
6 continued public utility service or effective utility  
7 service.

8 Resolution 40468 repeated many of the City's  
9 findings including the finding that CLICK!'s assets in the  
10 excess capacity of the HFC network were surplus to the  
11 needs of Tacoma Power, Tacoma Public Utilities and the City  
12 and were no longer required for continued public utility  
13 service.

14 The Court notes that before passing these  
15 resolutions, the City considered an analysis done by CTC  
16 Technology and Energy, held public hearings and took public  
17 testimony including testimony from Mr. Shook. The City  
18 argues that its resolutions were reasonable.

19 On the other hand, plaintiff Shook provides  
20 evidence taken from the City's 2017 to 2018 adopted budget  
21 stating that Tacoma Public Utilities provided services that  
22 are, quote, vital to our quality of life, unquote. TPU's  
23 mission statement specifically mentions the CLICK! Network  
24 and the telecommunication services that it provides.

25 Plaintiff Bowman argues that the City's decisions

1 are arbitrary and capricious because the CLICK! Network once  
2 it is turned over to the third party will continue to offer  
3 the same exact telecommunication services as it does now  
4 thus demonstrating that it is not surplus.

5 The Court finds that the plaintiffs have not  
6 presented any evidence that the City did not consider these  
7 and similar arguments in passing its resolutions. There has  
8 been no evidence presented that the City's decisions were  
9 willful or unreasoning or that the City made its decision  
10 without consideration of and in disregard of facts and  
11 circumstances.

12 The plaintiffs have failed to raise genuine issues  
13 of material facts on this issue of whether the City's  
14 decisions were arbitrary or capricious. The Court has no  
15 basis to invalidate the City's decisions, and as such, the  
16 City's resolutions must stand.

17 Because the City is determined that CLICK!'s  
18 assets and the excess capacity are surplus and not  
19 essential, the public vote requirements in RCW 35.94.040 and  
20 Tacoma City Charter Section 4.6 are not triggered.

21 On the subject of Mr. Shook's Consumer Protection  
22 Act, the City correctly points out that the act does not  
23 apply to municipal corporations. The Court would direct the  
24 parties to the case of *Washington Natural Gas Company versus*  
25 *Public Utility District No. 1 of Snohomish County*. That is

1 found at 77 Wn.2d pages 98 through 99.

2 The Court must dismiss the CPA claim and based on  
3 the foregoing, the Court will grant the City's motion and  
4 deny the plaintiffs' motions.

5 If the parties could please work on some proposed  
6 orders.

7 MR. CHRISTIE: Your Honor, we submitted, with our  
8 motion, proposed orders very simple and straightforward. I  
9 think it lists everything. I'll show it to counsel. The  
10 recitation at the end is that the defendant City of Tacoma's  
11 motion for summary judgment is granted and plaintiffs'  
12 claims against defendant are dismissed with prejudice in  
13 their entirety is the simple conclusion. But I'll show it  
14 to counsel.

15 MR. VAN ALSTYNE: Your Honor, with respect, we  
16 would like a more detailed order that includes all of the  
17 findings that you made from the bench.

18 MR. CHRISTIE: Your Honor, I'm going to say this  
19 with respect to that: Certainly what you have said is very  
20 instructive and helpful, all of which has been taken down  
21 and I'm sure would be part of any appellate record. The  
22 appeals court, because they review this de novo, are not  
23 fond of having lengthy findings and conclusions necessarily  
24 set forward in the simple order reflecting the outcome.

25 So respectfully, I think that what you've said is

1 well documented, would be part of any record, and would be  
2 considered for whatever weight the court might give it, but  
3 I don't think it's appropriate to put in an order.

4 MR. VAN ALSTYNE: Your Honor, your exact  
5 rationales for granting or denying these motions and the  
6 pieces thereof are highly relevant to an appellate review  
7 hearing and I think that Your Honor went to such a great  
8 extent to carefully lay out her reasoning here, that should  
9 be reflected in the order. We can simply get the transcript  
10 and then a week or two from now submit the order of  
11 presentation hearing that exactly tracks what Your Honor  
12 said here.

13 MR. SHOOK: Your Honor, I agree with Bowman  
14 attorney also, Your Honor. Specifically I think it's very  
15 important that we document the things that you said  
16 especially about City Charter 4.1 because there is the  
17 language not limited to there that appears. And so those  
18 findings are going to need to find their way to the  
19 appellate court and they're going to have to decide if  
20 telecommunications is a utility still in our state. So I  
21 think that if we could get a copy of what you were reading  
22 from perhaps we could prepare that order for you and present  
23 it.

24 MR. CHRISTIE: May I address that, Your Honor.

25 THE COURT: Certainly.

1 MR. CHRISTIE: Clearly a reporter is taking down  
2 everything you said. I'm sure it will be ordered. There  
3 could be a reference line in the order simply saying  
4 "transcript attached." But I submit respectfully it is not  
5 appropriate or necessary in the order to recite all of what  
6 you've said in the form of an order.

7 THE COURT: I've actually looked at case law on  
8 this, and I would prefer to do it the way that has been  
9 proposed by the City. I think the appropriate way to handle  
10 this, if you're gearing up for an appeal, would be to enter  
11 an order in as simple form as possible and then just have a  
12 transcript provided to the Court of Appeals. And we know  
13 all about transcripts here.

14 MR. CHRISTIE: That is what this order reflects.  
15 So I'll share it with counsel and Mr. Shook.

16 MR. VAN ALSTYNE: Thank you, Your Honor.

17 THE COURT: Thank you all. I did appreciate  
18 everyone's advocacy. I know you went to great lengths to  
19 put on your presentation today. I appreciate that. I also  
20 have a lot of paper here. Do you folks recycle?

21 MR. CHRISTIE: Yeah, you can leave it.

22 THE COURT: Mr. Shook, can I ask you a quick  
23 question? The new declarations or certifications that you  
24 provided today, have they been filed with the court?

25 MR. SHOOK: No. I could file them as a

1 supplement.

2 THE COURT: We can do that right now. We want  
3 those to be in the record.

4 Folks, before you go, can I ask the attorneys a  
5 question. Mr. Shook needs to file these certifications that  
6 he presented to the Court at the very beginning of the  
7 hearing. He doesn't have cover sheets on them. They're not  
8 appropriate for the clerk to accept. Does anyone have an  
9 objection to him taking them somewhere so he can put a cover  
10 sheet on and then filing either today or maybe Monday at the  
11 latest?

12 MR. CHRISTIE: No objection.

13 JUDICIAL ASSISTANT: If you can provide a cover  
14 sheet to me today, this stamp will satisfy that and we don't  
15 need to --

16 THE COURT: I think it --

17 JUDICIAL ASSISTANT: Because you e-file it and  
18 it's after 4:30, it's going to say that you filed it Monday.

19 THE COURT: I think I said at the beginning of the  
20 hearing that I would want to consider that, so it's in the  
21 record. But I just wanted to make sure you knew what was  
22 going to happen with the documents.

23 MR. VAN ALSTYNE: In terms of this order, Your  
24 Honor, I'm trying to fill in all the documents that you  
25 relied on in support of the order. Is there anything you

1 did not rely on?

2 THE COURT: No. I did not grant -- I know there  
3 was a motion to strike and I did not grant that.

4 MR. VAN ALSTYNE: Okay.

5 MR. CHRISTIE: Your Honor, if we can get agreement  
6 on the concluding language, and perhaps I can hand that up,  
7 then I think I can work with counsel and Mr. Shook to make  
8 sure that the order that we will submit to you lists  
9 everything so that the Court of Appeals doesn't have a doubt  
10 about that. I think there is agreement on that. And I'll  
11 hand it up to the Court. I read it earlier, but...

12 MR. VAN ALSTYNE: Mr. Shook hasn't looked at it  
13 yet on the language, but otherwise I am fine with it.

14 MR. SHOOK: You can't add stuff later after the  
15 judge signs it. You know, we got to get this right, Bob.

16 MR. CHRISTIE: To make it clear, Your Honor, I'm  
17 suggesting that you approve the concluding language and the  
18 only thing that would change in the form of the order is the  
19 listing of all the materials. But we could sit here and do  
20 that as well.

21 THE COURT: It's up to you. I'm still here.

22 MR. SHOOK: So can we present it next Friday, Your  
23 Honor?

24 MR. CHRISTIE: No. I'm going to be out of the  
25 country.

1 MR. VAN ALSTYNE: Can we present it ex parte?

2 MR. CHRISTIE: I would like to get this wrapped up  
3 today in terms of at least signing off on the language that  
4 is going to be entered, the only difference being the  
5 listing of materials.

6 MR. VAN ALSTYNE: I am fine with signing off on  
7 the concluding language and listing the materials later.

8 THE COURT: Well, I think what he's saying is  
9 you're not signing today, just letting it be on the record  
10 what the end of the order says. And then you all will go  
11 work through what declarations and so forth were considered;  
12 and then if you're all in agreement, you can present ex  
13 parte a signed copy of everything.

14 MR. CHRISTIE: That's what I'd like to do. I just  
15 don't want any disagreement over the concluding language.  
16 So if Mr. Shook will look at that and we'll have you review  
17 it, then we can just read it in the record and be done with  
18 it in peace.

19 THE COURT: I'm good with the ending, if you all  
20 can fill in the middle.

21 MR. CHRISTIE: So the ending will say after  
22 listing the materials, "Having heard the argument of parties  
23 and being otherwise fully advised in this matter, it is  
24 further ordered, adjudged, and decreed that the defendant  
25 City of Tacoma's motion for summary judgement is granted and

1 plaintiffs' claims against defendant are dismissed with  
2 prejudice in their entirety." I think we have agreement on  
3 that.

4 Anticipating a motion for reconsideration. I am  
5 leaving tomorrow morning for Mumbai. I will be back on  
6 April 22nd and I would respectfully respect given time that  
7 nothing be noted or re-noted before I return.

8 MR. VAN ALSTYNE: Sorry. What was the return  
9 date?

10 MR. CHRISTIE: I get back on April 22nd.

11 THE COURT: Given that he's postponed his vacation  
12 already once, I think that's probably a reasonable request.

13 MR. VAN ALSTYNE: My main concern there is that  
14 the proposed vesting date is before his return.

15 THE COURT: Well, but my recollection of the rules  
16 as long as you get the motion filed, you can note it for way  
17 out. It just has to be filed is my recollection.

18 MR. VAN ALSTYNE: Right. More of a practical  
19 consideration that the subject matter of this lawsuit will  
20 already -- like the final vesting date will already have  
21 happen at the time that it's noted for is what I'm saying in  
22 that situation which would essentially to some degree -- I  
23 don't think it would actually moot out -- it would some  
24 degree moot out the relief we'd be requesting if we were to  
25 file such a motion.

1 MR. CHRISTIE: That's exactly why we're here is to  
2 get it done before I left.

3 THE COURT: Yeah. And I don't want to give you  
4 any legal advice. Obviously rules of the appellate  
5 procedure come into play. And there's the issue of a bond  
6 and I don't know what you would do about that.

7 MR. SHOOK: Your Honor, would you certify this  
8 decision then as a final decision, I suppose for the --

9 THE COURT: Well, you have other appeal as a  
10 matter of right.

11 MR. SHOOK: It's a prejudice so it's a final  
12 decision.

13 MR. CHRISTIE: Yes.

14 MR. SHOOK: So, you know, I did good on my last  
15 motion for reconsideration. I'll have to think about where  
16 I'm going, if we're going to the appellate court.

17 When are you back, Mr. Christie?

18 MR. CHRISTIE: April 22nd.

19 MR. SHOOK: Wow. Okay.

20 MR. VAN ALSTYNE: My concern without looking at  
21 the rules of appellate procedure, I don't know the answer to  
22 this question, but my concern is that...

23 MR. SHOOK: It's just different than what he said  
24 last time, Your Honor. He was only going to be gone until  
25 later in the month.

1 THE COURT: He was going to be gone today.

2 MR. SHOOK: Yeah and then gone on the --

3 MR. CHRISTIE: And my wife landed a few hours  
4 before we started.

5 MR. SHOOK: Yeah. So I thought it was  
6 February 28th. You were going to be back late February. So  
7 now it just seems like they have a lot of attorneys on a  
8 motion for reconsideration, Your Honor. It looked like your  
9 decision had been written before we talked about a lot of  
10 this today. Maybe some of that made a difference. I  
11 clearly have a few things I'd like to help, you know, the  
12 Court understand. The motion for reconsideration may be our  
13 only chance. Is if Mr. Bacha's been able to argue. Zack's  
14 been very capable. They have a team of attorneys. Isn't  
15 there any way that we could possibly have that  
16 reconsideration heard?

17 MR. VAN ALSTYNE: My concern is the interplay of a  
18 motion for reconsideration deadline and how that affects our  
19 requirements in terms of filing a notice of appeal.

20 THE COURT: I get it. I can't give you any legal  
21 advice on that. I mean, I don't know even know when  
22 anything would be noted.

23 MR. SHOOK: Right. Right. So you're not making a  
24 ruling that we have to wait for them. Okay.

25 THE COURT: I don't know what's happening. But

1        what he's saying is, I think he's asking for some  
2        professional courtesy.

3                MR. SHOOK:  And, Your Honor, in this case, given  
4        the magnitude of this decision, you know, based on the fact  
5        that that decision was written before you heard a lot of  
6        what was said --

7                THE COURT:  That's not what happened.

8                MR. SHOOK:  That's not what happened.

9                THE COURT:  No.

10               MR. SHOOK:  Okay.  Alright.  Well, I just would  
11        like to, you know, have the opportunity to have this heard  
12        because it seems fairly essential that we do it before it's  
13        disposed of, Your Honor.

14               THE COURT:  I'll let you go talk amongst  
15        yourselves and look at the rules.

16               MR. CHRISTIE:  Your Honor, I may have misspoken.  
17        I'm going to be back February -- if I said April, I'm very  
18        sorry.  I'm very sorry.  It's been a long day.  I'll be back  
19        February 22nd.

20               MR. VAN ALSTYNE:  In that case, no objection.

21               MR. CHRISTIE:  I'm very sorry.  February 26th.

22               THE COURT:  Thank you.  That's a good  
23        clarification.

24               MR. CHRISTIE:  I apologize.

25               THE COURT:  So if you can come to an agreement,

1 all you would need to do is e-mail your final order to  
2 Mr. Shanstrom and he can take that and file it and  
3 distribute copies. You don't have to come back to court  
4 again.

5 Thank you everyone. The Court will be at recess.

DARREL BOWMAN,  
Plaintiff,

NO. 19-2-11506-3

v.  
CITY OF TACOMA,  
Defendant.

ORDER GRANTING DEFENDANT  
CITY OF TACOMA'S MOTION FOR  
SUMMARY JUDGMENT

MITCHELL SHOOK,  
Plaintiff,

v.  
CITY OF TACOMA,  
Defendant.

THIS MATTER having come on regularly before this Court on cross-motions for summary judgment, the parties appearing by and through counsel or self-represented, the Court having reviewed the pleadings and files in this matter, specifically the following:

- 1. Defendant City of Tacoma's Motion for Summary Judgment;

ORDER GRANTING DEFENDANT'S MOTION FOR  
SUMMARY JUDGMENT - 1

Office of the City Attorney  
Department of Public Utilities  
3628 South 35<sup>th</sup> Street  
P. O. Box 11007  
Tacoma, Washington 98411  
Phone 253.502.8348  
Facsimile 253.502.8672

- 1 2. Declaration of Zachary B. Parker in Support of Defendant's Motion for Summary  
2 Judgment, with exhibits attached;
- 3 3. Declaration of Doris Sorum, with exhibits attached;
- 4 4. Declaration of Tenzin Gyalsten in Support of Defendant's Motion for Summary  
5 Judgment, with exhibit attached;
- 6 5. Plaintiff Mitchell Shook's Response to Defendant's Motion for Summary Judgment;
- 7 6. Declaration of Mitchell Shook in Support of Response to Defendant's Motion for  
8 Summary Judgment, with exhibits attached;
- 9 7. Plaintiff Bowman's Response to Defendant City of Tacoma's Motion for Summary  
10 Judgment;
- 11 8. Declaration of Kent Van Alstyne in Support of Plaintiff Bowman's Response to  
12 Defendant City of Tacoma's Motion for Summary Judgment, with exhibits attached;
- 13 9. Defendant City of Tacoma's Reply to Mr. Bowman's Response to Its Motion for  
14 Summary Judgment;
- 15 10. Defendant City of Tacoma's Reply to Mr. Shook's Response to the City's Motion for  
16 Summary Judgment;
- 17 11. Plaintiff Darrel Bowman's Motion for Partial Summary Judgment;
- 18 12. Plaintiff Mitchell Shook's Motion for Partial Summary Judgment;
- 19 13. Master Declaration of Mitchell Shook Prepared in Response to Court Order of January  
20 7, 2020 to Organize Declarations.
- 21 14. Defendant City of Tacoma's Response to Plaintiffs Bowman's and Shook's Motions  
22 for Partial Summary Judgment;
- 23 15. Declaration of Christopher D. Bacha in Support of Defendant's Response to Plaintiffs'  
24 Partial Summary Judgment Motions, with exhibits attached;
16. Plaintiff Bowman's Reply to Defendant's Response to Bowman's Motion for Partial  
Summary Judgment;
17. Declaration of Kent Van Alstyne in Support of Plaintiff Bowman's Reply to  
Defendant's Response to Bowman's Motion for Partial Summary Judgment, with  
exhibits attached;
18. Plaintiff Shook's Reply in Support of Motion for Partial Summary Judgement (sic)  
Granting Declaratory Relief;

- 1 19. Corrected Declaration of Mitchell Shook in Support of Reply to Defendant's Motion  
2 for Summary Judgment, with exhibits attached;  
3 20. Defendant City of Tacoma's Motion to Strike Declarations of Mitchell Shook (dated  
4 December 31, 2019);  
5 21. Plaintiff Mitchell Shook's Response to the Motion to Strike and Motion for Sanctions  
6 Pursuant to CR 11 (dated January 7, 2020);  
7 22. Plaintiff Bowman's Response to Defendant City of Tacoma's Motion to Strike  
8 Declarations of Mitchell Shook (dated January 7, 2020); and  
9 23. All other pleadings and papers filed in this action, with the exception of: (1) Mr.  
10 Shook's October 30, 2019 Declaration (subsequently refiled on December 11, 2019  
11 with his Motion for Partial Summary Judgment); (2) Mr. Shook's November 1, 2019  
12 Declaration (subsequently refiled on December 11, 2019 with his Motion for Partial  
13 Summary Judgment); (3) Declaration of Mitchell Shook, filed on December 12, 2019  
14 Declaration; (4) Declaration of Mitchell Shook Part II With Exhibit 67, filed on  
15 December 12, 2019;

16 having heard the argument of parties; and being otherwise fully advised in this matter;

17 IT IS HEREBY ORDERED, ADJUDGED AND DECREED that Defendant City of  
18 Tacoma's Motion for Summary Judgment is GRANTED, and Plaintiff Bowman's and Plaintiff  
19 Shook's respective motions for partial summary judgment are DENIED.

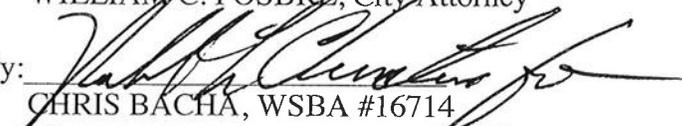

20 IT IS FURTHER ORDERED, ADJUDGED AND DECREED Plaintiffs' claims against  
21 defendant are dismissed with prejudice in their entirety.

22 SIGNED IN OPEN COURT/CHAMBERS this 28<sup>th</sup> day of February, 2020.

23   
24 HONORABLE SHELLY SPEIR

Summary Judgment Motion

3

1           BE IT REMEMBERED that on July 24th, 2020, the  
2 above-captioned cause came on for hearing before the  
3 Honorable Bryan Chushcoff, Judge of the Superior Court  
4 in and for the County of Pierce, State of Washington;  
5 the following proceedings were had, to wit:

6                           \* \* \* \* \*

7           THE COURT: Shook v. City of Tacoma, Cause  
8 No. 19-2-07135-0. It's No. 9 on our docket. Is  
9 anybody here on the line for the plaintiff?

10           MR. McCARTHY: This is Tom McCarthy, co-plaintiff  
11 pro se litigant, with my co-plaintiff,  
12 Christopher Anderson.

13           THE COURT: Okay. Great.

14           Is anyone here on behalf of the City? Is  
15 Mr. Christie on the line? Or Mr. Parker? Mr. Bacha?

16                           (No response.)

17           Well, I don't know what the deal is here. We seem  
18 to have lost a significant number of our folks here.

19           Hold on. We are going to try to get connected up.  
20 Those folks indicated that they were trying to be on  
21 our line.

22                           (Off the Record - Discussion.)

23           THE COURT: Is Mr. Parker on the line now?

24           MR. PARKER: Yes. This is Zachary Parker on  
25 behalf of the City.

1 THE COURT: We have Mr. McCarthy and Mr. Anderson  
2 on the line as well still. Gentlemen, is that right?

3 MR. McCARTHY: That is correct, Your Honor.

4 THE COURT: Great. Is there anybody else on this  
5 matter on the line?

6 (No response.)

7 THE COURT: Mr. Parker, I believe this is your --

8 THE MODERATOR: Your Honor, just both counsel.

9 THE COURT: I'm sorry. Say that again?

10 THE MODERATOR: It's just both counsel.

11 THE COURT: So, Mr. Parker, this is your motion.  
12 Proceed.

13 MR. PARKER: I don't want to correct the  
14 moderator, but I do believe that Mr. Anderson is also  
15 on the phone, if I'm not mistaken.

16 THE COURT: Yeah.

17 MR. ANDERSON: That's correct.

18 MR. PARKER: Okay. I just wanted the record to be  
19 clear.

20 Your Honor, as you've seen by our moving brief and  
21 by our reply brief as well, I think that we believe  
22 this is a very narrow issue. Do you have any specific  
23 questions for me before I begin my argument?

24 THE COURT: Well, I think I get this a little bit.  
25 Let me ask you a question here: Back when I still had

1 this case before it went to federal court and then back  
2 again, there was an aspect of this case that I had  
3 reserved sort of making a ruling about. This had to do  
4 with the Gateway Meter Project. Are you familiar with  
5 what I'm talking about?

6 MR. PARKER: Yes.

7 THE COURT: When I made my order in July of 2019,  
8 I said, well, we don't know whether or not the Gateway  
9 Meter Project infrastructure, if you will, associated  
10 with that -- so much of it has dealt with Click! -- was  
11 going to be part of the sales transaction or whether it  
12 was going to be retained. It just wasn't known at that  
13 point in time. The City was claiming that it was  
14 intending to retain, at least for some period of time,  
15 all of the Click! infrastructure associated with that.  
16 I don't know whether or not that wound up being the  
17 final result or not.

18 MR. PARKER: And I apologize, Your Honor, for my  
19 connection. I did not hear a lot of what you just  
20 said.

21 THE COURT: Well, I'll repeat it.

22 MR. PARKER: I do apologize. I promise it's just  
23 our connection.

24 THE COURT: Sure. It's not your fault. I mean,  
25 that's the technology we have now. I suppose if I had

1 stopped the sale, we would have a better connection  
2 now.

3 MR. PARKER: I fully disagree, Your Honor. I  
4 would move to strike that.

5 THE COURT: Well, Mr. McCarthy and Mr. Anderson  
6 might agree with me about that point at least.

7 What I was saying was --

8 MR. McCARTHY: Certainly do, Your Honor.

9 THE COURT: Well, what I was saying was, is that  
10 in July of 2019 when I declined the opportunity to  
11 enjoin the sale, I did allow one aspect of this, which  
12 was the Gateway Meter Project was something that used  
13 some of the Click! infrastructure to provide water  
14 meter reading or electrical meter reading or both for  
15 the City via the Click! Network. It wasn't clear to me  
16 to what extent that was being sold. Or if it was going  
17 to be sold, it was going to be retained, and so on. I  
18 don't know what happened with that.

19 Can you advise about that, Mr. Parker?

20 MR. PARKER: I don't mean to sound like a broken  
21 record, Your Honor. I'm hearing about every third word  
22 you say, and I apologize about that. I don't fully  
23 know what you asked me.

24 THE COURT: It sounds like my dog.

25 MR. PARKER: Is there someone else who could go

1 before us? And maybe I can call on a different line.  
2 Is there another matter?

3 THE COURT: I will move on to another case for the  
4 moment.

5 MR. PARKER: Moderator, if you can hear me, I'm  
6 going to call on a different line and just advise the  
7 judge whenever he is done with the next matter that, in  
8 fact, I've joined.

9 THE MODERATOR: Of course.

10 MR. PARKER: Okay. I'll call right back.  
11 Thank you, Your Honor.

12 (Off the Record - Recess.)

13 THE COURT: This is 19-2-07135-0.

14 Mr. Parker, you're on the line?

15 MR. PARKER: Yes. This is Zach Parker for the  
16 City of Tacoma.

17 THE COURT: Can you hear me better now?

18 MR. PARKER: Currently, I can. I apologize if  
19 something goes awry.

20 THE COURT: It's not your fault.

21 Is Mr. McCarthy and Mr. Anderson on the line?

22 MR. MCCARTHY: Yes, Your Honor, we are. And if we  
23 can just say, there are numerous members of the public  
24 who would like to follow along with this hearing, but  
25 the live stream seems to be offline.

1           THE COURT: That's because this is a CourtCall  
2 proceeding and not a Zoom proceeding. You can  
3 certainly turn the volume of the thing up as loud as  
4 you would like.

5           It sounds like everybody is here.

6           Mr. Parker, you asked me -- you said, this is  
7 fairly straightforward and did I have any questions,  
8 and I did.

9           My question was -- that you couldn't hear  
10 before -- that in July of 2019, when I denied the  
11 injunction that was previously sought by the citizens  
12 here, I said but it wasn't clear to me what the status  
13 was with respect to the negotiations to sell the Click!  
14 Network as it related to the Gateway Meter Project,  
15 which was a part of the Tacoma Public Utilities. They  
16 used part of the Click! fiberoptic system to make that  
17 work. They claimed that they were -- the City claimed  
18 at the time that they were phasing that out over the  
19 next few years. It wasn't clear to me whether they  
20 were going to retain ownership of that, whether they  
21 were going to lease it back, or what the deal was on  
22 that. I don't know how that ever was resolved.

23           So my question is, did the Gateway Meter Project  
24 continue to be part of this transaction? I mean, in  
25 other words, was the fiberoptic space that was

1 dedicated for that use sold along with everything else?

2 UNIDENTIFIED SPEAKER: (Inaudible.)

3 MR. PARKER: Sorry. Was someone asking a  
4 question?

5 THE COURT: I asked my question of you,  
6 Mr. Parker.

7 MR. PARKER: Sorry, Your Honor. I heard your  
8 question. I didn't mean to interrupt you. I thought  
9 that I heard somebody else asking a question.

10 THE COURT: I thought that I heard something too,  
11 but go ahead and answer now. Ignore that.

12 MR. PARKER: So, Your Honor, I will defer to our  
13 briefing in the Shook motion. I believe, in fact -- I  
14 don't want to represent anything that is not correct.  
15 I believe that was sold as a portion of it. I'm not  
16 confident, so I can go back to our briefing and I can  
17 give you supplemental briefing.

18 But as stated in our moving brief, again, we  
19 really believe that the entire Complaint that both  
20 Mr. McCarthy and Mr. Anderson have brought are, in  
21 fact -- they should be dismissed due to res judicata.  
22 They are identical to the previous claim that  
23 Judge Spier dismissed. It is really -- that's entirely  
24 our argument in this case.

25 THE COURT: Sure. It is my understanding that

1 there's a couple of things here. One is, if she  
2 granted summary judgment, her reasoning is not  
3 explained. As I understood it as best that I could,  
4 she simply decided, look, the City has the right under  
5 the statute to designate whatever they designate as  
6 surplus property, and, you know, they've exercised  
7 discretion reasonably as far as I know. Therefore,  
8 Plaintiffs lose.

9 The reason why I ruled the way that I ruled was  
10 that I held that the Click! Network in general as a  
11 telecommunications network is not a utility. And  
12 because even though it's owned by a utility in the  
13 sense that it was operated by Tacoma Power, that  
14 doesn't make it a utility, and utilities can operate  
15 all kinds of other businesses that are not utility  
16 businesses.

17 The Issaquah case from the 1980s or so made it  
18 pretty clear to me that this was -- that at least the  
19 telecommunications aspect of Click! was not a utility.  
20 However, the utility did use some part of the  
21 fiberoptic network for the Gateway Meter Project. It  
22 seemed to me that if that was sold or attempted to be  
23 sold as opposed to being retained, that -- or at some  
24 kind of sale or lease back, or whatever it might be,  
25 that that would implicate the idea of whether or not

1 this constituted sufficient sale of the utility that  
2 gave rise to a requirement to have a vote.

3 I don't know that you can decide that on summary  
4 judgment without some kind of hearing or testimony  
5 about the dimension of what that represented. I  
6 realized at the time there was some issue that -- if  
7 memory serves, it was something like 18,000 homes that  
8 were serviced by the Gateway Meter Project. A year or  
9 so ago, it being phased out. I don't know how  
10 significant or insignificant it is now. That, as I  
11 understood it, does not constitute all of the meters  
12 that the project has, at least it's certainly not all  
13 of the meters within the City of Tacoma, for that  
14 matter, much less its service area; but, nevertheless,  
15 it constituted a not insignificant number of meters.

16 To me, it is a different -- potentially, it's a  
17 different issue or at least maybe one that I disagree  
18 with.

19 MR. PARKER: Certainly, when you say that you  
20 disagree, are you saying that you disagree with the  
21 order itself or are you agreeing with me?

22 THE COURT: Well, I'm disagreeing that you can --  
23 I don't know what was put in front of Judge Spier to  
24 know whether or not she knew all of that stuff about  
25 the Gateway Meter Project and whether or not she

1 reviewed all of that and found against the plaintiffs  
2 on that or not. I mean, I just don't have any of that  
3 information. I just have a flat ruling that they lose.  
4 I just don't think given that our rationalès were  
5 different, and my rationalè was that this may well be a  
6 significant division of or alienation of utility  
7 property -- and in order to determine that, one would  
8 have to have some testimony about it potentially -- I  
9 mean, maybe it can be done on summary judgment if we  
10 had the affidavits. I don't know what was in front of  
11 Judge Spier about that.

12 I guess my concern is, if the Gateway Meter  
13 Project -- if the telecommunications aspect of the  
14 Gateway Meter Project was retained by the City, then at  
15 least -- it seems to me that the rest of the sale is  
16 fine, and then there's no problem. If it was sold by  
17 the City, then I have to have some kind of information  
18 that explains to me at least that this was considered  
19 by Judge Spier, and I don't have that information. I  
20 don't know that the issues are the same is what I'm  
21 trying to tell you. If the issues aren't the same,  
22 then there's no res judicata.

23 MR. MCCARTHY: Your Honor, this is Tom McCarthy.  
24 Can I make a comment?

25 THE COURT: Let me let Mr. Parker, and then I will

1 certainly go to you, Mr. McCarthy.

2 MR. McCARTHY: Very good.

3 THE COURT: Mr. Parker.

4 MR. PARKER: Thank you, Your Honor.

5 So I guess my response would be -- I have two  
6 responses to what you just said. The first would be  
7 that Judge Spier did, in fact, review thousands of  
8 documents by Mr. Shook as well as Mr. Bowman regarding  
9 the Gateway Meter Project and other, currently -- and I  
10 apologize. I don't have my client on the phone. My  
11 client would be able to answer that question slightly  
12 better to what exactly happened to that project. I  
13 believe it was phased out. It sounds like Mr. McCarthy  
14 or Mr. Anderson wants to answer that.

15 That also being said, Judge Spier either in our --  
16 in a declaration attached to -- and, rather, in  
17 Mr. Christie's declaration or in the record, the  
18 transcript of Judge Spiers' order, which I would  
19 respectfully say is not, you know -- it wasn't curt.  
20 She very specifically -- she looked at every single  
21 document, and she describes exactly why, in fact, she  
22 dismissed the Complaint with prejudice. I just want --  
23 I want to point that out for the record.

24 Again, I can provide additional briefing as well  
25 as potentially a declaration from my client describing

1 exactly what happened to the Gateway Meter Project, if  
2 that would help the Court.

3 THE COURT: It might.

4 Mr. McCarthy, you wanted to say something.

5 MR. McCARTHY: Yes, Your Honor. First of all,  
6 it's not at all clear to my co-plaintiff and I that  
7 those meters are no longer in use. That is to say that  
8 the nexus that you've discussed in that earlier court  
9 ruling is not still established.

10 Furthermore, you know, the industrial customers  
11 use Stark meters. Those meters continue to be in use.  
12 I would also add that, you know, since our earlier  
13 Court issues, which was about a temporary injunction,  
14 we have refined our understanding of this issue  
15 somewhat and see it a little bit differently.

16 We would challenge that the Issaquah case applied  
17 in this at all because Issaquah was about cable TV,  
18 which is a one-way system. Telecommunication systems  
19 are two ways. In 1972, the telecommunications were  
20 completely different. There wasn't such thing as  
21 internet at that time.

22 THE COURT: Can I weigh in on that just a bit?

23 MR. McCARTHY: My co-plaintiff, Chris Anderson,  
24 would like to add something, if he might.

25 THE COURT: Well, before he does -- I would

1 certainly be glad to hear from Mr. Anderson. Before he  
2 does, I want to mention one thing about the one-way  
3 versus two-way business.

4 When there was a motion to reconsider my July  
5 order, the issue of two-way communications versus  
6 one-way communication was raised for the first time. I  
7 discussed that in my ruling in a couple of ways. It  
8 seemed to me what I said -- if memory serves, it was  
9 something like, first of all, I have no reason to  
10 believe that a cable television system is a purely  
11 one-way communication. It is different from telephone.  
12 It is different from the internet, but I can order a  
13 movie on my cable television system. In order to do  
14 that, the communication has to go the other direction.  
15 It isn't clear to me that the cable television is  
16 purely a one-way communication item.

17 No. 2, the Issaquah case -- the Supreme Court did  
18 not analyze that problem in an idea of a one-way versus  
19 two-way communication sort of way.

20 Of course, the third problem was, at least for  
21 purposes of the motion to reconsider was, that that had  
22 never been raised in any of the prior pleadings or  
23 argument or anything else until the motion to  
24 reconsider. It was entirely new and not supported by  
25 any particular evidence. As I say, given that I think

1 that I can order a television movie through my cable  
2 television system, it seems to me, that, of itself,  
3 suggests that it's more than a one-way communication  
4 system.

5 Now, having said that, I will be glad to hear from  
6 Mr. Anderson.

7 MR. ANDERSON: Hi, Judge. Thank you very much.

8 My name is Chris Anderson. I have been in IT for  
9 about 25 years. I'm considered a subject matter expert  
10 in IT and telecommunications for my separate career.  
11 One of the things is, there's been evolution of use  
12 even for cable TV. The predominant use is actually  
13 internet. Internet itself is the basis for how all  
14 telecommunication companies do their back call and also  
15 provide last-mile service. Whether it be Comcast,  
16 whether it be Click!, whether it be CenturyLink, it has  
17 to go through copper somewhere. In this particular  
18 medium, there is an RF network, which is a radio  
19 frequency network which, when it's delivering the  
20 signal, it's just the medium for which to provide  
21 telecommunications.

22 I think that the issue is getting confused by  
23 other parties here to kind of stretch it to be too  
24 literal and not looking at the change of use of the  
25 medium to something that's evolved where it is merely

1 riding upon that medium versus the actual connectivity.

2 When you look at the definition of  
3 telecommunications, it specifically speaks about  
4 electromagnetic frequency and signaling as  
5 telecommunications -- as part of that  
6 telecommunications concept. Again, it talks about  
7 basically the medium of where we are taking it to the  
8 end user.

9 As we look at what is going on with the pandemic  
10 right now, it is clear now that -- how the internet  
11 connects and how it is being used and how Click! is  
12 being used. As for me, my myself, as a customer, it's  
13 absolutely telecommunication because I would not be  
14 able to do my job, my wife would not be able to teach  
15 at Bates, TCC. It's all telecommunications. It's done  
16 to transmit image, voice, and communication in a  
17 two-way method. It is merely a medium, and I feel like  
18 in previous -- they don't represent us -- cases failed  
19 to address this fact. So that's the basis of my  
20 argument with the Issaquah statement. I can go on to  
21 further detail, if you wish.

22 THE COURT: No. I really don't at this point.  
23 Part of this is philosophical. Part of this has to do  
24 with why these laws got created in the first place.

25 If we are reading the teleprompter case too

1           literally and the statute too literally, it's because  
2           that's what we are supposed to do.  If the statute has  
3           gotten out of date, if you will, your remedy is to go  
4           back to the legislature.

5           Keep in mind, the reason these laws got passed in  
6           the first place so many decades ago was because of the  
7           prospect that somebody could bribe, if you will, the  
8           City, get the utilities sold to somebody, then they  
9           would have a monopoly on water service to everybody in  
10          the city, and they could raise the price to whatever  
11          they would want.  Obviously, that was not in the  
12          citizens' best interest.  The result was that they had  
13          laws like this restricting the alienation of utility  
14          problems.  They defined utilities.  Initially, they  
15          defined them far more broadly than they do now.  One of  
16          the points that was made on the motion to reconsider  
17          back in July of last year or so -- or August of last  
18          year -- was that citing the prior language which would  
19          refer to telephone and telegraph and that sort of  
20          stuff, that -- the statute got amended many years later  
21          in the 1950s or so.  All that language got dropped.  
22          There was a reason it got dropped.

23                 MR. PARKER:  Well, Your Honor --

24                 THE COURT:  I won't argue that point.  In the  
25                 meantime, one of -- what my ruling is going to be is

1           this: I'm going to deny the motion without prejudice.  
2           I have to have some more information with respect to  
3           the Gateway Meter Project. At the time, I was told it  
4           was going to be phased out in three or four years.  
5           That was a year ago. If it has been phased out  
6           entirely, I suppose this is a moot point. If it is  
7           still in existence, I don't know to what extent it has  
8           been phased out or maybe they changed their mind and  
9           didn't phase it out. I don't know. And I don't know  
10          whether or not the Gateway Meter Project is a product  
11          of this or not because Mr. Parker is not sure. I don't  
12          know that the issues are identical between what  
13          Judge Spier and what I did or what I am being asked to  
14          do. At this point in time, I will deny the motion.

15                 MR. PARKER: Your Honor, we would suggest that the  
16          Gateway issue was never addressed, to our knowledge --  
17          to the best of our knowledge, the Gateway issue was  
18          never addressed by the Superior Court.

19                 THE COURT: And that might be the case. In which  
20          case, we are going to still have some conversations  
21          about this.

22                 In the meantime, we are going to have another  
23          conversation about it because I'm denying the motion  
24          for summary judgment, as I say, without prejudice. You  
25          are going to have to convince me that the Gateway Meter

1 Project at least -- and now Anderson and McCarthy have  
2 raised issues with respect to some other kind of  
3 metering project for industrial users. I don't know  
4 anything about that, so I won't comment on it any  
5 further.

6 My understanding is that some of --

7 MR. PARKER: Your Honor --

8 THE COURT: My understanding is that some --

9 MR. PARKER: I didn't mean to interrupt.

10 THE COURT: My understanding is that some of the  
11 metering now is not being done through the fiber  
12 optics, but through the internet and basically through  
13 wireless communications. I don't know whether that  
14 applies to these industrial users or not.

15 In any event, for the moment, I'm simply denying  
16 this motion without prejudice. I don't think I've got  
17 an order denying it here. I will gin something else.

18 MR. PARKER: Thank you, Your Honor. I understand  
19 that you have made your order and all of that. I just  
20 want -- I want to make two quick points, if that's  
21 okay.

22 THE COURT: Sure.

23 MR. PARKER: Again, the Complaint that both  
24 Mr. McCarthy and Mr. Anderson made is truly identical  
25 to that of Mr. Bowman as well as Mr. Shook. And as

1 such, that Complaint was, in fact, summarily dismissed  
2 by Judge Spier. They don't make an actual claim  
3 against the gateway project. In fact, it is only one  
4 paragraph that they even mention said gateway project.  
5 I will get you a declaration one way or the other as to  
6 what happened. That's kind of my first point.

7 My second point is, I want to clarify one thing  
8 with you, which is, if I get a declaration from my  
9 client saying that, in fact, the gateway project was  
10 phased out or was not phased out, I'm just curious --  
11 you seem to hint how you will -- would you rule one way  
12 or the other if my client said one way or the other  
13 that it was phased out or was not phased out?

14 THE COURT: First of all --

15 MR. McCARTHY: Your Honor, if I could just  
16 interject --

17 THE COURT: Who is speaking?

18 MR. McCARTHY: I don't mean to interrupt.

19 THE COURT: Who is speaking?

20 MR. McCARTHY: This in Tom McCarthy. I apologize.

21 THE COURT: Go ahead, Mr. McCarthy.

22 MR. McCARTHY: I would say where the defendant is  
23 taking that is entirely inappropriate. If we are going  
24 to argue res judicata, then we should argue that. We  
25 certainly feel that it does not apply in case. There

1 has not been a final resolution in the Court of  
2 Appeals. Certainly, the Court is not bound by another  
3 Superior Court ruling, and there is no concurrence of  
4 identity.

5 I would say, it seems like we should -- if  
6 Your Honor is predisposed to deny this motion, let's  
7 deny the motion. And if they come out with further  
8 information, then we can --

9 THE COURT: And I don't know. If the fiber optic  
10 portion of the Gateway Meter Project wasn't even  
11 included in the sale, then I would probably grant  
12 summary judgment, not on the basis of res judicata, but  
13 on the basis of the Issaquah case, which is that the  
14 property that was sold is not a utility. I don't know  
15 any of those things now.

16 I will deny -- as I say, I will simply deny the  
17 motion at this point, and we will see what new  
18 information is and make a ruling based on the new  
19 information whatever it might be.

20 Thank you, everybody.

21 MR. PARKER: Thank you, Your Honor.

22 MR. McCARTHY: Thank you, Your Honor.

23 THE COURT: You're welcome, everybody.

THE HONORABLE BRYAN C. SHCOFF  
DEPT. 4 Dept. 4  
IN OPEN COURT

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE

MITCHELL SHOOK,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant

No. 19-2-07135-0

~~PROPOSED~~

ORDER ~~GRANTING~~ DENYING  
DEFENDANT CITY OF  
TACOMA'S MOTION FOR  
SUMMARY JUDGMENT ON  
GROUNDS OF RES JUDICATA

THOMAS MCCARTHY and CHRISTOPHER  
T. ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant

THIS MATTER having come on regularly before this Court on Defendant City of Tacoma's Motion for Summary Judgment on Grounds of Res Judicata, the parties appearing by and through counsel or self-represented, the Court having reviewed the pleadings and files in this matter, specifically the following:

~~ORDER GRANTING~~ **DENYING**  
DEFENDANT CITY OF  
TACOMA'S MOTION FOR SUMMARY  
JUDGMENT ON GROUNDS OF RES  
JUDICATA (19-2-07135-0)- 1

**CHRISTIE LAW GROUP, PLLC**  
2100 WESTLAKE AVENUE N., SUITE 206

THOMAS MCCARTHY and CHRISTOPHER  
ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

NO. 19-2-07135-0

DECLARATION OF TENZIN  
GYALSTEN

TENZIN GYALSTEN declares and states as follows:

1. I am over the age of eighteen years and am a citizen of the United States. I have personal knowledge of the facts herein and am competent to testify to them.

2. I am the Utility Technology Services Manager for Tacoma Power Utilities (TPU). In July 2019 I held the position of Power Section Manager and General Manager for Click! Network, a position I held for 9 years.

3. Attached as **Exhibit A** is a true and correct copy of a memorandum authored by Joe

DECLARATION OF TENZIN GYALTSSEN - 1

**CHRISTIE LAW GROUP, PLLC**  
2100 WESTLAKE AVENUE N., SUITE 206  
SEATTLE, WA 98109  
206-957-9669

1 Tellez, Chief Technology Officer & Advanced Meter Program Advisor to Chris Robinson, Power  
2 Superintendent/COO for Tacoma Power on July 9, 2019 requesting approval to formally terminate  
3 the Gateway pilot metering program. I received a copy of this memorandum. The “DRAFT”  
4 watermark was on the document when sent out, but it was treated as a final document for purposes of  
5 acting on the request. That request was granted and on August 31, 2019 that program was formally  
6 ended. No TPU customer is using the Gateway meters.

7 4. Attached as **Exhibit B** is a true and correct copy of a memorandum that I authored to  
8 Chris Robinson on July 18, 2019 requesting approval to remove the then approximately 300  
9 commercial/industrial meters read utilizing the Stark software from the Click! HFC network. Again,  
10 a “DRAFT” watermark was placed on the memo, but it was treated as a final document for purposes  
11 of acting on the request. That request was also granted. All commercial/industrial meters were  
12 removed from the Click! Network.

13 5. There is no TPU customer who is relying on any part of the Click! HFC Network for  
14 any of their TPU utility service. These aforementioned metering services were not sold or transferred  
15 when Click! network was leased to Rainer Connect.

16 I declare under penalty of perjury under the laws of the state of Washington that the foregoing  
17 is true and correct.

18 SIGNED in Tacoma, Washington this 3rd day of August, 2020.

TACOMA PUBLIC UTILITIES

DATE: July 9, 2019  
TO: Chris Robinson - Power Superintendent / COO  
FROM: Joe Tellez – Chief Technology Officer & Advanced Meter Program Advisor  
CC: Steven Hatcher – Customer Services Manager  
Joseph Wilson – Transmission & Distribution Section Manager  
Tenzin Gyaltzen – Utility Technology Services Section Manager  
Andre Pedefferri – Advanced Meter Program Manager  
SUBJECT: Termination of the Gateway Metering Pilot in Preparation for Advanced Meter Deployment

In preparation for the deployment of advanced meters per TPU's Advanced Meter Program and to alleviate on-going risks presented by Gateway technology obsolescence, I am requesting approval to formally terminate the Gateway metering pilot effective August 31, 2019. The following is an explanation and justification of the business drivers behind this request and proposed timeline for terminating the Gateway pilot.

**Ending the Gateway metering pilot will allow for implementation of an efficient bulk conversion process and stop the future expenditure of higher than normal operating costs associated with responding to Gateway metering failures. No supplier on the market today is available to cost effectively sustain Gateway meters.**

The current population of Gateway meters was initially manufactured beginning in 2003 and ending in 2007. From the beginning of deployment, the meters suffered from a number of technical problems within the meter resulting in communications failures (inability to communicate with the meter through the Click! HFC network), read failures (the controller in the meter is not able to read the meter), or remote disconnect (switching on/off) failures. Most of the communications failures result from the use of poor quality RF tuners within cable modem package manufactured within the meters. Communications errors were particularly high for early meter populations with failure rates of up to ten percent (10%) following initial installation. This resulted in several follow-on site visits by both metering and communications staff to troubleshoot problems which usually involved replacing the meter outright. Read failures, which began to appear approximately four years into the pilot program and have continued to grow, are usually caused by a failure in the circuitry that provides power to the display within the meter. The result of this failure is that the meter no longer functions to measure electrical consumption. Remote disconnect failures are most often caused by a failure of a capacitor within the switch circuitry which prevents the full operation of the switch. Switch failures can also result from problems within the cryptologic code used to encode switching commands sent to the meter.

Communications and read failures create problems for account billing due to missing consumption data. When consumption data is missing, it must be estimated which could erode confidence customers have about the accuracy of electric billing. To correct data issues, staff from multiple sections within the utility are required to troubleshoot problems resulting in higher operating costs in sustaining the remaining population of Gateway meters.

Communications and switch failures create problems where the electrical service cannot be restored or is left inappropriately energized (to either a delinquent account or to a vacated residence). Both cases result in higher operating costs resulting from unbilled delivery of power or the need to send utility crews to the residence to troubleshoot and/or replace the meter. Recent meter failure rates have averaged around one hundred (100) meters per month. Failures that occur at non pre-payment account customer residences are corrected by removing the Gateway pilot meter and installing a normal manually read meter. Because of the high failure rates and the impacts to metering, communications, and customer services resources required to respond to failures, along with the fact that alternative suppliers of coax wired smart meters are nonexistent; a coordinated effort has been made recently to convert remaining Gateway pilot meters to function as manually read meters within the utility's billing system. Currently the utility is converting approximately one hundred (100) meters per week utilizing a mostly manual process. A method is being developed to automate the conversion process to increase the rate of conversion.

**Ending the Gateway metering pilot removes the risk that a computing systems hardware failure could result in impacts to customers due to the inability to read meters or remotely connect services.**

The computing systems and software required to support reading meters are beyond end of life. The original server equipment installed to support reading the meters was installed in 2003, the majority of the system continues to run on this legacy hardware due to technical limitations in the custom developed meter reading software. Because of the age of the equipment and unavailability of warranted replacement equipment on the market, when hardware failures occur, Tacoma Power has to rely on alternative sourcing strategies to find replacement parts which are generally provided as previously used parts sold without warranty.

**Ending the Gateway metering pilot removes the risk that a cybersecurity incident within the metering systems could impact customers due to the inability to read meters or remotely connect service. This also removes a potential risk to other computing systems at the city of Tacoma.**

The Meter Control System (MCS) software which is used to send commands to the meters to acquire reads and operate the remote disconnect switch in the meter collar was developed internally within Tacoma Power. The highly customized code was written by a former employee utilizing a non-standard programming language and there are no current employees of Tacoma Power with any experience coding applications with this language. The code was written as a 32-bit Microsoft Windows application which utilizes several low level memory mapping techniques which have prevented the application from being successfully operated on modern operating systems and hardware. As a result, Tacoma Power has had to expend significant effort to maintain the operation of legacy software and operating systems with known cybersecurity vulnerabilities. Most of the cybersecurity vulnerabilities identified in these systems have been previously published in the public domain including documented exploitation code and tactics. This potentially presents a large cybersecurity risk not only to Gateway metering pilot systems, but to other systems at the City of Tacoma.

**Ending the Gateway metering pilot removes the risk that the host name resolution service could be utilized to potentially identify the actual physical address of Gateway metering endpoints or other proprietary customer information.**

In 2017, Click! employees made modifications to the configuration of the host name resolution service used to identify the network address of all endpoints on the network including all broadband customers and the Gateway metering devices. The configuration change was made to protect customer privacy when it was discovered that the prior hostname addressing scheme could allow the identification of the actual physical address of an endpoint device. The configuration change could not be applied to the Gateway metering endpoints since this methodology was central to how the Meter Control System software operated.

**Ending the Gateway metering pilot is considered a dependent task in preparation for the deployment of new advanced meters per the TPU Advanced Meter Program.**

Placing the remaining Gateway meter population on manual read routes directs critical staff time in UTS, T&D Meter Relay, and Customer Services from sustaining obsolete Gateway meters to critical deployment planning as part of the Advanced Meter Program. The program recognizes the need to continue to sustain the 180 or so customers on the existing pre-pay payment program and is committed to exploring methods to bridge the gap between the end of the Gateway meter pilot and the deployment of a new advanced meter for this specific customer population and will evaluate options / recommendations.

**Proposed Timeline.**

Over the course of the next three months beginning July 15, 2019, T&D Meter Relay and Customer Services will coordinate efforts to place the remaining Gateway meter population on a manual read route. Absent any unforeseen events, the Gateway pilot will terminate on August 31, 2019.

# EXHIBIT B

3628 South 35<sup>th</sup> Street  
Tacoma, Washington 98409-3192

TACOMA PUBLIC UTILITIES

DATE: July 18, 2019  
TO: Chris Robinson - Power Superintendent / COO  
FROM: Tenzin Gyaltzen – Utility Technology Services Section Manager  
CC: Joe Wilson – Transmission & Distribution Section Manager  
Daniel Drennan – Marketing & Development Manager  
SUBJECT: Removal of Commercial/Industrial Meters from Click! HFC Network

The Utility Technology Services section has the responsibility to identify and manage cybersecurity risks related to the use of utility specific technologies. To alleviate on-going risks presented by Commercial/Industrial (C&I) meters connected to the Click! HFC infrastructure, I am recommending that all C&I meters connected to the Click! HFC network have their installation updated to use a modern secure data channel. The following is an explanation and justification of the business drivers behind this request.

**Removing electric meters read by the Stark software from the Click! HFC network minimizes the risks that a cybersecurity incident could impact large commercial and industrial customers due to the inability to read meters or loss of metering data. This also removes a potential risk to other computing systems at the city of Tacoma.**

**Background:**

There are currently approximately three hundred (300) commercial/industrial meters read by the Stark software. Most of the Stark meters connected to the Click! HFC plant were initially installed between 2000 and 2004. The Stark meters include meters measuring energy/demand for major commercial and industrial customers as well as meters located within Tacoma Power substations used to measure load on individual distribution feeders. The Stark software includes the capability to communicate with meters by utilizing either standard TCP/IP Ethernet protocols or dial-up. Currently there are three transport methods being utilized to communicate with the existing meters: Verizon private cellular network (Ethernet), Click! HFC network (Ethernet), and dial-up.

**Risks:**

Click! HFC connected meters utilize a serial data connection to a serial to Ethernet adapter which is then connected to a DOCSIS 1.1 cable modem. There are known security vulnerabilities associated with both devices (the serial to Ethernet adapter and the cable modem) which if compromised could allow someone to interrupt or alter the collection of data from the meters. The serial to Ethernet adapters contain a vulnerability that allows attackers to retrieve the setup configuration of the devices including the Telnet password in plaintext by simply sending a malformed request on a specific port. A Metasploit module for manipulating this vulnerability has been available since 2012. The DOCSIS 1.1 standard used a weak 56-bit Data Encryption Standard within the Baseline Privacy Interface intended to allow cable service operators to refuse service to uncertified cable modems and unauthorized users. Successful attacks often occur when current Cable Modem Termination Systems are configured for backwards compatibility with early DOCSIS standards. Through cable modem cloning or hacking this could also create a threat to the system that reads the meters and the rest of the city of Tacoma network.

**Impacts**

Electrical rates and metering of services for large commercial and industrial customers is significantly more complicated than a typical residential service. The metering for these customers is designed to not only measure electrical consumption but also instantaneous and reactive demand. A significant portion of the costs billed to these customers results from charges based upon measured demand. Disruptions or loss of metering data can therefore result in significant financial impacts to both the utility and its large commercial and industrial customers which may not be easily recovered.

**Mitigation**

The level of effort required to mitigate these vulnerabilities will be specific to each installation and may require some coordination with the customer. To improve security and promote efficiency in managing both the technologies and related vendor contracts, it is recommended that Tacoma Power standardize the technology utilized to remotely read commercial/industrial meters to either the Verizon secure private cellular network or dial-up for locations where cellular signal is not available. This will also position Tacoma Power for the eventual replacement of these meters as part of the Advanced Metering project by identifying meters that can be replaced and added to the new wireless AM network from meters which will continue to require additional communications infrastructure at the premise.

THOMAS MCCARTHY and CHRISTOPHER  
ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

NO. 19-2-07135-0

SUPPLEMENTAL DECLARATION  
OF TENZIN GYALSTEN

TENZIN GYALSTEN declares and states as follows:

1. I am over the age of eighteen years and am a citizen of the United States. I have personal knowledge of the facts herein and am competent to testify to them.

2. I am the Utility Technology Services Manager for Tacoma Power Utilities (TPU). In July 2019, I held the position of Power Section Manager and General Manager for Click! Network, a position I held for 9 years. I am familiar with and was directly involved in the negotiation of the agreements leading to the transfer of the Tacoma Power Commercial System (also referred to as the

SUPPLEMENTAL DECLARATION OF  
TENZIN GYALSTEN - 1

**CHRISTIE LAW GROUP, PLLC**  
2100 WESTLAKE AVENUE N., SUITE 206  
SEATTLE, WA 98109  
206-957-9669

1 Click! Network) to Rainier Connect North, LLC (Rainier Connect) and termination of the use of the  
2 Tacoma Power Commercial System to transmit data for Tacoma Power and Tacoma Water Gateway  
3 and Stark meters.

4 3. This declaration supplements my declaration dated August 3, 2020.

5 4. On March 31, 2020 the City of Tacoma and Rainier Connect fully executed the  
6 Indefeasible Right of Use (IRU) agreement for an initial 20 year term, granting Rainier Connect an  
7 indefeasible right of use of the Tacoma Power Commercial System together with certain rights to use  
8 the Hub Sites, assigned IP addresses, and the headend site, and conveying certain customer premises  
9 equipment. The term Tacoma Power Commercial System, often referred to as the “Click! HFC  
10 Network” or “Click! Network”, includes among other things, all Tacoma Power Commercial Coaxial  
11 cable and all Tacoma Power Commercial Fiber, as those terms are defined in the IRU agreement.

12 5. Effective at midnight on April 1, 2020, full operational control over the Tacoma  
13 Power Commercial System was transferred to Rainier Connect and Rainier Connect begin providing  
14 programming and internet access services to all (former) Click! Network residential and  
15 commercial/industrial customers as the service provider.

16 6. This is the third year of the initial term of the IRU agreement and Rainier Connect  
17 remains in operational control of the Tacoma Power Commercial System and is making progress in  
18 meeting the requirements of all terms and conditions of the IRU agreement.

19 7. Tacoma Public Utilities, prior to the transfer of operational control of the Tacoma  
20 Power Commercial System to Rainier Connect on April 1, 2020, ended its use of the Tacoma Power  
21 Commercial System for transmission of data collected from Gateway and Stark meters. This  
22 included, shutting down the Gateway meter server and reading Gateway meters manually, using a

SUPPLEMENTAL DECLARATION OF  
TENZIN GYALTSEN - 2

**CHRISTIE LAW GROUP, PLLC**  
2100 WESTLAKE AVENUE N., SUITE 206  
SEATTLE, WA 98109  
206-957-9669

1 wireless network to transmit data from Stark meters, and reading Stark meters manually when a  
2 wireless connection could not be made to a Stark meter. This action was in line with the decision by  
3 Tacoma Public Utilities to implement an Advanced Meter Program and ended any business or  
4 operational need for use of the Tacoma Power Commercial System for the Tacoma Power and  
5 Tacoma Water Divisions of Tacoma Public Utilities. Until all meters are replaced with Sensus  
6 meters, Tacoma Power will continue to read the existing meters manually or use a wireless network  
7 to transmit data.

8 8. Under the Advanced Meter Program, all power and water meters will be replaced with  
9 a meter manufactured by Sensus. Sensus meters are capable of providing advanced remote meter  
10 reading services to customers and do not require use of the Tacoma Power Commercial System to  
11 transmit data. Many of the legacy Gateway and Stark meters have already been replaced with Sensus  
12 brand meters under the Advanced Meter program with the goal of replacing all meters with Sensus  
13 meters.

14 9. As of the April 1, 2020 date of transfer of operational control of the Tacoma Power  
15 Commercial System to Rainier Connect, no Tacoma Public Utilities customer is relying on any part  
16 of the Tacoma Power Commercial System for any Tacoma Public Utilities service and Rainier  
17 Connect is not providing or supporting any Tacoma Public Utilities services, other than as an ordinary  
18 commercial customer of services that it pays Rainier Connect to receive and that it previously paid  
19 Click! to receive.

20 I declare under penalty of perjury under the laws of the state of Washington that the foregoing  
21 is true and correct.

22 SIGNED in Tacoma, Washington this 29th day of July, 2022.

**I. RELIEF REQUESTED**

COME NOW the Plaintiff TOM MCCARTHY (“McCarthy”) to move this Court, Pro Se, for the following relief:

1. That the court make a factual determination confirming of the actual status of Tacoma Public Utilities Click! Network (“Click!”) as a Telecommunication system, rather than as a “cable television” system. A factual determination of Click! Network’s technical designation and status will guide the Court in reaching a just decision. The factual question of whether Click! is a telecommunication system or cable television system is important, for if Click! is a telecommunication system then Click! is clearly a “utility” and the “public vote” protections of Tacoma City Charter and state law apply to the system’s disposal.<sup>1</sup> Plaintiff is willing to waive oral argument in this case, if the Defendant will stipulate to the fact that Click! is a “Telecommunications System.” This would clarify the issue of Click’s status as a telecommunication system vs. a cable television system.

2. To make a finding and legal determination on the issue of law, of whether the telecommunications system serves a public purpose and is a utility.<sup>2</sup>

3. To make a finding and legal determination on the issue of law, whether Tacoma City Council acted beyond its legal authority, and in violation of City Charter Section 4.6 and RCW 35.94.020, in approving the sale and lease of the TPU’s municipal telecommunications system to Rainier Connect absent the approving vote of the electorate.

4. Issue an order annulling Tacoma City Council’s *ultra-vires* divesture of the municipal

---

<sup>1</sup> Telecommunications being named as a municipal utility provided with protection from sale, lease or disposal, by the public vote sine 1917 —under RRS 9512. Also, having first been regulated as a utility in Washington State by the Railroad Commission in 1907.

<sup>2</sup> The System, admittedly, was created to serve a “public purpose” as a municipal utility.

1 telecommunication system (the “System”) and declare the Asset Purchase Agreement (“APA”) and  
2 Indefeasible Right of Use (“IRU”) underlying the wrongful transfer of ownership and operational  
3 control of the System as *void ab initio* and thereby restoring the telecommunication system to the  
4 control of Tacoma Public Utilities, the Tacoma City Council and the citizens of Tacoma.

## 5 **II. STATEMENT OF FACTS**

6 In 1996 the Tacoma City Council (“Council”) passed Ordinance No. 25930, which  
7 established a telecommunication system as part of Tacoma Public Utilities (“TPU”). (Compl., ¶  
8 2.2). In doing so, the City determined it was “prudent and economical” to provide  
9 telecommunications services, including broadband Internet access and Ethernet transport  
10 services, to the municipal utilities residential and business customers. (First Decl. of M. Shook,  
11 filed 5/22/19 Ex. 1 [pg. 14/399], 2 [pg. 22/399]). The municipal telecommunication system was  
12 branded as “Click! Network” and was operated by TPU for 20 years —as one of four municipal  
13 utility services provided (water, rail, power and telecommunications). On April 1, 2020, the  
14 telecom System was sold to a private company, Rainier Connect, and changed hands  
15 (“Privatization”). All operational control of the System was vested in the private company and  
16 the System now continues to provide those same telecommunications services, to the same utility  
17 customers, today —only under exclusive private control, including rates changes.

18 TPU’s telecommunication system is a state-of-the-art, carrier-grade, hybrid fiber coaxial  
19 telecommunications network offering Gigabit speed Internet access, Fiber To The Home (“FTTH”),  
20 and cable modem services to the municipalities of Tacoma, University Place, Fircrest, Lakewood,  
21 and Fife, as well as part of unincorporated Pierce County. (Compl., ¶¶ 2.6, 2.9). The System  
22 consists of over 1,400 miles of fiber and cable plant constructed by TPU; the network covers  
23 approximately 66% of the homes in Tacoma Power’s service area. (First Decl. of M. Shook, filed  
24 5/22/19, File # 3311070, Ex. 10, pg. 109/399). Click! had more than 20,000 wholesale high-speed  
25 Internet service of customers and 100 wholesale broadband transport circuits. (*Id.*). Prior to the  
26 April 1, 2020 privatization of the System, Click’s rates were approved by the Public Utility Board  
 (“PUB”) and the City Council, and published under authority of Title 12 of the Tacoma Municipal

Code (“TMC”), which governs utilities. (See TMC Title 12).

Under the terms of the APA and IRU, Rainier Connect has been granted exclusive control over the telecommunications system for an initial term of 20 years, with two 10-year extensions. (Declaration of James P. Grifo, Part Three Correct, filed on 5/18/22, see Ex. B, 219/428).

Rainier Connect has been granted use of all the System’s assets necessary in providing broadband telecommunication services. These assets, referred to as “Related Assets,” include equipment used to create and operate the System and deliver services to customers, customer accounts, inventory of spare parts and equipment, prepaid items, and material contracts. (Id., ¶ See Original Exhibit A2 (at Pg 293/428). The Released Assets were sold to Rainier Connect through an asset purchase agreement (“APA”). (Id.). For an idea of how much equipment was “surplused” (yet remains in use today) see 5/18/22 Declaration of James P. Grifo, Part Three Ex. B, 297/428 —Hub Site Equipment)

Under the terms of the APA and IRU, Tacoma City Council and TPU Board PUB no longer have any control over establishing the System’s rates. All control has been vested in Rainier Connect, including all the electronic equipment, such as core routers, provisioning systems, DNS servers, DHCP servers, switches, gateways, hubs, nodes, IP addresses and many other plant assets. (Id.). The commercial and residential telecommunications services provided by the system are essential to those customers of the utility who rely on the System for remote learning, telecommuting and telemedicine. (Id., ¶¶ 8–15).

Plaintiff is a resident of the City of Tacoma and residential customer and ratepayer of Tacoma Power. McCarthy was a user of the Click Telecommunication System until Rainier Connect took control and raised his rates by 80% in September of 2020. (Declaration of Thomas McCarthy, filed 7/29/22, Ex. A.)

### **III. STATEMENT OF THE ISSUES**

The following issues are presented for resolution by the Court:

1. Issue of Fact: Whether Click! Network is a telecommunication system, protected under the law from sale or lease by the statutory requirement for a popular vote of the

1 Tacoma City electorate, or is it a cable television system —and therefor consequent  
2 lacking in such protection from privatization?

- 3 2. Issue of Law: Whether Tacoma City Council exceeded its legal authority by divesting  
4 of the City’s municipal telecommunication system without a vote of the people?

5 **IV. EVIDENCE RELIED UPON**

6 This motion is based on the declarations, pleadings and papers filed under this cause.

7 **V. LEGAL AUTHORITY AND ARGUMENT**

8 **A. Creation of the Telecommunication System by Tacoma Public Utilities Created a**  
9 **Municipal Utility.**

10 Tacoma Public Utilities telecommunication system was authorized by TPU Board  
11 Resolution 33668, as seen as Exhibit 1 in Mr. Shook’s May 22, 2019 Declaration in this case —  
12 on page 15/399. This Resolution 33668 shows the system would be built to “serve a public  
13 purpose” of providing broadband telecommunications to the municipal Utilities customers.<sup>3</sup> This  
14 is a function the System continues to serve —only now under the complete control of a private  
15 company. Rates and policies for the System are no longer established by the Council or the  
16 Board for the benefit of ratepayers.

17 **B. McCarthy Has a Clear Legal and Equitable Right Under the City Charter and State**  
18 **Law to Vote in a Municipal Election to Decide Whether the City Should Enter into**  
19 **the Proposed IRU and APA.**

20  
21 <sup>3</sup> The relevant Merriam-Webster definitions for “utility” are (1) “a public utility”, or (2) “a service (such  
22 as light, power, or water) provided by a public utility.” *“Utility” Definition*, MERRIAM-WEBSTER.COM,  
23 <https://www.merriam-webster.com/dictionary/utility> (last visited June 26, 2019). “Public utility” is further  
24 defined as “a business organization (such as an electric company) performing a public service and subject  
25 to special governmental regulation.” *Public Utility Definition*, MERRIAM-WEBSTER.COM,  
26 <https://www.merriam-webster.com/dictionary/public%20utility> (last visited June 26, 2019). “Public  
service” is further defined as “the business of supplying a commodity (such as electricity or gas) or  
service (such as transportation) to any or all members of a community.” *Public Service Definition*,  
MERRIAM-WEBSTER.COM, <https://www.merriam-webster.com/dictionary/public%20service> (last visited  
June 26, 2019). Thus, read together, a utility is defined as a business organization performing the business  
of supplying a commodity or service to any or all members of a community and subject to special  
governmental regulation.

1 The fundamental basis of Plaintiffs’ lawsuit is that under both the City Charter and  
2 Chapter 35.94 RCW, Sale or Lease of Municipal Utilities, the City must hold a municipal  
3 election prior to consummating and vesting the System via an IRU and APA and the City did not  
4 hold such a municipal election. Section 4.6 of the City Charter provides as follows:

5 **Disposal of Utility Properties**

6 Section 4.6 – The City *shall never sell, lease, or dispose of any*  
7 *utility system, or parts thereof essential to continued effective*  
8 *utility service, unless and until such disposal is approved by a*  
9 *majority vote of the electors voting thereon at a municipal election*  
10 *in the manner provided in this charter and in the laws of this state.*

11 Charter § 4.6 (emphasis added). Thus, under the City Charter, if the proposed IRU and APA of  
12 Click! is a (1) *sale, lease, or disposal* of a (2) *utility system or essential part thereof*, Plaintiffs  
13 must prevail on the merits of their claims.

14 Similarly, under Chapter 35.94 RCW, a city may “*lease...or sell and convey any public*  
15 *utility works, plant, or system owned by it or any part thereof,*” but only following the specific  
16 procedure for doing so as provided in RCW 35.94.020, which requires “*submit[al] to the voters*  
17 *of the city for their approval or rejection at the next general election...and a majority of the*  
18 *voters voting thereon...approv[ing] it.*” RCW 35.94.010, 020 (emphasis added). Under state law,  
19 if the proposed IRU and asset sale of Click! is a (1) *lease or sale* of a (2) *utility system or any*  
20 *part thereof*, Plaintiffs must prevail on the merits of their claims.

21 The plain language of the City Charter and RCW 35.94.020, the City’s Municipal Code,  
22 applicable case law and attorney general’s opinions, and current and historic treatment of  
23 Click!’s telecommunication system by the City clearly show that the System is a utility system,  
24 or at least a part thereof, and the IRU and APA are a sale, lease, and/or disposal of a municipal  
25 utility. As a result, Plaintiffs have a clear legal and equitable right to the relief requested.

26 1. The Telecommunications System Is a Utility System Under the City Charter and  
Chapter 35.94 RCW.

Under the plain language of the City Charter and Chapter 35.94 RCW, Click! is a “utility  
system.” Tacoma Municipal Code Section 12.13 —Utilities lists Click! services, regulating the

1 rates of same; RCW 54.16.330, .340, provides for public utility districts to provide  
2 telecommunications services like Click! and contain provisions for petitions to challenge rates,  
3 terms, and conditions of same; RCW 80.01.110 authorizes utilities and transportation  
4 commission to oversee petitions challenging rates, terms, and conditions of wholesale  
5 telecommunications services. Thus, under the plain language of the City Charter, state law and  
6 RCW 35.94, Click! is a utility system.

7 2. City's Operation of a Telecommunications Business Under State Law Further  
8 Demonstrates the Telecommunication System is a Utility System.

9 Beyond plain meaning, courts may also interpret terms in a statute by looking to “other  
10 statutes dealing with the same subject matter.” Harmon v. Dept. of Social and Health Services,  
11 134 Wn.2d 523, 530, 951 P.2d 770 (1998); see also, Morpho Detection, Inc. v. State Dept. of  
12 Revenue, 194 Wn. App. 17, 27, 371 P.3d 101 (2016) (interrelated statutes that relate to the same  
13 subject matter must be “read together and harmonized, if possible”). Here, an examination of the  
14 treatment of telecommunications businesses like Click! under other provisions of state law  
15 further reinforces the conclusion that Click! is a utility system.

16 As an initial matter, Click! is a “telecommunications company” providing  
17 “telecommunications” services under Title 80 RCW, public utilities. Under RCW 80.04.010,  
18 telecommunications companies are defined as “every...city or town owning, operating or  
19 managing any facilities used to provide telecommunications for hire, sale, or resale to the general  
20 public.” RCW 80.04.010(28). Telecommunications, in turn, are defined as the “transmission of  
21 information by wire...optical cable, electromagnetic, or other similar means.” RCW  
22 80.04.010(27). Thus, any city or town that operates or manages any facilities used for  
23 transmission of information by wire, optical cable, or other similar means is a  
24 telecommunications company. RCW 80.04.010 (27), (28). This is exactly what Click!’s  
25 telecommunications system is: a facility for transmission of information by optical cable or  
26 similar means that is sold to TPU ratepayers. (See First Decl. of M. Shook, Ex. 10, 13

1 (identifying the Click! system as a hybrid fiber coaxial network providing high-speed internet  
2 services to the public)).

3 Click!’s status as a telecommunications company is significant because  
4 “[t]elecommunications businesses are public utilities and are regulated by the state to varying  
5 degrees.” Wash. AGO 2003 NO. 11 (Wash. A.G.) (emphasis added); see also Five Corners  
6 Family Farmers v. State, 173 Wn.2d 296, 308, 268 P.3d 892 (2011) (attorney general opinions  
7 “entitled to great weight”); RCW 80.36 (chapter regulating telecommunications laws, which is  
8 contained within Title 80 RCW, Public Utilities); RCW 80.01.110 (*utilities and transportation*  
9 *commission* hears petitions to review rates, terms, and conditions of telecommunications  
10 services); RCW 35.96.020 (defining “communication utility” for the purposes of that chapter as  
11 any “utility engaged in the business of affording telephonic, telegraphic, cable television or other  
12 communication service to the public”). Thus, related statutes which encompass Click! within the  
13 definition of a telecommunications business further confirm the Click! telecommunication  
14 System is a “public utility” under City Charter and Chapter 35.94 RCW.

15 3. The City Has Consistently Labelled and Treated Click! as a Utility System.

16 Finally, the City has consistently and continuously labelled and treated Click! as a utility  
17 system. As an initial matter, the City relied specifically upon its statutory authorization to  
18 provide utility services in the recitals to the very ordinance that created Click!. See First Decl. of  
19 M. Shook, 5/22/19, Ex. 2 [pg. 23/399] (reciting that “WHEREAS RCW 35A.11.020 authorizes  
20 the City operate and supply utility and municipal services”). Additionally, the City litigated and  
21 confirmed its authority to establish Click! as a “telecommunications system” prior to  
22 commencing construction of the network—explicitly relying on the City’s statutory authority as  
23 a first-class city to “operat[e] and supply[.]...*utilities*” under RCW 35A.11.020. (Fourth Decl. of  
24 M. Shook filed on 6/4/19, Ex. 58 [pg. 11/334], 60 [pg. 41/334], 61 ][pg. 70/334.) Moreover, City  
25 regulations regarding Click! are contained—to this day—within Title 12 TMC, which governs  
26

1 utilities within the City. Finally, the TPU website displayed Click! prominently under its  
2 services, directly next to its other municipal utilities —power, rail, and water.

3 4. Click! is a Part of a Utility System Under RCW 35.94.020.

4 The definition of “public utility” is found in the Laws of 1917, House Bill 337, or  
5 Remington RRS § 9512 -9514, (“§ 9512”) now Chapter 35.94 RCW, titled: “An Act  
6 authorizing cities and towns to lease or sell any municipally-owned” utilities.<sup>4</sup> Providentially,  
7 Legislators provided a list of “utilities” protected from privatization by the public vote. The  
8 long list included “telegraph and telephone lines and plants and any other . . . system similar or  
9 dissimilar in character.”

10 Section 1 of the 1917 Act provided:

11 It is and shall be lawful for any city or town in this state now or  
12 hereafter owning any water works, gas works, electric light and power  
13 plant, steam plant, street railway line, street railway plant, **telephone or**  
14 **telegraph plant and lines**, or any system embracing all or any one or  
15 more of such works or plants or any similar or dissimilar utility or  
system, to lease for any term of years or to 'sell and convey the same or  
any part thereof, with the equipment and appurtenances. . . (emphasis  
added)

16 In 1945, this long list of municipally-owned utilities was “rewritten for brevity” by the  
17 Code Committee.<sup>5</sup> This “abbreviation” removed “telephone or telegraph plant and lines,”  
18 along with the long list and the emphatic language, “any similar or dissimilar utility.”<sup>6</sup>

19 Even broader language was substituted, with “any public utility works, plant or system  
20 owned by it or any part thereof. . .” With this one abbreviation, the “Laws of 1917” entered the  
21 RCW under Chapter 80, see image below. That language remains unchanged today.

22 Defendant has substituted its judgment upon matters within the province of the City’s  
23 Freeholders and State Legislators, who long ago determined the right to dispose of Tacoma’s

24 \_\_\_\_\_  
25 <sup>4</sup> Passed by the Senate on March 6, 1917 and approved by the Governor March 15, 1917.

26 <sup>5</sup> Laws of 1942, Ch. 252, Sec. 1. “continuing Code Committee with full power of revision and  
codification of the laws.”

<sup>6</sup> Important to note, because “Telegraph and Telephone” later becomes “Telecommunication” and the  
Ordinance creating Click!, and 1996 and 1997 Superior Court cases approving it, created a  
“Telecommunication System.”

1 municipal utility assets rests in the electorate. There is no justification for Defendant’s attempt  
2 to circumvent laws placing an express limitation on City’s authority.

3 Citizens of Tacoma are not unique in reserving the right to vote on disposal of their  
4 municipal utility assets, *see Clark v. City of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d  
5 669

6 [W]hen the voters of South Haven granted the privilege to generate power,  
7 they were not content to divest themselves of every managerial function  
8 normally associated with the operation of a business concern. By their city  
9 charter they have retained express power over the discontinuance of their  
public utility. The contract in question has the effect of violating section 13.5  
of the charter for the city of South Haven and is therefore void unless approved  
by the voters as required by the charter.”

10 Click! (“System”) was created and funded as a “utility.” The City’s detailed 1996 plan,  
11 for a municipally-owned advanced telecom system, was a revolutionary and controversial  
12 concept. Authority to establish and fund the utility was blessed by two Court Orders.<sup>7</sup> Click!  
13 was born, built, bought, and paid for as a utility system.<sup>8</sup>

14 For all the preceding reasons Click!, as a telecommunications system, is a utility system  
15 under the City Charter and Chapter 35.94 RCW, and thus a municipal election is required prior  
16 to sale, lease, or disposal of Click!. The procedural requirements to sell or lease of a utility  
17 system under RCW 35.94.020 also apply to the sale or lease of “*any part*” of a utility system.  
18 RCW 35.94.020 (emphasis added); see, also Charter § 4.6 (election requirement applies to sale,  
19 lease, or disposal of “essential part[s]” of utility system). Click! is at least “part” of the City’s  
20 electric utility, Tacoma Power, and therefore lease or sale of the same requires a municipal  
21 election.

22 <sup>7</sup> In *City of Tacoma v. Taxpayers and Ratepayers of Tacoma*, 96-2-09938-0. Superior Court issued two  
23 orders, one authorizing the System (1996 Order), the other authorizing utility bonds to fund it (1997  
24 Order). Taxpayers argued Click! was general government’s obligation, and a public vote was required to  
fund the System. City prevailed, arguing the System was a utility and must be funded by utility bonds.  
Relying on that decision, for 20 years, the City is now legally and equitably estopped from alleging  
otherwise.

25 <sup>8</sup> The enabling City of Tacoma Ordinance #25930, that created Click!, cited authority in RCW  
26 35.95.020. Also, the Ordinance, in Section 1.3, cited the “Utilities” section of the City Charter as  
authority for funding Click! as a “utility.” (specifically “Charter § 4.1 The City shall possess all the  
powers granted to cities by state law to construct, condemn and purchase, purchase, acquire, add to,  
maintain, and operate”).

1 Property owned by a utility system is a “part” of a utility system. See Okeson and the  
2 example of art work loaned to by the Seattle City Light to Seattle City general government.

3 Bremerton Municipal League v. Bremer, 15 Wn.2d 231, 237–39, 130 P.2d 367 (1942),  
4 the Supreme Court found that two wharves in the harbor area were part of a utility system  
5 because they were a portion of the public docks. See *Bremer*, at 237, as *Bremer* states, “these  
6 sections of our statutes provide the only procedure by which the city can lawfully sell or lease  
7 municipal wharves.”

8 Chapter 35.94 RCW (RRS §§ 9512 at the time) was interpreted by the Washington  
9 Supreme Court in *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 130 P.2d 367  
10 (1942). The court found that a public vote was mandatory in disposing of “*any kind of utility* in  
11 whose operations the public has an interest.” *Bremer*, at 237. The definition of utility under  
12 *Bremer* was even interpreted to include “wharves and docks.”

13 *Bremer* states, regarding “the provisions of Chapter 137, Laws of 1917, p. 573, Rem. Rev.  
14 Stat., §§ 9512-9514. We are of the opinion that these sections of our statutes provide the only  
15 procedure by which the city can lawfully sell or lease municipal wharves.” *Bremer*, 237.

16 Privatization of the municipal telecommunication system absent the required public vote  
17 violates the law and is substantively and procedurally *ultra vires*. As stated in by the *Bremer* court:

18 The appellants point out that the statute specifically names a long list of  
19 utilities, but does not specifically mention wharves and docks. But the  
20 statute also says, '*or any similar or dissimilar utility or system.*' This, we  
21 think includes any kind of utility in whose operations the public has an  
22 interest, that is to say, any public utility. (emphasis added)

23 *See Bremer*, 15 Wn.2d at 237

24 Telecommunications is a public utility under federal, state and local law.<sup>9</sup> Telecom has  
25 been a regulated public utility since 1909 in Washington.<sup>10</sup> Even longer than electric power.<sup>11</sup>

26 <sup>9</sup> In 47 U.S. Code Title 47, state at Chapter 80.36 RCW, local in Tacoma Municipal Code Title 16 B.

<sup>10</sup> Session Laws of 1909, Ch. 93. Sec. 3 Pg. 192, 196, (“authorize the commission to regulate telephone  
and telegraph companies and their rates and charges, to prevent discrimination and extortion by such  
companies; and to authorize the Railroad Commission of Washington to make all necessary rules.”).

<sup>11</sup> Electricity regulated by Laws of 1911, Ch. 117, Pg. 538.

1 Telecommunications (“Telecom”) companies are “utilities,” with authority rooted in  
2 Washington’s Constitution, Article XII, Section 19: Telegraph And Telephone Companies. “The  
3 right of eminent domain is hereby extended to all telegraph and telephone companies.”<sup>12</sup>

4 Telecommunications is defined as a “public utility” by name, in the statute itself, in the long  
5 list of protected utilities found in RRS § 9512, which is the unabbreviated (but still intact)  
6 version of RCW 35.94.020.<sup>13</sup> The Code Committee’s abbreviation of RRS § 9512, found in the  
7 Laws of 1951, which substituted the long list of utilities with the all-encompassing, “any public  
8 utility works, plant or system owned by it or any part thereof,” did *not* remove or change the  
9 definition of public utility. Telecommunications is still a utility and Click! is a  
10 telecommunications system.

11 RRS § 9512 was simply “rewritten for brevity,” there was no change in the law, as RCW  
12 1.04.020 confirms “The previously existing laws shall control.”<sup>14</sup> In *Arnott v. Spokane*, 6 Wash.  
13 442, (1893):

14 [W]here the mode of contracting is expressly provided by law, no other mode  
15 can be adopted which will bind the corporation. This principle results from the  
16 fact that municipal corporations derive all their powers from their charters.<sup>15</sup>

17 City is free to negotiate a sale/lease of Click!, but the statutory requirement for a public  
18 vote is inalienable. As *Arnott* says, the “mode of contracting,” is “expressly provided” — in  
19 Click!’s case that “mode” is found in RCW 35.94.

20 Click! is a municipal utility system and therefore disposal of the System requires a vote  
21 of the electorate per RCW 35.94.020.

#### 22 5. The IRU and APA are a Lease, Sale, and/or Disposal of Click!

23 <sup>12</sup> In 1985, the term “Telecommunications” widely replaced “telephone” and “telegraph” in Title 80  
24 RCW *See generally* Laws of 1985, Ch. 450, Sec. 13, Pgs. 1978 -1995.

25 <sup>13</sup> “If the statute is ambiguous, the courts must construe the statute so as to effectuate the legislative  
26 intent. In so doing, we avoid a literal reading if it would result in unlikely, absurd or strained  
consequences. *State v. Elgin*, 118 Wn.2d 551, 555, 825 P.2d 314 (1992).

<sup>14</sup> Laws of 1951 (“rule of rule of construction, in case of any omissions or inconsistency between any of  
the revised code as so supplemented or modified and the laws existing immediately preceding this  
enactment, the previously existing laws shall control”).

<sup>15</sup> *Arnott v. City of Spokane*, 6 Wash. 442, (1893) citing 1 Dill. Mun. Corp. (4th Ed.) 449, (373;).

1 Section 4.6 of the City Charter applies if the proposed IRU and APA are a “lease, sale, or  
2 disposal” of Click! Similarly, the procedural requirements of RCW 35.94.020 apply if the  
3 proposed IRU and APA are a “lease” or “sale” for purposes of that statute. None of these terms  
4 are defined under the City Charter or Chapter 35.94 RCW, so the Court must resort to a  
5 dictionary to determine their ordinary meanings. See North Pacific Ins. Co. v. Christensen, 143  
6 Wn.2d 43, 48, 17 P.3d 596 (2001) (internal quotations omitted).

7 A “lease” is broadly defined as “a contract by which one conveys real estate, equipment,  
8 or facilities for a specified term and for a specified rent.” *Lease Definition*, MERRIAM-  
9 WEBSTER.COM, <https://www.merriam-webster.com/dictionary/lease> (last visited June 12, 2019).  
10 This is precisely what the IRU and APA have done —vested ownership and control over the  
11 telecommunications facilities and operations in Rainier Connect and conveyed specific  
12 equipment and facilities to Rainier Connect for a specified period of time. See First Decl. of M.  
13 Shook 5/22/19, Ex. 5 (pg.54/399) & Ex. 17 (pg 148/399) (stating that Click!’s “Related Assets  
14 will be conveyed to Rainier Connect subject to the terms of the asset purchase agreement”).  
15 Tellingly, the proposed IRU also specifically uses the term lease to define its terms. See id.,  
16 (referring to the IRU fee as a “Direct Lease Fee” and conceding that “[t]he Tacoma Power Fiber  
17 on Critical Routes is collocated with the fiber optic strands that are used by Click! and are now  
18 planned to *lease to Rainier Connect under the IRU*”) (emphasis added). In sum, there is no  
19 question that the IRU and APA are a lease and sale or disposal, respectively, for purposes of the  
20 City Charter and RCW 35.94.010.

21 **C. The Public’s Strong Interest in Protecting its Right to Vote in a Municipal Election**  
22 **Heavily Weighs in Favor of Issuance of a Preliminary Injunction in this Case.**

23 The Tacoma voting public has a strong interest in enforcing its right to vote in a  
24 municipal election. As a general matter, the right to vote is a fundamental right. See Madison v.  
25 State, 161 Wn.2d 85, 98, 163 P.3d 757 (2007). Infringement of the Tacoma voting public’s right  
26 to vote on lease or disposal of utility systems is therefore both a uniquely public issue, in  
addition to an issue touching on fundamental rights. No identified equitable interests support the

1 City's decision to violate its own Charter by approving the IRU and APA asset sale for the  
2 municipal telecommunications system. As a result, the Court should consider the significant  
3 public interest in protecting municipally owned utility assets, by requiring a municipal election  
4 on the matter, and resolve this case in the plaintiff's favor.

5 Tacoma's electorate possess a clear right to approve the sale of their city's municipal  
6 telecommunication system. City Council can substitute their judgement for that of Tacoma's  
7 voters. Absent voter approval, Council's contract for disposal is *ultra vires*. No valid contract  
8 can be created. A municipality's action is void, if contrary to law.

9 As stated in *Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 679, 695 (1987):

10 Tacoma's municipal utility authority has limits. In exercising its  
11 proprietary power, Tacoma may not act beyond the purposes of the  
12 statutory grant of power, *State ex rel. PUD 1 v. Wylie*, 28 Wash.2d 113,  
13 182 P.2d 706 (1947), or contrary to express statutory or constitutional  
14 limitations. *Metropolitan Seattle v. Seattle*, 57 Wash.2d 446, 459-60,  
15 357 P.2d 863 (1960); 12 E. McQuillin, *supra* at § 35.35.52<sup>16</sup>

16 There is an absolute want of power on the part of the municipality to contract.<sup>17</sup> Without a  
17 legal title, no legal conveyance can begin to issue. To convey a legitimate title, Defendant must  
18 obtain voter approval. City Charter § 4.6 cannot be ignored.

19 A municipality does not have unbounded discretion to dispose of utility property without  
20 voter approval. Council has acted beyond its authority. A municipal election cannot be avoided  
21 in conveying the citizens' telecommunication system. *South Tacoma Way, LLC v. State*, 169  
22 Wn.2d 118, 123, 233 P.3d 871 (2010) (governmental acts without authority are *ultra vires*).

23 **D. The History of RCW 35.94.010 Conclusively Demonstrates that Telecommunications  
24 Services are Public Utilities under the Statute.**

25 The Court has indicated that the case *City of Issaquah v. Teleprompter Corp.*, 93 Wn.2d  
26 567, 574-75, 611 P.2d 741 (1980), compels a determination that TPU's telecommunication system

<sup>16</sup> *Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 679, 695, 743 P.2d 793 (1987).

<sup>17</sup> *State v. City of Pullman*, 23 Wash. 583, 63 P. 265, (1900).

1 is not a utility for purposes of Chapter 35.94 RCW. However, a review of the history and origin of  
2 RCW 35.94.010 compels the conclusion that the System is indeed a utility as contemplated by  
3 RCW 35.94.010.

- 4 1. RCW 35.94.010 was Recodified into the Revised Code of Washington in 1951 from  
5 Remington’s Revised Statutes § 9512 as Part of the Process of Converting the  
6 Previously Existing Laws of the State of Washington into a Single, Revised,  
7 Consolidated, and Codified Form.

8 In 1917, The Washington Legislature enacted House Bill 337, entitled “Sale or Lease of  
9 Public Utilities Owned by Cities or Towns” (“1917 Law”). (Zandell Decl. 7-29-19, Ex. A.) The  
10 1917 Law was codified in Remington’s Revised Statutes (“RRS”) at §§ 9512–14. RRS §§ 9512,  
11 9513, and 9514 are the predecessors to the modern-day RCW 35.94.010, .020, and .030.<sup>18</sup> (Id.) RRS  
12 § 9512 provided, in relevant part:

13 It is and shall be lawful for any city or town in this state now or  
14 hereafter owning any water works, gas works, electric light and  
15 power plant, steam plant, street railway line, street railway plant,  
16 *telephone or telegraph plant and lines, or any system embracing all*  
17 *or any one or more of such works or plants or any similar or*  
18 *dissimilar utility or system,* to lease for any term of years or to sell  
19 and convey the same or any part thereof, with the equipment and  
20 appurtenances, in the manner hereinafter prescribed.

21 RRS § 9512; see 7-29-19 Decl. of T. Zandell, Ex. A. Thus, the text of RRS § 9512 was similar to  
22 the current day RCW 35.94.010, but even broader in that it contained a nonexclusive illustrative list  
23 of utilities, which included “telephone [and] telegraph plant[s] and lines” and even “any similar or  
24 dissimilar utility or system.” Id.

25 In the mid-1940’s, the Washington Legislature established and tasked the State Revision and  
26 Recompilation Committee (“Code Committee”) with proposing and submitting to the Legislature  
changes, revisions, and recodifications of the existing laws of the State for the purpose of creating

---

<sup>18</sup> RCW 35.94.040 and .050 were adopted in 1973 and 1986, respectively.

1 the Revised Code of Washington. (See 7-29-19 Zandell Decl., Ex. B. Pg. 8/18) As part of the Code  
2 Committee’s review and revision of the existing laws, in 1946 the Code Committee proposed that  
3 RRS § 9512 be codified at RCW 80.12.01, with the following rewritten language:

4           A city may lease for any term of years or sell and convey any public  
5           utility works, plant, or system owned by it or any part thereof,  
6           together with all or any equipment and appurtenances thereof.

7 Proposed Revised Code of Washington, Volume 2, Title 46 to End (1946), at 80-47; Zandell 7-29-  
8 19 Decl., Ex. B. (pg8/18). The Proposed RCW 80.12.01 is identical to the current RCW  
9 35.94.010.<sup>19</sup> As clearly indicated in the applicable reviser’s notes, the Code Committee’s change  
10 was a “rewrite for brevity”, not a substantive change to the existing law. Reviser’s Notes for  
11 Volume 2, Revised Code of Washington (1946), at 80-7 (stating that RRS § 9512 was “*rewritten for*  
12 *brevity*”) (emphasis added); Zandell Decl. 7-29-19, Ex. C.

13           In 1951, the Legislature adopted the Code Committee’s proposed changes, revisions, and  
14 codifications of the existing laws of the State, and enacted for the first time the Revised Code of  
15 Washington. See RCW 1.04.010. RRS § 9512 was recodified as RCW 80.48.010, using the Code  
16 Committee’s proposed language for brevity. Subsequently, in 1965, RCW 80.48.010 was recodified  
17 without amendment to its current location at RCW 35.94.010. (Zandell 7-29-19 Decl., Ex. D.)

18           Thus, to summarize the previous history of modern-day RCW 35.94.010, it was adopted  
19 first in 1917, editorially rewritten for brevity and re-codified in its current form at RCW 80.48.010  
20 in 1951, and the recodified again without change into RCW 35.94.010 in 1965.

21  
22           2. The Recodification of RRS § 9512 into the RCW and Associated Revisions of the  
23 Provision were Solely for Brevity, and Explicitly Not Intended to Alter Its Meaning.

24           For two reasons, the history of current RCW 35.94.010, and specifically the text of the  
25 original RRS § 9512, are critical to correctly interpreting the term “public utility” as used in RCW  
26

---

<sup>19</sup> Similarly, proposed RCW 80.12.02 is identical to the current RCW 35.94.020.

1 35.94.010. First, the modification of RRS § 9512 to its current form was done purely to rewrite the  
2 statutory language for brevity, not to change its meaning. Reviser’s Notes for Volume 2, Revised  
3 Code of Washington (1946), at 80-7 (stating that RRS § 9512 was “*rewritten for brevity*”)  
4 (emphasis added); Zandell 7-29-19 Decl., Ex. C. (pg. 11/18) Second, when the RCW was first  
5 adopted in 1951, the Legislature adopted RCW 1.04.020, which provides:

6 1.04.020. Code as evidence of the law--Rule of construction--Effect  
7 of amendment

8 The contents of the Revised Code of Washington...shall establish  
9 the laws of this state of a general and permanent nature in effect on  
10 January 1, 1951; *except, that nothing herein shall be construed as*  
11 *changing the meaning of any such laws and, as a rule of*  
12 *construction, in case of any omissions or any inconsistency between*  
*any of the provisions of the revised code as so supplemented or*  
*modified and the laws existing immediately preceding this*  
*enactment, the previously existing laws shall control.* (emphasis  
added)

13 RCW 1.04.020. Thus, the Legislature explicitly provided that the editorial revision and  
14 recodification of previously existing laws, such as RRS § 9512, into the RCW would not “chang[e]  
15 the meaning of any such laws.” RCW 1.04.020. Further, the Legislature explicitly provided that for  
16 purposes of statutory construction, any inconsistency between the formerly existing laws and the  
17 amended laws would be resolved *in favor of the previously existing laws*. *Id.* As a result, RCW  
18 35.94.010’s meaning explicitly did not change as a result of its editorial revisions and recodification  
19 from RRS § 9512, and this Court must analyze RRS § 9512 in order to determine the meaning of  
20 “public utility” under RCW 35.94.010.  
21

22  
23 3. The Inclusion of Telegraph and Telephone Services in RRS § 9512 Demonstrates that  
Telecommunications Services are Public Utilities Under RCW 35.94.010.

24 As fully explained above, the text of RRS § 9512, and particularly the illustrative examples  
25 of utilities that were included there, inform and control the meaning of RCW 35.94.010. Under the  
26 broad language of RRS § 9512, the municipal telecommunication system, and its provision of

1 Broadband Internet service, is clearly a “similar or dissimilar utility or system” to a “telephone or  
2 telegraph plant and lines.” RRS § 9512.

3 As an initial matter, Broadband Internet, telephone, and telegraph services are all  
4 telecommunications services that provide for two-way communication. See RCW 80.04.010(27)  
5 (defining telecommunications as the “transmission of information by wire...optical cable,  
6 electromagnetic, or other similar means.”). In many ways, Broadband Internet is just the modern-  
7 day telecommunications evolution of the telegraph and telephone systems that have existed in this  
8 country for more than a century. Thus, Broadband Internet service is certainly “similar or  
9 dissimilar” to telegraph and telephone services.  
10

11 Even more importantly, the System’s status as a public utility under RCW 35.94.010, as  
12 informed by RRS § 9512, is further confirmed by the Washington Supreme Court’s decision in  
13 Bremerton Municipal League v. Bremer, 15 Wn.2d 231, 130 P.2d 367 (1942). In Bremer, the  
14 Supreme Court was faced with the question of whether municipally-owned wharves were a public  
15 utility under RRS § 9512. Bremer, 15 Wn.2d at 237-39. Despite the fact that none of the illustrative  
16 examples of public utilities in RRS § 9512 are even related to ports, docks, or wharves, the Supreme  
17 Court still determined that wharves were public utilities under RRS § 9512. Specifically, the  
18 Supreme Court stated:  
19

20 The appellants point out that the statute specifically names a long list  
21 of utilities, but does not specifically mention wharves and docks. But  
22 the statute also says ‘or any similar or dissimilar utility or  
23 system.’ This, *we think includes any kind of utility in whose  
operations the public has an interest*, that is to say, any public utility.

24 Bremer, 15 Wn.2d at 237 (emphasis added). Click! easily meets the Bremer test for a public utility  
25 as the public certainly “has an interest” in the municipal telecommunications system’s operations.  
26 Moreover, in contrast to the wharves in Bremer, which were not related to any of the specific

1 examples in the illustrative statutory list, Tacoma Public Utilities’ provision of telecommunications  
2 service is directly related to the specifically enumerated examples of telegraph and telephone  
3 systems. Thus, if the Bremer court determined that wharves were public utilities under RRS § 9512,  
4 there is no question that Click! is also a public utility under RRS § 9512 and RCW 35.94.010.

5 As a result, under RCW 35.94.010, as informed by RRS § 9512 and Bremer, Click! is a  
6 utility, and this Court should reconsider its Order on that basis.

7 //

8 **E. *City of Issaquah v. Teleprompter Corp.* is Not Controlling Precedent on Whether Click!  
9 is a Public Utility Under RCW 35.94.**

10 As explained above, the history of current RCW 35.94.010, the text of RRS § 9512, and  
11 the Bremer decision collectively demonstrate that the telecommunications system is a public  
12 utility for purposes of RCW 35.94.010. Issaquah v. Teleprompter Corp., 93 Wn.2d 567, 611 P.2d  
13 741 (1980) has no bearing on a telecommunication system as a public utility for several reasons.

14 To begin with, the Issaquah decision specifically held that “cable television is not a  
15 public utility *as contemplated by RCW 35A.80 and 35.92.*” Issaquah, 93 Wn.2d at 574 (emphasis  
16 added). In so holding, the Issaquah court noted that the statutes at issue in the case—Chapters  
17 35A.80 and 35.92 RCW—do not “provide a clear definition” of public utility. Id. Thus, the  
18 Issaquah “public utility” analysis was predicated upon a lack of a definition or test within the  
19 relevant statutory scheme. See id. Here, unlike the statutes at issue in Issaquah, Chapter 35.94  
20 RCW, as informed by RRS § 9512, does contain an illustrative list and test for determining  
21 whether a system qualifies as a public utility. RCW 35.94.010; RRS § 9512. The reasoning  
22 contained in Issaquah is therefore inapposite because RCW 35.94.010 and RRS § 9512 provide  
23 *specific guidance* as to the appropriate meaning of “public utility.”  
24  
25  
26

1 Moreover, the Issaquah decision does not explicitly hold anything with regard to the  
2 meaning of “public utility” for the purposes of Chapter 35.94 RCW. Issaquah, 93 Wn.2d at 574  
3 (holding that “cable television is not a public utility *as contemplated by RCW 35A.80 and 35.92*”  
4 and never citing RCW 35.94 nor RRS § 9512) (emphasis added). While the Issaquah court did  
5 not interpret the meaning of “utility” with respect to RCW 35.94 and RRS § 9512, the Bremer  
6 Court certainly did. See Bremer, 15 Wn.2d at 237–39 (interpreting meaning of “public utility”  
7 under RRS §9512). Thus Bremer, not Issaquah, is the controlling Supreme Court precedent on  
8 the meaning of “public utility” for the purposes of Chapter 35.94 RCW, and, as explained above,  
9 Tacoma Public Utilities’ telecommunications system is a “public utility” under the Bremer test.  
10

11 Cable television only provides for one-way transmission of information, in contrast to  
12 telegraph, telephone, and telecommunications, each of which provide for two-way  
13 communication. Thus, cable television is not as “similar” to the listed utilities under RRS § 9512  
14 as is Broadband Internet service. The Issaquah decision does not dictate or inform whether  
15 telecommunications services are “similar or dissimilar” to the listed public utilities under RRS  
16 §9512.  
17

18 For all these reasons, the Issaquah decision does not operate to disqualify a municipal  
19 telecommunications System as a public utility under Chapter 35.94 RCW and RRS §9512.  
20

21 Conclusion: The City Has Acted in Absence or in Excess of its Jurisdiction.

22 The City has acted in a manner inconsistent with the requirements of both the City  
23 Charter and Chapter 35.94 RCW, by selling, leasing, and/or disposing of Click! without first  
24 holding a municipal election to approve the same.  
25  
26

1 Telecommunications is not a luxury. You cannot add a “rooftop antenna” and get it.<sup>20</sup> The  
2 flow of such “information” requires a “pipeline,” a fiber optic backbone, for transferring  
3 customer’s data.<sup>21</sup> Click! Network’s telecommunication system is the community’s ’ public  
4 data pipeline, or “information highway.” As a municipal telecommunication “utility,” the  
5 additional capacity and fibers, paid for by the municipal utility, are the equivalent of “lanes” on  
6 a public telecom highway.

7 Defendant’s characterization of the System as a cable television system, and complete  
8 disregard for telecommunications as a “utility,” returns us to an era of monopolization and  
9 privatization. This Court must over turn Council’s *ultra-vires* act. Allowing the disposal of a  
10 functional, municipally-owned, utility asset to be sold without a mandatory public vote sets a  
11 dangerous precedent. Could water, power or rail facilities be next?

12 In the City Charter, the people have reserved unto themselves the power of “ownership” and  
13 the electorate is solely vested with authority to provide final approval over privatization of this  
14 municipal telecommunications system. This Court must remind Defendant that City Council’s  
15 role is simply that of a trustee in managing the disposal of the peoples’ municipal utilities.

16 City Charter § 4.6 requires an approving vote of the electorate. This public vote is the only  
17 procedure by which the City can lawfully sell the citizens’ functional municipal utility property.  
18  
19  
20  
21  
22  
23  
24  
25

---

26 <sup>20</sup> *City of Issaquah v. Teleprompter Corp.*, 93 Wn.2d 567, 574–75, 611 P.2d 741 (1980), “It’s  
something you can do with a rooftop antenna. In that sense, it’s not a utility.”

<sup>21</sup> 5G networks of the future, for example, require an underlying fiber network, like Click!, to function.

AFFIDAVIT OF SERVICE

**IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE**

MITCHELL SHOOK,

Plaintiff,

v.

CITY OF TACOMA,

Defendant.

NO. 19-2-11760-1

DECLARATION OF  
THOMAS MCCARTHY

I, Thomas McCarthy, declare as follows: I am a resident of Tacoma, ratepayer of Tacoma Public Utilities, taxpayer to City of Tacoma, and customer of Click!, the municipal broadband telecommunications system operated by Tacoma Public Utilities. I am over the age of eighteen, competent to testify in this matter, am endowed with the capacity of reason, am unschooled in legal sophistries and make this declaration on my own personal knowledge.

1 That as I have been an advocate for Click Network! and maintaining its public control for the  
2 benefit for Tacoma citizens in maintaining it as a public utility to increase competition and better  
3 service, in addition to creating an economic advantage for our economy as has been the case for  
4 Chattanooga, TN.  
5

6 1. I affirm that I maintained service with Click until my provider was forced from serving  
7 Click! Customers, and once my year's subscription expires, and Rainier Connect raised  
8 my rates from 80% for the same level of service (from \$300/year to \$45/month), at which  
9 time, I was forced to seek service with Centurylink at \$50/month, but with higher gigabyte  
10 speed service. (See Exhibit A) Neither Rainier Connect nor Centurylink provided  
11 anywhere near the level of customer service that my initial provider did prior to the  
12 Tacoma City Council illegally privatizing Click! to Rainier Connect. Customer service is  
13 much poorer, involving failure to even reach tech support after hours of waiting and effort.  
14

15 2. I also affirm that having reliable internet service has been critical during the coronavirus for  
16 my wife, a managing social worker at the Veterans Administration, who worked online at  
17 home full time, and to my business, which often requires me to work from home online.  
18 Furthermore, since all schooling was forced online and at home during the pandemic,  
19 telecommunications was critical for their education. And during the pandemic, my only  
20 option in participating in several court hearings was to do so via Zoom via internet. If  
21 there was any iota of doubt or unclarity that access to internet via telecommunications  
22 systems constituted a utility, that question has been erased. There can be no doubt  
23 whatsoever that there is a clear public interest in telecommunications as articulated by the  
24 Washington State Supreme Court in Bremerton Municipal League v. Bremer (1942), a  
25 case of controlling precedence that has never been over rule and binds lower courts, as law  
26

1 enacted in the 1917 Act it ruled under remain fully in force.

2 3. I affirm, as a student of history, the understanding that in that period over one hundred years  
3 ago when public municipalities were nascent the motive of this law was to create a  
4 firewall against privatizing utilities which were owned by the citizens' polity, held in the  
5 public interest, which would otherwise be liable to privatization of public assets by  
6 corruptible elected officials in favor of their benefactors, private for-profit interests. Then,  
7 as now, private for-profit corporations do not want to compete with the public sector in  
8 providing utility services. Whether private power companies, or private  
9 telecommunications firms, eliminating public utilities from essential services guarantees  
10 large profits with little to no competition. Eliminating Click! as a public utility certainly  
11 met the policy goals of companies like Comcast, Centurylink, and even a bit player like  
12 Rainier Connect buying out or eliminating its two rivals within Click.  
13  
14

15 4. I affirm that the mayor of the City of Tacoma, who benefitted from over \$100,000 in  
16 political donations by Rainier Connect via direct and indirect means in her first run for  
17 mayor, immediately after election declared that people are tired at dealing with Click!, and  
18 moved quickly to privatize Tacoma's publicly owned telecommunications system...which  
19 was awarded to Rainier Connect for a tiny fraction of the \$200 million investment by the  
20 citizens of Tacoma for a paltry lease amount of \$2.5 million/year. The bidding process  
21 was transparently fixed towards its intended recipient, Rainier Connect. And elected  
22 officials  
23

24 5. Attached hereby as Exhibit C is a true and correct copy of the brief of Mitchell Shook,  
25 from his request for accelerated review of Pierce County Case NO. 19-2-11506-3. I  
26 offer this exhibit, since I recognize the Court considers that cable tv may possess some

1 similarity to two-way communications, as the subscriber must select the programing to  
2 be viewed. However, federal, state and local statues differentiate the technologies and  
3 make it crystal clear that cable tv is NOT two way communications. I Mr. Shook's brief  
4 goes into great detail in distinguishing the issue of two-way communication as it relates  
5 to cable television.

Tacoma City Ordinance No. 25930 .....	8

## I. INTRODUCTION

Darrel Bowman and Mitchell Shook (“Appellants”) appeal the February 28, 2020 decision of the Pierce County Superior Court denying Appellants’ Motion for Partial Summary Judgment, granting Respondent City of Tacoma’s (“City” or “Respondent”) Motion for Summary Judgment, and dismissing Appellants’ claims in their entirety. This response is provided to join in and support Mr. Bowman’s Motion for Accelerated Review.

This lawsuit is about the separation, disposal and “privatization” of the City of Tacoma’s municipal telecommunications utility, Click! Network (“Click!”), without voter approval, as explicitly required under state law, Chapter 35.94.020, and under Tacoma’s City Charter § 4.6.

Municipal telecommunications utilities are protected from such disposal by Chapter 35.94 RCW, or the Laws of 1917, House Bill 337, Remington RRS § 9512 -9514, (“§ 9512”): “An Act authorizing cities and towns to lease or sell any municipally-owned” utilities. In 1917 Legislators provided a long list of utilities protected from privatization by the public vote. “Telegraph and telephone lines” and any other . . . system “similar or dissimilar” were among the utilities protected. *See App. Pg. 40.*

In 1945 this list of utilities was “rewritten for brevity” by the Code Committee, providing the statutes current language of “any public utility works, plant or system owned by it or any part thereof. ..” This abbreviated version of the “Laws of 1917” was codified into RCW 80.48 in 1951. That language remains unchanged today.<sup>1</sup> *See App. Pg. 68.*

---

<sup>1</sup> A savings clause was added at RCW 1.04.020 to ensuring the laws were unchanged by the code revisor’s abbreviation.

For a detailed explanation of RRS § 9512 -9514 evolution into Chapter 35.94 RCW, please *see* App. Pgs.28-30 , Shook’s MSJ. Also, *see* App. Pgs. 66 – 68 Shook’s Reply in the MSJ.

Click! (the “System”) is a state-of-the-art advanced telecommunication system and enterprise, owned and operated by Tacoma Public Utilities (“TPU”), supporting the community’s needs for data transport and broadband services. It serves over 35,000 active TPU utility customer accounts.

TPU provides four distinct public services; water, power, rail and telecommunications under four brand names: Tacoma Water, Tacoma Power, Tacoma Rail and Click! Network. TPU’s website prominently displays Click! as one of “Our Services: Power, Water, Rail, Click!.”<sup>2</sup>

The Telecommunications System serves public institutions, such as Tacoma Public Libraries and Pierce County’s Sheriff, Planning and Public Works, Tax Assessor/Treasurer, Courts and Auditors Department. The System also supports over 1,000 commercial and institutional accounts, including hospitals and universities. The System has been in operation for over 20 years and revenues exceeded \$25 million in 2019.

Privatization of the System is a public issue involving a fundamental and urgent issue. Conveying an entire municipal telecommunications enterprise, along with exclusive possession and control of the underlying fiberoptic infrastructure, intellectual property, equipment and improvements, as a going

---

<sup>2</sup> See App. Pg. 2 TPU “Our Services” .

concern, for a period of up to 40 years, is of broad public import and requires prompt and ultimate determination.<sup>3</sup>

The City of Tacoma's municipal telecommunications system was constructed at public expense, costing over \$200 million in public utility funds, and includes 1,500 miles of fiberoptic and coaxial cable, situated in underground conduits and attached overhead to 10,000 telephone poles. The System passes 120,000 of TPU's customers' homes and business locations. TPU's website describes Click!'s as, "one of the largest municipally owned telecommunications systems in the country." <sup>4</sup>

The separation, transfer and disposal of the municipal telecommunications system, without the mandatory vote of the people, is being accomplished via the Click! Business Transaction Agreement ("CBTA"), which Tacoma City Council approved in November of 2019. Conveyance and transfer of operational control is expected to occur on April 1, 2020. The System's essential employees are generally being reassigned to other jobs within the City and the Utility.

The CBTA conveys to the buyer, a private company, all proprietary operational control and total authority over setting rates for the municipal utility's wholesale telecommunications services. The System's rates are currently set by City Council, in accordance with the Tacoma's Municipal

---

<sup>3</sup> RCW 43.330.530(3) "Broadband infrastructure" means networks of deployed telecommunications equipment and technologies necessary to provide high-speed internet access and other advanced telecommunications services to end users.

<sup>4</sup> RCW 43.330.530 (2) "Broadband" or "broadband service" means any service providing advanced telecommunications capability and internet access with transmission speeds that, at a minimum, provide twenty-five megabits per second download and three megabits per second upload.

Utility Code TMC Title 12. All public control and oversight of operations and rate setting for the System are separated under the terms of the CBTA.

Telecommunications is a utility. Chapter 35.94 RCW requires voter approval for disposal of a municipal utility works, plant, or system owned by it, or *any part thereof*, or any equipment or appurtenances. (emphasis added).<sup>5</sup>

Tacoma's City Charter 4.6 ("Charter") contains a similar directive, requiring approval by "a majority vote of the electors."

The City shall never sell, lease, or dispose of any utility system, or parts thereof essential to continued effective utility service, unless and until such disposal is approved by a majority vote of the electors voting thereon at a municipal election.

Tacoma City Council ("Council") circumvented the voter approval required under City and State law, by declaring the entire Telecommunication System "surplus" under RCW 35.94.040. This surplus declaration is an ultra vires application of the City's surplus authority.<sup>6</sup>

Council flaunts Article I, Section I of the Washington Constitution, which provides: "All political power is inherent in the people, and governments derive their just powers from the consent of the governed." Voters of Tacoma granted the City a privilege of operating the Department of Public Utilities;

---

<sup>5</sup> Railroads were the first regulated utility in Washington State, in 1905, under the Railroad Commission. Telecommunication was the second utility to be regulated, in 1909, also under the Railroad Commission See App. Pg. 20, Shook's MSJ.. As the modern extension of telegraph and telephone, Telecommunications has been regulated as a public utility since the Pacific Telegraph Act of 1860.

<sup>6</sup> See App. Pg. 30, Shook MSJ. "Legislative Intent of Surplus and Plain Language of Municipal Utility Surplus Clause."

but, they were not content to divest themselves of every managerial function normally associated with the operation of a business concern. By charter, the people retain express power over disposal of their proprietary interest in the community's municipal public utility property.

The people have reserved full power and exclusive authority to provide final approval over privatization of their telecommunications system. Council's role, essentially, is that of the people's trustee, limited to negotiating the CBTA agreement and then presenting the contract to voters for approval at the ballot—a mandatory step in the privatization process..

Chapter 35.94.040 RCW's statutory definition of surplus, as "not required for providing continued public utility service," was simply ignored—for Click! is being vested turnkey, as a going concern, and the System will continue providing the same proprietary telecommunications services, to the same utility customers, under the same brand, over the same infrastructure, only with a private company controlling rates and cashing customers' checks.

The utility System is not surplus. The System's assets and customers are simply "changing hands," lock, stock, barrel and brand. This state-of-the-art fiberoptic municipal utility system, delivering essential public utility telecommunications services, will continue providing the same services to the same loyal utility customers. Such a disposal does not reflect the Legislature's intent for "surplus." (*See App. Pg. 30, Shook's MSJ*)

In privatizing the community's pubic broadband system, essential assets are being separated. The "last mile infrastructure" is a single wire, a "data

pipeline,” to a customer’s home or business.<sup>7</sup> The “middle mile infrastructure,” of over 1,500 miles of fiber, cable, conduits, vaults, easements and equipment, is required for essential communication services.<sup>8 9</sup>

Recognizing the monopolistic nature of the industry, with huge fixed costs and barriers to entry, federal, state and local laws have fiercely protected consumers from anti-competitive consolidation of assets and ownership in the telecommunications industry for over 100 years.<sup>10</sup>

For over 20 years, the City has owned, operated and regulated Click! as a municipal-utility, establishing service levels, rates and even setting net neutrality policies. State laws and federal policies support and encourage such public, non-profit, “municipal” utility systems. Such utility systems now operate in Washington state, across the USA and around the world.<sup>11</sup>

For these reasons, Petitioner Shook respectfully requests that this Court grant Mr. Bowman’s request for accelerated disposition of this matter.

---

<sup>7</sup> RCW 43.330.530 (5) "Last mile infrastructure" means broadband infrastructure that serves as the final connection from a broadband service provider's network to the end-use customer's on-premises telecommunications equipment.

<sup>8</sup> RCW 43.330.530 (7) "Middle mile infrastructure" means broadband infrastructure that links a broadband service provider's core network infrastructure to last mile infrastructure.

<sup>9</sup> RCW 43.330.532 Findings: "The legislature finds that: (1) Access to broadband is critical to full participation in society and the modern economy"

<sup>10</sup> See 2015 Open Internet Order, 30 FCC Rcd at 5631, para. 81 n.134 (“data suggests that meaningful alternative broadband options may be largely unavailable to many Americans, further limiting the ability to switch providers. Based on the submissions from various commenters, it appears that between 65% and 70% of households have at most two options for high speed Internet access.”); see also 2010 Open Internet Order, 25 FCC Rcd at 17923, para. 32; Appendix C, Section II.A.1., Table 1 (showing that, nationwide, 97 percent of households have two or fewer providers of BIAS at download speeds of 25 Mbps).

<sup>11</sup> Tacoma Council even has its own bright-line (net neutrality) regulation.

Delay in resolution of this issue will indefinitely deprive affected constituents of their right to vote, result in the loss of institutional knowledge associated with Click! Network's terminated employees, and subject customers to suffer the potential monopolization of the public utility; In addition, pending lawsuits in state and federal courts contain virtually identical issues to this appeal, and accelerated review of this case will prevent inconsistent decisions at the trial court level and promote judicial efficiency.

For these reasons, Petitioner respectfully requests that this Court accelerate disposition of this matter.

## **II. IDENTITY OF THE PARTY**

This response is presented by one of the Appellants, Mitchell Shook.

## **III. STATEMENT OF RELIEF SOUGHT**

Appellant requests the Court grant Mr. Bowman's Motion to accelerate the disposition of this appeal pursuant to RAP 18.8 and 18.12.

## **IV. FACTS RELEVANT TO MOTION**

### **A. Establishment Of A Municipal Telecommunications System.**

In 1996, TPU commissioned a "Telecommunications Study."<sup>12</sup> The "study team" set out to determine if TPU might benefit from establishing "a modern telecommunications infrastructure." The study asked if the greater Tacoma area has the "telecommunications resources necessary for business that may want to locate in the area?" It even cited "telecommuting" and asked,

---

<sup>12</sup> For a detailed history, see App. Pg. 18-19, Shook's MSJ. "Creation of Municipal Utility's Telecommunication System and Service."

“How will the explosion in the Internet be handled?” The Study explained why the System would be built:<sup>13</sup>

One of the most significant ways a community and its *economic base* are intertwined is through an area's infrastructure, As a result, the evolution of a community's economy often depends upon the investments it makes in its transportation system, power system, and—given the *shift to the information age—its telecommunication system*, This study was therefore commissioned to investigate Tacoma's potential *economic futures* and the inter-relationship between its *economic development* and potential *telecommunication system investments*, (emphasis added).

In 1996 Council approved Ordinance 25930 establishing a “A SEPARATE SYSTEM.” Article II provided for: “Establishment Of The Telecommunications Project As A Separate System; And Adoption Of Plan And System”:<sup>14</sup>

Section 2.1. Establishment of **Telecommunication System**. The City hereby creates *a separate system* of the City's Light Division to be known as the telecommunications system (the "**Telecommunications System**"). The public interest, welfare, convenience and necessity require the creation of the **Telecommunications System**, contemplated by the plan adopted by Section 2.2 hereof, for the purposes set forth in **Exhibit A**. The City hereby covenants that all revenues received from the **Telecommunications System** shall be deposited into the Revenue Fund. (emphasis added).

“Exhibit A” of the Ordinance, included commercial broadband “Internet Access Service” and “high speed data” transport services.

In July of 1996, prior to funding construction of the System, the City sought declaratory judgement in Pierce County Superior Court to confirm

---

<sup>13</sup> See App. Pg. 129 – 132, Shook MSJ.

<sup>14</sup> See App. Pg. 13 -15 for discussion of Ordinance 25930, also the Ordinance itself on App. Pgs, 83-106 see App. Pg. 106. “Ex A “Telecommunications Project.”

authority for TPU to establish a municipal telecommunication utility system, funded by TPU bonds, to provide commercial telecommunications services.

In the City's November 1996 Memorandum In Support of Summary Judgment, the City cited RCW 35.96.030 as authority for municipal funding of the communication utility.<sup>15</sup> The City also cited authority for commercial telecommunications services in RCW 80.36.300 (5), to "Promote diversity in the supply of telecommunications services and products in telecommunications markets throughout the state."<sup>16</sup> The City's Memorandum also cited its statutory power to provide telecommunications utility services—as a first-class charter city with all powers not denied by law, "including operating and supplying of utilities and municipal services commonly or conveniently rendered by cities or towns." RCW 35A.11.020.<sup>17</sup>

The City prevailed and two Orders were issued by Pierce County Superior Court confirming TPU's authority to fund and operate the telecommunications utility.

City Council approved TPU's final plan for establishing the System in Resolution No. 33668.<sup>18</sup>

Click! became operational in 1998. Shortly thereafter, in April of 2000, Tacoma's Mayor, Professor Baarsma, and Dr. Singleton, of University of Puget Sound, authored a learned paper reviewing the creations of Click! Network. Their scholarly study, attached as App. Pgs. 134 - 138, is entitled "Creating Capacity And Competition In Broadband Telecommunications: The City Of Tacoma's

---

<sup>15</sup> App. Pgs. 146-150. The 1996 Memorandum In Support of City Of Tacoma's MSJ,

<sup>16</sup> App Pg. 148

<sup>17</sup> App. Pg. 148.

<sup>18</sup> App. Pg. 108 -109 the 1997 Resolution 33668.

Initiative.” This paper will provide an understanding of what Click! Network is, and why the community created it as a public utility. *see* App. Pgs. 51 -52 for Appellant Shook’s citations from that study, as presented in a previous brief.

This study cites the community’s need for an advanced telecommunications system with broadband capability and why it was viewed as essential. The project brought benefits in revenue diversification and economic growth, which, in turn, increased revenue from additional sales of TPU’s other utilities, water and power.<sup>19</sup>

#### **B. Disposal of City’s Municipal Telecommunication System.**

In the process leading up to pending privatization of Click! Network, there has been no appraisal of the System’s market value. There has also been no audit of the System’s profitability as a commercial enterprise. There was never a Request for Proposal (“RFP”) or any bidding for the System’s “surplus” assets. The entire privatization process has occurred in backrooms, out of the public eye, with the terms for privatization, including the vast assets that would be vested, which include valuable IP addresses and all available dark fiber, being made known only to the private company, Rainier Connect.

Appellant Bowman’s Motion correctly identifies most of the elements that create urgency for accelerated review. However, one issue Bowman fails to cite is the potential monopolization of the System by the private acquirer.

Click! is currently operated as an “Open Access” system, with TPU providing standardized wholesale rates and “packages” to the competing Internet Service Providers (“ISPs”). The ISPs then compete by reselling those

---

<sup>19</sup> App. Pgs. 134 - 138, Dr. Baarsma’s Study of Click! creation.

broadband packages to retail customers over the System. Since authority over the System is being vested in one of these ISPs, the private buyer Rainier Connect, it will allow Rainier Connect to destroy its competitor, Advanced Stream. Advanced Stream is Rainier’s only remaining competitor on the System. Rainier Connect has already acquired the other two ISPs. This conveyance will potentially facilitate a monopolization of Tacoma’s public broadband services over the municipal telecommunications system.<sup>20</sup> While the CBTA requires Rainier Connect to continue operating the system under open access policies, the definition of open access is left to Rainier Connect’s interpretation of those terms. While the outcome is not clear, Rainier Connect may attempt monopolization of the system on April 1, 2020.<sup>21</sup>

### **C. Legal Issues and Procedural History**

Appellant Shook agrees with the Appellant Bowman’s presentation of the legal issues and procedural history.

## **V. GROUNDS FOR RELIEF AND ARGUMENT**

Appellant Shook supports Appellant Bowman’s motion and agrees that RAP 18.12 provides the Court authority to “set any review proceeding for accelerated disposition.” Appellant Bowman is especially correct to cite

---

<sup>20</sup> The ISP Advanced Stream is a company owned by Appellant Mr. Shook. Advanced Stream provides ISP services, including VoIP and Email service, to over 9,000 customers and has operated on the System for over 20 years.

<sup>21</sup> See App. Pg. 154, City of Tacoma “Notice” to Advanced Stream customers, also App. Pg. 152, Rainier Connect’s mailers to the same customers advertising “no waiting for the “Cable Guy”—which is possible since Advanced Stream’s customers are on the same System (no truck roll or visit from the Cable Guy is required. The Advanced Stream customers are being switched over to Rainier Connect with a simple phone call under this promotion. If Rainier Connect’s first act, in assuming operational control, is to destroy its only competitor and monopolize the System, this does not portend well for the future.

RAP 18.8(a), for this case is a time “when it is necessary for the court to act swiftly, particularly in matters relating to affairs of the state or local government, or when irreparable harm to a party would result from delay.” *See* 3 Wash. Prac., Rules Practice, RAP 18.12 (7th ed.).

Privatization of a municipal utility system, in violation of the public’s right to vote, is appropriately accelerated for prompt and expeditious review.

There can be no doubt that Click! is a telecommunications system. By definition of RCW 80.04.010 (27): A "Telecommunications Company" is “every city or town owning, operating or managing any facilities used to provide telecommunications for hire, sale, or resale to the public”. *See* RCW 80.04.010 (28). As a municipal utility, the System is protected from privatization by the public vote requirements of RCW 35.94.020.

Justice delayed is justice denied. A review on standard appellate timelines will be harmful and: (1) deny the electorate their right to vote for an indefinite time and potentially render Appellant’s claims for injunctive relief moot; (2) create a risk of monopolization over the System by Rainier Connect; (3) result in loss of institutional knowledge in the operation of Click! from the termination and loss of the System’s municipal employees; (4) result in disclosure of confidential customer account information to a private party; (5) increase risk of inconsistent decisions and/or delay in similar ongoing lawsuits in state and federal court. For these reasons accelerated review should be granted. RAP 18.12.

**A. Accelerated Review is Necessary Because Transfer Operational Control Over the System Deprives the Electorate from Exercising Their Right to Vote for an Indefinite Time.**

Voters have a right to approve execution of conveyance of their public telecommunication utility system under RCW 35.94 and City Charter § 4.6. The City refuses to hold a municipal election, and intends to execute the CBTA imminently—on April 1, 2020. The City’s actions compel expedited review of Appellant’s claims.

Accelerated review is necessary to resolve the question of whether Respondent is depriving residents of the City their right to vote on the privatization of Click!. City’s actions will violate voters’ fundamental rights for an extended period of time. This is an important public policy question, with over 200,000 people living and reside in the City, Washington’s third largest, and tens of thousands of residents’ voting rights would be compromised by a delay of the right to vote during the appellate process.

Privatization will remove all rate control over wholesale broadband internet and telecommunications services. Such rates are now set by City Council under the City’s municipal utility code. Vesting such authority for setting rates solely in a private company would damage each interested voter in the City for the duration of appellate review.

Thus, consistent with other appeals regarding the public’s right to vote, accelerated review should be granted. *See In re February 14, 2017, Special Election on Moses Lake School District No. 161 Proposition 1, 2 Wn. App. 2d 689, 413 P.3d 577 (2018)* (accelerating review on whether constituents were denied opportunity to vote to approve a school district bond); *see also Global Neighborhood v. Respect Washington, 7 Wn. App.2d 354, 385, 434 P.3d 1024 (2019)*.

**B. Terminating Click! Employees Will Result in the Loss of Institutional Knowledge. Time is Of The Essence.**

If Appellant prevails, the CBTA will be void. Without accelerated review it becomes more difficult if for the City to recover previously terminated employees necessary for the operation of Click!. As a result, accelerated review is warranted. RAP 18.12. Click! is a technically complex system, with equipment such as core routers, provisioning systems, DNS servers, DHCP servers, switches, gateways, hubs, nodes, and many other plant assets. The institutional knowledge of Click! employees is essential to operating the system. Click! employees may more easily return after only a few months, rather than a longer period—if this Court were to ultimately rule in the Appellant’s favor on the traditional timeline. Thus, accelerated review should be granted to resolve the issues in this appeal.

**C. Destruction of Competition May Occur With Additional Loss Of Institutional Knowledge Held By Other ISP, Advanced Stream.**

Click! operates as an “Open Access” system, with TPU providing standardized wholesale rates and “packages” to two competing Internet Service Providers (“ISPs”), Rainier Connect and Advanced Stream.

These ISPs now compete on a level playing field, reselling Click!’s broadband “packages” to retail customers over the System. With authority over the System vested in Rainier Connect, Advanced Stream—Rainier’s only competitor on the System—could be ruined. A destruction of Advanced Stream would result in a loss of the support services to Advanced Stream’s

over 9,000 broadband customers and a monopolization of broadband services over the municipal telecommunications system.<sup>22</sup>

The CBTA requires Rainier Connect to operate the System under Open Access Policies. The definition of “open access” seems left open to Rainier Connects’ interpretation.<sup>23</sup> An abuse of such power could potentially result in monopolize the System on April 1, 2020.<sup>24</sup> The loss of Advanced Stream’s employees’ institutional knowledge will be irreparable if too much time passes. Additionally, if Rainier Connect does in fact monopolize the System, customers of Advanced Stream may lose their essential email address and telephone services—which are now provided by Advanced Stream as part of ISP services. Time truly is of the essence in this appeal.

## VI. CONCLUSION

Appellant respectfully requests the Court grant accelerated disposition.

Respectfully submitted this 23<sup>rd</sup> day of March 2020.

By: /s/ Mitchell Shook  
Mitchell Shook, Plaintiff, Pro Se

---

<sup>22</sup> The ISP Advanced Stream is a company owned by Appellant Mr. Shook. Advanced Stream provides ISP services, including VoIP and Email service, to over 9,000 customers and has operated on the System for over 20 years.

<sup>23</sup> App. Pg. 155 – 156 . Pages from the CBTA relating to Open Access Program.

<sup>24</sup> See App. Pg. 154, City of Tacoma “Notice” to Advanced Stream customers, also Rainier Connects mailers to the same customers advertising “no waiting for the “Cable Guy” —which is only possible since Advanced Stream’s customers are on the same System (no truck roll or visit from the Cable Guy is required. The Advanced Stream customers are being switched over to Rainier Connect with a simple phone call under this promotion. If Rainier Connect’s first act, in assuming operational control, is to destroy its only competitor and monopolize the System, this does not portend well for the future.

# About Click!

## Company

Click! Network is an operating section of Tacoma Power and a multi-service broadband telecommunications provider within the electric company's service area.

## Vision

**To be known for excellence in:**

- People – professionals committed to the highest level of customer service and satisfaction, who create and maintain a team environment in which trust, respect, honesty and dignity are valued.
- Products and services – specifically designed to meet and exceed our customer needs through innovative uses of technology.
- Performance – a technically superior network designed and maintained to serve both current and future telecommunications needs of Tacoma Power and of Click! Network customers.

## Mission

To develop and deliver to all Tacoma Power customers innovative products and services made possible by the convergence of telecommunications and electric technologies.

## Ownership

Click! Network is one of the largest municipally-owned telecommunications systems in the country and part of the City of Tacoma's Department of Public Utilities.

# Internet Service Providers

Click! operates an Open Access Network, which is a different business model than traditional telecommunications providers. In an open-access network there is a network owner and operator, and multiple retail service providers that deliver services over the network.

## Click! Powered Internet Gives You

KEVIN STOCK  
COUNTY CLERK  
**NO: 19-2-11506-3**

The Honorable Judge Shelly K. Speir  
Hearing Date: January 10, 2019  
Oral Argument Requested

**IN THE SUPERIOR COURT OF PIERCE COUNTY  
OF THE STATE OF WASHINGTON**

DARREL BOWMAN,

Plaintiff,

v.

CITY OF TACOMA,

Defendant.

**NO. 19-2-11506-3**

**PLAINTIFF MITCHELL SHOOK'S  
MOTION FOR PARTIAL SUMMARY  
JUDGMENT**

MITCHELL SHOOK,  
Plaintiff Pro Se,

v.

CITY OF TACOMA,

Defendant.

**I. Nature of The Action and Summary of Argument**

This lawsuit is about privatization of Click! Network ("Click!"), Tacoma Public Utilities' fiber-optic municipal telecommunications system, without voter approval, as explicitly required by state law and Tacoma's City Charter. Privatization conveys the municipal utility's entire

1 public broadband infrastructure and enterprise, as a going concern, including all proprietary  
2 operational control and authority over the municipal utility's rate setting functions.<sup>1</sup>

3 Click! (the "System") is an advanced telecommunication system, owned and operated by  
4 Tacoma Public Utilities ("TPU"), serving over 35,000 active utility customer accounts. The  
5 System's revenues exceeded \$25 million in 2018. (Shook Decl. 10/30/19 Ex. 9).

6 TPU's website describes Click!'s commercial telecommunications operations as, "one of the  
7 largest municipally owned telecommunications systems in the country and part of the City of  
8 Tacoma's Department of Public Utilities" (Shook Decl. 10/30/19 Ex. 1, Pg. 5).<sup>2</sup>

9 Article I, Section I of the Washington Constitution provides: "All political power is inherent  
10 in the people, and governments derive their just powers from the consent of the governed."

11 The people have reserved full power and exclusive authority to provide final approval over  
12 privatization of their telecommunications system. Council's role, essentially, is that of the  
13 people's trustee, limited to negotiating the agreement and presenting the contract to voters.

14 Chapter 35.94 RCW requires voter approval for disposal of any public utility works, plant,  
15 or system owned by it or any part thereof, or any equipment or appurtenances.

16 Tacoma's City Charter's ("Charter" or "the Charter") contains a similar directive, requiring  
17 approval by "a majority vote of the electors." (Shook Decl. 10/30/19 Ex. 5).

18 The City shall never sell, lease, or dispose of any utility system, or parts thereof  
19 essential to continued effective utility service, unless and until such disposal is  
20 approved by a majority vote of the electors voting thereon at a municipal election.

21 The City has circumvented the voter approval process and declared Click!'s entire system  
22 "surplus," under RCW 35.94.040. Tacoma City Council ("Council" or "City") approved a  
23 Declaration of Surplus Property ("DSP") and conveyance of ownership and control is set to  
24 occur in March of 2020. (Shook Decl 10/30/19 Ex. 2).

25 The City also approved the "Click! Business Transaction Agreement" ("CBTA"), privatizing  
26 Click!'s enterprise and conveying the utilities' customer accounts, Mr. Shook's home services  
included. All public control over operation and rate setting for the System is lost for 40 years.

---

<sup>1</sup> RCW 43.330.530(3) "Broadband infrastructure" means networks of deployed telecommunications equipment and technologies necessary to provide high-speed internet access and other advanced telecommunications services to end users.

<sup>2</sup> RCW 43.330.530 (2) "Broadband" or "broadband service" means any service providing advanced telecommunications capability and internet access with transmission speeds that, at a minimum, provide twenty-five megabits per second download and three megabits per second upload.

1 Ironically, the City acknowledges lack of authority for disposal absent voter approval. The  
2 City has admitted voters alone are vested with express power to approve separation of the  
3 municipal utility's public broadband enterprise. (Shook Decl. 12/12/19 Ex. 32, Pg. 1, Ln 20)

4 Despite knowing<sup>3</sup> it lacked authority, the City nevertheless abrogated voters' rights, with an  
5 ultra vires declaration of surplus designed to circumvent the requirements of Chapter 35.94 RCW  
6 and Charter Section 4.6. (Shook Decl. 12/12/19 Ex. 32, Pg. 1, "Whereas 4.6 Requires a vote. . "

7 The statutory definition of surplus, as "not required for providing continued public utility  
8 service," was simply ignored. Vested turnkey, as a going concern, Click! will continue providing  
9 the same proprietary services, to the same utility customers, under the same brand, over the same  
10 infrastructure, only with a private company controlling rates and cashing customers' checks.<sup>4 5</sup>

11 The utility System is not surplus. The System's assets, trademarks and customers are simply  
12 "changing hands," lock, stock, barrel and brand. A state-of-the-art fiber optic municipal utility  
13 system, delivering essential public utility services, continuing to providing the same services to  
14 the same loyal utility customers, does not reflect the Legislature's intent for "surplus."<sup>6</sup>

15 Voters of Tacoma granted the City a privilege of operating the Department of Public  
16 Utilities, they were not content to divest themselves of every managerial function normally  
17 associated with the operation of a business concern. By charter, the people retain express power  
18 over disposal of their proprietary interest in the community's municipal public utility property.

19 Disposal of Click!'s equipment, infrastructure and enterprise, all acquired for the purpose of  
20 providing telecommunication services, and required for continuing those same services, violates  
21 section Charter 4.6. Such a sale is ultra vires and void, unless approved by the voters.

22 In privatizing the community's public broadband system, essential assets are separated,  
23 including "last mile infrastructure," that single wire or "data pipeline" to a customer's home or  
24 business,<sup>7</sup> and the public's "middle mile infrastructure," of over 1,500 miles of fiber, cable,

25 <sup>3</sup> "Knowingly" is a statutorily defined term. RCW 9A.08.010(1)(b)(i) states a person "acts knowingly . . .  
26 when . . . he [or she] is aware of a fact, facts, or circumstances

<sup>4</sup> A buyer that is one of the mayor's largest campaign contributors!~ Shook Decl. 12/12/19, Ex. 47, Pg. 6.

<sup>5</sup> The Business Transaction Agreement provides "WHEREAS, the Parties have mutually agreed to  
cooperate to ensure a smooth and seamless transition of the Click! Business." Shook Decl. 11/1/19 Pg. 6

<sup>6</sup> The transaction includes use of the Click! trademark and brand name. Shook Decl. 10/30/19 Ex. 2.

<sup>7</sup> (5) "Last mile infrastructure" means broadband infrastructure that serves as the final connection from a  
broadband service provider's network to the end-use customer's on-premises telecommunications  
equipment.

1 conduits, vaults, easements and equipment, all required for accessing the services and  
2 applications critical for modern society.<sup>8 9</sup>

3 Recognizing the monopolistic nature of the industry, with huge fixed costs and barriers to  
4 entry, federal, state and local laws have fiercely protected consumers from anti-competitive  
5 consolidation of assets and ownership in the telecommunications industry for over 100 years.<sup>10</sup>

6 For over 20 years, the City has owned, operated and regulated Click! as a municipal-utility,  
7 establishing service levels, rates and even setting net neutrality policies. State laws and federal  
8 policies support and encourage such public, non-profit, "municipal" utility systems. Many such  
9 systems operate in Washington, across the USA and around the world.<sup>11</sup>

10 As the modern extension of telegraph and telephone, Click! is a utility system.  
11 Telecommunications has been a public utility since the Pacific Telegraph Act of 1860.<sup>12</sup>

12 No material issues of fact exist. This matter is properly resolved on summary judgment.<sup>13</sup>

## 13 **II. Relief Requested and Statement of the Issue**

14 This motion seeks partial summary judgment for declaratory relief, pursuant to CR 54(b).  
15 Plaintiff asks the Court to rule, as a matter of law, on the following questions:

16 1. Are telecommunication assets of a municipal utility governed by Chapter 35.94 RCW or  
17 Tacoma City Charter 4.6 ?

18 2. Does a surplus resolution facilitating privatization of an operational municipal utility  
19 telecommunication enterprise defeat the legislative intent for "surplus" in RCW 35.94.040, when  
20 the enterprise and its assets continue providing the same telecommunication services, to the same  
21 public utility customers, post-privatization?

22 <sup>8</sup> (7) "Middle mile infrastructure" means broadband infrastructure that links a broadband service  
23 provider's core network infrastructure to last mile infrastructure.

24 <sup>9</sup> RCW 43.330.532 Findings: "The legislature finds that: (1) Access to broadband is critical to full  
25 participation in society and the modern economy"

26 <sup>10</sup> See 2015 Open Internet Order, 30 FCC Rcd at 5631, para. 81 n.134 ("data suggests that meaningful  
alternative broadband options may be largely unavailable to many Americans, further limiting the ability  
to switch providers. Based on the submissions from various commenters, it appears that between 65% and  
70% of households have at most two options for high speed Internet access."); see also 2010 Open  
Internet Order, 25 FCC Rcd at 17923, para. 32; Appendix C, Section II.A.1., Table 1 (showing that,  
nationwide, 97 percent of households have two or fewer providers of BIAS at download speeds of 25  
Mbps).

<sup>11</sup> Council even has its own bright-line (net neutrality) regulation. Shook Decl. 12/12/19 Ex. 34

<sup>12</sup> Regulation over such communication was transferred from the Interstate Commerce Commission to  
Federal Communications Commission in 1934, 47 U.S. Code § 151, § 601.

<sup>13</sup> Affirmation of electorates' right to vote is curative of all ills and eliminates unnecessary litigation.

1 3. When the legislative authority of a city deems it advisable to lease, sell or dispose of a  
2 municipal utility’s operational telecommunications enterprise and system, or useful and  
3 functional in-service equipment, appurtenances, betterments and essential parts thereof, does  
4 RCW 35.94.020 or Charter 4.6 require voter approval of the proposed transaction?

5 **III. Background Facts**

6 The following facts are in the declarations of Plaintiff, Mitchell Shook (“Mr. Shook”), a  
7 taxpayer of the City, ratepayer of TPU and Click! customer, with standing to bring this action.

8 **A. Tacoma Public Utilities Ownership and Creation of Click! Network**

9 The Department of Public Utilities was established under City Charter (“Charter”) Section  
10 4.1. TPU is one of the largest municipally owned utilities in the Pacific Northwest.<sup>14 15</sup>

11 The Utility provides four distinct public services; water, power, rail and telecommunications  
12 under four brand names: Tacoma Water, Tacoma Power, Tacoma Rail and Click! Network.

13 TPU’s website prominently displays Click! as one of “Our Services: Power, Water, Rail,  
14 Click!.” *see* Shook Decl. 10/30/19, Ex. 1, Pg. 7 -about TPU.

15 Owned and operated by TPU, Click! is an “advanced telecommunication system,” delivering  
16 commercial services under its own organizational structure, to approximately 35,000 TPU  
17 customer accounts. The System’s services were launched in 1998.<sup>16</sup>

18 Click!’s state-of-the-art, carrier-grade, telecommunications system, delivers Gigabit speed  
19 BIAS, (“Broadband Internet Access Service”) over Fiber To The Home (“FTTH”) technology,  
20 VoIP prioritized DOCSIS 3.1 cable modem service, commercial “Metro Ethernet” data-transport  
21 services and cable television to customers in the in Tacoma, Fircrest, Fife, University Place,  
22 Lakewood and unincorporated Pierce County.<sup>17 18</sup>

23 The System passes 66% of the homes in Tacoma Power’s service area with 1,500 miles of fiber  
24 and cable plant.<sup>19</sup> The City describes Click! as: “This state-of-the-art technology for modern  
25 network architecture enables reliable and cost-efficient delivery of Gigabit internet services”.<sup>20</sup>

26 <sup>14</sup> Shook Decl. 10/30/19, Ex. 5.

<sup>15</sup> Official Statement: City of Tacoma Series 2017 Electric System Revenue Bond, p.1.

<sup>16</sup> “Broadband” is defined as “advanced telecommunications services” by RCW 54.16.420.

<sup>17</sup> TPU Annual Report p. 26 (Shook Decl. 12/12/19, Ex. 48, Also shows continues investment.

<sup>18</sup> Defendant’s Answer ¶23, admits point-to-point metro Ethernet broadband services.

<sup>19</sup> Defendant’s Answer ¶19. Pg. 4. Total mileage, admits 1,800.

<sup>20</sup> Admitted in Defendant’s Answer, Pg. 5, ¶22. Shook Decl. 10/30/19, Ex. 7 Click! Network 2018 Cable TV Annual Report -Pam Burgess to Jeff Leuders 2/28/19. See Shook Decl. 12/12/19, Ex. 57 for FTTH.

1 Like the City’s water and power utilities, Click!’s rates are set by Council and published under  
2 Title 12, the “Utilities” section of the Tacoma Municipal Code. Charter 4.3 allows Council to  
3 “revise such rates and charges as it may deem advisable for supplying such utility services.”<sup>21</sup>

4 Revenues and expenses for the System are accounted for separately, from other TPU  
5 operations, and appear as “Telecommunications” on TPU financial statements.

6 **B. Purpose in Creation of Click! Network -The Community’s Need For Broadband.**

7 In 1996, TPU commissioned a “Telecommunications Study.” The “study team” set out to  
8 determine if TPU might benefit from establishing “a modern telecommunications infrastructure.”  
9 The study asked if the greater Tacoma area has the “telecommunications resources necessary for  
10 business that may want to locate in the area?” It even cited “telecommuting” and asked, “How  
11 will the explosion in the Internet be handled?” Shook Decl 10/30/19 Ex. 10, Pg. 92 of 389.<sup>22</sup>

12 The Study explained why the System would be built:

13 One of the most significant ways a community and its *economic base* are intertwined is  
14 through an area's infrastructure, As a result, the evolution of a community's economy  
15 often depends upon the investments it makes in its transportation system, power  
16 system, and-given the *shift to the information age-its telecommunication system*, This  
17 study was therefore commissioned to investigate Tacoma's potential *economic futures*  
18 and the inter-relationship between its *economic development* and potential  
19 *telecommunication system investments*, (emphasis added).<sup>23</sup>

20 A “Telecommunications Business Plan” was part of the study and proposed:

21 Three types of **telecommunications services** would be offered by Tacoma City Light  
22 - wholesale high-speed telephony and **data transport, Internet data transport**, and  
23 cable television. Each of these services meet the **growing telecommunications needs**  
24 in the greater Tacoma area. . . . (emphasis added)

25 The conclusion lamented, “one could hope *that other companies would step forward.*”<sup>24</sup>

26 [T]he local market has a *growing need for better telecommunications access*. Despite  
growing local demand, the incumbent wire line service providers have stated that their  
investments in the local infrastructure will either slow without significant rate  
increases or be halted all together. *One could hope that other companies would step  
forward* and create a modem telecommunications system through out (*sic*) our  
community *but the prospects for that occurring appear dim.* (emphasis added)<sup>25</sup>

On June 21, 1996, TPU issued a “Request for Ordinance or Resolution” seeking to:

<sup>21</sup> Defendant’s Answer, Pg. 4, ¶21 -City Council approve rates. *Also see* Shook Decl. 10/30/19, Ex. 8.

<sup>22</sup> The Purpose and Conclusion is at Shook Decl. 12/12/19, Ex. 50.

<sup>23</sup> Shook Decl. 10/30/19, Ex. 10, at Pg. 142 of 398 in PDF.

<sup>24</sup> Local Telecommunications Business Plan. Shook Decl. 10/30/19. Ex. 10, at Pg. 142 of 398

<sup>25</sup> Shook Decl. 10/30/19, Ex. 10, at Pg. 186 of 398 in PDF.

1 Authorize a Bond Ordinance for City of Tacoma, Washington, Department of Public  
2 Utilities, Light Division to clarify its legal authority to develop telecommunication  
capacity for . . . certain telecommunications services,<sup>26</sup>

3 On June 26, 1996, the Board approved funding the telecommunication business plan.<sup>27</sup> On July  
4 23,1996, Council approved Ordinance 25930 establishing a “A SEPARATE SYSTEM.”  
5 Ordinance 25930 included Article II: “Establishment Of The Telecommunications Project As A  
6 Separate System; And Adoption Of Plan And System”:<sup>28</sup>

7 Section 2.1. Establishment of **Telecommunication System**. The City hereby creates *a*  
8 *separate system* of the City's Light Division to be known as the telecommunications  
9 system (the "**Telecommunications System**"). The public interest, welfare, convenience  
10 and necessity require the creation of the **Telecommunications System**, contemplated by  
11 the plan adopted by Section 2.2 hereof, for the purposes set forth in Exhibit A. The City  
hereby covenants that all revenues received from the **Telecommunications System**  
shall be deposited into the Revenue Fund. (emphasis added).

12 This “Exhibit A” of the Ordinance, included commercial broadband “Internet Access Service”  
13 and “high speed data” transport services.

14 **C. Summary Judgements Confirmed Authority to Establish Telecommunication System.**

15 In July of 1996, prior to funding construction of the System, the City sought declaratory  
16 judgement in Pierce County Superior Court to confirm authority for TPU to establish a  
17 telecommunication system to provide commercial telecommunications services. Two Orders  
were issued, confirming TPU’s authority to do so.<sup>29 30</sup>

18 In the City’s November 1996 Memorandum In Support of Summary Judgment”, the City  
19 cited RCW 35.96.030, which provides authority for municipal funding of communication utilities,  
20 as authority for the City’s proposed municipal utility telecommunication system.

21 In creating Click!, the City also cited authority for commercial BIAS services in the policy  
22 statement of RCW 80.36.300 (5), to “Promote diversity in the supply of telecommunications  
23 services and products in telecommunications markets throughout the state.”

24 <sup>26</sup> Signed by Superintendent Klein Shook Decl. 10/30/19, Ex. 11, Pg. 28, at 224 of 389 in PDF.

25 <sup>27</sup> Resolution U-9198. Shook Decl. 10/30/19 Ex. 11, Pg. 31 or Pg. 227 of 389 total pages in PDF.

26 <sup>28</sup> See Ordinance 25930 Shook Decl. 10/30/19, Ex. 11, Pg. 197 of 389 A “Separate System.”

<sup>29</sup> The 12/13/96 Order determined Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.  
The 5/9/97 Order approved authority to fund the System and carry out the business plan for offering  
wholesale telecommunication service, including retail cable tv services. Shook Decl. 10/30/19 Ex. 12, 13.

<sup>30</sup> The 5/20/97 Request for Ordinance stated: “Authorize the development of a broad band  
telecommunications network to improve electric utility service and improve the telecommunications  
infrastructure available to the community. This would include the business plan for a broad band  
telecommunications system and the implementation of the telecommunications system.

1 On March 20, 1997, in support of Res# 33668 to establish the System, TPU Director Mark  
2 Crisson wrote Council, outlining the System’s goals, saying the “Telecommunications System”  
3 would "Provide additional revenue to the Light Division and General Government through  
4 expansion of the market for telecommunications services.”<sup>31</sup>

5 "Significantly enhances regional economic development and quality of life by creating  
6 state-of-the-art telecommunications infrastructure and providing it to all businesses and  
7 residences throughout the community."

8 On April 8, 1997, Council approved Res. 33668. The Board followed with Resolution U-  
9 9258, finding provision of broadband Internet to be “prudent and economical,” stating:

10 WHEREAS the Light Division has retained consultants to review and analyze the  
11 feasibility of a **broad band telecommunications systems** for the Light Division's  
12 service area, and a **business plan** has been prepared for this purpose.

13 WHEREAS, the Public Utility Board hereby finds and determines that the Light  
14 Division's proposal for a **broad band telecommunications system** is in the best  
15 interests of the City, **will serve as a public purpose**, and should be approved.

16 BE IT RESOLVED BY THE PUBLIC UTILITY BOARD.

17 That the Board hereby **approves the Light Division's proposal** including the  
18 Business Plan for a **broad band telecommunications system**, and the Board  
19 recommends that the City Council approve a resolution to authorize the Light  
20 Division to proceed to implement said proposal for a **broad band  
21 telecommunications system..** (emphasis added). (Shook Decl. 12/12/19, Ex. 75)

22 Resolution 33668 identified other “utility purposes,” or benefits, that would be accomplished  
23 by creating Click!’s broadband system. These included revenue diversification and economic  
24 development, both having an important “nexus” to Tacoma Power’s role of producing energy.<sup>32</sup>

25 One year later, as the project gained national attention, TPU Director Mark Crisson proudly  
26 wrote the Tacoma City Manager, and forwarded a national news article and stating:

“MSNBC has written a very informative piece about Tacoma Power's Click! Network.  
It was written complete with slides of our work in progress. I know the City Council,  
as well as the Board, will be proud of this national coverage.”<sup>33</sup>

**D. Click! Network’s Commercial Telecommunication System and Operations Today**

In 2018 Click!’s total revenue exceeded \$25 Million. In August 2019, Click!’s monthly  
sales were \$2,116,912, with a \$40,070 profit after all allocations, taxes and depreciation.<sup>34</sup>

<sup>31</sup> Shook Decl. 10/30/19, Ex. 10, Pg. 4. (or Pg. 50, of 389 in PDF).

<sup>32</sup> Shook Decl. 12/12/19, Ex. 75. See first “Whereas” in Amended Resolution U-9258.

<sup>33</sup> Shook Decl. 10/30/19, Ex. 14 Pg.2 -Importantly, see the quote on Pg. 6: “The system is not being built  
as a cable system. We have got a multilayered business model.” - Deb Stewart Click Network.

<sup>34</sup> Shook Decl. 10/30/19, Ex. 9, Tacoma Power Statement 12/31/18, Click! Operational Summary 8/19

1 Click! is an FCC registered telecommunications provider, with Federal Registration Number  
2 (“FRN”) FRN 0007466642,<sup>35</sup> filing Form 499 and Form 477,<sup>36</sup> and publishing a “Transparency  
3 Disclosure,” as mandated by the FCC.<sup>37</sup> Click! provides gigabit data “*transport only*” services  
4 to the Tacoma City Library System and files FCC Form 471, allowing libraries participate in the  
5 Universal Service Administrative Company (“USAC”) “E-rate Program.” Click!’s USAC  
6 Service Provider Number (“SPN”) is SPN 143035981.<sup>38</sup> See Shook Decl. 12/12/19 Ex. 64.

7 Click! enters into “Master Service Agreements” (“MSA”) to install “dedicated transport  
8 services” over the System’s municipal “communications facilities,” often in large commercial  
9 buildings. Examples, including CenturyTel’s, are provided in Shook Decl. 12/12/19, Ex. 62.

10 “Telecommunications Installation and Service Agreements,” with multifamily dwellings,  
11 allow installation of “Telecommunications System” for providing “telecommunication services.”

12 Owner grants Click! the right to enter and access the Premises for the **purpose of**  
13 **installing telecommunications facilities** in, at and upon the Premises including, but not  
14 limited to, all wiring, cables, conduits, electronic and other equipment, antennae,  
15 switches, amplifiers, filters, traps, signal receiving/scrambling/decoding equipment, key  
16 lock box(es) and key(s), and any additional equipment that may be requested for  
17 provision of . . .telecommunication services at the Premises (“Facilities” and collectively  
18 “**Telecommunication System**”). (emphasis added) (Shook Decl.10/30/19, Ex. 17).

19 Click! holds a Franchise Agreements for Pierce County and the Cities of Tacoma, Fife,  
20 Lakewood, Fircrest, University Place and Puyallup. (Shook Decl. 12/12/19, Ex. 30).

21 Click!’s Pierce County “Telecommunications Franchise” is Ordinance No. 2004-43:  
22 Telecommunication Franchise To The City Of Tacoma, . . . Light Division, For A  
23 Telecommunications Network In Pierce County To Be In The Public Interest;

24 The Puyallup Telecommunications Ordinance grants City of Tacoma rights:

25 To Construct, Maintain, Operate, Replace And Repair A Telecommunications  
26 Network, In, Across, Over, Along, Under, Designated Public Rights-Of-Way.<sup>39</sup>

27 **E. Planned Conveyance of Click! Network’s Commercial Telecommunication System.**

28 On Nov. 5, 2019, Council approved the CBTA and Indefeasible Right of Use (“IRU”)

29 <sup>35</sup> Click! Network Disclosure and FRN, *se*, Pg. 283/389 of PDF.

30 <sup>36</sup> Shook Decl. 10/30/19, Ex. 15 All facilities-based providers are required to file data with the FCC twice  
a year (Form 477) on where they offer Internet access service at speeds exceeding 200 kbps in at least one  
direction. See Who Files What: *available at* <https://www.fcc.gov/general/broadband-deployment-data-fcc-form-477>

31 <sup>37</sup> Click! FCC Form 477 *see* Shook Decl 10/30/19 Ex. 15, *also available at* <https://perma.cc/9T9T-L4FL>

32 <sup>38</sup> Shook Decl. 10/30/19 Ex. 15, Pg. 7, Library Funding info *at* <https://www.usac.org/sl/default.aspx>

33 <sup>39</sup> Shook Decl. 12/??/2019 Ex. 79

1 agreement (the “Agreements”) to privatize Click! by transferring ownership and operations of the  
2 enterprise to Rainier Connect, a private company.<sup>40</sup> see Shook Decl. 12/12/19 Ex. 39.

3 Privatization transfers an active, in-service, municipal utility enterprise. It vests all proprietary  
4 operational interests in the System. Assets essential for continued provision of BIAS services to  
5 TPU’s customers would be separated and conveyed for up to 40 years.

6 All franchises agreements, contracts, warranties, operating rights, active customer account  
7 information, billing and bank payment details would be vested. All electronic equipment, software,  
8 provisioning systems, DNS servers, DHCP servers,<sup>41</sup> Caching servers, routers, hubs, nodes,  
9 trademarks, IP addresses, head end equipment, customer premise equipment, trucks, brand name,  
10 other critical assets and infrastructure are included. (Shook Decl. 11/1/19, Pg. 12)

11 It is undisputed that privatization removes all Council control over the System’s rates going  
12 forward, leaving the System’s customers without protection from future rate increases.

#### 12 IV. Argument

13 This motion is based on the pleadings, declarations and evidence filed under this cause.

14 **Summary Judgement Standard:** With only questions of law, summary judgment is appropriate  
15 under CR 56(b). When moving party shows “no issue as to a material fact,” *Scott v. Pacific West*  
16 *Mountain Resort*, 119 Wn.2d 484, 502-03 (1992), “the burden shifts to the non-moving party” to  
17 establish facts to be proven at trial. *Young v. Key Pharmaceuticals, Inc.*, 112 Wn.2d 216, 225  
18 (1989). The non-moving party must offer specific facts, not bare allegations. *Baldwin v. Sisters*  
19 *of Providence*, 112 Wn. 2d 127, 132 (1989). Conclusory assertions do not preclude summary  
20 judgment. *Grimwood v. University of Puget Sound, Inc.*, 110 Wn. 2d 355, 359-60 (1988).

#### 21 A. Click! is A Municipal Utility System Providing Municipal Utility Service.

22 By resorting to RCW 35.95.040, to surplus Click!, the City admits the System is a municipal  
23 utility, regulated by Chapter 35.94. The plain meaning of the terms “utility” and “system” seem  
24 obvious; but, if further definition is desired, courts may “look to standard English language  
25 dictionaries.” *North Pacific Ins. Co. v. Christensen*, 143 Wn.2d 43, 48, 17 P.3d 596 (2001)

26 \_\_\_\_\_  
<sup>40</sup> Ironically, to say the least, Rainier opposed Click!’s creation in 1996. Shook Decl. 12/12/19 Ex. 47.  
Also, a hearing on an Ordinance to convey the Click! Franchise Agreement was held on 12/10/19. Shook  
Decl. 12/12/19, Ex. 63

<sup>41</sup> DNS is Domain Name Service and Domain Name Servers, DHCP, Dynamic Host Configuration  
Protocol) The automatic assigning of IP addresses

1 Black's Law Dictionary's defines "*public utility*" as, "a company that provides necessary  
2 services to the public, such as telephone lines and service, electricity and water."<sup>42 43</sup>

3 Merriam Webster provides, "*system*" is "a regularly interacting or interdependent group of  
4 items forming a unified whole." Click! assets, represented by over 2000 pages in the CBTA and  
5 IRU Agreements,<sup>44</sup> constitute a telecommunication system. Click! is a "Public Utility System."

6 U.S. Code and Washington State statutory definitions confirm Click! is a municipal "utility"  
7 The 1996 Telecommunications Act provides, at 47 USC § 224(a)(1): "Utility."

8 The term "utility" means any person who is a local exchange carrier or an electric,  
9 gas, water, steam, or other public utility, and who owns, or controls poles, ducts,  
10 conduits, or rights-of-way used, in whole or in part, for any wire communications.

11 Our State Supreme Court's defines "public utility" as a service that will "subserve a *public*  
12 *use*." Also, "The crucial and final test is, does the use--utility--subserve a public purpose; does it  
13 furnish a natural need of the city or its citizens; does it contribute to his comfort, prosperity, or  
14 happiness?" *Winkenwerder v. City of Yakima*, 52 Wn.2d 617, 328 P.2d 873, (1958). Under  
15 *Winkenwerder*'s "crucial and final test," Click! is undoubtedly a utility.

16 In *Bremer*, the high court defines utility:

17 [T]he statute specifically names a long list of utilities, but does not specifically  
18 mention wharves and docks. But the statute also says, '*or any similar or*  
19 *dissimilar utility or system.*' This, we think includes any kind of utility in whose  
20 operations the public has an interest, that is to say, any public utility"  
21 see *Bremerton v Bremer*, supra

## 22 **B. Creation of Municipal Utility's Telecommunication System and Service.**

23 The term "Telecommunications" replaced "telephone" and "telegraph" in Title 80 RCW  
24 under the Laws of 1985. See Ch. 450, Sec. 13, Pgs. 1978 -1995, or Shook Decl. 12/12/19 Ex. 61.

25 Click!'s municipal telecommunications system<sup>45</sup> was carefully conceived, constructed and  
26 paid for by TPU, for the express purpose of providing broadband services to TPU customers.

<sup>42</sup> *Black's Law Dictionary* Eleventh Edition 2019 P. 1859

<sup>43</sup> Click! enables "telephone service." The transmitting and receiving ordinary-language messages is widely accomplished with Voice Over IP Protocol (VoIP) service, a disruptive technology rapidly replacing traditional switched telephone technologies. Click! offers a "Voice Package", or VoIP with QoS ("quality or service" features). that prioritize "data packets." Click!'s telecommunication system allows services that are the modern equivalent of the "telephone." Shook Decl. 12/12/19, Ex. 44

<sup>44</sup> Shook Decl. 11/1/2019, Ex. 29

<sup>45</sup> Click! is a "telecommunication system" see Shook Decl 12/12/19 Ex. 59 Decl. of Terry Dillon.

1 City's Ordinance No. 25930 created Click! upon municipal authority to supply "utility  
2 services." The City intended to establish utility services. The Ordinance provides, "WHEREAS  
3 RCW 35A.11.020 authorizes the City to operate and supply utility and municipal services  
4 commonly or conveniently rendered by cities or towns." <sup>46</sup> (Shook Decl. 10/30/19, Ex. 11, Pg. 4)

5 Prior to constructing Click!, to confirm legal authority for commercial municipal utility  
6 telecommunication services, the City brought suit for declaratory judgement in Pierce County  
7 Superior Court and succeeded, in 1996 and 1997, in obtaining two approving Orders. <sup>47 48</sup>

8 In all the briefing supporting the proposed system, City cited federal, state, and local  
9 statutory and judicial authority, as allowing construction and operation of a municipal utility  
10 "Telecommunications System" The "Introduction" of the City's brief stated:

11 The City of Tacoma (the "City") brought this declaratory judgment class action  
12 under RCW 7.24 and 7.25 and CR 23(8)(2) to confirm its authority to issue bonds  
13 for the purpose of constructing and operating a telecommunications system  
14 consisting of a hybrid fiber coaxial network (the "Telecommunications System").

14 The City's April 14, 1997 Memorandum in Support of Summary Judgment shows the City  
15 created a "Telecommunication System" as a municipal utility. *See* Shook Decl. 12/12/19 Ex. 30

16 Click!'s a "Telecommunications Company," operating a municipal *telecommunication*  
17 *system*, providing *telecommunication services*. RCW 80.04.010 (27). A "Telecommunications  
18 Company" is "every city or town owning, operating or managing any facilities used to provide  
19 telecommunications for hire, sale, or resale to the public". *See* RCW 80.04.010 (28). <sup>49 50</sup>

20 Thus, any city or town operating facilities used for transmission of information by wire, or  
21 optical cable, is a telecommunications company. This is exactly what Click! Network is: "*a*  
22 *facility for transmission of information by optical cable or similar means.*" <sup>51</sup>

23 <sup>46</sup> The bond was payable solely by TPU (not general government). Shook Decl. 10/30/19 Ex.11

24 <sup>47</sup> Pierce County Case No. 96-2-09938-0, City Of Tacoma v Taxpayers and Ratepayers of Tacoma.

25 <sup>48</sup> City's 11/5/96 Memorandum In Support Of Motion For Summary Judgment. Shook Decl 10/30/19, Ex.  
26 12, Ex. 13. *See* Section I, of the City's brief. These Summary Judgement Orders confirmed City's  
authority to establish a "Telecommunication System."

<sup>49</sup> The Public Service Commission, now the UTC, regulates utilities with strong police powers under  
RCW 80.04.470: "Commission to enforce public service laws. Police power."

<sup>50</sup> *see* RCW 54.16.005 "Telecommunications" has the same meaning as contained in RCW 80.04.010.

<sup>51</sup> RCW 35.99.010 "**Telecommunication Systems**" are not cable service or cable television systems..  
Telecommunication systems are operated under Master Permits. Section (3) "Master permit" "A master  
permit does not include cable television franchises" (7) "Telecommunications service" means the  
transmission of information by wire, radio, optical cable, electromagnetic, or other similar means.

1     1.     Telecommunications Companies are Public Utilities.

2           Common law and statutory definitions of “Public utilities” are synonymous with “public  
3 service.” By all definitions, Click! is a “public utility” and a “public service company.”

4           Click! is a "public utility" under RCW 36.87.140:

5                   The term "public utility" as used in this section shall include utilities owned,  
6                   operated, or maintained by every gas company, electrical company, telephone  
7                   company, telegraph company, and water company whether or not such  
8                   company is privately owned or owned by a governmental entity.

9           Public utility and “public service company” share the same definition:

10                   RCW 80.04.010 (23) ““Public service company" includes every gas company,  
11                   electrical company, telecommunications company, wastewater company, and  
12                   water company.”<sup>52</sup>

13           The Public Service Commission Law, defined a “public service company.”<sup>53</sup>

14                   Rem.Rev.Stat. §10344, **The term 'service' is used in its broadest and most  
15                   inclusive sense.** The term 'public service company' includes every common carrier,  
16                   gas company, electrical company, water company, **telephone company, telegraph  
17                   company, wharfinger and warehouseman, as such terms are further defined . . .**  
18           *Inland Empire Rural Electrification . v. Department of Public Service*, 199 Wash. 527, (1939)

19           Click! is a “utility,” as a “communications utility, with its vast underground infrastructure:

20                   "Communication utility" means any utility engaged in the business of affording  
21                   telephonic, telegraphic, cable television or other communication service to the  
22                   public in all or part of the conversion area and includes telephone companies and  
23                   telegraph companies as defined by RCW 80.04.010. (Quoting RCW 35.96.020)

24     3.     Telecommunications Has Been Defined as A Public Utility in Washington Since 1909.

25           Railroads were the first regulated utility in Washington State, in 1905, under the Railroad  
26           Commission.<sup>54</sup> Telecommunication was the second utility to be regulated, in 1909, also under  
27           the Railroad Commission.<sup>55</sup>

28           The Railroad Commission became the “Public Service Commission” in 1911, with a "Public  
29           service company" including every “gas company, electrical company, water company, telephone  
30           company, telegraph company.” *See* Session Laws of 1911, Ch. 117, Pg.538.<sup>56</sup>

31           <sup>52</sup> Municipal utilities are except from Title 80 RCW -“Public Utilities” Tacoma enjoys “home-rule.”

32           <sup>53</sup> 1911, Ch. 117, Pg 546, *also* Shook Decl. 12/12/19 Ex. 35, Pg 5.

33           <sup>54</sup> Railroad Commission was established by the Session Laws of 1905, Ch. 81, Pg. 145.

34           <sup>55</sup> The U.S. Interstate Commerce Act of 1887 regulated railroads and preceded Washington state’s Laws  
35           of 1909, Ch. 93. Sec. 3 Pg. 192, 196, which did: “authorize the commission to regulate telephone and  
36           telegraph companies and their rates and charges, to prevent discrimination and extortion by such  
37           companies; and to authorize the Railroad Commission of Washington to make all necessary rules.””

38           <sup>56</sup> Since 1961 UTC has regulated utilities an under Title 80. RCW. *See* 1961 c 14 § 80.01.010

1 As an advanced “telecommunication system” and “enterprise” of TPU, generating over \$25  
2 million in revenue, providing a necessary “public service” to over 35,000 TPU utility accounts,  
3 Click! meets every definition of a “*public utility system*.”

4 4. An Attorney General’s Opinion, Professor Brown’s Definition and Eminent Domain.

5 The AGO finds “Telecommunications businesses are public utilities.” See Authority Of  
6 Cities, Towns, And Counties To Provide Telecommunications Services. AGO 2003 No. 11<sup>57</sup>

7 Consider Professor Richard E. Brown’s definition of public utilities. He wrote the book on  
8 public utilities, Business Essentials for Utility Engineers, and is a Fellow of the Institute of  
9 Electrical and Electronics Engineers (IEEE), with BSEE, MSEE and PhD degrees from the  
10 University of Washington in Seattle, an MBA degree from the University of North Carolina at  
11 Chapel Hill, and as a registered professional engineer, Prof. Brown defines “public utility” as:

12 *Public utilities* provide essential services to society. Because of their  
13 importance, legal precedent has upheld the need for specialized government  
14 oversight of these businesses to ensure that safe and reliable utility services  
15 are widely available for rates that are reasonable and non-discriminatory.<sup>58</sup>

16 Public utility services are often established via eminent domain and possess natural  
17 monopoly characteristics, with “pricing power,” thus creating a need for regulation.<sup>59 60 61</sup>

18 Click! fits the definition of “public utility,” with a brand is organized as a “system,” holding  
19 itself out<sup>62</sup> to supply telecommunication and data transport services to a class of TPU ratepayers,  
20 subject to special governmental regulation, both at the local and state levels.<sup>63 64</sup>

21 <sup>57</sup> Attorney General Opinions are “entitled to great weight.” See *Five Corners Family Farmers v. State*,  
22 173 Wn.2d 296, 308, 268 P.3d 892 (2011)

23 <sup>58</sup> Dr. Brown has provided consulting services to most major utilities in the United States and many  
24 around the world, is a frequent instructor, having taught courses in eleven countries, and is an adjunct  
25 professor at North Carolina State University. Shook Decl. 12/12/19 Ex. 40 Pg. 4

26 <sup>59</sup> Large fixed costs are associated with establishing public-utilities, like a telecommunication system, act  
as a barrier to entry, creating a “natural monopoly” with “pricing power” -or the ability to unfairly raise  
rates, since demand is “inelastic.” Buyers, needing the service, have little choice but to pay .

<sup>60</sup> Telecommunication companies are regulated in Washington State under Chapter 80.36 RCW; however,  
in deference to municipal control, RCW 80.04.500 expressly provides Tacoma with home-rule authority  
for most of the provisions of Title 80 RCW. As a result, rates and policy for Click! are set by Council.

<sup>61</sup> Broadband service is generally a monopoly in the USA. Shook Decl. 12/??/19, Ex. 46, also “market for  
local access to broadband tends to be a “natural monopoly.” See WI-FI Everywhere: Universal  
Broadband Access as Antitrust and Telecommunications Policy Hannibal Travis American University  
Law Review, Vol.55 Issue 6 (2006) Shook Decl. 12/12/19, Ex. 51

<sup>62</sup> See Shook Decl. 12/12/19 Ex. 42 Click! holds itself out as providing Broadband Telecommunications  
services. Also see RCW 54.16.005 (4) as “the provision of telecommunications services or facilities for  
resale by an entity authorized to provide telecommunications services to the general public and internet  
service providers.”

<sup>63</sup> Council fixes Click! rates and policies. The State also regulates broadband under RCW 19.385.020.

1 Constructed upon 140 years of the City’s municipal infrastructure, established under broad  
2 eminent domain authority, as represented in the many easements, conduits, vaults and facilities  
3 underlying the utility system, Click! further fits the definition of a utility.<sup>65</sup>

4 The City has broad power, “to condemn land and other property and damage the same for  
5 such and for any other public use.” As a utility, City “may acquire, construct, purchase, condemn  
6 and purchase, own, operate, control, add to and maintain lands, easements, rights-of-way.” As a  
7 telecommunication company, “The right of eminent domain is hereby extended to all  
8 telecommunications companies organized or doing business in this state.”<sup>66</sup>

9 To sum it up, a “municipal public-utility” is a non-profit enterprise, holding itself out under a  
10 brand or system to supply a “public service” to a specific class of customers, subject to special  
11 governmental regulations that insure equitable, non-discriminatory, prices and practices.<sup>67</sup>

12 5. Invention of Broadband and Reemergence of Municipal Communications Utilities.

13 At the dawn of the telecommunication age, municipal communication utilities were very  
14 commonplace. In 1907 the U.S. Census Bureau did a Special Report on Telephones and found  
15 over 580,000 non-profit community lines operated by “Mutual Systems,” “Cooperative  
16 Associations” and “Farmer Lines” across the nation.<sup>68</sup> History shows AT&T crushed such  
17 competition and monopolized this industry, but was broken up in 1984. With subsequent federal,  
18 state and local governmental support, the public is regaining control of essential communication  
19 facilities.<sup>69</sup> A revival of municipal ownership of telecommunication utilities is unfolding.<sup>70</sup>

20 Anacortes, Washington, is an example of a municipal telecommunication utility regaining  
21 control of such services. Anacortes now offers retail broadband utility service alongside their  
22 water utility. Their first customer was recently installed. (Shook Decl. 12/12/19 Ex. 58, Pg. 8)

24 <sup>64</sup> Answer, Pg. 6 ¶33. Admits Click! “partners” with local ISP “partners” to provide internet service.

25 <sup>65</sup> Transferring City’s “police power” of eminent domain, *juris privati*, is likely unconstitutional.

26 <sup>66</sup> Eminent domain authority for a City is found in the Session Laws of 1893, Ch. 84, Sec.1, Pg. 189, now  
RCW 8.12.030, for a utility in RCW 35.84.020, and a “telecommunications company,” RCW 80.36.010.

<sup>67</sup> A “public service” is a service “holding itself out, expressly or impliedly, to supply its service or  
product for use either by the public as a class or by that portion of it that can be served by the utility”  
*Inland Empire Rural Elect. v. Dept. of Public Service of Wash.*, 199 Wash. 527, 537, 92 P.2d 258 (1939)

<sup>68</sup> Shook Decl. Ex. 58, Pg.1 Department Of Commerce: The Census on Telephones: 1907

<sup>69</sup> Shook Decl. 12/12/19, Ex. 49. A Brief History of American Telecommunications Regulation.

<sup>70</sup> The Telecommunications Act of 1996 created broad opportunities for municipal ownership.

1 Click! is a public utility, by common language definitions, regulatory statutes, numerous  
2 municipal utility examples, the Attorney General’s opinion, 500 years of case/common law, all  
3 of which confirm that a municipal telecommunications business, affected with a public interest,  
4 subserving a public need, exercising police power of eminent domain and rate setting, standing at  
5 the gateway of commerce, subject to public regulation, holding itself out expressly for supplying  
6 essential public services, devoted to public use and operated for the common good and benefit of  
7 Tacoma Public Utility ratepayers, is subject to an approving vote of the people. As the high court  
8 found, in *State v. Kuykendall*, 137 Wash. 602, 243 P. 834, (1926)<sup>71</sup>

9 [I]f in the beginning or during its subsequent operation the pipe line was devoted  
10 by its owner to public use, and if the right thus extended to the public has not  
11 been withdrawn, there can be no doubt that the pipe line is a public utility.

12 6. Additional Utility Functions, Utility Purpose and Utility Benefits.

13 Click! offsets TPU’s telecommunication costs, provides revenue diversification,<sup>72</sup> and spurs  
14 economic development, all of which increases revenues for TPU’s other utilities,<sup>73</sup> increasing  
15 profits and lowering rates for all Power customers. Click! is a utility with a true nexus to Tacoma  
16 Power’s primary purpose.<sup>74 75</sup>

17 The community, at large, benefits from lower broadband rates due to competition in the  
18 market for broadband services. Competition between Click!’s Internet Service Providers  
19 (“ISPs”) partners, over Click!’s open access system, results in fierce competition for Comcast.  
20 This results in lower rates for the region. All of which spurs economic growth and serves to  
21 benefit TPU’s other utility purposes.<sup>76 77 78</sup>

22 <sup>71</sup> Drawing on *Budd v. People*, 12 S.Ct. 468, 143 U.S. 517, 36 L.Ed. 247 (1892), quoting *Munn v. Illinois*,  
23 94 U.S. 113, 24 L.Ed. (1877).

24 <sup>72</sup> Similarly, Chattanooga’s Electric Power Board (“EPB”) experiences savings. In the 2017 annual report,  
25 EPB announced: “Lower Power Rates: Because EPB Fiber Optics pays such substantial allocations and  
26 access fees to EPB Electric Power, the electric system has been able to avoid a significant electric rate  
increase. As a result, all electric customers are enjoying lower electric rates regardless of whether they are  
EPB Fiber Optics customers or not.” Shook Decl 12/12/19 Ex. 38.

<sup>73</sup> This provides a “sufficiently close nexus to the purpose and object” of TPU’s non-telecommunication  
utilities, water and power. *City of Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 696 (1987).

<sup>74</sup> The threshold for nexus is quite low. Utility buying art to beautify its own facilities was sufficient nexus;  
but, utility could not buy art to benefit the general public. “Such projects beautify employee workspaces and  
customer service areas and thereby helped increase the efficiency of workplace operations and acted to the  
benefit of City Light.” *Okeson v. City of Seattle*, 130 Wash. App. 814, 125 P.3d 172 (2005) (Okeson II).

<sup>75</sup> Chattanooga, Tennessee operates an electric provider known as the Electric Power Board (EPB). In re  
City of Wilson, North Carolina, 30 FCC Rcd. 2408, 2015 WL 1120113, at \*7 (2015)

<sup>76</sup> Shook Decl. 12/12/19, Ex. 52, see Harvard Study on Broadband confirming lower prices.

1 **C. Municipal Utilities Commonly Provide Telecommunication Utility Services**

2 “The municipal corporation is allowed to go into the business only on the theory that thereby  
3 the public welfare will be subserved.” *Springfield Gas & Elec. Co. v. Springfield*, 257 US 66 -  
4 Supreme Court 1921. Municipal communication systems, owned and operated by non-profit,  
5 community entities, commonly provide broadband services in the modern era.<sup>79</sup>

6 Mr. Shook’s report, A Sampling of Municipal Broadband Utilities in the USA (2019),  
7 reviews 25 such utilities, with a short “description” of each utility’s services, taken directly from  
8 each utility’s own website. **Please See** Shook Decl. 10/30/19 Ex. 18.

9 Kansas Municipal Utilities (“KMU”) represents 178 cities and communities that have  
10 decided municipal utilities are the best choice for providing electricity, natural gas, water, sewer  
11 and telecommunications services. The KMU website states:

12 Kansas has a long history of municipal utility operation. When private business  
13 would not or could not serve the utility needs of its citizens, city governments  
14 stepped up to provide essential utility needs – electric, gas, water, wastewater,  
15 stormwater, **and telecommunication services**. These community-owned  
16 utilities are municipal by choice. (Emphasis added)<sup>80</sup>

17 1. Washington’s Public Utility Districts Operate Telecommunication Utilities.<sup>81</sup>

18 Courts may interpret a statute by looking to “other statutes dealing with the same subject  
19 matter.” The PUD statutes are related statutes and helpful when “read together and harmonized.”  
20 *Harmon v. Dept. of Social and Health Services*, 134 Wn.2d 523, 530, 951 P.2d 770 (1998)

21 Municipal ownership and operation of telecommunication systems is common in Washington  
22 State. Public Utility Districts (“PUDs”) are non-profit municipal corporations organized to

Competition And Choice For Community Development And Highspeed Internet Access. (2015) Shook  
Decl. 10/30/19 Exhibit 21, Pg. 14, 15.

<sup>80</sup> KMU website, last accessed 11/19/19, available at <https://www.kmunet.org/page/Benefits?> Also  
available at Perma Link <https://perma.cc/8FDZ-XX8D> and as Shook Decl. 10/??/19 Ex.

<sup>81</sup> See RCW 54.04; also *Wash. Natural Gas Co. v. PUD 1*, 77 Wn.2d 94, 97, 459 P.2d 633 (1969).

1 provide public utility services. With less authority than charter cities like Tacoma, fourteen  
2 PUDs currently operate telecommunication “utility” systems across our state.<sup>82 83 84</sup>

3 Washington’s UTC considers broadband a “utility.”<sup>85</sup> (Shook Decl. 12/12/19 Ex. 41 Pg.1).

4 PUDs recognize broadband is “utility service,” vital to education, economic growth and  
5 employment.”<sup>86</sup> Kitsap County PUD calls “Broadband” a “utility.”

6 PUDs were formed in 1930 to provide equitable access to modern utilities for  
7 Washington's communities. Today, this *includes broadband*  
8 *telecommunications*. Watch our video to see how Kitsap PUD is continuing  
9 the mission and working to bring *this essential utility* to all of Kitsap's  
10 communities. (emphasis added).

11 Municipal broadband utilities are defined in Title 54, RCW -Public Utility Districts, in RCW  
12 54.16.420 “Retail internet service.” (1)(a) "Broadband" means high-speed internet access and  
13 other advanced telecommunications services.<sup>87</sup> (b) "Broadband network" means networks of  
14 deployed telecommunications equipment and technologies necessary to provide broadband.

15 PUDs are regulated, under RCW 54.16.420(15): “A public utility district providing retail  
16 internet service must separately account for any revenues and expenditures.” RCW 54.16.330,  
17 rates may not be “discriminatory or preferential,”: Provision of Telecommunications Services:

18 (2) A public utility district providing **wholesale or retail telecommunications services**  
19 shall ensure that rates, terms, and conditions for such services are not unduly or  
20 unreasonably discriminatory or preferential.

21 Regulation of PUD broadband utilities demonstrates Click! is also a utility, providing  
22 essential utility services. Chapter 35.94 RCW applies to such municipal utility assets.<sup>88</sup>

23 **D. The City’s Telecommunication System Provides Essential Utility Services.**

24 <sup>82</sup> See RCW 54.16.330(1)(a) A public utility district . . . may construct, purchase, acquire, develop . . .  
25 operate, and maintain any telecommunications facilities . . .

26 <sup>83</sup> First class cites conferred with an omnibus grant of power under RCW 35.22.570 .

<sup>84</sup> “district is publicly owned and operated and that it has no profit motive.” *Snohomish County Pub. Util.*  
*Dist. 1 v. Broadview Television.*, 91 Wn.2d 3, 8-9, 586 P.2d 851 (1978)

<sup>85</sup> The Australia’s Commonwealth has funded a National Broadband Network. Every Australian will have  
access to 100 Mbps service. 11 million homes are now ready to connect. Shook Decl. 12/12/19 Ex. 60.

<sup>86</sup> Shook Decl. 12/12/19 Ex. 38. Washington PUD Association (“WPUDA”) website, last accesses on  
11/23/19 “Widely available and reliable access to broadband service is important to our state’s economic  
health, access to education and essential services, and quality of life. Public utility districts play an  
important role in connecting communities by providing access to high-speed broadband service.”

<sup>87</sup> See 47 U.S. Code § 1302 (d)(1) The term “advanced telecommunications capability” is defined, without  
regard to any transmission media or technology, as high-speed, switched, broadband telecommunications  
capability that enables users to originate and receive high-quality voice, data, graphics, and video  
telecommunications using any technology.

<sup>88</sup> Click! services were conceived as a “utility purpose.” Shook Decl. 12/12/19, Ex. 30, Pg. 10, 11.

1 Broadband is commonly considered an essential utility.<sup>89</sup> State, federal and local public policy  
2 support broadband as a municipal utility service.<sup>90</sup> The City describes its own “Mission” in  
3 provision of these services as “vital to our quality of life.” (Shook Decl. 12/12/19, Ex 48, Pg. 8).

4 Washington state’s “Broadband Office,” established in 2019, with “AN ACT Relating to  
5 expanding affordable, resilient broadband service to enable economic development, public  
6 safety, health care, and education” *see* RCW 43.330.532 Broadband office—Established:<sup>91</sup>

7 The legislature finds that: (1) Access to broadband is critical to full participation in  
8 society and the modern economy provides a public benefit to the citizens of  
9 Washington by enabling access to health care, education, and essential services,  
10 providing economic opportunities, and enhancing public health and safety. *Id.*

11 In RCW 43.330.400 the Legislature found broadband technology advancements:

12 [E]nhance economic development and public safety . . . improved health care,  
13 access to consumer and legal services, increased educational and civic participation  
14 opportunities, and a better quality of life for the state's residents.

15 In July 2019, Pierce County Council passed a Resolution stating:

16 "Broadband" - forms the basis of an essential 21st Century infrastructure in our  
17 digital world and economy. It is vital to the economic development and quality of  
18 life for the residents, businesses and institutions of Pierce County and throughout  
19 Washington. (*see* Shook Decl. 12/12/2019 Ex. 37, and for Resolution *see* Ex. 54)

20 Pierce County Council’s 2019 Broadband Study concluded:

21 Broadband is essential, much like education, electricity, and water or sewer. It has  
22 become a primary enabler of economic mobility and prosperity, a “*fourth utility*” *Id*

23 Federal policy supports municipal communications.<sup>92</sup> Benefits are widely known and broadly  
24 promoted. Like roads, broadband is essential infrastructure for a modern economy. Broadband is  
25 a core utility for households, businesses and community institutions.<sup>93 94</sup>

26 <sup>89</sup> *See* 47 U.S. Code § 1301 (2) “Continued progress in the deployment . . . of broadband technology is  
vital to ensuring that our Nation . . . continues to create business and job growth.

<sup>90</sup> RCW 80.36.630 (c) "Broadband service" means any service providing advanced telecommunications  
capability, including internet access and access to high quality voice, data, graphics, or video.

<sup>91</sup> *See* RCW 43.330.532 – Findings 2019 c 365 The legislature finds Broadband (2) “serves a fundamental  
governmental purpose and function and provides a public benefit to the citizens of Washington. Also,

<sup>92</sup> *See* 47 U.S. Code § 1301 (4) “The Federal Government should also recognize and encourage  
complementary State efforts to improve the quality and usefulness of broadband data and should  
encourage . . . the continued growth of broadband services . . . for the . . . the Nation.

<sup>93</sup> Shook Decl. 10/30/19, Ex. 21, *see generally* Report from the executive office of the president:  
Community-Based Broadband -The Benefits Of Competition And Choice For Community Development  
And Highspeed Internet Access. (January 2015).

<sup>94</sup> Shook Decl. 10/30/19 Ex. 22, Pg. 3 -*see generally* A Light in Digital Darkness: Public Broadband after  
Tennessee v. FCC 20 Yale J. L. & Tech. 311 (2018).

1 “Today, **broadband** is taking its place alongside water, sewer and electricity as essential  
2 infrastructure for communities”. Quoting USDA Report (Shook Decl. 10/30/19, Ex. 23).<sup>95</sup>

3 **Broadband is crucial for increased health, educational and economic opportunities,**  
4 **as well as for job and business creation and growth.** Broadband can help close the  
5 digital divide between rural and urban communities. (USDA Rural Development’s  
6 Rural Utilities Programs website, *last visited* 10/30/19)

7 **E. Click! is a Municipal Utility “System Requiring a Vote under Charter 4.6**

8 Charter 4.6 requires a vote upon disposal of a “System.” Click!’s services are not general,  
9 sovereign, government functions, provided for the common good of the general public at large,  
10 to customers who do not request service. Click! is a municipal utility enterprise, providing  
11 proprietary public utility services for the benefit of the Utility and its customers.

12 That Click! is a “System,” operating under an “organizational structure,” with a general  
13 manager providing oversight, is important to note.<sup>96</sup> The “proprietary” services Click! provides  
14 define Click! as an “enterprise.” An enterprise is a system.<sup>97</sup> (Shook Decl 12/12/19, Ex.26)

15 Click!’s services are provided, as a proprietary function, to the Utility’s customers.

16 In the context of utilities, the focus is on whether the utility "operates for the benefit of  
17 its customers, not the general public," or, stated differently, whether it "will [provide  
18 service] to a customer that does not request service." Okeson, 150 Wn.2d at 550. If it  
19 operates to serve customers, a utility is serving a proprietary function.

20 *City of Wenatchee v. Chelan County Public Utility District*, 181 Wn.App. 326, (Div. 3 2014)

21 Washington decisions have held that the operation of a water system or other utility  
22 serving billed customers is a proprietary function. *Russell v. City of Grandview*, 39  
23 Wn.2d 551, 553, 236 P.2d 1061 (1951)

24 **F. The City Confirms Click! is Part of a Utility by Taxing it as a Utility.**

25 Further admission is found in the City’s organization, labeling, treatment and Taxation of  
26 Click!, which show the City has consistently demonstrated its expressed intention that Click! is a  
public utility “system.”<sup>98</sup>

The Washington Constitution provides, in Article VII Section 5: Taxes, How Levied, that “  
every law imposing a tax shall state distinctly the object of the same to which only it shall be

<sup>95</sup> Shook Decl. 10/30/19, Ex. 23. USDA Rural Utilities Service - Telecommunications Programs:

<sup>96</sup> Shook Decl. 10/30/2019, Ex. 9, Pg. 3

<sup>97</sup> “Enterprise” is a “a business organization,” also, “a systematic purposeful activity.” “Systematic” is  
“relating to or consisting of a system. Merriam-Webster.com Dictionary Accessed 11 December 2019

<sup>98</sup> Shook Decl. 10/30/19, Ex. 17, Showing the \$629,716. The City Website states: “City Utility Tax”  
refers to a tax on public service businesses, including businesses that engage in telecommunications

1 applied.” The City’s collects a 7.5% “utility tax” on Click! activities, including broadband  
2 revenue, as a “public utility.” In 2018 this tax amounted to \$629,716 on broadband alone.<sup>99</sup>

3 The City’s taxation of Click! as a public utility, shows an express intent that Click! is a  
4 public utility. The City’s taxation policy, City Charter 4.4, allows taxation “upon any of the City-  
5 operated utilities.” By collecting the City’s B&O “utility tax” on Click!’s broadband services,  
6 City demonstrates for the Court that Click! is a utility in Tacoma. (Shook Decl. 10/30/19, Ex. 9).

7 Tacoma’s utility tax rate increased, from 6% to 7.5%, by Proposition 3. It was a “utility tax  
8 increase,” and Click!’s tax rate increased accordingly. More evidence that Click! is seen as a  
9 utility. (Shook Decl. 12/12/19 Ex. 56, Pgs. 3, 4, 6) (Shook Decl. 10/30/19 Ex. 16).

10 Tacoma’s website provides: “Tax Classifications: Business income is reported under a tax  
11 classification *depending on the type of business activity*.” Click!’s “Business Activity” is a  
12 “*utility*” under the City Tax Code. (Shook Decl. 12/12/19 Ex. 56, Pg. 3).

13 **G. Laws of 1917 and Origin of Right To Vote on Separation of Municipal Utility Assets.**

14 Struggles between private and public interests over municipal utility assets are nothing new.  
15 The instant case is a good example of why the laws of 1917 were established. Private interests,  
16 who might benefit from privatizing municipal utilities, are held in check by the vote.

17 The contemporaneous events, surrounding enactment of the 1917 statute, inform the Court  
18 of the Legislature's intent in requiring voter approval for privatization. A central figure in the  
19 “public power struggles,” between public and private utilities, was the Honorable Homer T.  
20 Bone, Chairman of the 1925 Tacoma City Charter Committee that provided Charter 4.6’s  
21 protective vote. His speech, during his 1932 senate campaign, provides context for interpreting  
22 RCW 35.94 and Charter 4.6.<sup>100</sup> (Shook Decl. 12/12/19, Ex. 67, Pg. 6).

23 The power trust of this nation has junked every standard of decency in its dealing  
24 with the public. It has debauched our institutions of learning and our legislative  
25 bodies. It has brazenly gouged the pocketbooks of the people to maintain a flood  
26 of propaganda calculated to deceive the public mind. Its victims have been  
compelled to pay for the flood of corruption it has loosed upon the country. It has  
set up a long train of abuses and usurpation of power pursuing invariably the

---

<sup>99</sup> Pursuant to City Charter 4.4, which permits tax “upon any of the City-operated utilities.” This defines Click! as a utility, given its taxation of as a utility. Res.# 39236 “earnings tax on utility companies.”

<sup>100</sup> Homer Truett Bone, In the early 1920s served as attorney for Port of Tacoma and Tacoma City Light, the city’s municipally owned utility. U.S. Senator, 1932-1944; judge, U.S. Circuit Court of Appeals, Ninth Circuit, San Francisco, 1945-1954.. Shook Decl. 12/12/19, Ex. 67 Pg. 12.

same object which is reducing the American people to a state of vassalage to the greatest instrument of plunder the world has yet produced.

The people must not only destroy the power of this insolent organization, but *write into the laws of the land* new guards for future security against such monstrous invasions of their rights.

One only need look at the record of the Washington State Legislature to perceive how completely a public body can be dominated by a power trust lobby. The thing has become a stench in the nostrils of decency in the state of Washington which *led to the people of this great state to rise in their wrath and pass the Grange Power measure by a big majority in 1930.* (emphasis added). (Shook Decl. 12/12/19 -Part II Ex. 67 )

RCW 35.94, the Laws of 1917, originally codified as Remington’s Revised Statutes (“RRS”) 1917 c 137 §§ 9512–14, included “telephone or telegraph plant and lines, or any system embracing all or any one or more of such works or plants or *any similar or dissimilar utility or system.*” That legislative intent remains today, unchanged. (Shook Decl. 12/12/19 Ex. 33, Pg. 8)

The consequences of privatizing municipal utility property without an approving vote of the public was memorialized in 1942, by our high court’s finding that two wharves, which had been privatized, were “part of” a municipal utility. *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 237–39, 130 P.2d 367 (1942). *Bremer*, cited RRS § 9512 thus:

'It is and shall be lawful for any city or town in this state now or hereafter owning any water works, gasworks, electric light and power plant, steam plant, street railway line, street railway plant, telephone or telegraph plant and lines, or any system embracing all or any one or more of such works or plants or *any similar or dissimilar utility or system*, to lease for any term of years or to sell and convey the same or any part thereof, with the equipment and appurtenances, in the manner hereinafter prescribed.'

The appellants point out that the statute specifically names a long list of utilities, but does not specifically mention wharves and docks. But the statute also says, '*or any similar or dissimilar utility or system.*' This, we think includes any kind of utility in whose operations the public has an interest, that is to say, any public utility.<sup>101</sup>

In 1917, the legislature included a list of public services considered municipal utilities for protection under RCW 35.94. This list was left dramatically open. The Legislators could have simply said “not limited to,” instead, with the emphatic phrase of “*any similar or dissimilar utility or system,*” Legislators were assertive in issuing the inhabitants of a city the right to vote over disposal of their municipal utility property.

---

<sup>101</sup> Such struggles continue, now between public broadband and private “broadband trusts,” to this day. Click! is target with equivalent tactics. Shook Decl. 12/12/19, Ex. 45. See Ms. Lachelle letter.

1 *Bremer* found a frivolous “abandonment,” done in anticipation of making the lease in  
2 question, had the “appearance of having *been made to circumvent the provisions* of sections  
3 9512-9514, inclusive, of the statutes.” (Emphasis added). As the *Bremer* court stated:

4 The appellants urge that the wharves had been abandoned. . . .As we read the  
5 record, the Front street wharf was not abandoned--or if so, only in anticipation of  
6 making the lease in question, for the ordinance approving the lease was passed on  
7 first reading by the city commission . . . it may well be doubted whether an  
8 abandonment would be approved which has the appearance of having been made  
9 to circumvent the provisions of sections 9512-9514, inclusive, of the statutes. *Id.*

10 The System telecommunication functionality is not just “similar or dissimilar” to the  
11 communication functionality contemplated in Chapter 35.94, it is identical. The System enables  
12 phone calls, using interconnected VoIP service. A lifesaving 911 call can be made over the  
13 System. The FCC’s Lifeline program subsidizes broadband as an advanced telecommunication  
14 service, with VoIP and broadband treated on the basis as traditional POTS service.<sup>102 103</sup>

15 Low-income consumers receive a standard \$9.25 monthly discount on Lifeline-supported  
16 VoIP or broadband Internet access service (Shook Decl. 12/12/19 Ex. 44).

17 1. Legislative Intent of Surplus and Plain Language of Municipal Utility Surplus Clause

18 RCW 35.94.040 was adopted in 1973, the legislative history shows the City was keenly  
19 interested in the bill. Senator “Slim” Rasmussen, 29<sup>th</sup> District, sponsored the bill, and  
20 Representative R. J. Kelley, Tacoma’s 28<sup>th</sup> District introduced it in the House.<sup>104</sup> TPU Director A. J.  
21 Benedetti, wrote supportive letters and testified on the need for the bill. In his March 5, 1973 letter  
22 to the House of Representatives, and his March 20, 1973 letter to the Chairman and Committee  
23 Members of the Senate Committee on Local Government, the Director acknowledged and agreed

24 <sup>102</sup> See 47 CFR § 54.400 (n) *Supported services*. Voice Telephony services and broadband Internet access  
25 services are supported services for the Lifeline program. The services are recognized equally under the  
26 FCC’s Lifeline program, providing subscribers a discount on monthly telephone service, broadband  
Internet access service, or voice-broadband bundled service. *Also* FCC Order 19-111 Released: November  
14, 2019 Bridging the Digital Divide. *also see* Shook Decl. 12/12/19 Ex. 44, Pg. 3

<sup>103</sup> See 47 CFR § 9.3 Interconnected VoIP service: Enables real-time, two-way voice communications and  
permits users generally to receive calls that originate on the public switched telephone network and to  
terminate calls to the public switched telephone network. VoIP capability includes *Automatic Number  
Identification* (“ANI”). A system that identifies the billing account for a call. For 911 systems, the ANI  
identifies the calling party and may be used as a call back number.

See 47 CFR § 54.400(m) Voice telephony service. “Voice telephony service” is defined as voice grade  
access to the public switched network or its functional equivalent; . . . access to the emergency services  
provided by local government or other public safety organizations, such as 911 and enhanced 911. . .

<sup>104</sup> House Bill 939, and Senate Bill 2835 Shook Decl. 12/12/19, Ex. 33, Pgs. 23, 31

1 with the importance of “*the confirming approval of the voters*” for surplus of “*operating*” utility  
2 assets.<sup>105</sup>

3 Director Benedetti assured Legislators that, “*Such procedure, of course, is desirable* when in  
4 fact all or *an integral part of an operating utility* is to be so disposed of.” The Director added:

5 This bill will accomplish procedural flexibility in such transactions without  
6 repealing the formalized procedures required in the situations involving utility  
operating plant and properties. (*see* Shook Decl. 12/12/19, Ex. 33, Pgs. 5, 6).

7 The Local Government Committee took up the matter. In an April 6, 1973 memo, Legislative  
8 Executive Secretary J.W. Gunther wrote Chairman Rep. Haussler, explaining the purpose of the bill.

9 Under the existing law, there is a long, detailed requirement for the calling of bids,  
10 passing of resolutions and all this appears to be rather cumbersome for the purpose  
of disposing of surplus properties. (*see* Shook Decl. 12/12/19, Ex. 33, Pg. 18)

11 At the first reading of the bill in the Senate, on March 14, 1973, surplus assets were defined by  
12 the term “*unusable property*,” and real estate defined as “unimproved lands.” In a hand written  
13 note, the terms “unusable” and “unimproved” were identified for removal as “*superfluous*,”  
14 indicating the word “surplus” was clear enough.<sup>106</sup> (Shook Decl. 12/12/19, Ex. 33, Pg. 3)

15 On March 16, 1973, Mr. Nolan, Deputy City Attorney for TPU, spoke to the House Local  
16 Government committee and assured Legislators this bill would simply allow TPU “*the same*  
17 *privileges*” for surplus enjoyed by Public Utility Districts. (Shook Decl. 12/12/19 Ex. 33, Pg. 38)

18 A direct comparison to the PUD “*privileges*,” and assurance of seeking identical limitations on  
19 surplus authority, was also cited in Director Benedetti’s letters. The Director confirmed for the  
20 Legislators, that the authority to surplus was “consistent with that *long enjoyed by the Public Utility*  
21 *Districts* under RCW 54.16.180.” (Shook Decl. 12/12/19 Ex. 33, Pg. 18 ).

22 The Director’s comparison was fair. PUDs and “cities and towns” are municipal corporations  
23 with “the same powers” and “same duties” for disposal of utility assets. RCW 54.16.180 (9)

24 ***Districts are municipal corporations for the purposes of this section.*** A commission  
25 shall be held to be the legislative body, a president and secretary shall have the same  
26 powers and perform the same duties as a mayor and city clerk, and the district resolutions  
shall be held to be ordinances ***within the meaning of statutes governing the sale, lease,  
or other disposal of public utilities owned by cities and towns.*** (emphasis added).

Which makes sense, given both surplus statutes, RCW 35.94.040 and RCW 54.16.180(2)(b),

<sup>105</sup> Shook Decl. 12/12/19, Ex. 33, Pgs. 5, 6.

<sup>106</sup> Shook Decl. 12/12/19, Ex. 33, Pgs. 22. - terms “unusable” and “unimproved” as superfluous.

1 share a common origin, *in the Laws of 1917* and the same protective statues in RRS §§ 9512 -9514.

2 From 1945 to 1955, the City and PUDs shared identical statutory authority for disposal of their  
3 utility property. Surplus was regulated in *exactly the same way*, under *exactly the same laws*. The  
4 Laws of 1945. House Bill 342, Chapter 143, Section 6(m), Page 413, specifically linked PUD's and  
5 the City's process for the sale, lease or disposal of the people's assets.<sup>107</sup>

6 It is, and shall be lawful for any public utility district organized hereunder to sell and  
7 convey, lease or otherwise dispose of all or any part of the works, plants, systems,  
8 utilities and properties authorized by this act and owned by it after proceedings and  
9 approval by the voters of the district as provided for in chapter 137, Laws of 1917,  
(sections 9512, 9513 and 9514 of Remington's Revised Statutes of Washington).

10 Only two amendments have ever been made to the surplus language in the 1945 statute. The  
11 first came in 1955, when PUDs gained "flexibility in procedure," with surplus authority, With the  
12 newly created RCW "chapter and section" numbering system, PUDs were regulated under Title 54,  
13 when Legislators first modified RRS §§ 9512 -9514's cumbersome process for disposal of surplus  
14 utility property in the Laws of 1955, Senate Bill 367. Thus was created RCW 54.16.180. <sup>108</sup>

15 To this day, RCW 54.16.180 represents the unmistakable legislative intent regarding the term  
16 "surplus" in relationship to municipal utility property under RRS §§ 9512 -9514.

17 It would be 18 more years until Tacoma gained surplus authority. During that time, the PUDs  
18 surplus statue remained unchanged. In 1973 RCW 54.16.180 was the template for the same  
19 surplus authority Tacoma now sought for improving the same "rather cumbersome" process.<sup>109</sup>

20 The Tacoma Utility Director and two Tacoma City Attorneys testified that the surplus  
21 authority they sought was "the same privilege," "consistent with that long enjoyed by the Public  
22 Utility Districts under RCW 54.16.180." <sup>110</sup> Here is RCW 54.16.180 as it appeared in 1973. This  
23 is the surplus authority Tacoma sought. Legislative intent for surplus under RRS § 9512 is here.

24 That a district may sell, convey, lease, or otherwise dispose of all *or any part of the*  
25 *property owned by it*, may sell, convey, lease, or otherwise dispose of to any person or  
26 public body, any part, either within or without its boundaries, which has become  
unserviceable, inadequate, obsolete, worn out or unfit to be used in the operations of the  
system and which is no longer necessary, material to, and useful in such operations,  
without the approval of the voters. (*see* Laws of 1955, Ch. 390, Pg. 1685.) (emph. added)

<sup>107</sup> The Laws of 1945, Ch. 143 Pg. 413. Shook Decl. 12/12/19, Ex. 33, Pg. 5.

<sup>108</sup> See the Laws of 1955, Ch. 390, S.B. 367, Section 19, Pg. 1685. Shook Decl. 12/12/19, Ex. 33, Pg. 4

<sup>109</sup> Shook Decl. 12/12/19, Ex. 33, Pg. 18 – Legislative Executive Secretary J.W. Gunther wrote Chairman  
Rep. Haussler, explaining the purpose of the bill.

<sup>110</sup> Quoting Director Benedetti's letters, *surpa..* All of this represents legislative intent for surplus.

1 This 1973 version of RCW 54.16.180 shows the legislative intent for “surplus” under RCW  
2 35.94.040. This is the very statute which RCW 35.94.040 was intended to replicate. It was  
3 presented to Legislators, as a direct comparison and a basis for their unanimous adoption of  
4 RCW 35.94.040. It represents what Legislators intended to accomplish, in 1973, by modifying  
5 the 55-year old legacy of RRS §§ 9512 -9514. Legislative intent for “surplus” under RCW  
6 35.95.040 is revealed for the Court in this 1973 version of RCW 54.16.180.

7 Understanding the legislative intent behind RCW 35.94.040 provides context for statutory  
8 interpretation of “surplus” in the instant case. The statutes terms, such as “obsolete,” “worn out,”  
9 “unserviceable,” “no longer useful” or “unfit to be used” in the operation of the system, do not  
10 describe a state-of-the-art fiber optic system, earning \$25 million a year, and being “leased” for 40  
11 years, with a reversionary interest. The Court cannot substitute its judgement for that of the  
12 legislators. Click!’s status, as an operational enterprise, simply does not meet the Legislator’s intent  
13 of the term “surplus.” When considering the meaning of “surplus,” associated words placed in the  
14 statute control the meaning of a word. *Cito v. Rios*, 3 Wn. App. 2d 748, 759, 418 P.3d 811, review  
15 denied, 191 Wn.2d 1017, 426 P.3d 747 (2018).

16 Only one other change has ever been made to the 1955 version of RCW 54.16.180. That came  
17 in 2008, with the Laws of 2008, Ch. 198, Pg. 8, Sec. 5, and further confirms legislative intent over  
18 disposal of surplus assets. Legislators made “surplus” even clearer, by adding the emphatic phrase,  
19 “**no longer useful in such operations, to any person or public body**.” The statute reads today: <sup>111</sup>

20 RCW 54.16.180 (2) A district may, without the approval of the voters, sell, convey, lease,  
21 or otherwise dispose of all or any part of the property . . . which has become  
22 unserviceable, inadequate, obsolete, worn out or unfit to be used in the operations of the  
23 system and which is no longer necessary, material to, **and useful in such operations, to  
24 any person or public body.** (emphasis added).

25 The words, “**useful in such operations to any person or public body**” shows legislative intent to  
26 protect assets from “**any person**” that would use productive public utility assets to continue  
providing the same utility service, or “such operations.”<sup>112</sup> In Click!’s case, the System is absolutely  
“**useful.**” The private buyer will provide exactly the same “**operations,**” for the next 40 years.

---

<sup>111</sup> Substitute House Bill 2639

<sup>112</sup> Consider a water pipeline, or water system, for example. The phrase “**useful in such operations**” would prohibit “surplus” from being applied to assets being sold to someone who would use them to continue supplying water. They pipeline could be salvaged for scrap, but not continue in public service.

1 “In resolving the meaning of a statutory term, we adopt the interpretation that best advances the  
2 legislative purpose.” *Citizens Alliance for Property Rights Legal Fund v. San Juan County*, 184  
3 Wn.2d 428, 437, 359 P.3d 753 (2015), and find the statutes plain meaning as “derived from the  
4 context of the entire act as well as any ‘related statutes which disclose legislative intent about the  
5 provision in question.’” *Jametsky*, 179 Wn.2d at 762 (quoting *Dep’t of Ecology v. Campbell &*  
6 *Gwinn, LLC*, 146 Wn.2d 1, 11, 43 P.3d 4 (2002)).

7 **H. Click! Serves a Useful Purpose and Disposal by Surplus is Substantive Ultra Vires..**

8 Click!’s fiber optic cable is used for data transport. All of the “fiber” is sheathed within one  
9 “outer jacket.” It is essentially one pipe consisting of a number of “tubes,” with each tube having  
10 a specific number of fiber “strands.” *See* (Shook Decl. 12/12/19 Ex. 31, Pg. 3)

11 On Click!’s system, there are 12 fiber optic strands in each “tube.” ***Click! currently uses one***  
12 ***“tube” for all Click!’s commercial services.*** There are *15 additional* “tubes” of dark fiber,  
13 representing the communities’ potential for future use. Click!’s current use of this fiber optic  
14 “backbone” is shown in “purple” on the City’s slide presentation from October 29, 2019.<sup>113</sup>

15 Privatization not only transfers complete control over the twelve strands of fiber currently  
16 used by Click!, but also vests complete control all over the ***additional 9 tubes, or 108 additional***  
17 ***strands of dark fiber***, needed for the community’s access to broadband services in the future.  
18 Explosive growth in data usage and broadband telecommunications is upon us. The community  
19 will require all this infrastructure and more. (Shook Decl. 12/12/19 Ex. 31, Pg. 14).

20 Equally as important are the DNS servers, DHCP servers, Caching servers, routers, switches,  
21 hubs, nodes, and intellectual property that enable the system. A most notable example an asset  
22 that is obviously not surplus is the IPv4 address, included in the CBTA. The agreement provides,  
23 in connection with the IRU, Tacoma Power will assign IPv4 addresses to Operator from CIDR  
24 131.191.0.0/17 and 192.173.160.0/20.”<sup>114</sup>

25 IP Addresses are numbers owned by the City and assigned to each customer device via  
26 Click!’s DHCP server, allowing devices to connect directly to the world wide web. The world

---

<sup>113</sup> *See* Shook Decl. 12/12/19 Ex. 31, Pg. 3 All required in increasingly digital world, to connect with friends and family, access goods and services. The IDC predicts the Global Datasphere, estimated to be 33 ZB in 2018, will grow to 175 ZB by 2025.

<sup>114</sup> The City owns the valuable IPv4 addresses included in the IRU. These are not “surplus.” All devices that connect to the Internet require an Internet Protocol (IP) address and IP addresses are a valuable commodity. Demand has exhausted the global supply of IPv4 addresses.

1 supply of IPv4 address is exhausted. They are a precious and valuable commodity, with a long  
2 waiting list of over a year. *See* Shook Decl. 12/12/19 Ex. 65.<sup>115</sup>

3 Defendant admits Click! is part of a municipal utility, providing a public service. These  
4 services are “municipal utility services.” If portions of Click! qualify as the “works, plant, *or*  
5 *system* owned by it or ***any part thereof***,” then vesting via surplus is ultra vires. A direct violation of  
6 statute. *Finch v. Matthews*, 74 Wash.2d 161, 172, 443 P.2d 833 (1968)

7 Property “originally acquired for public utility purposes” is not surplus, when that property  
8 continues providing “public utility service.” All the assets being conveyed were “originally  
9 acquired for public utility purposes.” The System was established to deliver telecommunication  
10 services to TPU customers, diversify TPU revenue, drive economic growth and offset costs for  
11 TPU. The property is not idle, or its operations discontinued. If privatized, the System would  
12 continue providing TPU customers with the same services. A property is not surplus, when  
13 continuing to provide the same municipal utility services.<sup>116 117</sup>

14 The City’s Resolution 40467, declaring surplus utility-owned property, inventory,  
15 equipment, and vehicles allocated to Click! Network, enables Resolution 40468, which  
16 authorizing execution of the CBTA to convey ownership of Click!. Together these Resolutions  
17 circumvent the public vote requirement in RCW 35.94.020. No bidding has been occurred in the  
18 surplus process, as is generally seen. (Shook Decl. 12/12/19, ¶ 1, and City Policy Ex. 54, Pg. 4)

19 A municipality does not have unbounded discretion to declare a utility surplus. *South Tacoma*  
20 *Way, LLC v. State*, 169 Wn.2d 118, 123, 233 P.3d 871 (2010) (governmental acts without authority  
21 are *ultra vires*). A municipality’s action is void, if contrary to law.

22 City’s “Declaration of Surplus Property” does not meet the standard of “surplus” under RCW  
23 35.94.040, which applies to property “not required for providing continued public utility  
24 service.” Since Click!’s “surplus” property will continue providing the same public utility  
25 broadband services to the same public utility customers, Council’s surplus Resolutions is an ultra  
26 vires application of the statute. A “contract contrary to the terms and policy of a legislative  
enactment is illegal and unenforceable. *South Tacoma Way, LLC v. State*, 169 Wn.2d 118, 233

---

<sup>115</sup> Cable modem customers receive 5 routable IP addresses with service, and FTTH users get 1,

<sup>116</sup> Imagine a public school being declared as “surplus” and privatized; but, in fact students still in attendance, only forced to pay whatever tuition of lunch program charges the private company requires.

<sup>117</sup> Under RCW 35.94.040, the System itself is required for “providing continued public utility service.”

1 P.3d 871 (2010) , *Hederman v. George*, 35 Wash.2d 357, 362, 212 P.2d 841 (1949); *State v. Nw.*  
2 *Magnesite Co.*, 28 Wash.2d 1, 26-27, 182 P.2d 643 (1947).

3 The City’s authority in exercising its proprietary power is limited. Tacoma may not act  
4 beyond the purposes of the statutory grant of power, *State ex rel. PUD 1 v. Wylie*, 28 Wash.2d  
5 113, 182 P.2d 706 (1947), or contrary to express statutory or constitutional limitations.  
6 *Metropolitan Seattle v. Seattle*, 57 Wash.2d 446, 459-60, 357 P.2d 863 (1960);

7 "Ultra vires acts are those done wholly without legal authorization or in direct violation of  
8 existing statutes." *Metro. Park Dist. of Tacoma v. State*, 85 Wash.2d 821, 825, 539 P.2d 854 (1975)

9 Click!’s public broadband system provides a valuable and “effective” way for TPU customers  
10 to connect to the Internet. Without Click!, “continued effective utility service” is impossible.  
11 Circumventing this process is a substantive violation of the statute and *ultra vires* act., rendering the  
12 contract void ab initio. *Faylor's Pharmacy v. Dep't of Soc. & Health Servs.*, 125 Wash.2d 488, 499,  
13 886 P.2d 147 (1994) This “right to vote” prevents corrupt disposal of public assets. Failure to allow  
14 the vote is an ultra vires action.

15 “Historically, the unauthorized contracts of both corporate and governmental  
16 entities, which by their nature represent the interests of groups of individuals,  
17 have been rendered void and unenforceable under the ultra vires doctrine.” *Noel*  
18 *v. Cole*, 98 Wash.2d 375, 655 P.2d 245 (1982).

19 Also, “where the procedure followed has not been in accordance with law, proceedings had  
20 thereunder must be held void,,” *Jones v. City of Centralia*, 157 Wash. 194, 289 P. 3, (1930), and,  
21 “the lease here in question was void ab initio, and that the warrants issued in payment  
22 therefor are invalid, because both the making of the lease and the issuance of the  
23 warrants, without the assent of the voters, were ultra vires of the town council.” See  
24 *State v. Town of Newport*, 70 Wash. 286, 126 P. 637, (1912)

25 The doctrine of ultra vires applies to governmental action to "protect the citizens and taxpayers  
26 from unjust, ill-considered, or extortionate contracts, or those showing favoritism" see *10 E.*  
*McQuillin*, Municipal Corporations § 29.02, at 200 (3d ed. 1981)

27 A municipal election cannot be avoided in conveying a going concern. Vesting a municipal  
28 utility’s telecommunications system, with in-service assets, active customer accounts, under  
29 surplus, is fundamentally a legal question of statutory interpretation. No factual issues require  
30 determination. Privatization removes all public oversight of operations and rates. As a sale,  
31 lease, and/or disposal of Click! Mr. Shook is entitled to the relief requested.

32 **I. Good Public Policy Prevents Ultra Vires Act Circumventing People Right to Vote.**

1 The right to vote is curative of all ills and the fundamental basis of all democracy.. See  
2 *Madison v. State*, 161 Wn.2d 85, 98, 163 P.3d 757 (2007). A vote is mandatory in this case.  
3 Preventing the ultra vires destruction of that right is good public policy.

4 Council’s authority is expressly limited, by extraordinary Charter and state statutory  
5 requirements for a public vote. Express authority is in the electorate. Circumventing the law  
6 cannot be validated. The matter must be “submitted to the voters of the city for their approval or  
7 rejection at the next general election.”

8 If Click! is surplus, any private company could pilfer the public treasury by deploying large  
9 campaign contributions to sway policymakers into privatizing utility assets. No such loophole  
10 should be opened by the Court. Protecting the people’s property from plunder and preserving  
11 them for the people who paid for them, is the purpose of the policies in RCW 35.94. The Court  
12 would be well informed by taking judicial notice of the fact that municipal utility ownership  
13 (“MO”) has always faced fierce opposition and criticism from entrenched powerful private  
14 interests facing municipal competition. <sup>118</sup> (Shook Decl. 12/12/19, -Part II, Ex. 67 )

15 When all the facts are considered together, the business plan, the Ordinance establishing  
16 Click!, the abundant statutory and judicial authority cited in City’s 1996 and 1997 Memorandum  
17 for the Summary Judgement, the legislative intent and history of RRS §9512 in Chapter 35.94  
18 RCW, the common definitions of “system,” “utility,” the bare fact Click! is owned and operated  
19 by a utility, taxed as a utility, provides essential service to 35,000 active accounts, earns \$25  
20 Million annually in revenue, has significant brand recognition, for all these reasons, Click! is  
21 obviously a municipal utility system providing the same services for which it was established.

22 The surplus resolution has every *appearance of having been made to circumvent the*  
23 *provision of Chapter 35.94 RCW*. It is procedurally *ultra vires*. The public’s investment in these  
24 assets must be protected, especially from the very same powerful private interests who opposed  
25 the creation of the system in the first place and would profit from privatization of these assets.<sup>119</sup>

26 <sup>118</sup> Consider the contemporary opposition, in 1917 and 1925, from private municipal rail, gas, telephone,  
water and power companies at the time Chapter 35.94 RCW and the Tacoma City Charter were written.  
Propaganda published at the time demonstrate the lobbying tactics, and motives, of those opposing to the  
hated “MO” (municipal ownership). For examples, see Shook Decl., 12/12/19 PART II Ex. 67.

<sup>119</sup> Thanks in large part to substantial lobbying efforts, twenty-one states have legislative barrier to  
municipal broadband networks Shook Decl. 12/12/19, Ex. 46, Pg. 601. Casting a Wider Net: How And  
Why State Laws Restricting Municipal Broadband Networks Must Be Modified. Many Communities see  
existing broadband offerings not meeting needs and are building municipal broadband networks.

When private companies cannot, or will not, deliver the essential infrastructure required for participating in modern society, municipalities must have the right to take such important matters into their own hands, as the citizens of Tacoma did, over 20 years ago, by creating, arguably, the nation’s first municipal broadband public utility system.

Voters can choose to “privatize” their municipal broadband telecommunication network, if they so desire. The law gives them that right and also spells out the process, including an approving vote of the people, required to accomplish it.

Defendant’s surplus declaration skirts the law and this Court must prevent disposal of an entire utility system without a vote of the people. Such a determination supports important public policy and protects voter rights.<sup>120</sup>

The laws of 1917 plainly encompass telecommunication systems such as Click!. On its face, the statute is not ambiguous. The people’s assets are serving a useful public purpose and require protection from wrongful privatization. Government officials are “trustees” and the electorate’s right to vote ensures accountability. Privatization requires a vote of the people.

**Conclusion**

For the forgoing reasons, the Court should grant Mr. Shook’s motion and declare City’s surplus resolution ultra vires

Respectfully submitted this 12<sup>th</sup> day of December 2019.

<sup>120</sup> Fortunately, the CBTA anticipates nullification of the IRU Agreement by the Court: There is no harm. The Agreement provides “In the event that, prior to Transfer of Operational Control, a court of competent jurisdiction issues an order nullifying or invalidating the IRU Agreement or restraining or enjoining either Party from executing the IRU Agreement . . . either Party shall have the right to terminate this Agreement, which shall be Party’s sole remedy.

**PLAINTIFF MITCHELL SHOOK'S  
RESPONSE TO DEFENDANT'S MOTION  
FOR SUMMARY JUDGMENT**

MITCHELL SHOOK,  
Plaintiff Pro Se,  
v.  
CITY OF TACOMA,  
Defendant.

I. INTRODUCTION

The definition of “public utility” is found in the Laws of 1917, House Bill 337, or Remington RRS § 9512 -9514, (“§ 9512”) now Chapter 35.94 RCW, titled: “An Act authorizing cities and towns to lease or sell any municipally-owned” utilities.<sup>1</sup> Providentially, Legislators provided a list of “utilities” protected from privatization by the public vote. The long list included “telegraph and telephone lines and plants and any other . . . system similar or dissimilar in character.”<sup>2</sup>

CHAPTER 137.

[H. B. 337.]

SALE OR LEASE OF PUBLIC UTILITIES OWNED BY CITIES OR TOWNS.

AN ACT authorizing cities and towns to lease or sell any municipally-owned water works, gas works, electric light and power plants, steam plants, street railway plants and lines, telegraph and telephone lines and plants and any other municipally-owned public utility, or public utility system similar or dissimilar in character.

Section 1 provided:

It is and shall be lawful for any city or town in this state now or hereafter owning any water works, gas works, electric light and power plant, steam plant, street railway line, street railway plant, *telephone or telegraph plant and lines*, or any system embracing all or any one or more of such works or plants or any similar or dissimilar utility or system, to lease for any term of years or to 'sell and convey the same or any part thereof, with the equipment and appurtenances. . . (emphasis added)

In 1945, this long list of municipally-owned utilities was “rewritten for brevity” by the Code Committee.<sup>3</sup> This “abbreviation” removed “telephone or telegraph plant and lines,” along with the long list and the emphatic language, “any similar or dissimilar utility.”<sup>4</sup>

Even broader language was substituted, with “any public utility works, plant or system owned by it or any part thereof. . .” With this one abbreviation, the “Laws of 1917” entered the RCW under Chapter 80, see image below. That language remains unchanged today.

<sup>1</sup> Passed by the Senate on March 6, 1917 and approved by the Governor March 15, 1917.  
<sup>2</sup> Shook Decl. 12/30/19, Ex.81, Reviser's Notes Volume 2, Revised Code of Washington, 1946, At 80-7, (stating RRS § 9512 was "rewritten for brevity.")  
<sup>3</sup> Shook Decl. 12/30/19, Ex. 81, Laws of 1942, Ch. 252, Sec. 1. (“continuing Code Committee with full power of revision and codification of the laws.”)  
<sup>4</sup> Important to note, because “Telegraph and Telephone” later becomes “Telecommunication” and the Ordinance creating Click!, and Court cases approving it, created a “Telecommunication System.”

CHAPTER 80.12  
SALE OR LEASE OF MUNICIPAL UTILITIES

Sections

- 80.12.01 Authority to sell or let.  
80.12.02 Procedure.  
80.12.03 Execution of lease or conveyance.

80.12.01 A city may lease for any term of years or sell and convey any public utility works, plant, or system owned by it or any part thereof, together with all or any equipment and appurtenances thereof.

80.12.02 The legislative authority of the city, if it deems it advisable to lease or sell such works, plant, or system, or any part thereof, shall

In 1985, the terms “*Telegraph and telephone*” were broadly replaced by the modern term “*Telecommunications*.”<sup>5</sup> Consequently, Chapter 35.94 (“Laws of 1917”) now encompass “Telecommunication,” as a municipal “utility.” Click! is a “*municipally-owned*” telecommunication (“Telecom”) system, hence protected from privatization by the public vote.

WASHINGTON LAWS, 1985

Ch. 450

Sec. 17. Section 80.36.030, chapter 14, Laws of 1961 and RCW 80-36.030 are each amended to read as follows:

Such (~~telegraph or telephone~~) telecommunications company may appropriate so much land as may be actually necessary for its telecommunications line (~~of telegraph or telephone~~), with the right to enter upon lands

Try as they may to recast the facts, Defendant’s attempt to convert a cancelled pilot meter program into a surplus declaration over Click!’s entire telecommunication enterprise runs headlong into the undisputed material fact that Click! was expressly created, designed and built to fulfill the community’s pressing need for an advanced “Telecommunication System.”

Click!’s services would continue under privatization, therefore Click! is “*required for providing continued public utility service*.”<sup>6</sup> Given Click!’s system is “useful” and “*required*” for continued service, Click! is not surplus. Privatization requires a vote of the people.<sup>7</sup>

The careful planning and construction of Click! included costly investments to secure “Additional Capacity,” which Click! utilizes and relies on today. Click! paid for these improvements, and continues to pay more than its share.<sup>8</sup> Defendant asserts Click! was built for Tacoma Power’s (“Power’s”) abandoned pilot meter program. This is misleading and wrong.

<sup>5</sup> Shook Decl. 12/12/19, Ex. 61, (examples of substitution). See Shook’s MPSJ, Pg. 10. See also Laws of 1985, Ch. 450, Senate Bill No. 3305, Pgs. 1978 -1995 (examples).

<sup>6</sup> RCW 35.94.040 limits surplus, with: “and is not required for providing continued public utility service.”

<sup>7</sup> Legislative intent for surplus under the Laws of 1917 is found in the PUD laws of 1945.

<sup>8</sup> See Shook Decl. 12/30/19, ¶ 1, (shared costs), E.g. Ex. 76, Operational Summaries (depreciation costs).

1 Defendant has substituted its judgment upon matters within the province of the City's  
2 Freeholders and State Legislators, who long ago determined the right to dispose of Tacoma's  
3 municipal utility assets rests in the electorate. There is no justification for Defendant's attempt to  
4 circumvent laws placing an express limitation on City's authority.

5 Citizens of Tacoma are not unique in reserving the right to vote on disposal of their municipal  
6 utility assets, *see Clark v. City of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d 669

7 [W]hen the voters of South Haven granted the privilege to generate power, they  
8 were not content to divest themselves of every managerial function normally  
9 associated with the operation of a business concern. By their city charter they  
10 have retained express power over the discontinuance of their public utility. The  
11 contract in question has the effect of violating section 13.5 of the charter for the  
12 city of South Haven and is therefore void unless approved by the voters as  
13 required by the charter."

14 Click! ("System") was created and funded as a "utility." The City's detailed 1996 plan, for a  
15 municipally-owned advanced telecom system, was a revolutionary and controversial concept.  
16 Authority to establish and fund the utility was blessed by two Court Orders.<sup>9</sup> Click! was born,  
17 built, bought and paid for as a utility system.<sup>10</sup> Municipal competition was divisive when first  
18 proposed.<sup>11</sup> It remains controversial across our nation today.<sup>12</sup> Power Superintendent at the  
19 time, Steve Klein, described the opposition in those early days,

20 My sense -- and this is my sense when I was there, and it's fairly accurate -- is the  
21 people in Click were wonderful. The service was wonderful. It was a local  
22 utility trying to do and doing good. How do you attack something like that? And  
23 so basically the opposition came up with, well, how do you attack it? You make  
24 people feel like they're being ripped off. And so every so many years, this theme  
25 would build up again, and here -- here it was again. (Shook Decl, Ex. 75, Pg. 19)

26 <sup>9</sup> In *City of Tacoma v. Taxpayers and Ratepayers of Tacoma*, 96-2-09938-0. Superior Court issued two  
orders, one authorizing the System (1996 Order), the other authorizing utility bonds to fund it (1997  
Order). Taxpayers argued Click! was general government's obligation, and a public vote was required to  
fund the System. City prevailed, arguing the System was a utility and must be funded by utility bonds.  
Relying on that decision, for 20 years, City is legally and equitably estopped from alleging otherwise.

<sup>10</sup> Shook Decl. 10/30/19, ex. 11, The enabling Ordinance 25930, creating Click!, cited authority in RCW  
35.95.020. Also, in Section 1.3, it cited the City Charter (as authority for funding Click! as a "utility."  
("Charter § 4.1 The City shall possess all the powers granted to cities by state law to construct, condemn  
and purchase, purchase, acquire, add to, maintain, and operate").

<sup>11</sup> Nineteen states have laws restricting municipalities to from establishing telecommunication utilities,  
such as Click!. The Supreme Court confirmed state authority to preempt municipal competition in *Nixon v.*  
*Mo. Mun. League*, 541 U.S. 125, 140-41 (2004). The FCC attempted to preempt such state laws, but was  
overruled in *Tennessee v. FCC*, 832 F.3d 597, 610 (6th Cir. 2016).

<sup>12</sup> Shook Decl. 12/30/19, Ex. 69, Broad-Banned: The FCC's Preemption of State Limits on Municipal  
Broadband, Vol. 68 Emory L.J. 407 (2018). Municipal utilities threaten incumbent monopoly's profits  
("Broadband Trusts"), The Broadband Trusts lobby fiercely to preserve their entrenched market power.

1 Presenting no issue of material fact, feigning confusion over the meaning of utility, Defendant  
2 urges we harmonize Chapter 35.94 RCW’s clear language with Chapter 35.92, and search in vain  
3 for imagined support in three unrelated cases, *Issaquah, King County* and *Clark*.<sup>13</sup> Yet, the  
4 meaning of “public utility” and Charter §4.6 is fully well known to Defendant, as confirmed by  
5 Defendants’ own Resolution U-10828 citing the vote requirement, here: <sup>14</sup>

6  **AMENDED RESOLUTION NO. U-10828**  
7 1 A RESOLUTION relating to Click! Network; authorizing Click! to prepare a  
8 2 business plan to provide, in addition to retail cable television, retail  
9 3 internet services including voice over data internet (“VoIP”) protocol,  
10 20 commercial broadband and Gigabit service (“Retail Services”).  
11 21 WHEREAS the City Charter Section 4.6 requires a vote of the people  
12 22 before the City may sell, lease, or dispose of any utility system, or parts thereof  
13 essential to continued effective utility service, and

11 Defendant knows the definition of utility, and that the laws protecting municipally-owned  
12 utility assets from disposal require a public vote.<sup>15</sup> This Court can do justice, by upholding the  
13 law and reminding them of their solemn duty on this crucial public policy matter. *See Fondren* <sup>16</sup>

## 14 II. COUNTERSTATEMENT OF FACTS

15 Shook incorporates herein by this reference all facts set forth in this Motion and Declaration  
16 in Support, and in Plf.[’s] Motion for Partial Summary Judgment (“MPSJ”), and Mo. for TRO,  
17 and all declarations filed in this matter. Following is a summary of facts relevant to Def[’s]  
18 arguments in response to Defendant’s cross MPSJ.

19 Click! is a self-described “Telecommunications System,” providing competitive Telecom  
20 services, as shown in this 2001Click! press release:<sup>17</sup>

21 **July 24, 2001**  
22 Click! Network is an operating section of Tacoma Power and is the nation’s largest municipally  
23 owned telecommunications system. Click! provides competitive telecommunications services in  
24 the City of Tacoma, including cable television, high-speed data transport and Internet services.  
More information about Click! services is available at [www.click-network.com](http://www.click-network.com)  
or by calling 253-502-8900.  
**Contact:** Diane Lachel, 253-502-8537; Cyndi Wikstrom, 253-502-8763

25 <sup>13</sup> Def.[’s] MSJ, Pg. 14. *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980), *King County v. King*  
*County Water Districts et. al.*, Wash. No. 96360-6, Slip Op. (December 5, 2019). *Clark v. Olson*, 177  
26 Wash. 237 (1934).

<sup>14</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. ( Def.[’s] Resolution citing public right to vote. ).

<sup>15</sup> “we do not construe a statute that is unambiguous.” *Food Servs. of Am. v. Royal Heights, Inc.*, 123  
Wn.2d 779, 784-85, (1994).

<sup>16</sup> *Fondren v. Klickitat County*, 79 Wn. App. 850, 856, 905 P.2d 928 (1995) (decisions of the State  
Supreme Court are binding on all lower state courts). *See also, Bremerton Municipal League v. Bremer*,  
130 P.2d 367, 15 Wn.2d 231 (Wash. 1942).

<sup>17</sup> Shook Decl. 12/30/19, Ex. 83. (taken from Click! website).

1 Click! was carefully built, based on an extensive “Telecommunications Study” and Business  
2 Plan to provide crucial telecommunication services for the community. Click!’s vital services are  
3 not rendered “surplus” by a failed pilot meter program.

4 Considerable investment was made in the additional equipment and infrastructure needed for  
5 Click!’s essential system, to create the vital services the community relies on. Over \$69 million  
6 was appropriated in 1997 alone.<sup>18</sup> Approximately \$200 million in historical costs are invested in  
7 Click!’s System.<sup>19</sup> *E.g.* Some of Click!’s core routers cost over \$1 million each.<sup>20</sup>

8 Click!’s services are enjoyed by governmental, commercial and residential customers alike.<sup>21</sup>

9 Before embarking on this major undertaking, Tacoma Power pulled together a  
10 panel of fourteen experts from an array of disciplines to review and pass on a final  
11 business plan. That plan, which was given the stamp of approval by the panel,  
12 called for retail and wholesale applications.<sup>22</sup>

13 As the Telecommunication Study concluded, “*One could hope. . .*”<sup>23</sup>

14 [T]he local market has a growing need for better telecommunications access.  
15 Despite growing local demand, the incumbent wire line service providers have  
16 stated that their investments in the local infrastructure will either slow without  
17 significant rate increases or be halted all together. *One could hope* that other  
18 companies would step forward and create a modem telecommunications system  
19 throughout our community but the prospects for that occurring appear dim.

20 Click! was built out of necessity, as an alternative to the incumbent monopoly, who refused  
21 to upgrade their “*crummy*” system and provide the telecom services Tacoma’s policymakers  
22 believed were required for economic growth in the information age.<sup>24</sup>

23 Click! provides “lit” wholesale telecommunication service.<sup>25</sup> It enables retail ISP partners to  
24 provide BIAS.<sup>26</sup> Cable modems are owned by Click!’s ISP partners, or by the ISP’s customers,  
25 the “end-users.”<sup>27</sup> <sup>28</sup> On Click!’s DOCSIS, coaxial, portion of telecom platform, Click! installs

26 <sup>18</sup> Shook Decl. 12/30/19, Ex. 85 Tacoma Ord.#26141, 10/28/97, ( additional \$67 million funding ).

27 <sup>19</sup> Shook Decl. 12/30/19, Ex. 75, Pg. 1 Click! Asset Study, 3/18/13, by Rates, Planning & Analysis Dept.

28 <sup>20</sup> Shook Decl. 12/30/19, ¶ 2. Ex. 73. (Board’s Cisco CRB-8 Resolution U-10884, router \$1,034,100).

29 <sup>21</sup> Shook Decl. 12/12/19 Ex. 64 ( Click! provides data-transport and broadband to Tacoma’s Libraries).

30 <sup>22</sup> Shook Decl. 12/30/19 Ex. 70, (“Creating Capacity and Competition in Broadband Telecommunications:  
31 The City of Tacoma’s Initiative,” April 2000. Mayor Baarsma and Prof. Ross Singleton. ).

32 <sup>23</sup> Shook Decl. 10/30/19. Ex. 10, at Pg. 186 of 398, (Conclusions of Telecommunications Business Plan).

33 <sup>24</sup> Shook Decl. 12/30/19, Ex. 74. Pg. 12 (Superintendent Klein’s comment on “*crummy* system” and  
34 monopoly’s TCI’s attitude that City must consent to TCI’s terms or go “Jump in the Lake.” ).

35 <sup>25</sup> “Lit” means Click! provides all electronics, systems and technology required for the telecommunication  
36 system to transport data to and from all endpoints on the Internet for the ISPs customers.

<sup>26</sup> “BIAS” is Broadband Internet Access Service. Click! is “telecommunications inputs” or “transmission  
facilities” used to access the Internet. *Nat’l Cable & Telecom. v. Brand X.*, 54 U.S. 967, (2005)

<sup>27</sup> There are only two remaining ISPs operating on Click!, Advanced Stream and Rainier Connect.

<sup>28</sup> Click! provides wholesale FTTP, DOCSIS and Ethernet services. DOCSIS is “Data Over Cable Service  
Interface Specification”, a telecommunication standard for broadband data transfer over coaxial cables.

1 end-users' data outlets, provides network monitoring, maintenance, hosting and provisioning of  
2 DHCP services, assigns and manages IP addresses and DNS services, among many other things.

3 The ISPs provide their customers, the "end-users," tech support, Email, VoIP, web-hosting,  
4 spam and virus filtering, managed Wi-Fi services, and process customer's monthly payments.

5 Click! also provides a fully lit wholesale FTTP service. This symmetrical fiber optical Gigabit  
6 speed service uses no coaxial cable facilities.<sup>29</sup> With FTTP, Click! installs, operates and  
7 maintains all customer premise equipment required to make the FTTP services operational.<sup>30</sup>

8 Click! also provides Tacoma Public Libraries, and 100 other institutional customers, with  
9 Metro Ethernet service.<sup>31</sup> This provides a transparent data path, and involves no "change in the  
10 form or content of the information as sent and received."<sup>32</sup> It is a pure data transport service.

11 1. Click! is A "Telecommunications System" Not a Cable TV System.

12 Every Ordinance, Resolution, Franchise, Court Case, Contract, Federal, State and Municipal  
13 Code relating to the System, recognizes Click! is a "Telecom System."<sup>33</sup> See 47 U.S.C. Sec 153  
14 (53) "telecommunications services are treated as telecommunications services regardless of the  
15 facility used to provide them." Defendant's comparison of Click! to cable TV and citation to TV  
16 statutes and *Issaquah*, are irrelevant and outdated.<sup>34</sup> Telecom is NOT cable television.<sup>35</sup>

17 Click! is a telecom system, with two-way communication, capable of sending and receiving  
18 data, of the user's choosing, to and from all "end points" of the World Wide Web.<sup>36</sup>

19 Cable TV ("cable system") is a closed-off, "one way" system, with "closed transmission  
20 paths."<sup>37</sup> One-way capability is not telecom.<sup>38</sup> Compare 47 U.S.C. § 522(7), with 47 USC §  
21 153(50). Click!'s physical infrastructure, "the pipes," is a wire "communication system."<sup>39</sup>

22 <sup>29</sup> Fiber to the Premises, is fiber optic telecommunications directly to customers' premises.

23 <sup>30</sup> Shook Decl. 12/12/19, Ex. 57, Pg. 326/423. (Click! Network Role and Responsibilities).

24 <sup>31</sup> Shook Decl. 12/12/19, Ex. 64, Pgs.1, 2-9 (Tacoma Public Library Contract No. 16-01 ). Click also  
25 provides retail BIAS to the Libraries, which maybe a breach of the ISP's non-compete clause.

26 <sup>32</sup> 47 U.S.C. Sec 153(50) "the transmission, between or among points specified by the user, of information  
of the user's choosing, without change in the form or content of the information as sent and received."

27 <sup>33</sup> Shook Decl. 10/30/19, Ex. 6, (TPU Annual Report, describes "telecommunications system"), Ex. 11,  
28 (Ordinance creating Click!), Ex. 12, 13, (1996 and 1997 Orders affirming System and utility funding), Ex.  
29 17, (Installation Contract). Shook Decl. 12/12/19 Ex. 62, (Century Link Contract) Ex. 64 (Library  
30 Contract) Ex. 65. (County Franchise) *E.g.*, RCW 35.99.010 (1) ("Cable television service" means the one-  
31 way transmission to subscribers of video programming and other programming service and subscriber  
32 interaction, if any, that is required for the selection or use of the video programming. . .).

33 <sup>34</sup> See Def.[']s] SJM, Pgs. 13, 14, 15, 17, 18, and 21.

34 <sup>35</sup> *E.g.* RCW 82.04.065 (27) ("Telecommunications service" does not include television and video  
programming service). RCW 80.36.630 (State Law mirrors federal code. "Telecommunications" has the  
same meaning as defined in 47 U.S.C. Sec. 153.) Television is also expressly distinguished.

35 <sup>36</sup> Shook Decl. 12/12/19 Ex. 59, (Telecommunications definition by Mr. Dillon, retired Click! Manager).

1 As a telecom system, with vast underground facilities, as seen in the IRU, Shook Decl.  
2 11/1/19, Ex 29, 30. Click! is a “communication utility” by RCW 35.96.020’s definition,

3 **RCW 35.96.020**

4 “Communication utility” means any utility engaged in the business of affording telephonic,  
5 telegraphic, cable television or other communication service to the public in all or part of the conversion  
6 area and includes telephone companies and telegraph companies as defined by RCW 80.04.010.

7 RCW 35.96.020 provides “as defined by” RCW 80.04.010, where we see Click! is a utility. A  
8 Telecommunication Company,” to be precise, includes “every city or town.”

9 (28) “Telecommunications company” includes every corporation, company, association, joint stock  
10 association, partnership and person, their lessees, trustees or receivers appointed by any court  
11 whatsoever, and every city or town owning, operating or managing any facilities used to provide  
12 telecommunications for hire, sale, or resale to the general public within this state.

13 2. The Defendant’s “Pilot Meter” Program Is A Red Herring.

14 Click!’s assets are not rendered “surplus,” or “excess capacity” by Power’s abandoned meter  
15 program. That failed pilot program is unrelated to the community’s vital need for, and increasing  
16 usage of, Click!.<sup>40</sup> Data usage and revenues are rising. Click! generated \$695,919 in Data  
17 Transport and Broadband revenues in October 2018, increasing to \$768,573 by Oct. of 2019.<sup>41</sup>

18 The primary objective in creating Click! was to fulfill the community’s need for an alternative  
19 to the incumbent monopoly provider.<sup>42</sup> The pilot meter program was an afterthought, only  
20 developed in “the mid-2000s,” nearly 10 years after policymakers first envisioned the  
21 community’s pressing need for Click!’s system.<sup>43</sup> The community’s needs are only increasing.

22 Click!’s facilities continue fulfilling the original mandate, providing a competitive, publicly  
23 owned and operated alternative to the incumbent monopoly, TCI (now Comcast). Over 35,000  
24 loyal government, business and residential customer accounts continue to rely on Click! every  
25 day, including Pierce County, Tacoma Public Libraries and over 100 institutional customers.

26 <sup>37</sup> 47 U.S.C. § 522(7). (Cable System: a facility, consisting of closed transmission paths).

<sup>38</sup> 47 U.S.C. § 522(6). (Cable Service is one-way transmission to subscribers of video programming, and  
subscriber interaction for the selection or use of such video programming or programming service).  
*Compare with*, 47 USC § 153(50) telecommunications” means the transmission, between or among points  
specified by the user, of information of the user’s choosing.

<sup>39</sup> 47 USC § 153(59) “wire communication” or “communication by wire” means the transmission of ...  
pictures, and sounds of all kinds by aid of wire, cable, or like connection.”

<sup>40</sup> Shook Decl. 12/30/19, ¶ 4, Ex. 76. (Data usage and revenues over the System are increasing).

<sup>41</sup> Shook Decl. 12/30/19, ¶ 4., Ex. 76 (Operational Summaries for Oct 2018 and Oct 2019).

<sup>42</sup> Shook Decl. 12/30/19 Ex. 70. Mayor Baarsma and Professor Singleton’s Paper on Click! “Creating  
Capacity” (“The City built a broadband telecommunications system with the express purpose of providing  
competitive telecommunications services to businesses and residents within the City”).

<sup>43</sup> Tenzin Gyaltzen Decl. Pg. 3, ¶ 7. (“During the mid-2000s, Tacoma Power developed” smart meters.)

1 Click!'s enterprise and facilities are not surplus. They are functional, useful "additional  
2 capacity." <sup>44</sup> These are valuable, vital municipal assets. The sophisticated equipment, software,  
3 switches, fiber-optics, franchises, intellectual property, trademarks, IP addresses, customer  
4 accounts, contracts and "data pipes" are not "excess capacity." See, Shook Decl. 12/30/19 Ex. 70  
5 ("Additional Capacity" created). Also, Ex. 74 Pg. 3, ¶¶ 7, 8, and 9. (the business plan).

6 **§ 9512. Sale or Lease of Public Utilities.**

7 **It is and shall be lawful for any city or town in this state now or**  
8 **hereafter owning any water works, gasworks, electric light and power**  
9 **plant, steam plant, street railway line, street railway plant, telephone or**  
10 **telegraph plant and lines, or any system embracing all or any one or more**  
11 **of such works or plants or any similar or dissimilar utility or system, to**  
12 **lease for any term of years or to sell and convey the same or any part**  
13 **thereof, with the equipment and appurtenances, in the manner hereinafter**  
14 **prescribed. [L. '17, p. 573, § 1.]**

15 Right to vote was settled under *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231 (1942);  
16 *Bremer* guides the Court, under *Fondren v. Klickitat County*, 79 Wn. App. 850, 856, 905 P.2d  
17 928 (1995) (decisions of the State Supreme Court are binding on all lower state courts).

18 **III. ISSUES PRESENTED**

19 1. Are a municipal utility's functional telecommunications assets subject to the public vote  
20 requirements of Chapter RCW 35.94.020 ? Yes.

21 2. Is legislative intent in RCW 35.94.040 destroyed by City declaring a municipal  
22 telecommunication system "surplus," when such system is a going concern achieving revenues  
23 of \$25 million a year, and will be leased, turn key, to a private company for continuing the same  
24 utility services, to same utility customers, for up to 40 years, while City maintains reversionary  
25 interest in the valuable surplus utility assets? Yes.

26 **IV. EVIDENCE RELIED UPON**

This Response to Defendant's Motion for Summary Judgment is based upon all the pleadings  
and filings of record in the above-captioned matter, and including without limitation:

1). The 10/30/19 Motion for TRO and Declaration of Mitchell Shook; 2). The 11/1/2019  
Declaration of Mitchell Shook; 3). Shook's 12/12/19 MSJ and Declaration; 4). 12/30/19 Declaration  
of Mitchell Shook in Support of this Summary Judgement Motion.

---

<sup>44</sup> Shook Decl. 12/30/19, Ex. 85 Tacoma Ord.#26141, 10/28/97, providing additional \$67 million funding.

## V. ARGUMENT AND AUTHORITIES

Telecommunications is a public utility under federal, state and local law.<sup>45</sup> Telecom has been a regulated public utility since 1909 in Washington.<sup>46</sup> Even longer than electric power.<sup>47</sup>

Telecommunications (“Telecom”) companies are “utilities,” with authority rooted in Washington’s Constitution, Article XII, Section 19: Telegraph And Telephone Companies. “The right of eminent domain is hereby extended to all telegraph and telephone companies.”<sup>48</sup>

Defendant has conceded the public’s statutory right to vote, in Council’s own resolution.<sup>49</sup> *Lenci v City of Seattle*, 36 Wn. 664, 668 (1964). Cf. RCW 35.94.020.<sup>50</sup> (Council findings are presumed valid). Two decades ago Defendant argued Click! was a utility, in securing two Court Orders to build it; and, recently in *Coates*. City is equitably estopped from arguing otherwise.<sup>51</sup>

### **A. Telecommunication Assets are Public Utilities Under Chapter 35.94 RCW.**

Defendant argues the word “utility” and the term “public utility” are not “statutorily defined,” and urges us to harmonize RCW Ch 35.94 with Ch 35.92.”<sup>52</sup>

But the definition of “public utility” is provided by name, in the statute itself, in the long list of protected utilities.<sup>53</sup> The Committee’s abbreviation of § 9512, substituting that long list with the all-encompassing, “any public utility works, plant or system owned by it or any part thereof,” did *not* remove or change the definition of public utility. It’s still there, when you dig a bit.

Simply “rewritten for brevity,” there was no change in the law, as RCW 1.04.020 confirms “The previously existing laws shall control.”<sup>54</sup> In *Arnott v. Spokane*, 6 Wash. 442, (1893):

<sup>45</sup> In 47 U.S. Code Title 47, state at Chapter 80.36 RCW, local in Tacoma Municipal Code Title 16 B.

<sup>46</sup> Session Laws of 1909, Ch. 93. Sec. 3 Pg. 192, 196, (“authorize the commission to regulate telephone and telegraph companies and their rates and charges, to prevent discrimination and extortion by such companies; and to authorize the Railroad Commission of Washington to make all necessary rules.”).

<sup>47</sup> Electricity regulated by Laws of 1911, Ch. 117, Pg. 538, *See also* Shook Decl. 12/12/19 Ex. 36, Pg. 2.

<sup>48</sup> In 1985, the term “Telecommunications” widely replaced “telephone” and “telegraph” in Title 80 RCW *See generally* Laws of 1985. Ch. 450, Sec. 13, Pgs. 1978 -1995, *E.g.*, Shook Decl. 12/12/19 Ex. 61.

<sup>49</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. ( Def.[’s] own Resolution citing public right to vote. )

<sup>50</sup> Requires a public vote. “We will not read a statute in such a way as to render a provision meaningless. *Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008).

<sup>51</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. Resolution is an express admission of a party-opponent, and assurance of promised of future action, with the government then failing to carry out those acts. *Munich v. Skagit Emergency Commc’ns Ctr.*, 175 Wn.2d 871, 288 P.3d 328, (2012)

<sup>52</sup> Def.[’s] MSJ., 12/12/19, Pg. 16, Ln.10.

<sup>53</sup> “If the statute is ambiguous, the courts must construe the statute so as to effectuate the legislative intent. In so doing, we avoid a literal reading if it would result in unlikely, absurd or strained consequences. *State v. Elgin*, 118 Wn.2d 551, 555, 825 P.2d 314 (1992).

<sup>54</sup> Laws of 1951 (“rule of rule of construction, in case of any omissions or inconsistency between any of the revised code as so supplemented or modified and the laws existing immediately preceding this enactment, the previously existing laws shall control”).

1 [W]here the mode of contracting is expressly provided by law, no other mode can  
2 be adopted which will bind the corporation. This principle results from the fact  
3 that municipal corporations derive all their powers from their charters.<sup>55</sup>

4 City is free to negotiate a sale/lease of Click!, but the statutory requirement for a public vote  
5 is inalienable. As *Arnott* says, the “mode of contracting,” is “expressly provided” in RCW 35.94.

6 1. Telecommunications And Electric Power Are Two Types of Utilities.

7 Power and Telecommunications (“Telecom”) are distinct utility services, often provided,  
8 managed and organized by a single municipal entity. The American Public Power Association,  
9 the “voice of community-owned utilities” that power 2,000 towns and cities nationwide, labels  
10 these entities as “Multiservice Utilities.”<sup>56</sup> TPU is a “multiservice provider,” with four utility  
11 services; water, power, rail and telecommunication. (Shook Decl. 12/30/19, Ex. 68, Pg.1).

12 Many public power utilities provide more than electric service for their  
13 communities; they might also manage the area’s water, wastewater, internet,  
14 waste, gas, and *telecommunications services*. For these utilities, being a  
15 *multiservice provider* brings opportunities in streamlining how work gets done,  
16 organizing the workforce, and giving back to the communities they serve.

17 Physically, Click!’s “*commercial network*” and TPU’s “*power communication network*” share  
18 a common fiber optic backbone, but even this “backbone” *is separated* into discrete “tubes,”  
19 with unique fibers separating the infrastructure of the two utility systems.<sup>57</sup>

20 Click!’s telecom system and Power’s electrical system offer distinct services, separate in  
21 both a physical and organizational sense, with distinct brands, websites, organizational  
22 structures, financial reports, monthly invoicing, employee newsletters and customer loyalty  
23 programs, etc. Even federal, state and local regulations differentiate the two systems.<sup>58</sup>

24 Click! was established for more than TPU’s needs.<sup>59</sup> By sharing common infrastructure,  
25 easements and rights of way, Click! and Tacoma Power maximize the value of their assets,  
26 generating operational synergies.<sup>60</sup> This was the original purpose of the System.<sup>61</sup>

24 <sup>55</sup> *Arnott v. City of Spokane*, 6 Wash. 442, (1893) citing 1 Dill. Mun. Corp. (4th Ed.) 449, (373);.

25 <sup>56</sup> APPA website ( Multiservice utilities: A one-stop shop for communities). <https://perma.cc/BF37-FN29>

25 <sup>57</sup> See Shook MPSJ, Pg. 26, discussion of fibers and “tubes.” *Also see*, Shook Decl. 12/12/19 Ex. 31, Pg. 4)

26 <sup>58</sup> Shook Decl. 10/30/19, Ex. 26 (Organizational Chart), Ex. 75 (Employee Newsletter), Ex. 76 (Financial Statements and Purple Perks Program). FCC regulates Click! and FERC regulates Power. As municipal utilities, Power and Click! are regulated under distinct sections of Tacoma’s Municipal Utilities Code.

<sup>59</sup> Shook Decl. 12/30/19 Ex. 70, -(City of Tacoma’s Initiative, April 2000. Mayor Baarsma).

<sup>60</sup> Shook Decl. 10/30/19, Ex. 12. *See also*, Shook’s MPSJ, Pg. 15, Ln. 12. ( Click!’s Nexus to power, diversifying TPU revenue, driving economic growth, offsetting costs for a system TPU needs anyway ).

<sup>61</sup> Shook Decl. 10/30/19, Ex. 12, Pg. 9, Memo. In Support Of City Of Tacoma’s MPSJ. ( “revenue to help offset the costs of constructing and operating the Telecommunications System.” )

1 **B. Creation of Click!. The Community's Need for a Telecommunication Utility System.**

2 Click! was established as a municipal communication utility, with a clear mandate to  
3 provide commercial communication services. The extensive Telecommunication Study and  
4 Business Plan prepared in creating Click!, and other historical evidence, demonstrate Click! was  
5 created for much more than supporting Tacoma Power's aborted pilot meter program.<sup>62</sup>

6 The circumstances and events surrounding the creation of Click! reveal Tacoma's desperate  
7 need for a municipal telecommunication utility and explain why Click! was established.

8 The significance of the utility system's creation is revealed in a 1998 letter, from TPU  
9 Director Crisson to City Council, along with his attached MSNBC article describing the City's  
10 communications project. Director Crisson said, "I know the City Council, as well as the Board,  
11 will be proud of this national coverage." The MSNBC article was titled, "*Tacoma Power to give  
12 TCI a jolt. Municipal utility prepares to jump into cable.*"<sup>63</sup> Some excerpts:

13 While AT&T officials congratulate themselves on their \$48 billion purchase of Tele-  
14 Communications Inc., they might want to keep an eye on the Northwest corner of  
15 TCI's sprawling cable empire. Tacoma Power, the city-owned utility of Tacoma,  
16 Wash. will soon turn on **a \$100 million broadband communications network** that  
17 will enable it to sell cable TV and Internet access as well as water and electricity -  
18 making it a direct competitor to TCI.

19 IF THE PROJECT is successful, it is sure to encourage more municipal utilities to  
20 take on TCI and other cable monopolies across the country. The effort is already  
21 getting attention from local governments weary of residents' complaints about **high  
22 prices and poor service from their incumbent cable provider**. Tired of waiting for  
23 new competitors to shake things up, many cities and towns are thinking about either  
24 constructing their own cable network, or encouraging their local utility to do it for  
25 them. Tacoma Power's Click! Network is the largest such effort to date.

26 **Concerned cable industry officials** are launching a public relations counter-offensive,  
citing studies that question the viability of such projects and complaining that access  
to public funds give government-backed systems an unfair competitive edge.

Click! was established for more than supporting Tacoma Power's pilot meter program. The  
news article's very premise, "it is sure to **encourage more municipal utilities** to take on TCI and  
other cable monopolies across the country," shows Click! was not simply supporting a future  
pilot meter program. That "**Concerned cable industry officials** are launching a public relations

<sup>62</sup> Shook's MPSJ., Section B, pages 5, 6 and 7.(Additional not "excess" Capacity). Shook Decl. 10/10/19, Ex. 10, (Excerpts from Business Plan and Telecommunication Study).

<sup>63</sup> Shook Decl. 10/30/19 Ex. 14. (Mr. Crisson's Letter to City Manager Corpuz, MSNBC Article).

1 counter-offensive,” demonstrates Click! was controversial for, famously, pioneering the public  
2 broadband movement now sweeping our nation and the world. <sup>64</sup> So much more than meters. <sup>65</sup>

3 In April 2000, Mayor Baarsma and Dr. Singleton, of University of Puget Sound, authored a  
4 paper on Click!, Creating Capacity And Competition In Broadband Telecommunications: The  
5 City Of Tacoma's Initiative. <sup>66</sup> Excerpts from their paper show Click! was not about meters: <sup>67</sup>

6 ABSTRACT: This paper describes the process by which the City of Tacoma,  
7 Washington came to build an open access, broadband telecommunications system  
8 designed to promote effective competition in the provision of Internet and other  
9 telecommunications services.

10 The City of Tacoma has designed and built a broadband telecommunications  
11 system with the *express purpose of providing* competitive telecommunications  
12 services to businesses and residents within the City.

13 But before making the multi-million-dollar investment, the utility's director  
14 requested that Tacoma Power's citizen oversight body, the Utility Board, authorize  
15 an outside review by a consultant group--the Stanford Research Institute.

16 The Board approved and soon SRI's consultants came back with an interesting  
17 idea: Why not *invest more dollars* to expand the fiber optic pipe? Then Tacoma  
18 Power could offer its customers an array of services--cable television, competitive  
19 Internet access, telephony and data transport. The Telecommunications Act signed  
20 into law by President Bill Clinton in 1996 had, in fact, given Tacoma Power this  
21 option by eliminating barriers to entry into the telecommunications market. This  
22 led Tacoma Power's superintendent to proclaim: "The new law afforded us the  
23 opportunity to embark on a broader strategy. . ."

24 The next step was to conduct a marketing survey. The findings . . . forecast over  
25 33,000 cable customers in three years of operation. Within ten years time, the  
26 entire investment of \$100 million would be paid off. . . . But before embarking on  
this major undertaking, Tacoma Power borrowed once again from the private  
sector. The utility pulled together a panel of fourteen experts from an array of  
disciplines to review and pass on a final business plan. That plan, which was given  
the stamp of approval by the panel, called for retail and wholesale applications.

The political dynamics revolving around Tacoma Power's plans to build a fiber  
optic system soon changed once the management team broadened their strategy to  
include an array of telecommunications services. The manager of the incumbent  
cable provider (TCI) sent a scathing critique of the utilities' business plan to the  
Tacoma City Manager. The twenty-one page letter ended with the warning:

<sup>64</sup> Shook Decl. Ex. 74, Pgs. 18, 20. Mr. Klein (political attacks on Click! formation -Hendery & Crowley).

<sup>65</sup> See, e.g., Shook Decl. 10/30/19, Ex. 18, A Sampling of Municipal Broadband Utilities in the USA. See also Shook Decl. 10/30/19 Ex. 21, Pg. 20 Appendix 1: (U.S. Municipalities with Broadband Networks, Report from The Executive Office of the President. Benefits Of Competition And Choice For Community Development And Highspeed Internet Access. (January 2015)). Compare with, Shook Decl. 12/12/19, Ex. 60, (Australia's NBN, open access project passes 11 million homes).

<sup>66</sup> Mayor Baarsma was a professor at the University of Puget Sound and on City Council at the time, even voting on the creation of Click! in 1996. Shook Decl. 10/30/19, Ex. 11 Pg. 33, or 229/389.

<sup>67</sup> Shook Decl. 12/30/19 Ex. 70, "Creating Capacity and Competition in Broadband Telecommunications: The City of Tacoma's Initiative," April 2000. Even the title indicates Click! was "created capacity."

1 "(Tacoma's policy makers should)...pause and let the euphoria of the benefits you  
2 may now expect be replaced by a realistic appreciation of the *pitfalls and risks*  
3 *associated with municipal ownership* of what is traditionally an entertainment  
4 service provided by private enterprise." After numerous public hearings, two  
5 declaratory judgements from the state superior court, a plea from the cable  
provider's national president and an additional due diligence review by three  
outside consultants, the city policy makers moved forward with the \$100 million  
overbuild. (emphasis added).

6 The Professors' Paper shows the System's primary objective was a "broader strategy," the  
7 community's need for advanced telecommunication services. The prospect of \$100 million in  
8 Additional Capacity creating municipal competition was alarming to the incumbent, TCI, who  
9 warned Tacoma of "the *pitfalls and risks* associated with municipal ownership."<sup>68</sup> (*supra*)

10 In preparing the Business Plan, a detailed "Marketing Survey" was conducted, to study "The  
11 Current Business Market."<sup>69</sup> This Survey excerpt shows Click! was more than meters:

12 To help assess current business market support for advanced telecommunications  
13 services in the greater Tacoma area, Tacoma City Light pursued two avenues of  
14 consumer research: A telephone survey of 200 businesses, with 25 or more  
employees. . . This group represents a pool of "Potential Customers."

15 Based upon the results of 200 telephone interviews with medium to large Tacoma  
16 area businesses, the Potential Customer business market is on the brink of being  
17 ready for advanced telecommunications technologies. The money is there,. . .key  
18 findings show these customers account for more than \$5 billion dollars in annual  
19 revenues and 25,000 jobs. What's more, they currently spend over \$10 million  
dollars annually on telecommunications services. They perceive telecommunications  
links are extremely important to the success of their businesses, and many believe  
their telecommunications needs will increase rapidly, particularly for Internet access  
and local data networks.

20 As the Business Plan and Marketing Survey indicate, Click!'s creation was seen as vital for  
21 Tacoma to remain economically competitive and prosper.<sup>70</sup> Like the arrival of the Northern  
22 Pacific railroad in Tacoma in the 1870's, such infrastructure was considered essential for success  
23 in the digital era. A monopoly existed in Tacoma and policymakers wanted a better system and  
24 service. This was the primary reason for establishing Click!.

25 <sup>68</sup> Shook Decl. 12/30/19, Ex. 74, Pgs. 25, 28 ( TCI, later AT&T, President Leo Hindery opposed Click!'s  
26 creation, publicly scolded Superintended Klein and sponsored studies to discredit Click!

<sup>69</sup> See Shook Decl. 10/30/19, Ex. 10, Pg. 115/389, ( Market Demand Summary -Potential Market They are  
more concerned about reliability than price for their local phone service, and very concerned about getting  
quick response from any telecommunications vendor.).

<sup>70</sup> Shook Decl. 10/30/19, Ex. 10, ( "One of the most significant ways a community and its economic base  
are intertwined is through an area's infrastructure. As a result, the evolution of a community's economy  
often depends upon the investments it makes in its transportation system, power system, and-given the  
shift to the information age-its telecommunication system." (emphasis added).).

1 Defendant's MacGuffin, a failed pilot meter project, conceals the true purpose behind the  
2 creation of Click!'s System. In April 2000, five years before the pilot meter program, Price  
3 Waterhouse prepared a "Performance Review" for Click!, and said:<sup>71</sup>

4 Click! continues to be at the forefront among public and private utility  
5 telecommunications efforts. This position has brought considerable national  
6 recognition to Tacoma, and also significant tangible benefits. From a review of local  
7 press clippings, at least 400 new jobs, five building renovation projects, enhanced  
8 University of Washington and UPS academic programs, and several development  
9 projects are all linked to the development and presence of Click!. Establishing Click!  
10 prompted AT&T (TCI and Excite @home) to upgrade services to Tacoma residents  
11 much earlier than otherwise would have happened.

12 The success of Click! and its continuing value to the community depends on a team  
13 effort among business, civic and education leaders to create a unique region with  
14 considerable growth potential. The fiber/coax network is literally and figuratively the  
15 thread that ties them together and enables this potential. Working together, this team  
16 can leverage the Click! asset to attract major new businesses, create jobs, attract  
17 students to programs that provide the skills for those jobs and generally enhance the  
18 whole community.

19 This Review cites "significant tangible benefits" from leveraging Click! "to attract major  
20 new businesses, create jobs, attract students to programs that provide the skills for those jobs and  
21 generally enhance the whole community." Even telecommuting was cited in the original plan.<sup>72</sup>

22 There is no mention of Power's pilot meter program. In the revolutionary excitement of  
23 creating "America's Most Wired City," meters were not cited in the Performance Review,  
24 Business Plan, Marketing Study or other documentation relating to the creation of Click!.

25 Click! was revolutionary in 1996. All media reports, scholarly papers and professional  
26 evaluations, show that creating an advanced telecommunication utility system for the community  
was Click!'s primary purpose.<sup>73</sup> Click! was never "excess capacity." Click!'s assets were  
"additional capacity," purchased and installed to enable vital services. They remain essential for  
continuing to provide these same telecom ("utility") services today.

Notably, Tacoma's visionary investment in the System occurred 12 years before Congress  
made broadband a national priority with the Broadband Data Improvement Act in 2008, and

<sup>71</sup> Shook Decl. 12/30/19, Ex. 71, Pgs. 16, 17. ( Click! Network Financial Performance Review ).

<sup>72</sup> *E.g.*, Today Tacoma maintains a robust Commute Trip Reduction Program. Tacoma Municipal Code Section 13.15.020 (Z). "Teleworking/telecommuting" means the use of . . . technology to permit an employee to work from home. *See also* RCW 70.94.521 (automotive traffic is the major source of emissions of air contaminants), (reduce single-occupant vehicle commuting.) RCW 28B.130.005 (Intent. Telecommuting -mitigate the adverse . . . effects of auto dependency and traffic congestion.)

<sup>73</sup> Shook Decl. 12/30/19, Ex. 70 (Mayor's paper and newspaper article.) *also* Ex. 71, (Auditors Review).

1 providing §101 of the Act, codified in 47 U.S.C. § 1301.:

2 (1) The deployment and adoption of broadband technology has resulted in enhanced  
3 economic development and public safety for communities across the Nation,  
4 improved health care and educational opportunities, and a better quality of life for all  
5 Americans.

6 (2) [P]rogress in the deployment and adoption of broadband technology is vital to  
7 ensuring that our Nation remains competitive and continues to create business and  
8 job growth.

9 **C. Click! is Built on “Additional Capacity” Not “Surplus Capacity”.**

10 Click! was established as a “separate system” and is a separate “department.”<sup>74</sup> Click! has its  
11 own unique brand, loyal customers, annual sales of \$25 million a year, and assets coveted by a  
12 private entity. The City has every right to organize its utility departments as a “multiservice  
13 utility.”<sup>75</sup> For organizational convenience, Click! is a department of Tacoma Power.

14 Ignoring Click!’s vibrant and successful enterprise, Defendant argues Click! is “excess  
15 capacity,” claiming Click! is not essential for Tacoma Power’s purposes.<sup>76</sup> *But*, Power’s needs  
16 are not the issue. Click! was never intended to be “*essential*” for Power’s purposes.

17 In TPU’s lobby, Click! has a separate customer service counter. Click! is a separate  
18 department and system, with a life and brand of its own. Click! is essential to Click! end-users.<sup>77</sup>

19 The enabling Ordinance 25930 provides: “The City **hereby creates** a separate system of . . .  
20 City Light.”<sup>78</sup> Click! was born as a “Separate System.” Click! is “Telecommunication System.”

21 **ARTICLE II**  
22 **FINDINGS; ESTABLISHMENT OF THE TELECOMMUNICATIONS PROJECT AS A**  
23 **SEPARATE SYSTEM; AND ADOPTION OF PLAN AND SYSTEM**  
24 **Section 2.1. Establishment of Telecommunication System.** The City hereby creates a  
25 separate system of the City's Light Division to be known as the telecommunications system  
26 (the "Telecommunications System"). The public interest, welfare, convenience and necessity

Click!’s “separate system” is essential to Click! users, who depend on the infrastructure in  
everyday life.<sup>79</sup> Click! was established to fulfill the community’s need for an advanced telecom

<sup>74</sup> Finance Dept, does not track performance of other Power divisions. Shook Decl. 12/30/19, ¶ 2.

<sup>75</sup> Tacoma has broad authority in organizing its utilities; but, cannot sell them without public vote.

<sup>76</sup> “Shouts” is more accurate, since the “Excess” phrase appears capitalized 35 times in Defendant’s brief.

<sup>77</sup> Shook Decl. 12/12/19, Ex. 42, Pg. 2.

<sup>78</sup> Shook Decl. Ex. 11, Pg. 8 (Article II creates a separate system, adopts Click! business plan.”

<sup>79</sup> RCW 43.330.532 [B]roadband is critical to full participation in society and the modern economy . . . by enabling access to health care, education, and essential services, providing economic opportunities, and enhancing public health and safety. *Also*, Shook Decl. 10/30/19, Ex. 21, Shook Decl. 12/12/2019 Ex. 37

1 system.<sup>80</sup> It is a municipal alternative to the incumbent monopoly provider, who, at the time,  
2 “could care less” about Tacoma.<sup>81</sup>

3 In 1996, when Click! was first proposed to Council, the incumbent monopoly, TCI (now  
4 Comcast), had no interest in upgrading their system. After repeated requests by the City, TCI’s  
5 attitude was, “*go jump in the lake.*” Power Superintendent Steve Klein recalled TCI’s attitude:<sup>82</sup>

6 [C]ity council, they're having a heck of a problem with the incumbent  
7 cable provider who still has the crummy system, refuses to upgrade it.  
8 And they don't come to the table to negotiate the franchise agreement.  
9 They can just tell the city government to jump in the lake. And if you  
10 don't like it, we'll just shut it -- we'll shut it down.

11 Monopoly incumbents can afford such cavalier arrogance.<sup>83</sup> Most consumers have no  
12 alternative for access. Monopoly and oligopoly control of broadband in America is the norm.  
13 FCC data shows nearly 85 percent of Americans have either one choice or no choice for speeds  
14 in excess of 100 Mbps.<sup>84</sup> This is why the FCC, FTC and DOJ closely regulate mergers of the  
15 powerful telecommunication conglomerates.<sup>85</sup>

16 Click!’s costly construction was never “excess capacity.” Council prudently and specifically  
17 resolved to provide “Additional Capacity,” with additional, incremental investment, funding  
18 equipment, abundant optical fiber, including dark fiber, and the skilled staff to cobble it all  
19 together.<sup>86</sup> required to create Click!’s essential services.<sup>87</sup> Click! was built to accommodate the  
20 community’s anticipated, ever-increasing, need for the data flow and for the explosive growth  
21 projected in the future.

22 On Click!’s website, Power Superintendent Steve Klein, the “Father of Click! Network,”  
23 explained the project’s origins and cited the “further review” that led to the additional investment  
24 in additional capacity for “expanding the network.” (Shook Dec. 12/12/19, Ex. 74, Pg. 8.)

25 <sup>80</sup> See generally, Shook Decl. 10/30/19, Ex. 23 (“[B]roadband is taking its place alongside water, sewer  
26 and electricity as essential infrastructure for communities”. Quoting USDA Report).

<sup>81</sup> Section 706(d)(1) defines “advanced telecommunications capability” as high-speed, switched,  
broadband telecommunications capability that enables users to originate and receive high-quality voice,  
data, graphics, and video telecommunications using any technology.

<sup>82</sup> Shook Decl. 12/30/19, Ex. 74, Pg. 12. (Power Superintendent’s Steve Klein deposition).

<sup>83</sup> Shook Decl. 12/30/19 Ex. 78, (monopoly power closely monitored. DOJ and FTC guidelines.)

<sup>84</sup> FCC, Annual Internet Access Services Report (2018), see also, FCC Fact Sheet Communications  
Marketplace Report GN Docket No. 18-231 Report; GN Docket No. 18-231 Ex. D-3.

<sup>85</sup> See AT&T-DIRECTV Order, 30 FCC Rcd at 9141, para. 20, 21; Comcast-NBCU Order, 26 FCC Rcd at  
4248, para. 24, (The FCC and DOJ, consider market power of incumbent and barriers to entry).

<sup>86</sup> Shook Decl. 12/30/19, Ex. 85 (City’s 1997 Emergency Res. for \$69 Million, includes telecom team).

<sup>87</sup> Shook Decl. 10/30/19, Ex. 21, Pg. 4, Ord.# 25930 (“WHEREAS, the City has determined that it is  
prudent and economical to provide *additional capacity* on such telecommunications system”).

1 Tacoma Power originally planned to build a fiber-optic network to control its  
2 substations. Further review indicated that expanding the network and offering a wide  
3 range of telecommunications services would benefit our customers and our  
4 community.<sup>88</sup>

5 Fiber must be activated, or “lit,” before it can be used to provide communication services.  
6 At great expense, TPU invested tremendous “additional” public treasury in providing the optical  
7 equipment, modulating electronics, equipment and staff necessary to light this fiber and make it  
8 capable of carrying services. There is nothing “excess” or surplus in Click!’s enterprise or fiber.

9 Power’s incremental investment to establish Click!, created a functional telecom system,  
10 addressing the community’s need for Broadband services. The “lit” fiber, and the currently  
11 unused dark fiber, are not “excess” capacity. These assets were intentionally included, as  
12 “*additional capacity*” in the original Ordinance and Business Plan. It is worth remembering  
13 Mayor Baarsma and Professor Singleton’s Paper, which described that incremental investment:<sup>89</sup>

14 *Why not invest more dollars to expand the fiber optic pipe?* Then Tacoma  
15 Power could offer its customers an array of services--cable television,  
16 competitive Internet access, telephony and data transport.

17 Click!’s assets are performing their intended purpose and function. They are useful and  
18 required for Click’s current and future needs in delivering essential services to the community.

19 The fact Click!’s fiber, both lit and dark, are included in the scheme, in exchange for \$2.5  
20 million a year, shows these are valuable assets. These fibers are not obsolete or surplus.<sup>90</sup>

21 Telecommunications has been a regulated public utility since the Pacific Telegraph Act of  
22 1860.<sup>91</sup> AT&T monopolized the industry for most of the 20<sup>th</sup> century.<sup>92</sup>

23 The Communications Act of 1934 created the FCC. AT&T’s monopoly was broken up by  
24 1983.<sup>93</sup> Congress recognizes telecom is an essential public utility.<sup>94</sup> In Section 706(a) of the

25 <sup>88</sup> Shook Decl. 12/30/19, Ex. 83, (“About us” description of Click! and historical screen shots of Click!’s  
26 website form the Wayback Machine, digital archive of the World Wide Web.).

<sup>89</sup> Shook Decl. 12/30/19 Ex. 70, Creating Capacity and Competition in Broadband Telecommunications.

<sup>90</sup> Click Business Transaction Agreement, Indefeasible Right of Use, or “Privatization Agreements.”

<sup>91</sup> See C. 137, U.S. Statutes 36th Congress, 1st Session, June 16, 1860, *also*, The FCC, formed by the  
Comm. Act of 1934. 47 U.S. Code § 151, § 601, took over wire communication regulation from the ICC.

<sup>92</sup> Shook Decl. 12/12/19, Ex. 49 Pg. 3. (Kingsbury Commitment did not hinder AT&T).

<sup>93</sup> Judge Greene’s opinion, *United States v. American Tel. and Tel. Co.*, 552 F. Supp. 131 (D.D.C. 1983).

<sup>94</sup> See generally, Shook Decl. 12/12/19, Ex. 31, Pg. 8, (We are approaching a new era of the Data Age,  
autonomous cars, humanoid robots, intelligent personal assistants, smart home devices, the world is  
undergoing a fundamental change, transforming our lives. Broadband connects us with friends and family,  
allows access to education, goods and services, and affects nearly every aspect of life.).

1 Telecom Act, 1996 (P.L. 104-104), Congress directs the FCC to encourage deployment of  
2 advanced telecom capabilities to all Americans on a timely basis.

3 Defendant argues Power is the only “real utility,” and Click! is just a silly old “cable TV”  
4 system, best viewed in the context of *Issaquah*. While Power did initially breathe life into the  
5 System, by funding Click!’s creation, Click! is a utility in its own right. Not a cable TV system.<sup>95</sup>

6 **D. Telecommunications is a Utility. A Monopoly or Separate Undertaking is Not Required.**

7 Defendant asserts the public has NO right to vote, if Click! is not a monopoly, a “separate  
8 undertaking,” or Title II regulated facility. All baseless arguments. *Contra*, Such “last mile”  
9 systems are effective “gateways,” with “bottleneck monopoly power” and all the “dangers this  
10 power poses.” *Turner Broadcasting System, Inc. v. FCC*, 512 US 622, 661 (1994)

11 This “monopoly power” was one of the reasons Click! was built. *See ante* Pg. 16, and Mr.  
12 Klein’s “Go Jump in The Lake” comment. Also, see Mr. Klein comment on limited pole space.<sup>96</sup>

13 1. Monopoly is Not a Prerequisite to Public Vote on Disposal of Community’s Assets.

14 Defendant argues Click! is not “a monopoly” and, therefore NOT deserving of the protective  
15 vote under RCW 35.94. Def. MSJ, Pg. 17. *Contra*, “Cable operators possess a local monopoly  
16 over cable households.” *Turner Broadcasting v. FCC*, 520 U.S. 180, 197 (1997).

17 Defendant argues public’s statutory right to vote is forfeited if Click! has a competitor. *But*  
18 *see* “[T]he question of whether or not a monopoly actually existed is not a controlling feature.”  
19 *State v. Kuykendall*, 137 Wash. 602, 609 (1926). *Cf.*, “It will readily be seen, then, that it makes  
20 ***no difference whether a monopoly existed.***” *Id.* at 610. (emphasis added).

21 Monopoly status is not a controlling feature in determining citizen’s right to vote. The Laws  
22 of 1917 provide a protective vote, regardless of a “monopoly.” Legislators knew from firsthand  
23 experiences, fresh in their minds, of dirty tactics deployed by private “Power Trusts,” who  
24 devoted armies of lobbyists and vast resources in destroying municipal utilities.”

25 Click! is protected by a public vote because its assets were paid for by the people and its  
26 property is devoted to public use. And because Legislators purposefully provided the Laws of  
1917 protected municipal utility property.<sup>97</sup>

<sup>95</sup> Shook Decl. 12/12/19, Ex. 59, Declaration of Terry Dillon.

<sup>96</sup> Shook Decl. 12/30/19, Ex. 24, Pg. 23 (US West and TCI had used up all available pole space.)

<sup>97</sup> Similarly, just as “purposefully,” policymakers provided “Additional Capacity” in building Click!. This investment must not be confused by defendant’s claim such investment was ever “excess capacity.”

1 Judge Bone explains why in his Letter, as reprinted in the Congressional Record in 1944. See  
2 generally Shook Decl. 12/30/19 Ex. 80.<sup>98</sup>

3 Tugboats, towboats, barges, silos, wharfs, warehouses, taxi cabs and pipelines are all “public  
4 utilities” because they are “devoted to public use,” not because they are monopolies.<sup>99</sup> Click!’s  
5 wires are *data pipelines*, “and no doubt” a public utility. In *State v. Kuykendall* it was found:<sup>100</sup>

6 [I]f in the beginning or during its subsequent operation the pipe line was devoted  
7 by its owner to public use, and if the right thus extended to the public has not been  
8 withdrawn, there can be no doubt that the pipe line is a public utility. *Kuykendall*,  
9 at 834

10 [T]he question of whether or not a monopoly actually existed is not a controlling  
11 feature; nor can courts know what considerations were pressed upon the  
12 Legislature to justify the passage of the act. It is enough for us to follow the  
13 holding in *Munn v. Illinois*, supra, where the court said: 'For our purposes we  
14 must assume that, if a state of facts could exist that would justify such legislation,  
15 it actually did exist when the statute now under consideration was passed. For us  
16 the question is one of power, not of expediency. If no state of circumstances could  
17 exist to justify such a statute, then we may declare this one void, because in  
18 excess of the legislative power of the state; but, if it could, we must presume it  
19 did.' As to the *propriety of legislation* in force within the scope of the legislative  
20 power the Legislature is the exclusive judge. (emphasis added).

21 Likewise, this Court must not question “*the propriety of legislation*” in § 9512, providing a  
22 protective public vote, preventing potential privatization of public utilities. It is a legislative  
23 prerogative. Neither can the Court question legislative intent in the definition of “surplus,” as  
24 “unserviceable, inadequate, obsolete, worn out or unfit to be used.”<sup>101</sup> Shook Decl. 12/30/19, Ex.  
25 80. Pg. 22 (“Power fight”).

26 Nothing in the statute requires a monopoly, although one nearly exists.<sup>102</sup> Property simply  
needs to be owned by the municipal utility and “useful.” Click!, with \$25 million a year in  
revenue is clearly performing that telecommunication purpose.

Consolidation in the telecom industry is highly scrutinized by the DOJ, FTC and the FCC to  
prevent market concentration.<sup>103</sup> Comcast’s 2015 bid for Time Warner Cable would have

<sup>98</sup> Shook Decl 12/30/19, Ex. 80, Pg. 7 (Homer T. Bone Letter, from Congressional Record, citing 1913  
“manipulation” of legislation by private power trusts, and Rep. Heinly’s “two lines” added to irrigation bill  
repealing City’s right to sell power outside the City limits). Pg. 23, (Judge Bone’s “Thorn Interview”.)

<sup>99</sup> *State v. Kuykendall*, 137 Wash. 602, 611 243 P. 834, (1926), “taxicab company was a public utility.”

<sup>100</sup> *Kuykendall*, at 611, Drawing on *Budd v. People*, 12 S.Ct. 468, 143 U.S. 517, 36 L.Ed. 247 (1892),  
quoting *Munn v. Illinois*, 94 U.S. 113, 24 L.Ed. (1877). As briefed in Plf. Shook’s MPSJ, Pg. 15.

<sup>101</sup> RCW 54.16.180 (represents clear legislative intent and definition of “surplus” for municipally-owned  
utility property.) See Shook’s MPSJ., Pgs. 24, 25, (detailed history of surplus statute).

<sup>102</sup> Tacoma suffers oligopoly, with two alternatives for BIAS, generally. Because of Click!’s existence.

1 consolidated 30 million subscribers.<sup>104</sup> Comcast unilaterally offered to divest nearly 4 million  
2 customers just in hopes of gaining approval for the deal. It was killed by DOJ scrutiny, anyway,  
3 seen as creating an “unavoidable gatekeeper for Internet-based services.”

4 2. A Separate Entity or Undertaking is Not Required For the Right To Vote.

5 Organizing Click! as a “Department” under Tacoma Power, or providing multiple utility  
6 services under one entity, does not destroy the public’s right to vote under RCW 35.94. The City  
7 has full discretion over organizing its utility departments.<sup>105</sup> Click! is still a utility asset.

8 Many public power utilities provide more than electric service for their communities, “they  
9 might also manage the area’s water, wastewater, internet, waste, gas, and *telecommunications*  
10 *services*,” says the American Public Power Association, who refers to such entities as  
11 “Multiservice Utilities.” Such organization structure are common.<sup>106</sup>

12 “Operationally, one advantage we see in being a *multiservice utility* is having  
13 the ability to coordinate our various activities,” said Ken Weber, chief executive  
14 officer of Harlan Municipal Utilities (HMU), which supplies electric, gas,  
15 water, and *telecommunications services* to some 5,100 people in Harlan, Iowa.  
16 Weber points to the convenience for customers that his utility can provide as a  
17 single point of contact for contractors and movers.

18 Coordination impacts field operations, too, said Gabriel Khalife, borough  
19 manager for Kutztown, Pennsylvania, a municipality about the same size as  
20 Harlan that also offers a gamut of services: water, wastewater, gas, electric,  
21 *telecommunications*, and waste management. (emphasis added.)

22 Defendant asserts *Coates v. Tacoma* prevents this Court from finding Click! is anything other  
23 than “part of” a public utility.<sup>107</sup> Perfect! “Part of ” is sufficient to win the right to vote.

24 Not that it matters, but Click! is more than a “part of.” Click! is a “Department” and System  
25 in its own right. The issues, evidence and arguments in *Coates* were entirely different. An  
26 accountancy act violation, compared with a right to vote.

27 *Coates* does not cut in defendants’ favor. Plaintiff claimed Click! was not a utility, was losing  
28 money, violated the accountancy act and any losses are general government’s obligation<sup>108 109</sup>

29 <sup>103</sup> Shook Decl. 12/30/19 Ex. 69, Pgs. 38, 39, (DOJ 4/24/15 DOJ Press release “significant concerns that  
30 the merger would make Comcast an unavoidable gatekeeper for Internet-based services that rely on a  
31 broadband connection to reach consumers.” ). See also Pg. 39 (Comcast’s divestiture offer).

<sup>104</sup> Shook Decl. 12/30/19 Ex. 69 (30 million subscribers, also 30 % of the total United States market).

<sup>105</sup> *Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 679, 695, (“ court leaves the choice of means used in  
operating the utility to the discretion of municipal authorities.”).

<sup>106</sup> Shook Decl. 12/30/19, Ex. 68, Pg.1. (Info from American Public Power Association website).

<sup>107</sup> *Coates v. Tacoma*, Division II, Unpublished Decision No. 51695 12/10/19 (Alleged City violated  
Washington’s local government accounting statute, RCW 43.09.210.)

1 City defended, arguing Click! was a utility and part of Tacoma Power. City was right, and  
2 prevailed. The court found, “Therefore, we conclude that Click! and Tacoma Power's electric  
3 utility are one undertaking for purposes of RCW 43.09.210(3).” *Coates*, at Pg. 9.

4 As “one undertaking,” *Coates* establishes Click! is, at least, “any part thereof,” triggering the  
5 mandatory vote in RCW 35.94 and § 4.6. Any other reading leads to absurd results.

6 The *Coates* “part of” finding is a thoughtful solution. It avoided a long trial over  
7 controversial accounting methodology.<sup>110</sup> It preserved federal and state policy goals furthering  
8 municipal broadband.<sup>111</sup> Shook Decl. 10/30/19, Ex. 21 (White House Report).

9 Charter § 4.6 has no surplus clause.<sup>112</sup> The *Coates* finding triggers a vote, regardless of  
10 surplus. With Judge Bone Chairman of the 1926 Charter Committee, the intent of §4.6 is clear. <sup>113</sup>

11 RCW 35.94.040 reads, “equipment originally acquired for public utility purposes.” Thus, it is  
12 the ownership of the property, not the definition of the assets’ function, that compels a public  
13 vote. When a utility buys an asset, with a “nexus” to the utilities purpose, it’s statutorily  
14 protected by the vote, unless surplus. Even artwork, that brighten employees’ day. <sup>114</sup>

15 Power and Click! are “one undertaking” under *Coates*, which establishes Click! is a bona-  
16 fide “utility,” and not a general government obligation. Since Click! is a “system,” by common  
17 definition, and *Coates*’ confirms Click! is part of a “municipal utility,” organizational  
18 convenience and institutional naming aside, the right to vote is mandatory. <sup>115</sup>

19 3. An FCC Designation Is not A Controlling Factor Over People’s Right to Vote.

20 Defendant raises unrelated issues, of cable TV “regulation” and the FCC’s politically  
21 inspired Restoring Internet Freedom (“RIF”) order. <sup>116</sup>Title I or Title II designation of BIAS does  
22 not preempt state laws the right to vote on disposal of a public communication system. <sup>117</sup>

23 <sup>108</sup> *E.g.* City of Tacoma’s 4/20/19 MPSJ. on The Nature or Mandamus Relief, *Coates v City of Tacoma*,  
Pierce County Superior Court 17-2-08907-4., Page-3.

24 <sup>109</sup> Losses were disputed issue and no finding on losses was ever made.

25 <sup>110</sup> Shook Decl. 12/12/19, Ex. 55 (Council Resolution for an Audit of controversial Click! accounting.)

26 <sup>111</sup> RCW 43.330.532, (Access to broadband critical to full participation in society and modern economy).

<sup>112</sup> Shook Decl. 12/30/19, Ex. 89 (Tacoma City Charter Article 4 -Utilities.)

<sup>113</sup> Shook Decl. Part Two 12/12/19, Ex. 67 Pg. 3 (Judge Bone elected Chair of Charter Committee).

<sup>114</sup> *E.g.* Shook’s MPSJ., Pg. 15, Fn. 74. (utility purpose, nexus to power, and *Okeson* line of cases).

<sup>115</sup> “If the statute is ambiguous, the courts must construe the statute so as to effectuate the legislative intent.  
In so doing, we avoid a literal reading if it would result in unlikely, absurd or strained consequences.”  
*State v. Elgin*, 118 Wn.2d 551, 555, 825 P.2d 314 (1992).

<sup>116</sup> FCC’s Restoring Internet Freedom Order (“RIF”) restored Title I regulation of BIAS. *Protecting and  
Promoting the Open Internet*, 30 FCC Rcd 5601, 5757-77 ¶¶ 355-387 (2015) (*Title II Order*).

1           *Mozilla* vacated the FCC’s RIF “Preemption Directive,” which would have prohibited state  
2 “bright-line” consumer protection regulation of net neutrality.<sup>118</sup> Washington State’s own net  
3 neutrality laws support broadband’s vital role as an essential utility.<sup>119</sup>

4           If Defendant’s argument is accepted, that Title II regulation of information flowing over the  
5 physical facilities defines a utility, then our State’s identical Title II bright-line regulations, in  
6 RCW 19.385.020, confirm Click!’s utility-status.<sup>120</sup> RCW 19.385’s “Open Internet Act,”  
7 preserved Title II’s bright-line regulations in Washington State, preempting the authority sought  
8 by the FCC in reclassifying BIAS to Title I.<sup>121</sup>

9           The Communication Act of 1934 expressly grants states authority to promote and regulate  
10 “telecommunications services, and safeguard the rights of consumers.”<sup>122</sup>

11           All “information services” are accessed via telecommunications.” Click! is a physical  
12 telecommunications system.<sup>123</sup>

13           Municipal ownership of Click!’s infrastructure, fibers, routers, servers, switches, pipes, poles  
14 and customer accounts is what triggers the right to vote, not the FCC’s shifting regulatory  
15 authority, or “non-authority,” in regulating data flow, or activity, over the physical infrastructure.  
16 Such regulation has no bearing on voter’s inalienable right to approve conveyance of Click!’s  
17 property.

---

18  
19 <sup>117</sup> See generally “nowhere in the general charge to “promote competition in the telecommunications  
20 market” is a directive to do so by preempting a state’s allocation of powers between itself and its  
21 subdivisions.” *Tennessee V. FCC*, 832 F. 3d 597 - Court of Appeals, 6th Circuit (2016).

22 <sup>118</sup> *Mozilla Corp. v. FCC*, 940 F.3d 1, 63 (D.C. Cir. 2019), “ Commission lacked the legal authority to  
23 categorically abolish all fifty States’ statutorily conferred authority to regulate intrastate communications.  
24 For that reason, we vacate the Preemption Directive, 2018 Order ¶¶ 194–204.” *Mozilla*, at 86, The court  
25 rejected the FCC’s preemption efforts, finding the FCC has no authority to regulate BIAS under Title I,  
26 and, hence no authority to tell states they cannot regulate it. The FCC, by arguing BIAS was not subject to  
FCC regulation, in effect, deprived itself of any authority to preempt state regulation.

<sup>119</sup> *Mozilla*, in rejecting FCC preemption, confirmed Washington State’s authority for bright-line regulation  
of BIAS. *Mozilla*, at 62, stated “the harms from blocking and throttling during a public safety emergency  
are irreparable. People could be injured or die.” Also finding “arbitrary and capricious the Commission’s  
failure to consider the implications for public safety” and “the 2018 Order was arbitrary and capricious in  
this respect, we remand” *Mozilla v FCC, Dist. of Col.* 2019 USCA Case #18-1051.

<sup>120</sup> The City of Tacoma and Washington state have their own bright-line regulation, of “No blocking; no  
throttling; no paid prioritization.” A *Title II* designation of BIAS would have provided federal authority.

<sup>121</sup> Chapter 19.385 RCW (may not: Block content, Impair internet traffic or Engage in paid prioritization).

<sup>122</sup> As amended by the Telecom. Act of 1996. See 47 U.S. Code § 253 (b) (shall not affect ability State to . . .  
protect public safety and welfare, ensure telecommunications services, safeguard rights of consumers).

<sup>123</sup> 47 USC § 153(50): transmission between points specified by the user, of information of user’s choosing.

1 Congress removed barriers, in 1996, authorizing the FCC to encourage the development of  
2 such systems. <sup>124</sup> The City even cited the Telecom Act, in seeking this Court's authority to  
3 establish Click! in 1996. <sup>125</sup>

4 [T]he thrust of the Telecommunications Act is to encourage the availability and  
5 affordability of telecommunications services. . . Tacoma is well positioned to make  
6 telecommunications services available to the public at a competitive price, thereby  
7 furthering this federal policy. (Shook Decl. 10/30/19 Ex. 12, pg. 10)<sup>126</sup>

8 Also, in this same 1996 Brief, at Pg. 12, ¶ B ( 3.), City cited its authority to provide "utilities,"

9 3. The City Has Authority Under Washington Statutes To Provide Telecommunications  
10 Services.

11 The City's statutory powers include the authority to provide telecommunications services.  
12 First, the City, as a first class charter city having code city powers as well, has all powers not denied  
13 by law, "including operating and supplying of utilities and municipal services commonly or  
14 conveniently rendered by cities or towns." RCW 35A.11.020. Tacoma may conveniently render

15 Tacoma may conveniently render telecommunications services because the Light  
16 Division has an existing citywide electric system of connections to customers'  
17 homes, because it has existing billing relationships with customers, and because  
18 it can provide services economically. Second, there is no express statutory  
19 prohibition against city provision of municipal telecommunications services.  
20 *Winkenwerder*, supra. To the contrary, the Legislature has acknowledged that  
21 cities provide communications services through enacting a statute providing for  
22 the burying of city-owned communications facilities. RCW 35.96.030. Finally,  
23 the Legislature has determined that competitive markets for telecommunications  
24 services serve the public interest. RCW 80.36.300; *In re Electric Lightwave, Inc.*,  
25 123 Wn.2d 530, 538-39 (1994) (noting that "it is the state's policy to promote  
26 diversity in the supply of telecommunications services and products in  
telecommunications markets throughout the state"). The City's provision of  
telecommunications services will make the market more competitive, thus  
furthering the public interest recognized by the Legislature.

27 Defendant argues cable modem service is not telecommunications, citing *Brand X*.<sup>127</sup> But,  
28 FCC designations aside, information service still requires telecommunications. Under USC 47  
29 153( 23) "information service" is the acquiring of "information via telecommunications." It's  
30 these physical facilities the people have a right to vote over. "[T]elecommunications is part and

<sup>124</sup> Under 47 U.S.C. § 1302(a), the Federal Communications Commission is charged with "encouraging the deployment on a reasonable and timely basis of advanced telecommunications capability to all Americans," Congress also entrusted this responsibility to state commissions.

<sup>125</sup> Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110 Stat. 70 (1996).

<sup>126</sup> 1996 Memorandum In Support Of City's Summary Judgement. See Shook Decl. 10/30/19 Ex. 12.

<sup>127</sup> *Nat'l Cable & Telecommunications Ass'n v. Brand X Internet Servs.*, 54 U.S. 967 (2005)

1 parcel of cable modem service ”*Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash.  
2 2008). *See also, Brand X*, at 1006. “the high-speed data transmission (telecommunications) that  
3 is an input used to provide this service”. Click! is still a communication utility. An FCC  
4 regulation does not magically convert it into a library, pizza store or pet shop. Click!’s physical  
5 transmission facilities, components and other assets are not surplus.

6 Click! is not an ISP. Click! is a pure telecom system providing wholesale FTTP, Metro  
7 Ethernet and lit data transport services, with established wholesale rates.<sup>128</sup> The retail ISP  
8 partners provide the end-user cable modem services, troubleshooting and maintaining their  
9 modems and competing in delivering retail BIAS services to the community.

10 This free market competition keeps end-user rates low. Privatizing Click! removes  
11 Council’s oversight of wholesale rate. End users include elderly, low-income, governmental and  
12 student customers, who could be harmed by unreasonable price increases, if Click! is sold to a  
13 private company.

14 Click!’s wholesale telecom operations are comparable to TPU’s wholesale water and power  
15 operations, where wholesale rates are also set by Council. In 2018 TPU earned over \$50 million  
16 in wholesale water and power sales. (Shook Decl. 12/30/19, ¶ 1, Ex. 75, Pgs. 19, 20.).

17 Privatization is both substantively and procedurally ultra vires.<sup>129</sup> Procedurally, there was no  
18 “RFP” issued for the sale of Click!, as Defendant alleges. Only an “RFI/Q”, for “information.”<sup>130</sup>  
19 Council never audited Click!’s financial performance.<sup>131</sup> They voted to go “All-In,” to expand  
20 Click!. The *Coates* lawsuit dashed those hopes, forcing Council to change direction.<sup>132</sup>

21 No bidding or appraisal has occurred in this process of privatization. Bidding typically  
22 follows a “surplus property declaration.” Council has no basis for determining a fair valuation of  
23 the System’s assets.<sup>133</sup> Fortunately, “the public vote is curative of all ills.”

24 <sup>128</sup> Shook Decl. 12/12/19, Ex. 57, Pg. 326/423. (Click! FTTP Role and Responsibilities). Ex. 64, Pgs.2-9, (Tacoma Public Library Broadband Agreement).

25 <sup>129</sup> Substantive ultra vires briefed in Pl. Shook’s MSJ., Pgs. 26, 27 and 28.

26 <sup>130</sup> Def.[’s] 12/12/19 MSJ., Pg. 6, Ln. 10. Def. deceptively adds a (“P”) in describing the RFI process. City did NOT prepare a RFP. It was an RFI and NOT an “RFI/Q/P.” The City issued an RFI. There was no “P”, Shook Decl. 12/30/19, ¶ 15, *also* Ex. 72. This is not “Wheel of Fortune,” Def. can’t just, “give me a P!”

<sup>131</sup> Shook Decl. 12/30/19, ¶¶ 1, 2, 3, and 13. No audit, disputed losses, no bidding, no valuation. Only basis for privatization was fear of adverse decision in *Coates*, *also* Ex. 72. Advanced Stream’s RFI response.

<sup>132</sup> *Edward E. Coates, et. al., v. City of Tacoma*, Division II, No. 51695-1 Unpublished decision, 12/10/19, see Shook Decl. 12/30/19, ¶¶10, 11 (explanation and evidence of switch from “All In, to “All-Out.”). Plaintiff’s in that suit, Mr. Crowley, have opposed Click! since before its creation.

<sup>133</sup> Shook Decl. 12/30/19, Ex. 82 Shook’s Email to Council, informing them of failure to follow process.

1 Plaintiff's CPA claim should not be dismissed. Naturally the CPA does not apply to City's  
2 "legitimate acts." Cities necessarily operate monopolies and enjoy sovereign immunity from CPA  
3 claims for doing so. But, tortious acts, and conspiracy with a private party, in restraint of trade are  
4 not legitimate ministerial functions.<sup>134</sup> The CPA claim involves many facts. Discovery and a trial  
5 could be required.<sup>135</sup> If justice prevails, the CPA claim will soon be moot and can be withdrawn,  
6 when the Court upholds the people's right to vote. The right to vote being "curative of all ills."<sup>136</sup>

7 Finally, telecommunications is not a luxury. You can't add a "rooftop antenna" and get it.<sup>137</sup>  
8 The flow of such "information" requires a "pipeline," a fiber optic backbone, for transferring  
9 customer's data.<sup>138</sup> Click! Network is our community's ' public data pipeline, that "information  
10 highway." It is a utility. The additional capacity and fibers, paid for by the people, are the  
11 equivalent of lanes on this advanced public highway. Defendant's definitions of "utility" and  
12 "surplus" would return us to an era of private "toll roads," and allow any municipally-owned  
13 utility asset to be sold, to large campaign contributors, without a public vote. Could a water,  
14 power or rail facility be next?

## 14 VI. Conclusion

15 For the forgoing reasons, the Court should deny Defendants Motion for Summary Judgement  
16 and grant Mr. Shook's Motion and declare City's surplus resolution ultra vires.

17 Respectfully submitted this 30<sup>th</sup> day of December 2019.

**Hearing Date: January 10, 2020**  
Oral Argument Confirmed

**IN THE SUPERIOR COURT OF PIERCE COUNTY  
OF THE STATE OF WASHINGTON**

DARREL BOWMAN,  
  
Plaintiff,  
  
v.  
  
CITY OF TACOMA,  
  
Defendant.

**NO. 19-2-11506-3**

PLAINTIFF SHOOK'S REPLY IN SUPPORT  
OF MOTION FOR PARTIAL SUMMARY  
JUDGEMENT GRANTING DECLARATORY  
RELIEF

MITCHELL SHOOK,  
Plaintiff Pro Se,  
  
v.  
  
CITY OF TACOMA,  
  
Defendant.

Plaintiff Shook's Reply In Support Of  
Motion for Partial Summary Judgment

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

- 0 -

1 As the Court considers this motion, please keep in mind *two* important observations:

2 *First*, Plaintiff’s motion only asks the Court to declare what the City’s own legislative body,  
3 *has already said*: An approving “vote of the people” is required to “sell, lease or dispose” of any  
4 utility property *essential for continued* utility services.<sup>1</sup>

5 *Second*, Click! provides advanced telecommunications “*services*,” using the public’s municipal  
6 utility *assets* and *appurtenances*. The public’s “assets” are *essential for continued* provision of  
7 Click!’s vital public telecom services.<sup>2</sup> The law requires a vote for the disposal of public utility  
8 “*assets*,” not just utility “*systems*,” as Defendant continues to mischaracterize this case.

9 As seen here, in the City’s own Click! Resolution, the City’s own finding cites the people’s  
10 right-to-vote under Charter §4.6: *See also*, Shook Dec. 12/12/19, Ex. 32, Pg. 1:20.

11 20 || WHEREAS the City Charter Section 4.6 requires a vote of the people  
12 21 || before the City may sell, lease, or dispose of any utility system, or parts thereof

13 Defendant admits that “telegraph and telephone,” now known as “telecommunications” or  
14 “telecom,” was one of the protected utilities, on the *long-list* of municipal utilities requiring a  
15 vote of the people, in the original version of RCW 35.94, the “Laws of 1917.”<sup>3</sup>

16 As a result, City’s only remaining opposition boils down to one main argument, that the  
17 Laws of 1917 were “repealed” in 1965, eliminating the “long-list” and any vote of the people  
18 requirement for the public’s telecom assets.<sup>4</sup> As seen here, page 10, line 17 of Def.’s Response:<sup>5</sup>

19 17 || of the statute as it existed in 1917. However, it is unnecessary for the Court to decide this question  
20 18 || because Chapter 137 of the Laws of 1917, including the reference to telephone plant and lines,  
21 19 || was repealed in its entirety in 1965.

22 Defendant erroneously asserts, “reference to telephone plant and lines, was repealed in its  
23 entirety in 1965.” That is not true. The Law of 1917 was “repealed and replaced,” in its *entirety*.

24  
25 <sup>1</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20, ¶ 4. (Def.’s own Res. U-10828 citing public’s right to vote.).  
26 <sup>2</sup> As evidenced by over 2,100 pages of essential assets listed in the Click! IRU privatization agreement, without  
which Click!’s telecom services cannot continue in operation. Shook Decl. 11/1/19, Ex. 29, 30.  
<sup>3</sup> Def’s Resp., Pg. 14:10, (“cable modem and metro-ethernet services are a form of telecommunications”).  
<sup>4</sup> “Laws of 1917” refer to the RRS §§9512-9514, “Sale or Lease of Public Utilities Owned by Cities.”  
<sup>5</sup> Def.’s Response, Pg. 10:17, Defendant states: “the Laws of 1917, including the reference to telephone plant  
and lines, was repealed in its entirety in 1965.”

1 The Laws of 1917 did not change in 1965 and a search for a definition of “utility” is not  
2 required. The statute defines telecom as the utility. Since Click! is owned by a city, and it doesn’t  
3 matter which Department of the city owns it, the popular vote requirement survives.

4 **A. The People’s Right to Vote was Not Extinguished by the Laws of 1965.**

5 The City’s main argument, that the Laws of 1917 were “repealed” in 1965, is easily dispelled,  
6 by examining 1951’s inaugural Chapter 80.48, incorporated as Chapter 35.94 in 1965.<sup>6</sup>

7 The 1951 version is identical to the statute today. Nothing was changed in 1965.<sup>7</sup> Seen here is  
8 RCW 80.48.010 as it appeared in 1951; and, as it remains today: Shook Dec. 1/6/20, Ex. 92:

9 **Chapter 80.48**  
10 **SALE OR LEASE OF MUNICIPAL UTILITIES**  
11 **Sections**  
12 80.48.010 Authority to sell or let.  
13 80.48.020 Procedure.  
14 80.48.030 Execution of lease or conveyance.  
15 **80.48.010 Authority to sell or let.** A city may lease for any term  
16 of years or sell and convey any public utility works, plant, or sys-  
17 tem owned by it or any part thereof, together with all or any equip-  
18 ment and appurtenances thereof. [1917 c 137 § 1; RRS § 9512.]

19 Today’s Title 35 version is identical to the Title 80 version from 1951. The 1965 enactment of  
20 Chapter 35 RCW did not “repeal” or change the previous Chapter 80.48 RCW. Since the statutes  
21 were identical, before and after the 1965 enactment of Title 35, the law falls under Chapter 35.98’s  
22 “Construction” statement, in RCW 35.98.010, which provides, “The provisions of this title . . . shall  
23 be construed as restatements and continuations, and not as new enactments.” Chapter 35.94’s  
24 enactment was, simply, “restatements and continuations” of the law, with no change in the law.  
25 Thus, it remains intact as originally enacted.

26 **Chapter 35.98**  
**CONSTRUCTION**  
**35.98.010 Continuation of existing law.** The provisions of this  
title insofar as they are substantially the same as statutory provi-  
sions repealed by this chapter, and relating to the same subject  
matter, shall be construed as restatements and continuations, and  
not as new enactments.

<sup>6</sup> Shook Decl. 1/6/20, Ex. 95 (Laws of 1965 savings clause, and Laws of 1951 with the statute as it existed at the inception of the RCW, as Chapter 80.48 RCW, showing RCW 35.94 was never changed.

<sup>7</sup> “Laws of 1917” were RRS §§9512-9514, “Sale or Lease of Public Utilities Owned by Cities or Towns.”

1 As a “Continuation of existing law,” the language in RCW 35.94.020 necessarily still  
2 encompasses “telegraph and telephone plants and lines, **or any system embracing all or any one**  
3 **or more of such works or plant or any similar or dissimilar utility system.**”<sup>8</sup> (Emphasis added).

4 Click!’s telecommunication system is the modern equivalent of “telegraph and telephone plants  
5 and lines,” and it is also a “similar or dissimilar” system. Thus, the protective popular vote-of-the-  
6 people requirement remains in effect under current statutory language.

7 So the City has negotiated the terms of the IRU, Business Agreement and Ordinance to assign  
8 the Click! Franchise. The statute requires City do those things. But there is a final step, which the  
9 statute requires, with a *clear statement* that the “ordinance shall not take effect until it has been  
10 submitted to the voters of the city for their approval or rejection at the next general election.”<sup>9</sup>

### 11 **1. Continuation of the Laws of 1917 into the 1951 Inauguration of RCW**

12 It is worth remembering the Laws of 1917 were “abbreviated” prior to codification into RCW  
13 80.48 in 1951.<sup>10</sup> A savings clause was added at RCW 1.04.020.<sup>11</sup>

14 When the statute was “Rewritten for brevity,” the long-list of utilities, with “telegraph and  
15 telephone,” was shortened to a generality encompassing “any public utility works, plant, or system  
16 owned by it or any part thereof, together with all or any equipment and appurtenances thereof.”

17 In 1946, the Code Revision & Recompilation Committee provided a letter, which explained that  
18 all “major changes in the course of revision” would be documented in a “third column,” with a  
19 “catch-line” containing the “reviser’s explanation in parenthesis.” The original letter can be found  
20 in Shook Decl. 12/30/19, Ex. 81 pg. 15 (pg. 330 of 507). Seen here, is an excerpt from that letter:<sup>12</sup>

21 **The third column contains the catch-line of each section as set**  
22 **forth in the revision itself, together with the reviser's explan-**  
23 **ation in parenthesis of the major changes made in the course of**

24 \_\_\_\_\_  
25 <sup>8</sup> Shook Decl. 1/6/20, Ex. 95. *Also see* Laws of 1965, Ch. 7, Page 444.

26 <sup>9</sup>A “contract contrary to the terms and policy of a legislative enactment is illegal and unenforceable. *South Tacoma Way, LLC v. State*, 169 Wn.2d 118, 233 *Hederman v. George*, 35 Wash.2d 357, 362, 212 P.2d 841 (1949); *State v. Nw. Magnesite Co.*, 28 Wash.2d 1, 26-27, 182 P.2d 643 (1947).

<sup>10</sup> Fully briefed on page 1 of Plaintiff Shook’s Motion, and in Plaintiff Bowman’s MPSJ on Pages 9-12.

<sup>11</sup> “nothing herein shall be construed as changing the meaning of any such laws.”

<sup>12</sup> Shook Decl. 12/30/19, Ex.81, Reviser's Notes Volume 2, Revised Code of Washington, 1946, At 80-7, (stating RRS § 9512 was "rewritten for brevity.")

1 Thus, the emphatic “similar and dissimilar” language was retired, not by legislative action, but  
2 by a code reviser’s revision for “brevity,” as shown in the “reviser’s explanation, seen here:<sup>13</sup>

CHAPTER 80.12		
SALE OR LEASE OF MUNICIPAL UTILITIES		
Sections		
80.12.01	9512	Authority to sell or let. (Rewritten for brevity.)
80.12.02	9513	Procedure.
80.12.03	9514	Execution of lease or conveyance.

3  
4  
5  
6 **B. Telecommunications Service is Not a Cable TV Service.”**

7 In City’s other argument against the public vote, which I call the “Hail Mary,” for being sillier  
8 than surplus, Defendant admits Click! is a telecommunication system, providing telecom services;  
9 yet denies they ever “intended” Click! to be a telecommunication system.<sup>14</sup>

10 All “intentions” aside, the argument is flawed. First, it’s false. Second, the City is legally and  
11 equitably estopped from asserting that it is not a telecom system because it has previously taken  
12 the position that it is.

13 Click! is owned by the City’s public utility, it provides telecom services and this case is not  
14 about “intentions.” Defendant’s own pleadings and business plans, in the 1996 case confirming  
15 authority for utility funding of Click!, prove Defendant’s “intention” was to establish a commercial  
16 telecom system, as part of the public utility, to deliver municipal telecom services.<sup>15</sup> Furthermore,  
17 Defendant admits Click! is a “telecommunications network” and its services are “a form of  
18 telecommunications.”<sup>16</sup> As seen the Response, on Page 14:10.

19 | defendant does not dispute that Click! Network operates over a network that meets the definition  
20 | of telecommunications. The HFC Network was built as a telecommunications network, and cable  
21 | television, cable modem and metro-ethernet services are a form of telecommunications.

22 Defendant urges viewing Click! as a “one-way” TV system, as in *Issaquah*.<sup>17</sup> The  
23 distinctions between TV and Click! was briefed in Plaintiff’s Response on Pages 6-7.

24  
25 <sup>13</sup> Decl. 12/30/19, Ex. 81 pg.19, or page 334/507 in the PDF. (reviser’s note rewritten for brevity)

26 <sup>14</sup> City’s Resp., Pg. 20:13, (“City had no intention of allowing Click! to operate as a telecommunications utility”).

<sup>15</sup> Shook Decl., 12/30/19 Ex. 88, *City of Tacoma v. Taxpayers and Ratepayers of Tacoma*,

<sup>16</sup> 47 USC § 153(53) The term “telecommunications service” means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.

<sup>17</sup> *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980).

26

**1. Telecommunications is Easily Distinguished From Cable TV**

Since Click! is a “communication system,” Defendant’s argument is moot under the Laws of 1917, which require a vote, and under federal, state and local statutes, and case law, which *all* fully distinguish cable TV from telecom.<sup>18</sup>

The legalities and complexities of advanced telecommunications technology and regulations can be perplexing, but some recent cases are helpful. *Community Telecable’s* ruling differentiates cable TV from Click!’s “two-way” telecommunications.<sup>19</sup> The Oregon State Supreme Court distinguishes cable TV and telecom systems, in explaining why Comcast’s cable modem services should be taxed as telecom and not cable TV.<sup>20</sup> As seen in *City of Eugene v. Comcast*, here:

Thus, considering the Telecommunications Act in context, we conclude that it created a regulatory scheme that focuses on the function of the service provided rather than on the communications facility used to provide it. Within that scheme, telecommunications services are generally treated as telecommunications services and cable services as cable services, regardless of who provides the service or how. *Id.* at 551

The FCC has recognized that, as it relates to distinguishing cable, telecommunications, and information services, none of those classifications “rests on the particular types of facilities used. Rather, each rests on the function that is made available.” *In re Inquiry Concerning High-Speed Access to the Internet*, 17 FCC Rcd 4798 at 4821; *see also* 47 USC § 522(6) (defining “cable services”); 47 USC § 153(53) (defining “telecommunications service”); 47 USC § 153(24) (defining “information service”). That is expressly the case for “telecommunications service,” which the Act defines as “the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, *regardless of the facilities used.*” 47 USC § 153(53) (emphasis original) *Id.* at 551.

**C. City Charter and Franchise Agreement do Not Prohibit Telecommunications Business.**

Defendant’s disingenuous and ill-conceived contention that City Charter Section 4.1 prohibits the City from providing telecom services is deeply insulting to the legacy of Tacoma’s own

<sup>18</sup> *E.g. Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008) differentiates TV from Telecom. *See also*, 47 USC § 153(50) *compare with* 47 U.S.C. § 522(6), *E.g.* RCW 82.04.065 (27), Tacoma Municipal Code Title 16 B. (“Telecom service” does not include television and video programming service).

<sup>19</sup> *E.g. Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008) differentiates TV from Telecom. *See also*, 47 USC § 153(50) *compare with* 47 U.S.C. § 522(6), *E.g.* RCW 82.04.065 (27), Tacoma Municipal Code Title 16 B. (“Telecommunications service” does not include television and video programming service).

<sup>20</sup> *City of Eugene v. Comcast of Oregon II, Inc.*, 359 Or. 528, 375 P.3d 446 (2016)

1 Honorable Judge Homer T. Bone, who authored that language. It places no such limitation on the  
2 types of utility services the City may “sell and deliver.” It affords “all the powers granted to cities  
3 by “state law,” and specifically provides “not by way of limitation.” As seen here,:

4 **Article IV**  
**PUBLIC UTILITIES<sup>13</sup>**

**General Powers Respecting Utilities**

5 **Section 4.1** – The City shall possess all the powers granted to cities by state law to construct, condemn  
6 and purchase, purchase, acquire, add to, maintain, and operate, either within or outside its corporate  
7 limits, including, but not by way of limitation, public utilities for supplying water, light, heat, power,  
8 transportation, and sewage and refuse collection, treatment, and disposal services or any of them, to the  
9 municipality and the inhabitants thereof; and also to sell and deliver any of the utility services above  
10 mentioned outside its corporate limits, to the extent permitted by state law.

11 The Charter’s history is fascinating, not only for the strong protection it affords citizens, with  
12 Section 4.6’s right to vote in protecting utility assets from wrongful privatization, but also for the  
13 fact it contains contributions by Hon. Judge Bone, the “Father of Public Power.”<sup>21</sup> Judge Bone was  
14 Chairman of the City’s Freeholder Charter Committee in 1926.<sup>22</sup> In Judge Bone’s personal letter,  
15 published in the 1944 Congressional Record, he describes his leadership role in creating Tacoma’s  
16 City Charter. *see* Shook Decl. 12-30-19, Ex. 80 pg. 5.

17 In 1926 a charter revision commission was elected by the people of Tacoma  
18 for the purpose of revising the city charter. I was elected to that commission,  
19 receiving many thousands more votes than anyone else who had been a  
20 candidate, and without objection was made chairman of the charter revision  
21 commission. Naturally, I made every effort to see that the revised (and  
22 present) city charter which was the outgrowth of the work of this commission,  
23 contained suitable provisions respecting franchises for private utilities. I  
24 wrote, and had incorporated into the new charter, a provision authorizing a  
25 referendum on any franchise which might be granted a private utility.

26 **D. Status as “System” or Departmental Organization is Unrelated to Right to Vote.**

Defendant describe the dispute as whether “Click! Network is a separate public utility from  
Tacoma Power.”<sup>23</sup> Also, that Click! was “intended” to be a municipal service. But “separate utility”

<sup>21</sup> Shook Decl. 1/6/20 Ex.96 Death Of Former Senator Homer T. Bone Congressional Record- Senate Mr.  
Magnuson. Mr. President, with a sense of great sorrow I announce to the Senate the passing yesterday of a  
former distinguished Member of this body, Homer T. Bone of the State of Washington. He was 87 years old.  
He served here for two terms with great distinction. . . . he was one of the most brilliant men ever to grace  
this body. He was a determined advocate of the development of power through the use of natural resources,  
particularly hydro-electric development. Out in the Pacific Northwest *we considered him to be the father of  
public power*, and also the Rural Electrification Administration.

See also, In 2016 Homer T. Bone Award went to Congressman Norm Dicks, last accessed 1/5/20, at  
<https://www.vnf.com/norm-dicks-recipient-of-homer-t-bone-award>, *also*, <https://perma.cc/Y5X2-SF5J> .

<sup>22</sup> Shook Decl. Part Two 12/12/19, Ex. 67 Pg. 3 (Judge Bone Chairman of 1926 Freeholders Charter  
Commission, and Member of the Utilities, Franchises; Public and Local Improvements Committee.)

<sup>23</sup> Quoting Def.’s Response Pg. 3:6.

1 is not the issue, or the standard for triggering the public vote.<sup>24</sup> Click!’s assets and appurtenances,  
2 by virtue of their public ownership, are “*any part thereof*” of a utility, triggering the vote.<sup>25</sup> In  
3 Shook’s Motion, under “Relief Requested” Shook asks, "Are telecom *assets* of a municipal utility”  
4 protected by the laws. Seen here, Page 3, of Shook’s MPSJ, here:

5 15 || 1. Are telecommunication assets of a municipal utility governed by Chapter 35.94 RCW or  
6 16 || Tacoma City Charter 4.6 ? ||

7 Defendant admits the assets and appurtenances were acquired for utility purpose.<sup>26</sup> Unless  
8 these assets are obsolete, worn out and no longer useful in performing the public purpose for which  
9 they were acquired, i.e. “surplus,” which they are not, they are protected by law. Defendant does  
10 not deny the assets are useful and valuable for the very same utility purposes for which they were  
11 acquired, nor can they deny it, given the assets are now earning \$25 million a year in revenue and  
12 will continue doing so under privatization.<sup>27</sup>

13 **1. Organizational Status Does Not Affect Click!’s Status as a Communication Utility.**<sup>28</sup>

14 Defendant’s theory that City created Click! to provide “municipal services,” not to create a  
15 “utility,” is irrelevant. As *Seen* here, from Defendant’s Response, pg. 19. In 9:<sup>29</sup>

16 Converting Click!’s ownership, from the Department of Utilities (“TPU”), to place it under  
17 general government’s control, does not magically convert the System into some other type of  
18 municipal service, such as a library, theater or ball park. Click! will never be anything other than a  
19 communications utility, regardless of administrative organization or “naming.”

20 <sup>24</sup> Plaintiff’s “Any Part Thereof” arguments are in the Plaintiff’s 10/30/19 Motion for TRO, hereby  
21 incorporated, *see* Pages 17-18 for the “Any Part Thereof” standard and threshold for triggering a public  
22 vote. *See also*, Page 12 where plaintiff cites the City of Duvall’s process for surplus property, as an  
23 example of best practices adhering to the surplus property requirements of RCW 35.94.040, *See also* Shook  
24 Decl. 10/30/19, Ex. 19. (Seattle Classified ad), *See also*, Shook’s “Email to Tacoma City Council” on  
25 Duvall process, Shook Decl. 12/30/19, Exhibit 82. Informs the Court and explains why Shook’s “any Part  
26 Thereof” resolves this case.

<sup>25</sup> See Shook moving brief, Pg. 27, Ln 3. If portions of Click! qualify as the “works, plant, *or system* owned  
by it or *any part thereof*,” then vesting via surplus is *ultra vires*.

<sup>26</sup> Def’s Response Pg. 22:10 (“The City does not dispute that the entire HFC Network was acquired for  
public utility purposes—nor, that operation of Click! Network was also for public utility purposes, i.e.”)

<sup>27</sup> For the full briefing on the history of RCW 35.94.040 and the legislative intent of “surplus,” see  
Shook’s Motion, on Pages 23-25. Surplus and “any part thereof,” are the issues before this Court.  
They determine the vote of the people over disposal of our assets.

<sup>28</sup> Click! is a “communication utility” by statutory definition RCW 35.96.020. Also RCW 80.04.010(28)  
Click! is a utility and “Telecommunication Company,”

<sup>29</sup> Defendant discusses authority under RCW 35A.11.020 and claims Click! was not “intended to be a utility.

1 Institutional naming and organizational convenience aside, it doesn't matter if the utility is an  
2 obligation of TPU or general government. Calling it a "municipal service," does not destroy the  
3 Laws of 1917 that have protected municipal telecom from privatization for over 100 years.<sup>30</sup>

4 TPU initiated the creation of Click!, not general government. TPU funded Click!, with approved  
5 of Council at the request of the TPU Board. TPU management saw a need to upgrade infrastructure  
6 and hired consultants to study the prospect of a telecom system. The consultants advised TPU of  
7 efficiencies and benefits that could be realized by increasing the original budget by an additional  
8 \$50 million, to include "*additional capacity*." Defendant has stated, "The original cost estimate for  
9 the network was \$15 million and the consultant's recommendation made to the city was to spend  
10 more and also bring telecommunications services to customers."<sup>31</sup> The additional capacity was  
11 costly; "The approved cost estimate for the network was **\$65 million**, but by the time Click! was  
12 launched to customers in July 1998 the cost grew to **\$89 million**."<sup>32</sup> (emphasis added.)

13 The community's need for an advanced telecom system with broadband capability was viewed  
14 as essential and projected to yield benefits in revenue diversification and economic growth, which,  
15 in turn, would increase sales of other utilities. Council approved TPU's plan, in Resolution No.  
16 33668 establishing the System:<sup>33</sup> Council determined, "the City Light Division's broadband  
17 telecommunications proposal is in the best interests of the City, will serve a public purpose and . . .  
18 that the proposed broadband telecommunications system shall be owned, operated and controlled  
19 by the City of Tacoma Department of Public Utilities Light Division." Click! is a utility asset.<sup>34</sup>

---

20 <sup>30</sup> Click! is a municipal "communication utility." RCW 35.94 makes no distinction based on what  
21 "department" a city places its utilities in. The protective public vote emanates from the fact Click! is a  
22 telecom system and named utility, protected on the "long-list" of utilities, in the Laws of 1917; plus, that  
23 right to vote was confirmed in *Bremer* by our Supreme Court. *see Bremerton Municipal League v.*  
24 *Bremer*, 15 Wn.2d 231 (1942); *Bremer* guides the Court, under *Fondren v. Klickitat County*, 79 Wn. App.  
25 850, 856, 905 P.2d 928 (1995) (Supreme Court binding on state courts).

26 <sup>31</sup> Shook Decl. 1/6/20, Ex. 93, Pg. 5. (Click! Network Business Plan Revised 3-20-17 Tenzin Gyalzen.)  
<sup>32</sup> *Id.* at 5 ("The approved cost estimate for the network was **\$65 million**, but by the time the Click! was  
launched to customers in July 1998 the cost grew to **\$89 million**.").

<sup>33</sup> Shook Decl. 10/30/19, Ex. 10:4 Res. 33668, also, Ex. 11 Ordinance 25930 (creating System.) Ex. 50  
(Conclusions of Business Plan for establishing Click!) 12/30/19, Ex. 74 Klein deposition and statements. Ex.  
70 (Baarsma Singleton Paper on Creating Capacity.), Ex. 83, historical website statements, press releases  
and news articles about Click! creation. Ex. 85 incremental cost to construct System, Ex. 88 briefs from '96  
and '97 case approving Click!.

<sup>34</sup> Click! was built and paid for by TPU and is a municipal utility protected by the public vote  
under the Laws of 1917. A separate department or designation as a "system" is not required to  
trigger the public vote. Click!'s services compels the public vote.

1           Instead of disputing Plaintiff’s facts, which they cannot, City pretends they never “intended”  
2 Click! to be a telecom system, that it was just another “municipal service;” and that departmental  
3 naming magically extinguishes citizens’ “right to vote,” allowing Defendant to surplus Click!.  
4 Defendant cites Click!’s cable TV franchise, an agreement with themselves, as proof that Click! is  
5 just a “municipal service” and not really a part of TPU, a municipal utility. Defendant goes on to  
6 compare Click! with and old worn out service vehicle or work truck.<sup>35</sup>

7           Not so fast! Some long-lost progressive era policymakers, Judge Bone among them, still have a  
8 say about privatization here, via their City Charter and the Laws of 1917. Bless their souls, for they  
9 knew about such things, having endured their own impossible scandals, over 100 years ago. The  
10 protections they provided, in clear, emphatic, language, from wrongful privatization, in case  
11 anything “similar or dissimilar” should ever happen again, survive today.<sup>36</sup>

12           Defendant admits Click! is a telecom system providing telecom services; but claims citizens  
13 have no right to vote over its disposal, since it is not a “separate” utility system. There is no law that  
14 requires the City to organize Click! more separately than it already has. Click!’s organization, as a  
15 sub-fund of Tacoma Power, is not precluded by law. The City accounts for Click! revenue and  
16 expenses appropriately. Furthermore, the City’s chosen and convenient method for organizing  
17 Click! under TPU recently passed judicial scrutiny in *Coates v Tacoma*.<sup>37</sup>

18           **2. Assets Will Continue Performing Utility Purpose For Which They Were Acquired.**

19           The Court need not find Click! is a “separate system,” rather, only that its assets are “any part  
20 thereof, and whether those assets are “property, or equipment originally acquired for public utility  
21 purposes,” which they were.<sup>38</sup> Then, are the assets surplus, which they are not; since they continue  
22

23 <sup>35</sup> Def’s Response, Page 20:21, (“For instance, if the City surplused a work vehicle, ostensibly it would still  
24 be continuing on in the same capacity as a vehicle.”)

25 <sup>36</sup> See Shook Decl. 12/30/19, Ex. 80 (Honorable Homer T. Bone’s Letter in the 1944 Congressional Record,  
26 published upon Judge Bone’s departure from the Senate, having been appointed a Judge to the Ninth Circuit.  
Also, “similar or dissimilar” is a play on that emphatic phrase, found in the Laws of 1917. It just shows how  
serious these legislators were about making their intentions clear.

<sup>37</sup> And why not? Click! supports Power’s purpose, of efficiently providing electrical power, and has a true  
nexus to such purpose, by offsetting costs, increasing revenue thru economic growth and diversifying  
revenues. Institutional naming, or organizational departmentalizing, do not turn Click! into a non-utility  
“municipal service,” such as a public gathering facility, service, a ball park, library or luxury TV service.

<sup>38</sup> Direct quote from RCW 35.94.040. (Lease or sale of property originally acquired for utility purposes.)

1 providing the same “utility purpose” for which they were acquired.<sup>39</sup> Thus, the assets are not  
2 surplus under the clear statement in RCW 35.94. The meaning of the term “surplus” is found in the  
3 legislative history that show the intent of RCW 35.94.040<sup>40</sup>

4 Furthermore, under the City Charter, there is no “surplus” clause at all. A vote is required  
5 regardless of surplus. The fact that the assets themselves are essential is obvious. Without them  
6 there is no municipal Click! telecommunication service available for the community.

7 Click!’s essential assets will continue serving the same customers with the same services, which  
8 Defendant does not deny, for it’s true. Click!’s assets are not surplus. Defendant maintains a  
9 reversionary interest in the assets and fiber optic network.

10 In Defendant’s example of a surplus work truck, Defendant argues the truck, once sold,  
11 continues performing the same function, that of a work truck. Perhaps, but not for TPU; nor in  
12 performing the very “utility purpose” for which the truck was acquired.<sup>41</sup>

13 Imagine a water truck, acquired by TPU to deliver customers’ water. The truck and water  
14 enterprise cannot be sold to a private party, to continue delivering water to the same customers,  
15 with the same truck, only with the private company then setting rates for customers’ water service.  
16 Selling a truck, or Click!, this way, violates the spirit of the surplus statute, which limits surplus  
17 to useless assets “not required for providing continued public utility service,”<sup>42</sup> and defines the  
18 items as “unserviceable, inadequate, obsolete, worn out or unfit to be used.”<sup>43</sup>

19 Also, when TPU sells a surplus truck, it retains no reversionary interest, requiring the truck be  
20 returned after 20 years. When something is surplus, the asset is “disposed of.” Cities do not retain  
21 reversionary interests when disposing of surplus assets under RCW 35.94.040.

22 <sup>39</sup> A detailed analysis of proper procedures for conveying public property, is available on MRSC : at  
23 <http://mrsc.org/Home/Explore-Topics/Legal/General-Government/Sale-of-Surplus-City-or-Town-Property.aspx> Also at- <https://perma.cc/XY4T-UQLS> None of which Defendant has, admittedly, followed;  
24 as Defendant cites authority for gifting of public funds via “ negotiated disposition of surplus TPU assets if  
25 approved” by the Board” See Def’s MJS, Pg. 22.

26 <sup>40</sup> See Shook’s moving brief, page 23. Defendant has not disputed that the assets are not actually  
surplus, nor do they deny the legislative history and intent of surplus, for they cannot. Click! assets  
are valuable and not “obsolete” or “useless.”

<sup>41</sup> Defendant’s work truck example is irrelevant. Service vehicles are not named in the “long-list” of utilities  
protected by the Laws of 1917, and do not bear the distinction of being the second “pubic utility” ever  
regulated in Washington State, as was “telephone and telegraph,” under the Railroad Commission.

<sup>42</sup> Quoting RCW 35.94.040.

<sup>43</sup> RCW 54.16.180 (showing clear legislative intent and definition of “surplus” for municipally-owned utility  
property.) See Shook’s moving brief., Pgs. 24, 25, (detailed history of surplus statute).

1 Defendant is conveying, unforgivably, the community’s broadband system, and the beloved  
2 Click! brand and trademark. Privatization is an offensive gift of public funds; a lending of the  
3 good name, and credit, of the government to a private party, a most basic gifting violations.<sup>44</sup>

4 **3 Cable TV Franchise is Irrelevant and Does Not Limit Authority for Telecom Services.**

5 Federal statutes distinguish TV from Telecom. The City’s self-issued cable TV franchise only  
6 requires Click! obtain a separate telecom license. It does not convert Click! into a cable TV system.  
7 All modern cable television franchise agreements are careful to distinguish telecom as a separate  
8 activity. This is done, not to prevent the provision of broadband services, but so TV revenues are  
9 not confused with such services or telecommunications, which are generally exempt from taxation  
10 under the ITFA. By specifying that the agreement does not cover telecommunications, cities avoid  
11 creating unnecessary difficulty in collecting their 5% cable TV franchise fee. The City’s references  
12 to cable TV regulations do not apply to telecommunications, under 47 USC § 541(b)(3)(A)(ii). *City*  
*of Eugene v. Comcast*, is again helpful:

13 “If a cable operator \* \* \* is engaged in the provision of telecommunications  
14 services, \* \* \* the provisions of *this subchapter* shall not apply to such cable  
15 operator or affiliate for the provision of telecommunications services.” 47 USC  
16 § 541(b)(3)(A)(ii) (emphasis added). That provision is best read as establishing  
17 that telecommunications services are not to be regulated as cable services, and  
not subject to cable franchising requirements, merely because those  
telecommunications services are provided over a cable system.

18 **E. Reply to Miscellaneous Citations in Defendant’s Response**

19 Defendant cites *Clark, Issaquah* and *King County*.<sup>45</sup> *King County* is cited simply to show  
20 “*Issaquah* is still good law,” the silly implication being Click!’s advanced telecom network is the  
21 equivalent to an old cable TV system, which *Issaquah* considered a “luxury,” or “something you can  
22 do with a rooftop antenna.”<sup>46</sup> Both *Clark* and *Issaquah* support plaintiff’s case. *Clark*’s definition of  
23 “utility” is broad enough to include the butcher, the baker and the broadband-maker.<sup>47</sup> More than

24 <sup>44</sup> *Port of Longview V. Taxpayers* 85 Wn.2d 216, at 222, 1974 (municipality borrowing money in its own  
name in form of municipal bond, and loaning that same money to a private corporation.)

25 <sup>45</sup> Def.[’s] MSJ, Pg. 14. *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980), *King County v. King County*  
*Water Districts et. al.*, Wash. No. 96360-6, Slip Op. (Dec. 5, 2019). *Clark v. Olson*, 177 Wash. 237 (1934).

26 <sup>46</sup> *Issaquah*, at 574, “It’s something you can do with a rooftop antenna. In that sense, it’s not a utility.”

<sup>47</sup> *Clark* provides that a “dedication to a public use” constitutes a utility. *Clark* also explains “public  
use” or “public utility” are established by “implication” and accommodation. *Clark* provided many  
examples of how “public use was implied.”<sup>47</sup> Those examples can be translated to Click!, further  
establishing Click!’s status as a municipally owned “utility.” Under *Clark*, Click! is a utility because

1 implying Click! is a utility, Defendant admits taxing Click! as a utility, on page 22 of their response,  
2 at line 17, seen here:

3 17 || TPU. Thus, because Click! Network generates revenue accruing by reason of transaction of  
4 18 || business, it is taxed under the GET as a business unit of TPU. Therefore, Mr. Shook's argument

5 *Issaquah* defines Click! as a “communication utility,” properly citing RCW 35.96.020, “a  
6 statute dealing with the conversion of electric and communication facilities to underground  
7 facilities in cities and towns,” and recognizing that Cable TV did not fit that definition. Since Click!  
8 is admittedly a communication system, indubitably Click! fits the standard of RCW 35.96.020.<sup>48</sup>

### 9 **Right to Vote is Constitutionally Protected**

10 In a free and democratic society, the power to vote is a fundamental right afforded citizens.  
11 The Washington State Constitution, Article I, Section 19 provides, “No power, civil or military,  
12 shall at any time interfere to prevent the free exercise of the right of suffrage.”<sup>49</sup>

13 Defendant's freewheeling disposal of Click! destroys citizens' fundamental Constitutional  
14 right to vote on the disposal of their valuable municipal utility assets. The right to vote, “in a free  
15 and unimpaired manner is preservative of other basic civil and political rights, any alleged  
16 infringement of the right of citizens to vote must be carefully and *meticulously scrutinized*.”  
(emphasis added) *Reynolds v. Sims*, 377 U.S. 533, 561-62, (1964).

17 When citizens of Tacoma granted City officials the privilege of managing their utilities, they  
18 were not content to divest themselves of every managerial function normally associated with the  
19 operation of a business concern. By their charter they have retained express power over the  
20 divestiture of their functional public utility property, or “*any part . . . any equipment and*  
21 *appurtenances thereof*.” The contract in question has the effect of violating the charter for the  
22 City of Tacoma and is therefore void unless approved by the voters as required by the charter.<sup>50</sup>

23 \_\_\_\_\_  
24 “public use was implied” by Click! holding itself out as a utility, by providing services to a certain class of  
25 the public, by Council setting rates, by funding and organizing Click! within the Dept. of Utilities, by the  
26 System being installed under the right of eminent domain, by Click! holding FCC licenses, by entering into  
telecom franchises agreements and contracts, by sharing lobby space within TPU headquarters for customer  
service purposes, and by City's treatment and taxation of Click! as a utility.

<sup>48</sup> *Issaquah*, at 574, cited the definition of “communication utility” in RCW 35.96.020, calling it “a statute  
dealing with the conversion of electric and communication facilities to underground facilities in cities and  
towns”. Cable TV did not fit that definition, but Click! certainly does.

<sup>49</sup> *Madison v. State*, 161 Wn.2d 85, 163 P.3d 757 (2007)

<sup>50</sup> Drawing inspiration from *Clark v. City of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d 669.

Plaintiff Shook's Reply In Support Of  
Motion for Partial Summary Judgment

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

1 The facts set forth in plaintiff's motion have not been refuted, for they are true.<sup>51</sup> Finally,  
2 please note, as stated in *Tacoma v. Taxpayers of Tacoma*,

3 Tacoma's municipal utility authority has limits. In exercising its proprietary power,  
4 Tacoma may not act beyond the purposes of the statutory grant of power, *State ex*  
5 *rel. PUD 1 v. Wylie*, 28 Wash.2d 113, 182 P.2d 706 (1947), or contrary to express  
6 statutory or constitutional limitations. *Metropolitan Seattle v. Seattle*, 57 Wash.2d  
7 446, 459-60, 357 P.2d 863 (1960); 12 E. McQuillin, *supra* at § 35.35.<sup>52</sup>

#### 8 F. Conclusion

9 For the foregoing reasons, the Court should deny Defendant's Motion and grant Plaintiff's  
10 motion for partial summary judgement by declaring council's actions to dispose of Click! by  
11 surplus ultra vires and require the matter be put to a vote of the people, as required under City  
12 Charter 4.6 and RCW 35.94.020.

13 Respectfully submitted this 6<sup>th</sup> day of January 2020.

14 

15 \_\_\_\_\_  
16 Mitchell Shook, Plaintiff

17  
18  
19  
20 <sup>51</sup> These undisputed facts encompass the historical information of Click! showing, the "Telecommunication  
21 Business Plan," the "Study Team," the original goals behind Click!'s creation, the funding, construction,  
22 marketing, and promotion, that resulted in an enterprise with \$25 million in annual revenue, a separate  
23 organizational chart and structure, expenses accounted for separately, growing profits and revenues,  
24 delivering Gigabit speed Broadband Internet Access Service, Fiber To The Home ("FTTH"), VoIP  
25 prioritized DOCSIS 3.1 modem and "Metro Ethernet" services, over *state-of-the-art technology*, with  
26 expansive operations, serving 35,000 residential, institutional and governmental customer accounts,  
including Tacoma's Public Libraries, holding telecom licenses, franchises and agreements; paying City's  
public utility Gross Earning Tax on telecom revenue, as a telecom utility, owning essential routers, servers,  
hubs, nodes, and IP addresses, that are not surplus and will *continue* providing the same utility services, to  
the Utility's same customers; with wholesale rates set by Council, published in Title 12-Utilities in the  
Municipal Code; privatization eliminating Council control over rates; Click! held out as one of four utility  
services; water, power, rail and telecommunications, under four distinct brand names: Tacoma Water,  
Tacoma Power, Tacoma Rail and Click! Network, sharing common customer service facilities in the lobby  
space of TPU's headquarters, appearing together on TPU's website as "Our Services: Power, Water, Rail,  
Click!." Not insignificant facts; yet, all undisputed.

## ORDINANCE NO. 25930

AN ORDINANCE of the City of Tacoma, Washington establishing a telecommunications system as part of the Light Division, supplementing Ordinance No. 23514 and providing for the issuance and sale of the City's Electric System Revenue Bonds in the aggregate principal amount of not to exceed \$1,000,000 to provide part of the funds necessary for the acquisition, construction and installation of additions and improvements to the telecommunications system.

WHEREAS, the City of Tacoma (the "City") owns and operates an electric utility system (the "Electric System"); and

WHEREAS, the Ordinance provides that the City may create a separate system as part of the Electric System and pledge that the income of such separate system be paid into the Revenue Fund; and

WHEREAS, RCW 35A.11.020 authorizes the City to operate and supply utility and municipal services commonly or conveniently rendered by cities or towns; and

WHEREAS, RCW 35.92.050 authorizes cities to construct and operate works and facilities for the purpose of furnishing any persons with electricity and other means of power and to regulate and control the use thereof or lease any equipment or accessories necessary and convenient for the use thereof; and

WHEREAS, the Utility Board and the Council have determined that it is in the best interest of the City that it install a telecommunications system among all of its Electric System substations in order to improve communications for automatic substation control; and

WHEREAS, the City has determined that it is prudent and economical to provide additional capacity on such telecommunications system to provide the Electric System with sufficient capacity to perform or enhance such functions as automated meter reading and billing, appliance control, and load shaping; and

WHEREAS, the Light Division may wish to connect such telecommunications system to individual residences and businesses in its service area or to other providers of telecommunications services; and

WHEREAS, the City has determined that it should create a telecommunications system as part of the Electric System in order to construct these telecommunications improvements; and

WHEREAS, the City by Ordinance No. 23514 passed November 20, 1985 (as amended and supplemented, the "Ordinance"), authorized Electric System Revenue Bonds (the "Bonds") of the City to be issued in series, made covenants and agreements in connection with the issuance of such Bonds and authorized the sale and issuance of the first series of such Bonds in the aggregate principal amount of \$125,505,000 (the "1985 Bonds") for the purpose of refunding all of the City's then outstanding light and power revenue bonds; and

WHEREAS, the 1985 Bonds were issued under date of December 1, 1985 and are now outstanding; and

WHEREAS, the City has heretofore issued ten additional series of Bonds on a parity with the 1985 Bonds, which bonds were issued and are now outstanding:

Authorizing Ordinance	Bonds Dated	Principal Amount Issued
23663	July 1, 1986	\$ 30,000,000
24073	May 1, 1988	60,400,000
24296	May 1, 1989	48,500,000

WHEREAS, after due consideration, it appears to the City Council and the Public Utility Board (the "Board") that it is in the best interest of the City to create and construct a telecommunications system and to issue Electric System Revenue Bonds to finance a portion of the costs of such construction and that the exact amount of Bonds and terms of the Bonds shall be determined by resolution of the Council; and

WHEREAS, Section 10.1 of the Ordinance provides that the City may, without the consent of the owners of any Bonds, adopt an ordinance supplemental to or amendatory of the Ordinance to provide for the issuance of Future Parity Bonds and to prescribe the terms and conditions pursuant to which such Bonds may be issued, paid or redeemed; and

WHEREAS, the City desires to provide that the issuance and sale of the Bonds will be issued and secured under the Ordinance as amended and supplemented by Ordinance No. 23663, Ordinance No. 24073, Ordinance No. 24296, Ordinance No. 25004, Ordinance No. 25089, Ordinance No. 25165, Ordinance No. 25333, Ordinance No. 25489 and this Ordinance;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY OF TACOMA:

ARTICLE I

DEFINITIONS AND AUTHORITY

Section 1.1. Supplemental Ordinance. This Ordinance No. 25930 is supplemental to and is adopted in accordance with Section 5.1 and Article X of the Ordinance and shall be known as the Eighth Supplemental Electric System Revenue Bond Ordinance (the "Eighth Supplemental Ordinance").

Section 1.2. Definitions.

A. All terms that are defined in Section 1.1 of the Ordinance shall have the same meanings, respectively, in this Eighth Supplemental Ordinance as such terms are given in

Section 1.1 of the Ordinance, as amended and supplemented by the First, Second, Third, Fourth, Fifth, Sixth, and Seventh Supplemental Ordinances.

B. In this Eighth Supplemental Ordinance:

"Arbitrage and Tax Certification" means the certificate executed by the Director of Finance of the City pertaining to the calculation and payment of any Rebate Amount with respect to the Bonds.

"Bond Sale Resolution" means the resolution to be adopted by the City Council setting forth the final terms of the Bonds.

"Bonds" means the Electric System Revenue Bonds, 199\_\_, of the City issued pursuant to the Ordinance and this Eighth Supplemental Ordinance.

"Code" means the Internal Revenue Code of 1986, as amended, together with corresponding and applicable final, temporary or proposed regulations and revenue rulings issued or amended with respect thereto by the United States Treasury or the Internal Revenue Service, to the extent applicable to the Bonds.

"Eighth Supplemental Ordinance" means this Ordinance No. 25930.

"Rebate Amount" means the amount, if any, determined to be payable with respect to the Bonds by the City to the United States of America in accordance with Section 148(f) of the Code.

Section 1.3. Authority for this Eighth Supplemental Ordinance. This Eighth Supplemental Ordinance is adopted pursuant to the provisions of the laws of the State of Washington, the Tacoma City Charter and the Ordinance.

ARTICLE II

FINDINGS; ESTABLISHMENT OF THE TELECOMMUNICATIONS PROJECT AS A SEPARATE SYSTEM; AND ADOPTION OF PLAN AND SYSTEM

Section 2.1. Establishment of Telecommunication System. The City hereby creates a separate system of the City's Light Division to be known as the telecommunications system (the "Telecommunications System"). The public interest, welfare, convenience and necessity require the creation of the Telecommunications System, contemplated by the plan adopted by Section 2.2 hereof, for the purposes set forth in Exhibit A. The City hereby covenants that all revenues received from the Telecommunications System shall be deposited into the Revenue Fund.

Section 2.2. Adoption of Plan; Estimated Cost. The City hereby specifies and adopts the plan set forth in Exhibit A for the acquisition, construction and implementation of the Telecommunications System (the "Telecommunications Project"). The City may modify details of the foregoing plan when deemed necessary or desirable in the judgment of the City. The estimated cost of the Telecommunications Project, including funds necessary for the payment of all costs of issuing the Bonds, is expected to be approximately \$40,000,000.

Section 2.3. Findings of Parity. The Council hereby finds and determines as required by Section 5.2 of the Ordinance as follows:

A. The Bonds will be issued for financing capital improvements to the Electric System.

B. At the time of issuance and delivery of the Bonds, there will be no deficiency in the Bond Fund and no Event of Default shall have occurred.

C. At the time of issuance and delivery of the Bonds, there will be on file with the City Clerk the certificate of the Director of Finance required by Section 5.2(B)(1) or Section 5.2(C) of the Ordinance.

20  
21  
22  
23  
24  
25  
26

The applicable limitations contained in Section 5.2 of the Ordinance having been complied with in the issuance of the Bonds, the Bonds will have a lien upon the Net Revenues of the Electric System for the payment of principal thereof and interest thereon equal in priority to the lien upon the Net Revenues of the Electric System for the payment of the principal of and interest on the 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds and the 1994 Bonds.

Section 2.4. Due Regard. The Council and Board hereby find and determine that due regard has been given to the cost of the operation and maintenance of the Electric System and that it has not obligated the City to set aside into the Bond Fund for the account of the Bonds a greater amount of the revenues and proceeds of the Electric System than in its judgment will be available over and above such cost of maintenance and operation.

Section 2.5. Findings. The Council and Board hereby find it to be necessary and in the best interests of the City to issue the Bonds in order to provide part of the funds necessary to finance the Telecommunications Project.

ARTICLE III

AUTHORIZATION OF BONDS

Section 3.1. Principal Amount, Designation and Series. Pursuant to the provisions of the Ordinance, a series of Bonds of the City entitled to the benefit, protection and security of such provisions is hereby authorized in the aggregate principal amount of not to exceed \$1,000,000. Such Bonds shall be designated as, and shall be distinguished from the Bonds of all other series by the title, "City of Tacoma, Washington Electric System Revenue Bonds, 199\_."

Section 3.2. Purpose. The purpose of the Bonds is to provide part of the funds necessary to finance the Telecommunications Project, make any necessary deposit to the Reserve Account and to pay the costs of issuance and sale of the Bonds.

20  
21  
22  
23  
24  
25  
26

Section 3.3. Date, Maturities and Interest. The Bonds shall be issued in the aggregate principal amount of not to exceed \$1,000,000 and shall be dated as of the date provided in the Bond Sale Resolution and shall bear interest from their dated date to their stated dates of maturity or prior redemption. The exact principal amount of the Bonds shall be established by the Bond Sale Resolution. The Bonds shall mature on the dates of the years and in the principal amounts and shall bear interest payable semiannually on the dates and at the rates per annum set forth in the Bond Sale Resolution.

Section 3.4. Denomination and Numbers. The Bonds shall be issued in fully registered form in the denominations of \$5,000 or any integral multiple of \$5,000 within a maturity. The Bonds shall be numbered separately in such manner and with any additional designation as the Registrar deems necessary for purposes of identification. The Bond Sale Resolution may provide for the Bonds to be held in book-entry only form.

Section 3.5. Redemption Terms. By the Bond Sale Resolution, the City Council may determine that all or a portion of the Bonds shall be subject to redemption prior to maturity at the option of the City, in whole or in part, on any date and at the respective redemption prices specified in the resolution. The City Council may designate certain Bonds as Term Bonds that will be subject to redemption by operation of the Bond Retirement Account through Sinking Fund Requirements in the years and amounts set forth in the resolution.

Section 3.6. Reservation of Right to Purchase. The City reserves the right to use money in the Revenue Fund or any other legally available funds at any time to purchase any of the Bonds in the open market provided there is no deficiency in the accounts within the Bond Fund. Any purchases of Bonds may be made with or without tenders of Bonds and at either public or private sale.

Section 3.7. Tax Exemption. The City shall comply with the provisions of this section unless, in the written opinion of nationally-recognized Bond Counsel to the City, such

compliance is not required in order to maintain the exemption of the interest on the Bonds from federal income taxation.

The City hereby covenants that it will not make any use of the proceeds from the sale of the Bonds or any other funds of the City which may be deemed to be proceeds of such Bonds pursuant to Section 148 of the Code and the applicable regulations thereunder which will cause the Bonds to be "arbitrage bonds" within the meaning of said Section and said regulations. The City will comply with the applicable requirements of Section 148 of the Code (or any successor provision thereof applicable to the Bonds) and the applicable regulations thereunder throughout the term of the Bonds.

The City further covenants that it will not take any action or permit any action to be taken that would cause the Bonds to constitute "private activity bonds" under Section 141 of the Code.

Section 3.8. Arbitrage Rebate. The City will pay the Rebate Amount, if any, to the United States of America at the times and in the amounts necessary to meet the requirements of the Code to maintain the federal income tax exemption for interest payments on the Bonds, in accordance with the Arbitrage and Tax Certification.

ARTICLE IV

REGISTRATION, FORM AND GENERAL TERMS

Section 4.1. Registrar and Paying Agent. The initial Registrar and Paying Agent shall be the fiscal agencies for the state of Washington in Seattle, Washington, and New York, New York.

Section 4.2. Transfer and Exchange. So long as the Bonds are not in book-entry form, any Bond may be transferred pursuant to its provisions at the Registrar's principal office for such purpose by surrender of such Bond for cancellation, accompanied by a written instrument of transfer, in form satisfactory to the Registrar, duly executed by the registered owner in

39

1 person or by the registered owner's duly authorized attorney. Upon payment of any applicable  
2 tax or governmental charge, the City will execute and the Registrar will authenticate and  
3 deliver at the principal office of the Registrar (or send by registered mail to the owner thereof  
4 at the owner's expense), in the name of the transferee or transferees, a new Bond or Bonds in  
5 authorized denominations of the same interest rate, aggregate principal amount and maturity,  
6 dated as of the last interest payment date to which interest has been paid so that there shall  
7 result no gain or loss of interest as a result of such transfer. To the extent of authorized  
8 denominations, one Bond may be exchanged for several bonds of the same interest rate and  
9 maturity, and for a like aggregate principal amount, and several Bonds of the same interest rate  
10 and maturity may be exchanged for one or several Bonds, respectively, of the same interest  
11 rate and maturity and for a like aggregate principal amount.

12 In every case of a transfer or exchange of any Bonds, the surrendered Bonds shall be  
13 canceled by the Registrar and a certificate evidencing such cancellation shall be promptly  
14 transmitted by the Registrar to the City. As a condition of any such transfer or exchange, the  
15 City at its option may require the payment of a sum sufficient to reimburse it for any tax or  
16 other governmental charge that may be imposed thereon. All Bonds executed, authenticated  
17 and delivered in exchange for or upon transfer of Bonds so surrendered shall be valid  
18 obligations of the City evidencing the same debt as the Bonds surrendered, and shall be entitled  
19 to all the benefits and protection of the Ordinance to the same extent as the surrendered  
20 Bonds.

21 Section 4.3. Limitation on Transfer or Exchange of Bonds. The City shall not be  
22 required to (a) issue, transfer, or exchange Bonds after the 15th day of the month prior to any  
23 interest payment date therefor, or (b) to register, discharge from registration, transfer or  
24 exchange any Bonds which have been designated for redemption within a period of 30 days  
25 next preceding the date fixed for redemption.

25  
26

Section 4.4. Effect of Payment. All payments of or on account of interest to any registered owner of any Bond, and all payments of or on account of principal to any registered owner of any Bond (or to his or her assigns), shall be valid and effectual and shall be a discharge of the City, the Paying Agent and the Registrar in respect of the liability upon the Bonds or claims for interest, as the case may be, to the extent of the sum or sums paid.

All Bonds upon the payment or redemption thereof shall be canceled and destroyed by the Paying Agent, and a certificate evidencing such payment, cancellation and destruction shall be promptly transferred by the Paying Agent to the City.

Section 4.5. Mutilated, Lost, Stolen or Destroyed Bonds. In case any Bond shall at any time become mutilated or be lost, stolen or destroyed, the City in the case of such mutilated Bond shall, and in the case of such lost, stolen or destroyed Bond in its discretion may, execute and direct the Registrar to authenticate and deliver a new Bond of the same interest rate and maturity and of like tenor and effect in exchange or substitution for and upon surrender and cancellation of such mutilated Bond, or in lieu of or in substitution for such destroyed, stolen or lost Bond. If such stolen, destroyed or lost Bond shall have matured or have been called for redemption, instead of issuing a substitute therefor, the City may without the surrender of such Bond at its option pay the same (in which case the City shall promptly file a certificate to that effect with the Paying Agent and Registrar) or cause the same to be paid by the Paying Agent by a certificate of the City directing such payment filed with the Paying Agent. Except in the case where a mutilated Bond is surrendered, the applicant for the issuance of a substitute Bond shall furnish to the City and the Registrar evidence satisfactory to them of the theft, destruction or loss of the original Bond, and also such security and indemnity as may be required by the City or the Registrar, and no such substitute Bond shall be issued unless the applicant for the issuance thereof shall reimburse the City and the Registrar for the expenses incurred in connection with the preparation, execution, authentication, issuance and

delivery of the substitute Bond. Any such substitute Bond shall be equally and proportionately entitled to the security of the Ordinance with all other Bonds issued hereunder, whether or not the Bond alleged to have been lost, stolen or destroyed shall be found at any time. The Registrar shall cancel all mutilated Bonds surrendered to it.

Section 4.6. Execution and Authentication of Bonds. The Bonds shall be executed on behalf of the City with the manual or facsimile signature of the Mayor and attested with the manual or facsimile signature of the City Clerk and the seal of the City shall be imprinted or impressed on each of the Bonds. The Bonds shall bear thereon a certificate of authentication, in the form set forth in Section 4.7 of this Eighth Supplemental Ordinance, executed manually by the Registrar. Only such Bonds as shall bear thereon such certificate of authentication shall be entitled to any right or benefit under the Ordinance and no Bond shall be valid or obligatory for any purpose until such certificate of authentication shall have been duly executed by the Registrar. Such certificate of the Registrar upon any Bond executed on behalf of the City shall be conclusive evidence that the Bond so authenticated has been duly authenticated and delivered under the Ordinance and that the owner thereof is entitled to the benefits of the Ordinance.

In case any of the officers who shall have signed or attested any of the Bonds shall cease to be such officers before the Bonds so signed or attested shall have been actually delivered, such Bonds shall be valid nevertheless and may be issued by the City with the same effect as though the persons who had signed or attested such Bonds had not ceased to be such officers.

Section 4.7. Form of Bonds.

(a) The Bonds shall be in substantially the following form:

UNITED STATES OF AMERICA  
STATE OF WASHINGTON  
CITY OF TACOMA  
ELECTRIC SYSTEM REVENUE BOND, 199\_

No. \_\_\_\_\_ \$ \_\_\_\_\_  
Interest Rate: \_\_\_\_\_ Maturity Date: \_\_\_\_\_ CUSIP No: \_\_\_\_\_  
\_\_\_\_\_% \_\_\_\_\_  
Registered Owner: \_\_\_\_\_  
Principal Amount: \_\_\_\_\_ DOLLARS

The City of Tacoma, a municipal corporation of the State of Washington (hereinafter called the "City"), for value received, hereby promises to pay to the Registered Owner identified above, or registered assigns, on the Maturity Date identified above, the Principal Amount indicated above and to pay interest on such principal amount from the date hereof or the most recent date to which interest has been paid or duly provided for, at the Interest Rate set forth above per annum, payable \_\_\_\_\_, 199\_, and semiannually thereafter on the first day of each \_\_\_\_\_ and \_\_\_\_\_ until payment shall have been made or provided for.

Principal of and interest on this bond are payable solely out of the special fund of the City known as the "Electric System Revenue Bond Fund" created and established by Ordinance No. 23514 of the City (the "Bond Fund"). Both principal of and interest on this bond are payable in lawful money of the United States of America. Interest shall be paid by mailing a check or draft or by wire transfer as provided in the Bond Ordinance (as hereinafter defined) to the registered owner or assigns at the address shown on the bond register as of the 15th day of the month prior to the interest payment date. Principal shall be paid to the registered owner or assigns upon presentation and surrender of this bond at the principal office of the Paying Agent or Agents which initially are the fiscal agencies of the State of Washington in Seattle, Washington, and New York, New York. (Such fiscal agencies also act, and are hereinafter referred to collectively, as the "Bond Registrar").

This bond shall not be valid or become obligatory for any purpose or be entitled to any security or benefit under the Bond Ordinance until the Certificate of Authentication hereon shall have been manually signed by the Bond Registrar.

25  
26

This bond is one of a duly authorized series of bonds aggregating \$ \_\_\_\_\_ in principal amount and designated as "Electric System Revenue Bonds, 199\_." This bond and the bonds of this series (the "Bonds") are issued under and pursuant to Ordinance No. 23514 as amended and supplemented by Ordinance No. 23663, Ordinance No. 24073, Ordinance No. 24296, Ordinance No. 25004, Ordinance No. 25089, Ordinance No. 25165, Ordinance No. 25489 and Ordinance No. 25930 of the City (together the "Bond Ordinance"), and under the authority of and in full compliance with the Constitution and laws of the State of Washington.

The Bonds are issued for the purpose of providing part of the funds necessary for financing capital improvements to the Electric System. The Bond Ordinance permits the issuance of Future Parity Bonds payable from the Bond Fund ranking on a parity with the 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds, the 1994 Bonds and the Bonds and secured by an equal charge and lien on the Net Revenues and permits the costs associated with certain Contract Resource Obligations to be included in the Electric System's Operating Expenses (as such terms are defined in the Bond Ordinance). The 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds, the 1994 Bonds, the Bonds and any Future Parity Bonds are hereinafter collectively referred to as the "Parity Bonds."

Copies of the Bond Ordinance are on file at the office of the City Clerk and at the principal office of each Paying Agent for this bond. Reference is hereby made to the Bond Ordinance and to any and all modifications and amendments thereof for a more complete description of the Revenues available for the payment of the principal of and interest on the Bonds and the rights and remedies of the owners of the Bonds with respect thereto, the terms and conditions upon which the Bonds have been issued, and the terms and conditions upon which this bond shall no longer be secured by the Bond Ordinance or deemed to be outstanding thereunder if money or certain specified securities sufficient for the payment of this bond shall have been set aside in a special account and held in trust for the payment thereof. Capitalized terms used herein and not otherwise defined shall have the meanings set forth in the Bond Ordinance.

Under the Bond Ordinance, the City is obligated to set aside and pay into the Bond Fund out of the Revenues of said Electric System certain fixed amounts sufficient to pay the principal of and interest and premium, if any, on all Parity Bonds at any time outstanding as the same become due and payable, all as is more fully provided in the Bond Ordinance. The Bonds and the interest thereon constitute the only charge against the Bond Fund and the amount of the Net Revenues pledged to said Bond Fund, as provided in the Bond Ordinance.

In and by the Bond Ordinance, the City covenants to establish, maintain and collect rates and charges for electric energy sold through the ownership or operation of the Electric

26

System and all other services, facilities and commodities sold, furnished or supplied by the City in connection with the ownership or operation of the Electric System which shall be fair and adequate to provide Revenues sufficient for the payment of the Parity Bonds and all payments which the City is obligated to set aside in the Bond Fund and for the proper operation and maintenance of the Electric System, including payment of certain Contract Resource Obligations, all necessary repairs, replacements and renewals thereof and other costs thereof, as provided in the Bond Ordinance.

The Bonds maturing on and after \_\_\_\_\_ 1, \_\_\_\_\_ are subject to redemption prior to maturity at the option of the City on any date on and after \_\_\_\_\_ 1, 20\_\_\_\_, in whole or in part, upon written notice as provided hereinafter, at the redemption prices with respect to each Bond (expressed as a percentage of the principal amount of the Bonds to be redeemed) set forth below, together with the interest, if any, accrued thereon to the date fixed for redemption:

Redemption Period	Redemption Price
-------------------	------------------

If less than all of the Bonds subject to optional redemption are to be called for redemption, the City shall choose the maturities to be redeemed. In the event that less than all of the Bonds of any maturity are called for redemption, the particular Bonds of such maturity to be redeemed shall be selected by lot by the Bond Registrar, or, so long as the Bonds are held in book-entry form, by the Securities Depository.

The Bonds maturing on \_\_\_\_\_ 1, \_\_\_\_\_ (hereinafter referred to as the "Term Bonds") shall be redeemed prior to maturity by lot, not later than \_\_\_\_\_ 1 in the years \_\_\_\_\_ through \_\_\_\_\_, inclusive, from amounts credited to the Bond Retirement Account in the Bond Fund as sinking fund installments therefor (to the extent such amounts have not been used to redeem or purchase such Bonds as provided below) and in the principal amounts as set forth below, upon written notice as provided hereinafter by payment of the principal amount thereof, together with the interest, if any, accrued thereon to the date fixed for redemption.

Year	Amount
------	--------

The City may purchase or redeem the Term Bonds through the application of part or all of the respective sinking fund installments therefor at any time prior to any \_\_\_\_\_ 1 due date.

21  
22  
23  
24  
25  
26

Any money not so used to redeem or to purchase such Term Bonds shall be substantially exhausted by application to the redemption of such bonds on such succeeding \_\_\_\_\_ 1. If, as of any \_\_\_\_\_ 1, the principal amount of Term Bonds retired by purchase or redemption from any source exceeds the cumulative requirement for sinking fund installments through such date, such excess may be credited against the sinking fund installment for the next fiscal year.

Written notice of redemption shall be given by first class mail, postage prepaid, not less than 30 days nor more than 60 days before the redemption date to the registered owners of the Bonds to be redeemed in whole or in part at their last addresses, if any, appearing on the Bond Register, but any defect with respect to the redemption of any bond shall not invalidate the redemption of any other bond. Notice of redemption having been given by mailing, as aforesaid, the Bonds so called for redemption shall on the date specified in such notice become due and payable at the applicable redemption price herein provided, and from and after the date so fixed for redemption (except as to any bond, or portion of any bond, not so redeemed in accordance with such call for redemption) interest on said Bonds so called for redemption shall cease to accrue.

A portion of the principal sum of this bond in the amount of \$5,000, or any integral multiple thereof, may be redeemed, and if less than all of the principal sum hereof is to be redeemed, in such case upon the surrender of this bond at the principal office of the Bond Registrar, there shall be issued to the registered owner, without charge therefor, for the then unredeemed balance of the principal sum hereof, fully registered bonds of like series, maturity and interest rate in any of the denominations authorized by the Bond Ordinance.

This bond shall be transferable by the registered owner at the principal offices of the Bond Registrar upon surrender and cancellation of this bond, and thereupon a new registered bond or bonds of the same principal amount and interest rate and maturity will be issued to the transferee as provided in the Bond Ordinance. The City, the Bond Registrar, the Paying Agents and any other person may treat the person in whose name this bond is registered as the absolute owner hereof for the purpose of receiving payment hereof and for all purposes and shall not be affected by any notice to the contrary, whether this bond be overdue or not.

It is hereby certified, recited and declared that all acts, conditions and things required by the Constitution and statutes of the State of Washington to exist, to have happened and to have been performed precedent to and in the issuance of this bond do exist, have happened and

ARTICLE V

APPLICATION OF PROVISIONS OF ORDINANCE TO BONDS

Section 5.1. Issuance of Future Parity Bonds. The provisions of Article V of the Ordinance relating to the issuance of Future Parity Bonds shall apply to the Bonds.

Section 5.2. Contract Resource Obligations. The provisions of Article VI of the Ordinance relating to Contract Resource Obligations shall apply to the Bonds.

Section 5.3. Application of Sections 7.1 through 7.3 of Ordinance Relating to Special Funds and Accounts. Except as otherwise provided below in Section 5.10, the provisions of

48

1 Sections 7.1 through 7.3 of the Ordinance relating to the Revenue Fund and the accounts  
2 therein, the Bond Fund and the accounts therein, the Cumulative Reserve Fund, and the  
3 investment of money held for the credit of such Funds shall apply to the Bonds.

4 Section 5.4. Covenants to Secure Bonds. The provisions of Article IX of the  
5 Ordinance setting forth the covenants to secure Bonds, as amended by Article VII of the First  
6 Supplemental Ordinance, shall apply to the Bonds.

7 Section 5.5. Supplemental and Amendatory Ordinances. The provisions of Article X  
8 of the Ordinance relating to supplemental and amendatory ordinances shall apply to the Bonds.

9 Section 5.6. Defaults and Remedies. The provisions of Article XI of the Ordinance  
10 relating to defaults and remedies shall apply to the Bonds.

11 Section 5.7. Amendments and Bondowners' Meetings. The provisions of Article XII  
12 of the Ordinance relating to amendments and bondowners' meetings shall apply to the Bonds.

13 Section 5.8. Miscellaneous. The provisions of Article XIII of the Ordinance relating  
14 to the City's contract with the owners of Bonds, money held by the Paying Agent one year  
15 after the due date, the benefits of the Ordinance and severability shall apply to the Bonds.

16 Section 5.9. Rights of AMBAC. The provisions of Article X of the Second  
17 Supplemental Ordinance and Article VII of the Fifth Supplemental Ordinance and Article VIII  
18 of the Sixth Supplemental Ordinance relating to the rights of AMBAC Indemnity Corporation  
19 are incorporated herein by reference and shall be in force and effect so long as any 1988 Bond,  
20 1992 Bond or 1992B Bond, respectively, is Outstanding and insured by the municipal bond  
21 guaranty insurance policy therein authorized.

22 Section 5.10. Reserve Subaccount. There is hereby established within the Reserve  
23 Account a special subaccount entitled the "199\_\_ Reserve Subaccount." Funds in such  
24 Reserve Subaccount shall be treated in all respects as other funds in the Reserve Account. The  
25 City shall make transfers into the Reserve Subaccount from money and investments in the

Reserve Account, from proceeds of the Bonds, or from other available money in amounts sufficient to satisfy the Reserve Account Requirement with respect to the Bonds.

The City is authorized to satisfy the requirements of Section 7.2 of the Ordinance with respect to the Reserve Account as to the Bonds through the use of Qualified Insurance, or a Qualified Letter of Credit, which may be purchased on the date of closing of the Bonds or after the issuance of the Bonds and substituted for amounts in the Reserve Subaccount pursuant to the provisions of Section 7.2 of the Ordinance.

ARTICLE VI

DISPOSITION OF BOND PROCEEDS

Section 6.1. Construction Account. A special fund of the City has heretofore been created and designated the "City of Tacoma Electric System Construction Fund" (the "Construction Fund"). There is hereby created within the Construction Fund a special account to be known as the "199\_\_ Bonds Construction Account" into which shall be deposited from the proceeds of sale of the Bonds. Money in the Construction Account shall be used for paying part of the costs of the acquisition, construction and installation of the additions and improvements described in Exhibit A, and for paying all expenses incidental thereto (including but not limited to costs of issuance of the Bonds, engineering, financing, legal or any other incidental costs) and for repaying any advances heretofore or hereafter made on account of such costs, and such money or so much thereof as may be necessary be and hereby is appropriated for such purpose.

All proceeds of the Bonds so deposited in the Construction Account shall be continuously and fully invested to the extent practicable in Permitted Investments. Interest earned and income or profits derived by virtue of such investments shall remain in the account and be used for the purposes for which the Bonds are issued or other lawful purposes. Money in the Construction Account may be transferred to the Bond Fund in such amounts as shall be

necessary to pay principal of and interest on Bonds, and may be used to pay any Rebate Amount.

Section 6.2. Disposition of Proceeds. The proceeds of the Bonds are hereby appropriated for the following purposes and shall be deposited as follows:

1. The amount equal to the interest accruing on the Bonds from their dated date to the date of their delivery shall be deposited in the Interest Account in the Bond Fund and invested in Permitted Investments.

2. To the extent permitted by the Code, the amount that when added to other money in the Reserve Account will ensure that the total amount in the Reserve Account equals the Reserve Account Requirement shall be deposited in the Reserve Account in the Bond Fund.

3. The balance of the Bond proceeds shall be deposited in the Construction Account and used for the purposes specified in Sections 6.1, including payment of costs of issuance of the Bonds.

ARTICLE VII  
SALE OF BONDS

Section 7.1. Sale of Bonds. The Bonds may be sold by competitive or negotiated sale, which sale shall be approved by the Bond Sale Resolution.

Section 7.2. Official Statement; Insurance. The Director and/or Deputy Director of Utilities are authorized to prepare a preliminary official statement for the marketing of the Bonds and to solicit bids for bond insurance. The Bond Sale Resolution shall approve the preliminary and final official statements and any bond insurance.

ARTICLE VIII  
MISCELLANEOUS

Section 8.1. Defeasance. In the event that the City, in order to effect the payment, retirement or redemption of any Bond, sets aside in the Bond Fund or in another special account, advance refunding bond proceeds or other money lawfully available or direct obligations of the Department of the Treasury of the United States of America ("Government Obligations"), or any combination of such proceeds, money and/or Government Obligations, in amounts which, together with known earned income from the investment thereof are sufficient to redeem, retire or pay such Bond in accordance with its terms and to pay when due the interest and redemption premium, if any, thereon, and such proceeds, money and/or Government Obligations are irrevocably set aside and pledged for such purpose, then no further payments need be made into the Bond Fund for the payment of the principal of and interest on such Bond, and the owner of such Bond shall cease to be entitled to any lien, benefit or security of the Ordinance except the right to receive payment of principal, premium, if any, and interest from such special account, and such Bond shall be deemed not to be outstanding hereunder.

Section 8.2. Undertaking to Provide Ongoing Disclosure. In the Bond Sale Resolution the City shall undertake to provide certain ongoing disclosure for the benefit of the owners of the Bonds as required by Section (b)(5) of the Securities and Exchange Commission's Rule 15c2-12 under the Securities and Exchange Act of 1934.

Section 8.3. Severability. If any one or more of the provisions of this Eighth Supplemental Ordinance is or are held by any court of competent jurisdiction to be contrary to law, then such provision or provisions shall be null and void and shall be deemed separable from the remaining provisions and shall in no way affect the validity of the other provisions of this Eighth Supplemental Ordinance or the Bonds.

CLERK'S CERTIFICATE

I, the undersigned, the duly chosen, qualified and ~~acting~~ City Clerk of the City of Tacoma, Washington, and keeper of the records of the City Council (herein called the "Council"), DO HEREBY CERTIFY:

1. That the attached Ordinance No. 25930 (herein called the "Ordinance") is a true and correct copy of an Ordinance of the Council, as finally passed at a regular meeting of the Council held on the 23<sup>rd</sup> day of July, 1996 and duly recorded in my office.

2. That said meeting was duly convened and held in all respects in accordance with law, and to the extent required by law, due and proper notice of such meeting was given; that a legal quorum was present throughout the meeting and a legally sufficient number of members of the Council voted in the proper manner for the passage of said Ordinance; that all other requirements and proceedings incident to the proper adoption of said Ordinance have been duly fulfilled, carried out and otherwise observed, and that I am authorized to execute this certificate.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of the City as of this 24<sup>th</sup> day of July, 1996.

EXHIBIT A  
TELECOMMUNICATIONS PROJECT

The Telecommunications Project will include some or all of the following elements:

Infrastructure improvements

Construct a hybrid fiber coax ("HFC") telecommunications infrastructure consisting of fiber optic rings and branches connecting nodes throughout the Light Division service area. This telecommunications system will be asymmetrically two-way capable. It will interconnect all Light Division substations. Connections may also be made with Light Division customers and with other providers of telecommunications infrastructure and services. This telecommunications system will have 500 channels. It will utilize existing Light Division rights-of-way.

Functions to be performed by infrastructure improvements

Through construction of the HFC telecommunications system, the Light Division's Telecommunications System will be capable of performing some or all of the following functions:

- conventional substation communications functions
- automated meter reading (electric and water)
- automated billing (electric and water)
- automated bill payment (electric and water)
- demand side management (DSM) functions, such as automated load (e.g. water heater) control
- provision of information to customers that is relevant to their energy and water purchasing decisions (e.g. information on time-of-use or "green" power rates)
- distribution automation
- remote turn on/turn off for electric and water customers
- city government communications functions
- CATV service
- transport of signals for service providers offering telecommunications services (e.g. Personal Communications Service (PCS), video on demand, high speed data, as well as conventional wired and wireless telecommunications services)
- Internet access service

WHEREAS the City Council and Public Utility Board will continue to be involved in the future decision-making on this proposal including construction contracts and debt financing approvals, quarterly reviews on-the project direction during the startup period, approval of agreements for use of City rights-of-way for telecommunications purposes which agreements will (to the extent required by law or City Council) treat the Light Division substantially similar to other franchises that the City grants for similar businesses, and

WHEREAS the City Council hereby finds and determines that the Light Division's proposal for a broad band telecommunications system is in the best interests of the City, will serve a public purpose, and should be approved and implemented; Now, therefore,

**BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TACOMA:**

That the Council hereby finds and determines that the City Light Division's broad band telecommunications proposal is in the best interests of the City, will serve a public purpose and that the said Business Plan is sufficient and adequate, therefore, the Council hereby approves the Light Division's proposal including the Business Plan and the Department of Public Utilities, Light Division is hereby authorized to proceed to implement said proposal for a broad band telecommunications system, and

That the proposed broad band telecommunications system shall be owned, operated and controlled by the City of Tacoma Department of Public Utilities Light Division with the Public Utility Board providing oversight and approval of business and third party agreements, as appropriate under the City Charter, Tacoma Municipal Code and other applicable laws, and the City Council shall continue to be involved in the major policy decisions including

# REQUEST FOR ORDINANCE OR RESOLUTION

CITY CLERK USE

Request #:	6366
Ordinance #:	
Resolution #:	33668

1. Date: **March 20, 1997**

Requesting Department/Division/Program	Sponsored By	Phone/Extension
2. <b>Tacoma Public Utilities/Light Division</b>		
Contact Person (for questions):		Phone/Extension
3. <b>Steven J. Klein</b>		502-8203

4. Preparation of Resolution is requested for the City Council meeting of Tuesday April 8, 1997

5. Summary Title/Recommendation: (A concise sentence, as it will appear on the Council Agenda)

Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community. This would include the business plan for a broad band telecommunications system and the implementation of the telecommunications system.

6. Background Information/General Discussion: (Why is this request necessary? Are there legal requirements? What are the viable alternatives? Who has been involved in the process?)

The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment and research on similar activities in other municipalities. It is projected that the cost for the construction and installation of this system will be approximately \$55 million to construct, plus more than \$10 million for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division and its customers will exceed the projected costs.

In addition to the benefits to the Light Division that the system would deliver through improved communication abilities, the system will also have the ability to transport data, provide high speed Internet access and deliver full cable television service.

7. Financial Impact: (Future impact on the budget.)

8. List all material available as backup information for the request and indicate where filed:

Request for Board meeting

CITY OF TACOMA  
DEPARTMENT OF PUBLIC UTILITIES

U-9258

of March 26, 1997

REQUEST FOR RESOLUTION

Date: March 19, 1997

INSTRUCTIONS: File request in the Office of the Director of Utilities as soon as possible but not later than nine working days prior to Board meeting at which it is to be introduced. Completion instructions are contained in Administrative Policy POL-104.

1. Summary title for Utility Board agenda: (not to exceed twenty-five words)  
Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community.

2. A resolution is requested to: (brief description of action to be taken, by whom, where, cost, etc.)  
Approve the Light Division's proposal including the business plan for a broad band telecommunications system and authorize the Light Division to proceed to implement the telecommunications system.

The Light Division projects that the cost for the construction and installation of this telecommunications system will be approximately \$55 million dollars to construct, plus more than \$10 million dollars for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division, and its customers will exceed the projected costs.

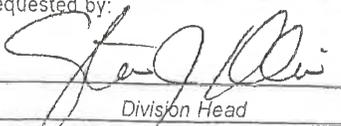

3. Summarized reason for resolution:  
The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment, and research on similar activities in other municipalities. Presentations have been made to neighborhood councils, chambers of commerce, local economic development groups, and the Tacoma Public School Board. A public hearing on the proposed telecommunications system was held by the Public Utility Board on March 12, 1997, and another public hearing was held by the City Council on March 18, 1997. Information summarizing the Telecommunications study and our recommendations was made available at the presentations and public hearings.

In addition to the benefits to the Light Division that the system would deliver through improved communications abilities, the system will also have the ability to transport data, provide high speed Internet access, and deliver full cable television service.

4. Attachments:  
a. Letter to the Public Utility Board and City Council from Mark Crisson

5.  Funds available

6. Deviations requiring special waivers:  None

To the Chairman and Members of the Public Utility Board and  
To the Mayor and Members of the City Council

### RESOLUTION No. U-

#### RECOMMENDATION

The Light Division requests approval by the Public Utility Board and the City Council to develop a broad band telecommunications network as described in the Light Division Telecommunication Study. This action authorizes project implementation and the initiation of design and contract specifications. The Light Division will bring subsequent requests for construction contract and debt issuance approval to the Public Utility Board and City Council as the project progresses. Both policy bodies will also be periodically advised of project status during the development process.

#### BACKGROUND

In preparation for this request, the Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment, and research on similar activities in other municipalities. Staff has made presentations to neighborhood councils, chambers of commerce, local economic development groups, the Tacoma Port Commission, and the Tacoma Public School Board. Two joint Public Utility Board/City Council study sessions were held. A public hearing on the proposed telecommunications system was held by the Public Utility Board on March 12, 1997, and another public hearing was held by the City Council on March 18, 1997. Information summarizing the Telecommunications study and our recommendations was made available at the presentations and public hearings.

The Light Division estimates the cost of this telecommunications system will be approximately \$55 million dollars for construction and installation, plus more than \$10 million dollars for startup operations. The business plan indicates excellent financial potential even under conservative revenue and market penetration assumptions. We recognize the plan's projections are no guarantee of success, but we think the project risks are manageable and justified given the project benefits. These benefits include:

- Improves electric service by enabling distribution system automation, market access, and real-time, interactive communication with customers
- Provides better telecommunications and cable television service sooner and cheaper than other providers will deliver
- Significantly enhances regional economic development and quality of life by creating state-of-the-art telecommunications infrastructure and providing it to all businesses and residences throughout the community
- Creates opportunities for public private partnerships in the wholesale leasing of system capacity to retail telecommunications service providers
- Provides additional revenue to the Light Division and General Government through expansion of the market for telecommunications services

**SUMMARY**

The proposed telecommunications system will strengthen the Light Division's competitive position in the electric power industry through the provision of enhanced electric and telecommunication services to *all* Light Division customers. This system will serve a public purpose and is in the best interests of the City.

Very truly yours,

Mark Crisson  
Director of Utilities

# REQUEST FOR ORDINANCE OR RESOLUTION

CITY CLERK USE

Request #:  
Ordinance #:  
Resolution #:

1. Date: *March 20, 1997*

2. Requesting Department/Division/Program <i>Tacoma Public Utilities/Light Division</i>	Sponsored By	Phone/Extension
3. Contact Person (for questions): <i>Steven J. Klein</i>		Phone/Extension <i>502-8203</i>

4. Preparation of Resolution is requested for the City Council meeting of Tuesday April 8, 1997

5. Summary Title/Recommendation: (A concise sentence, as it will appear on the Council Agenda)

Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community. This would include the business plan for a broad band telecommunications system and the implementation of the telecommunications system.

6. Background Information/General Discussion: (Why is this request necessary? Are there legal requirements? What are the viable alternatives? Who has been involved in the process?)

The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment and research on similar activities in other municipalities. It is projected that the cost for the construction and installation of this system will be approximately \$55 million to construct, plus more than \$10 million for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division and its customers will exceed the projected costs.

In addition to the benefits to the Light Division that the system would deliver through improved communication abilities, the system will also have the ability to transport data, provide high speed Internet access and deliver full cable television service.

7. Financial Impact: (Future impact on the budget.)

8. List all material available as backup information for the request and indicate where filed:

# Telecommunications Study

by Tacoma City Light

Tacoma City Council  
Public Utility Board  
Joint Study Session  
February 18, 1997

## Why should a Publicly Owned Electric Utility be involved in Telecommunications?

- Board initiated RFP process in 1995
- Enhanced Telecommunication capability vital to the Utility in order to continue to improve service and provide choice to customers in rapidly changing environment.
- Investment in the community that provides a pathway to choice and competition.
- Over 100 years ago, Tacoma took steps to improve vital infrastructure to better serve our citizens.

## Key Operational Advantages to Tacoma City Light

- Electric system control and outage reporting
  - Savings to Tacoma City Light
  - Savings to customers
- Electric system performance monitoring and preventive maintenance
- Providing interactive communication link to customers

## Telecommunications Study Team

- Bruce Campbell, Metro Utility Communications Group
- F. Paul Carlson, Ph.D., Metropolitan Communications Consultants
- Linda Dethman, Dethman & Associates
- Stuart Hauser, Metro Utility Communications Group
- Peggy sue Heath, A.B.D., APEX Business Solutions
- Sandy Hunt, Ph.D., APEX Business Solutions
- Richard C. T. Li, P.E., Metropolitan Communications Consultants
- Bruce Mann, Ph.D., University of Puget Sound
- Catherine Rudolph, APEX Business Solutions
- Susan V. Marr, Metro Utility Communications Group
- Gene Starr and the research team at Market Data Research
- Staff team: Chandra Enos, Lisa Steadmon, and Steve Roberts, P.E.

# Telecommunications Study

## Brief Review of Part One

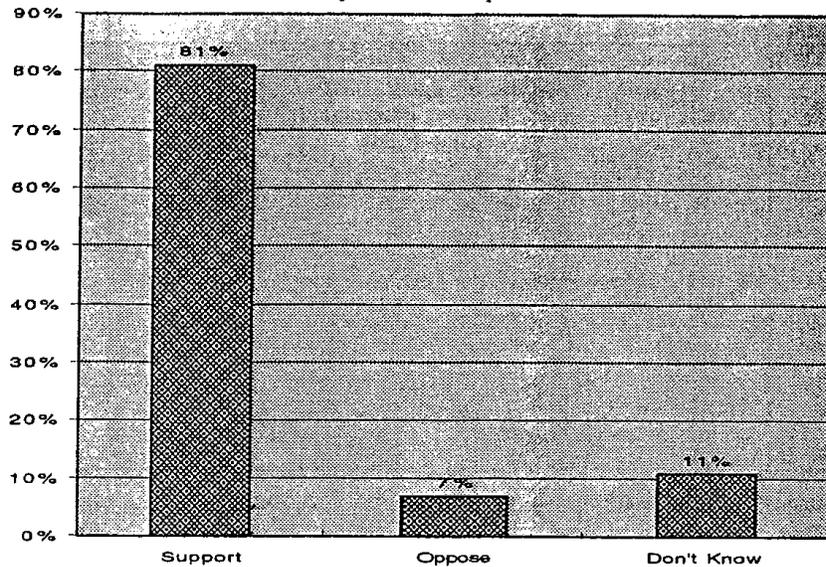

- Telecommunications technology
- Telecommunication companies
- Regulation: Federal, State, and Local
- Other cities and communities
- Local telecommunications history
- Existing telecommunications options in our local communities

## Business Market Research

- Survey of 200 businesses:
  - representing \$5 billion in revenue & 25,000 jobs
  - average of three locations in greater Tacoma area
- Importance of telecommunications links
  - 74% say links are extremely important to their success
  - 62% reported that a link being out one day would cause serious harm to their business; 20% said that it would shut them down
- 61% of businesses use Internet (but with limited access)
- 14% of employees telecommute (increasing to 18% in 2yr)
- Limited Experience with High Speed Lines
  - Two-thirds were not familiar with ISDN lines or T-1 lines

## Support for Tacoma City Light Telecommunications System

To what degree do you support Tacoma City Light building this new communications system to improve service to customers?

## Economic Development Impacts

- Market trends
  - Change in economic base
  - Downtown development activities
- Business Environment
- Telecommunications needs
  - Development activities at military bases
  - The expanding health services industry
  - Professional & financial services
  - Port of Tacoma

## ABSTRACT

This paper describes the process by which the City of Tacoma, Washington came to build an open access, broadband telecommunications system designed to promote effective competition in the provision of Internet and other telecommunications services. The decision by the City's electric utility to build a state-of-the-art communications system as a strategic response to deregulation in the electric utility industry is detailed. And, the decision to provide open access to the telecommunications system to promote competition in the broadband Internet services market is considered in light of telecommunications deregulation. Tacoma's open access cable system is analyzed in the context of contestable market theory. The state of broadband Internet competition is described, as is the current regulatory framework monopoly.

## INTRODUCTION

*I don't think society has figured out how to come up with a business model that is conducive for companies to make the size of investments that are necessary to solve that problem (a shortage of bandwidth in the 21<sup>st</sup> century) with a reasonable expectation of profit but without ending up with a monopoly position. [4]*

Andy Grove, Chairman of Intel Corp.  
Live Internet E\*Trade Interview  
Nov. 14, 1998

In this paper the authors place the Tacoma initiative within the context of existing regulations and current competitive conditions within the telecommunications and electric utility industries. The paper begins with a brief case study narrative of the events that transpired in Tacoma. The reader is given insight into the strategic decision-making and political considerations that led to the City's policy makers' decision to approve the telecommunications overbuild—the largest even undertaken by a municipally owned utility.[8] The paper will continue with a broader perspective. Four different broadband, Internet access technologies including cable, telephony (DSL), wireless, and satellite, are described. The rationale for the FCC's refusal to regulate Internet cable access is considered. And the current legal

challenges to the main cable Internet access provider (ATT/TCI) undertaken by the City of Portland and by a coalition of telephony-based DSL Internet access providers are described.

The authors' thesis that Tacoma has developed a viable business model for building broadband capacity without creating monopoly is introduced.

## **TACOMA'S BUSINESS STRATEGY DECISION: A RESPONSE TO DEREGULATION**

### **Background and context**

When President George Bush stood on an oil platform in the Gulf of Mexico to sign the 1992 National Energy Policy Act, Tacoma Power's management team knew that they had to plan for more than the electric utility's centennial celebration scheduled for the following year.[6] The century old municipally owned utility would now have to provide open access transmission service to wholesale or bulk rate providers and customers on an "unbundled" basis. And although "retail wheeling" was excluded from the federal statute, state policy makers were authorized to require the same open access for those providers and potential customers as well.[9] The days of a stable, regulated and monopolized marketplace would soon be ending for Tacoma Power.

Tacoma Power's management team faced this challenge by going to the private sector for advice. They queried a number of managers from other deregulated industries—airlines and banking—in a search for new models to deal with restructuring during uncertainty. What they learned was that the successful enterprises were led by managers who could think strategically. They were also told to know computers and follow technology, invest in process automation, learn to be more efficient and, most importantly, know your customer. The last point—know your customer—led to some disquieting findings from their own market research. While Tacoma Power's customers were satisfied, they were not loyal—in fact only ten percent of their customer based expressed loyalty.[6] The management team concluded that they were facing a true paradigm crisis where "all of the traditional rules blurred, experimentation was spreading rapidly, and practices once so accepted that they were simply a part of the woodwork were (now) being called into question." [3 p. 323]

### **A new strategy evolves**

The utility's managers chose to respond strategically by recognizing that their core business really was the reliant and efficient delivery of electrons. Thus, they sought a new paradigm—one that would steer the business, make it more reliable and customer friendly and, importantly, follow the technology. The technology in this case was fiber optics and the construction of a state-of-the art communication system for the purpose of automating the utility's distribution infrastructure.

Tacoma Power's managers realized that such a system would add considerable value for the customer: instant information on the time and location of power outages, remote connection and disconnection of services, information about electricity consumption patterns, real time pricing and appliance control systems.[2] As the utility's superintendent described it: "So what do we accomplish? We will keep the revenues going, the customers happy and we will be dispatching the crews where the problems are at." [6] In sum, the value-added services would truly put customers in the driver's seat and allow them "to control the resources" (real time pricing and appliance control) as well as to "choose the destination and route." [3 p. 181] The end result would be greater customer loyalty.

### **Building the system**

The question now was how to build such a system. An obvious option was a strategic alliance with the private sector. But those partnerships were not available. The local phone company, cable provider and a number of competitive access providers turned down overtures from Tacoma Power's management team.[6] And so the utility decided to move forward on its own—to build the infrastructure itself. But before making the multi-million dollar investment, the utility's director requested that Tacoma Power's citizen oversight body, the Utility Board, authorize an outside review by a consultant group—the Stanford Research Institute.

The Board approved and soon SRI's consultants came back with an interesting idea: Why not invest more dollars to expand the fiber optic pipe?[6] Then Tacoma Power could offer its customers an array of services—cable television, competitive Internet access, telephony and data transport. The Telecommunications Act signed into law by President Bill Clinton in 1996 had, in fact, given Tacoma Power this option by eliminating barriers to entry into the telecommunications market. This led Tacoma Power's superintendent to proclaim: "The new law afforded us the opportunity to embark on a broader strategy—one that would allow us to add smart electrons to the worker bee electrons the utility was providing for over 100 years." [6]

### **Testing the market**

The next step was to conduct a marketing survey. The findings were more than promising. Tacoma Power far outdistanced the competition as the preferred provider for cable television service.[10] And a financial analysis of the current market showed that a 25 percent penetration of the current customer base for cable service alone would lead to an operating profit within three years.[11] The pro forma income statement forecast over 33,000 cable customers in three years of operation. Within ten years time, the entire investment of \$100 million would be paid off and Tacoma Power would have enough revenue left over to plow into system upgrades.[11] But before embarking on this major undertaking, Tacoma Power borrowed once again from the private sector. The utility pulled together a panel of fourteen experts from an array of disciplines to review and pass on a final business plan. That plan, which was given the stamp of approval by the panel, called for retail and wholesale applications. On the retail side, the planned offerings included more reliable distribution of electricity, cable television, digital audio broadcasts, Internet over television and broadband services with customized point-to-point connectivity. On the wholesale side, Tacoma Power would offer a first-of-its-kind open platform highway for Internet Service Providers and their high speed modems.

### **Political currents**

The political dynamics revolving around Tacoma Power's plans to build a fiber optic system soon changed once the management team broadened their strategy to include an array of telecommunications services. The manager of the incumbent cable provider (TCI) sent a scathing critique of the utilities' business plan to the Tacoma City Manager. The twenty-one page letter ended with the warning: "(Tacoma's policy makers should)...pause and let the euphoria of the benefits you may now expect be replaced by a realistic appreciation of the pitfalls and risks associated with municipal ownership of what is traditionally an entertainment service provided by private enterprise." [5] After numerous public hearings, two declaratory judgements from the state superior court, a plea from the cable provider's national president and an additional due diligence review by three outside consultants, the city policy makers moved forward with the \$100 million overbuild.

The following section will discuss how contestable market theory applies to the Tacoma case and will bring the reader up-to-date on current and national developments.

## **THE ECONOMIC RATIONALE: CREATING CONTESTABILITY IN BROADBAND TELECOMMUNICATIONS AND ENHANCING COMPETITION IN THE CABLE TV MARKET**

### **Creating a Contestable Market in Broadband Telecommunications**

There are often strong parallels between the deregulation experiences of very diverse industries. In the early years of airline deregulation, Elizabeth Bailey, then a member of Civil Aeronautics Board, called for municipalities to bear the sunk costs associated with developing new airports in an effort to make the airline industry more contestable.[1] Entry by new airlines would be much more likely, she reasoned, if they did not have to bear the risk associated with investing in their own airports - investments which presumably could not be recovered if a new airline failed.

Similarly, entry into various branches of the telecommunications industry would be more likely if municipalities bore the sunk costs associated with broadband capacity. New telecom entrants could (for an appropriate charge) simply ride the municipal system much like new airlines contract for terminal space at the municipal airport. Moreover, as the telecom market becomes more contestable (as barriers to entry are reduced through public ownership of broadband capacity), the mere threat of potential competition becomes a more viable disciplinary force within the market. Existing providers of telecom services will be less likely to charge excessive prices or permit X-inefficient practices and less

likely to become technologically lethargic because of the constant threat of potential competition. A truly contestable telecommunications market, then, will provide consumers with an increasing variety of services produced in an efficient manner and offered at competitive prices.

The City of Tacoma has designed and built a broadband telecommunications system with the express purpose of providing *competitive* telecommunications services to businesses and residents within the City. By creating an open-access architecture (a feat which, until recently, AT&T contended was economically impossible), the City has made it possible for many competing Internet service providers to gain access to the system. It would appear that Tacoma's initiative provides one possible answer to Andy Grove's lament (as expressed earlier) that there appears to be no viable model for building much needed broadband capacity without creating a monopoly position.

#### **Creating Competition in the Cable TV Market**

As noted above, the telecommunications system developed by the City also created the capacity to compete with TCI, the local cable TV provider. Though this was not the primary rationale for constructing the system, the possibility of injecting competition into the cable TV market was very attractive to local policy makers because of the poor quality of service then offered by the existing cable TV provider.[13]

The advent of competition did have its intended effect in Tacoma as the incumbent provider (now AT&T/TCI) responded to the City's entry into the market by upgrading its service. By adding fiber to its delivery system and moving to a digital format, the incumbent was able to match (or exceed) the various channel offerings the City's new system delivered. No such upgrades were provided by TCI in nearby Seattle, leaving that city at odds with its only cable TV provider.[13]

#### **RECENT DEVELOPMENTS**

Presumably in response to legal challenges from the City of Portland, GTE and the Open NET Coalition, AT&T recently announced that it will open its broadband cable Internet system to ISP providers by 2002 when its contract with @Home, the sole provider currently riding its system, expires.[14] AT&T's general counsel had previously argued, "Regulation [a requirement to provide open access] would undercut the investment needed to expand cable's broadband services. It also would deter the private investment necessary to fund the construction of new broadband facilities, which will damage competition, not spur it." [7] According to AT&T, then, monopoly control of its broadband system was technologically determined. This, in effect, constitutes a natural monopoly argument, which would appear a dangerous position for AT&T to take.

However, the FCC, under William Kennard's leadership, has supported AT&T's position, arguing "At this nascent stage in the development [of broadband], one should not presume to have a regulatory cure for every anticipated marketplace ailment. It would be imprudent to act now. We must allow the marketplace to evolve." [7] The FCC recognizes at least four developing broadband technologies – cable access, DSL access provided by telephone companies, satellite access and wireless access.

Although AT&T's promise to open its system includes a pledge to not penalize customers for choosing a provider not affiliated with AT&T, the question lingers as to whether or not those independent providers of broadband services may be at some competitive disadvantage to AT&T's affiliates. The public ownership model developed by Tacoma represents a viable alternative – an alternative which should provide a more level playing field for ISP competition.

By the end of 1999, with substantial technical assistance from Cisco Systems, Tacoma's public utility had completed the construction of an open architecture, broadband telecommunications system. It was serving over 11,000 homes with cable TV services (exceeding the 25 percent penetration goal) and had contracted with one ISP to begin the provision of residential high-speed Internet services with other ISP providers in the wings. The utility also provides high-speed data transmission services to several major companies in the Tacoma area in competition with the regional Bell telephone company. As one of only three U.S. cities wired with a fiber-optic telecommunications system, Tacoma is attracting a variety of new high-tech businesses.[12] The economic development benefits of a truly competitive, broadband telecommunications system are clear and the public ownership model Tacoma has developed appears viable.

The Honorable Grant L. Anderson

IN THE SUPERIOR COURT OF WASHINGTON  
FOR PIERCE COUNTY

CITY OF TACOMA, a municipal corporation,  
Plaintiff,  
v.  
THE TAXPAYERS AND THE RATEPAYERS  
OF THE CITY OF TACOMA,  
Defendants.

No. 96 2 09938 0  
CITY OF TACOMA'S MOTION FOR  
SUMMARY JUDGMENT

Plaintiff City of Tacoma ("City") requests that this Court enter a judgment declaring that:

1. The Court has jurisdiction over the subject matter and parties in this action.
2. Tacoma City Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.
3. The City has authority under the laws of the State of Washington and the United States to provide cable television service in the Light Division service area.
4. The City has authority under the laws of the State of Washington and the United States to lease telecommunications facilities and capacity to telecommunications providers.
5. The City has authority under the laws of the State of Washington and the United States to issue the Bonds for the purposes set for in paragraphs (3) and (4) above and in the manner set forth in the Bond Ordinance.

**I. INTRODUCTION**

The City of Tacoma (the "City") brought this declaratory judgment class action under RCW 7.24 and 7.25 and CR 23(B)(2) to confirm its authority to issue bonds for the purpose of constructing and operating a telecommunications system consisting of a hybrid fiber coaxial network (the "Telecommunications System"). On July 23, 1996, the Tacoma City Council adopted Ordinance No. 25930, which authorized the sale of Electric System revenue bonds (the "Revenue Bonds") in order to finance the first phase of constructing and operating the Telecommunications System. The City will utilize the Telecommunications System to enhance electric service to customers of its Light Division. The City may also utilize a portion of the Telecommunications System to provide cable television service to customers in the Light Division service area, and lease Telecommunications System facilities or capacity to providers of telecommunications services.

**II. RELIEF REQUESTED**

The City requests that the Court enter judgment declaring that:

1. The Court has jurisdiction over the subject matter and parties in this action.
2. Tacoma City Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.
3. The City has authority under the laws of the State of Washington and the United States to provide cable television service in the Light Division service area.
4. The City has authority under the laws of the State of Washington and the United States to lease telecommunications facilities and capacity to telecommunications providers.
5. The City has authority under the laws of the State of Washington and the United States to issue the Bonds for the purposes set for in paragraphs (3) and (4) above and in the manner set forth in the Bond Ordinance.

16

**IV. EVIDENCE RELIED UPON**

17 The City believes that the following facts are undisputed in every material respect. These  
18 facts are contained in the Declaration of Jon Athow in Support of the City's Motion for Summary  
19 Judgment ("Athow Decl.").

20 Plaintiff, the City of Tacoma, is a municipal corporation and a city of the first class of the  
21 State of Washington. The Defendants herein are taxpayers of the City of Tacoma and ratepayers of  
22 its electrical utility, which is known as the Light Division of the Department of Public Utilities (the  
23 "Light Division"). Harold E. Nielsen, Jr., the taxpayer and ratepayer representative, is a resident and  
24 taxpayer of the City and a customer of the Light Division. The City currently owns and operates,  
25 through its Light Division, an electric utility (the "Electric System") for the purpose of providing  
26 electricity and other energy services throughout the City and other portions of Pierce County.

27 The Telecommunications System will be used to improve the speed and capability of the  
28 existing real-time communications among certain Electric System substations, and to extend such  
29 real-time communications to the remaining substations. In addition, the Telecommunications System  
30 may be used to enhance such existing energy services as demand management, identification of  
31 outages, meter reading, billing and payment, and resource dispatch. The Telecommunications System  
32 may be used to perform similar functions for the City's provision of water service. The City's  
33 authority to issue the Revenue Bonds to finance the purposes discussed in this paragraph is not at  
34 issue.

35  
36

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 4

O:\LARI24624-00.015\SJMEMRA.DOC

1 The City may also utilize a portion of the Telecommunications System to provide cable  
2 television service to customers within the Light Division service area, and to lease facilities or  
3 capacity to providers of video-on-demand, data transport, telephony, and other telecommunications  
4 services. By providing cable television service and/or leasing facilities or capacity to  
5 telecommunications providers, the City can ensure a range of choices for consumers, provide public  
6 interest television programming, and improve the availability of competitively priced  
7 telecommunications services.

8 The City also estimates that by providing cable television service and/or leasing facilities or  
9 capacity, it could generate substantial revenue to help offset the costs of constructing and operating  
10 the Telecommunications System. Because the infrastructure for the telemetry improvements designed  
11 to meet Electric System needs represents a substantial portion of the costs of the Telecommunications  
12 System, the relative cost of these additional revenue-producing capabilities is low.<sup>1</sup>

13 The Tacoma City Council enacted Ordinance No. 25930 (the "Bond Ordinance") on July 23,  
14 1996, at a regular meeting.<sup>2</sup> The Bond Ordinance provides for the construction and operation of a  
15 Telecommunications System within the Light Division and for the issuance and sale of Electric  
16 System revenue bonds in the aggregate principal amount of \$1,000,000.

17 **V. ARGUMENT**

18 **A. Summary Judgment Standard**

19 Summary judgment is appropriate to dispose of actions or parts thereof when no genuine  
20 issues of material fact exist or when only a question of law exists. CR 56(c). "The burden is on the  
21 moving party to demonstrate that there is no issue as to a material fact." *Scott v. Pacific West*  
22 *Mountain Resort*, 119 Wn. 2d 484, 502-03 (1992). If the party seeking summary judgment  
23 successfully carries its initial burden, the burden shifts to the non-moving party to establish the

24 <sup>1</sup> Declaration of Jon Athow in Support of Motion for Summary Judgment ("Athow Decl."), ¶ 10.

25 <sup>2</sup> A true and correct copy of the Bond Ordinance is attached as Exhibit C to Mr. Athow's Declaration.

1 existence of the facts on which it has the burden of proof at trial. *Young v. Key Pharmaceuticals,*  
2 *Inc.*, 112 Wn. 2d 216, 225 (1989). The non-moving party must respond with specific facts and  
3 cannot rely on bare allegations contained in his or her pleadings. *Baldwin v. Sisters of Providence,*  
4 112 Wn. 2d 127, 132 (1989). Conclusory statements or argumentative assertions raised in affidavits  
5 are insufficient to raise an issue of fact and do not preclude summary judgment. *Grimwood v.*  
6 *University of Puget Sound, Inc.*, 110 Wn. 2d 355, 359-60 (1988).

7 In the instant case, there are no issues of material fact. The facts bearing on the City's  
8 authority to provide cable television service and to lease telecommunications facilities and capacity to  
9 telecommunications providers are undisputed. Only questions of law remain. The case should  
10 therefore be resolved on summary judgment.

11 **B. The City Has Authority Under Washington Statutes To Construct and Operate the**  
12 **Entire Telecommunications System and To Lease Portions of the System's Capacity or**  
13 **Facilities.**

14 1. **A Charter City Has Broad Powers.**

15 The Washington Constitution grants broad powers to first-class charter cities such as Tacoma.  
16 It states, "Any city containing a population of ten thousand inhabitants, or more, shall be permitted to  
17 frame a charter for its own government, consistent with and subject to the Constitution and laws of  
18 this state . . . ." Wash. Const. art XI, § 10. Under Chapter 35 RCW, a charter city has "all the  
19 powers which are conferred upon incorporated cities and towns by this title or other laws of the state,  
20 and all such powers as are usually exercised by municipal corporations of like character and degree."  
21 RCW 35.22.570. In addition to this "omnibus" grant of power, RCW 35.22.900 provides that grants  
22 of power to first-class cities must be liberally construed to carry out the objectives of chapter 35.22  
23 RCW. *See also Citizens for Financially Responsible Government v. City of Spokane*, 99 Wn. 339,  
343 (1983).

24 In light of these constitutional and statutory provisions, the Washington Supreme Court has  
25 held that "the only limitation on the power of cities of the first class is that their action cannot  
26

1 contravene any constitutional provision or any legislative enactment. . . . [A] city of the first class has  
2 as broad legislative powers as the state, except when restricted by enactments of the state legislature."  
3 *Winkenwerder v. City of Yakima*, 52 Wn. 2d 617, 622 (1958).

4 2. A City Has Even Broader Powers When It Is Operating a Utility.

5 The powers of a city under Washington law are especially broad when the city is performing a  
6 proprietary, as distinguished from a governmental, function. In *Tacoma v. Taxpayers*, 108 Wn.2d  
7 679 (1987), the Washington Supreme Court stated that while municipal authority must be narrowly  
8 construed when the function is governmental, "when the Legislature authorizes a municipality to  
9 engage in a business, it may exercise its business powers much in the same way as a private individual.  
10 . . . We have viewed the Legislature as implicitly authorizing a municipality to make all contracts, and  
11 to engage in any undertaking necessary to make its municipal electric utility system efficient and  
12 beneficial to the public." *Id.* at 694-95. *See also Hite v. Public Utility Dist. No. 2*, 112 Wn.2d 456,  
13 459 (1989) ("It is clear that in the production and sale of electricity, a municipal corporation acts in  
14 its proprietary capacity. . . . In that capacity, a municipal corporation acts as the proprietor of a  
15 business enterprise for the private advantage of the city and may exercise its business powers in much  
16 the same way as a private individual or corporation." )<sup>3</sup>

17 In addition, the courts have recognized many instances in which public utility districts, which  
18 are municipal corporations with more limited powers than cities, may engage in activities that are  
19 incidental to their expressly authorized functions of providing electric or other utility service. *See,*  
20 *e.g., Puget Power and Light Co. v. Public Utility District No. 1 of Chelan County*, 17 Wn. App. 861  
21 (1977) (involving public utility district's provision of recreational facilities); *Snohomish County*  
22 *Public Utility District No. 1 v. Broadview Television Co.*, 91 Wn.2d 3, 8 (1978) (upholding district's

23  
24  
25 <sup>3</sup> *Hite* and *Taxpayers* made clear that the holding in *Chemical Bank v. Washington Public Power Supply*  
26 *System*, 99 Wn.2d 772 (1983), does not detract from the broad authority that cities enjoy when acting in a proprietary  
capacity.

1 authority to lease pole attachments even though activity is “only incidental to the accomplishment of  
2 the district’s primary purpose, the distribution and sale of electricity”).

3 3. The City Has Authority Under Washington Statutes To Provide Telecommunications  
4 Services.

5 The City’s statutory powers include the authority to provide telecommunications services.  
6 First, the City, as a first class charter city having code city powers as well, has all powers not denied  
7 by law, "including operating and supplying of utilities and municipal services commonly or  
8 conveniently rendered by cities or towns." RCW 35A.11.020. Tacoma may conveniently render  
9 telecommunications services because the Light Division has an existing citywide electric system of  
10 connections to customers' homes, because it has existing billing relationships with customers, and  
11 because it can provide services economically. Second, there is no express statutory prohibition  
12 against city provision of municipal telecommunications services. *Winkenwerder, supra*. To the  
13 contrary, the Legislature has acknowledged that cities provide communications services through  
14 enacting a statute providing for the burying of city-owned communications facilities. RCW  
15 35.96.030. Finally, the Legislature has determined that competitive markets for telecommunications  
16 services serve the public interest. RCW 80.36.300; *In re Electric Lightwave, Inc.*, 123 Wn.2d 530,  
17 538-39 (1994) (noting that "it is the state's policy to promote diversity in the supply of  
18 telecommunications services and products in telecommunications markets throughout the state").  
19 The City’s provision of telecommunications services will make the market more competitive, thus  
20 furthering the public interest recognized by the Legislature.

21 4. Washington Case Law Recognizes the City’s Authority To Provide  
22 Telecommunications Services.

23 The Washington Supreme Court in *Issaquah v. Teleprompter Corp.*, 93 Wn. 2d 567 (1980),  
24 recognized the power of a code city under RCW 35A.11.020 to utilize its telecommunications system  
25 to provide telecommunications services, including cable television service. The Court held in  
26 *Teleprompter* that a city was authorized by statute to operate a cable television system under the

1 broad authority of RCW 35A.11.020 because there was "no general law which conflicts with the  
2 city's authority under the optional municipal code to operate such a system." *Id.* At 575. First class  
3 charter cities such as Tacoma have all the powers granted to code cities. RCW 35.22.570. Thus,  
4 under *Teleprompter* the City is clearly authorized to use its Telecommunications System to offer  
5 cable television service.

6 Tacoma's authority is not limited to the provision of cable television service.  
7 *Teleprompter* provides no basis for distinguishing cable television from other telecommunications  
8 services. The Washington Legislature views cable television as a telecommunications service. *See,*  
9 *e.g.*, RCW 80.04.010 (defining "telecommunications" as "the transmission of information by wire,  
10 radio, *optical cable*, electromagnetic, or other similar means) (emphasis added); RCW 80.36.370  
11 (exempting cable television from the Washington Utilities and Transportation Commission's  
12 regulation of telecommunications services). Thus, *Teleprompter* clarifies the authority for Tacoma to  
13 provide telecommunications services.

14 5. The City Has Authority To Lease City-Owned Telecommunications Facilities

15 The City has authority under its charter and under state law to lease excess capacity and  
16 facilities of its Telecommunications System to other telecommunications providers. Tacoma's Charter  
17 expressly permits the City to lease City property. Tacoma, Wash., Code § 9.1. Under state law, a  
18 first class city has the power to:

19 control the finances and property of the corporation, and to acquire, by purchase and  
20 otherwise, such lands and other property as may be necessary for any part of the  
21 corporate uses provided for by its charter, and to dispose of any such property as the  
interests of the corporation may, from time to time, require.

22 RCW 22.280(3). The Washington Supreme Court has upheld the authority of cities to lease  
23 municipal property to private parties as long as the lease does not interfere with public use.  
24 *Winkenwerder, supra* at 624. Cities are specifically authorized to lease surplus utility property and  
25 equipment. Ch. 35.94 RCW.

26

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 9

O:\LARI\24624-00.015\SIJMEMRA.DOC

1 C. Federal Law Requires that the City Be Allowed To Provide Telecommunications  
2 Service.

3 The City's authority to provide telecommunications services must be recognized under the  
4 Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110 Stat. 70 (1996) (the "Act"), as a  
5 consequence of the Act's prohibition against barriers to the entry of any entity into the  
6 telecommunications market. Federal law can preempt state utility regulation. *Public Utility District*  
7 *No. 1 of Pend Oreille County v. Federal Power Commission*, 308 F.2d 318 (D.C. Cir. 1962) (holding  
8 that the Federal Power Act preempted Washington statute purporting to limit city's ability to  
9 condemn property for power plant). The *Pend Oreille* court found that preemption was required  
10 merely by implication of a federal law. Here, the case for preemption is far stronger because the Act  
11 expressly preempts state interference in the telecommunications market. Section 253 of the Act  
12 states, "No state or local statute or regulation, or other state or local legal requirement, may prohibit  
13 or have the effect of prohibiting the ability of *any entity* to provide *any* interstate or intrastate  
14 telecommunications service." Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110  
15 Stat. 70 (1996) (emphasis added). There is no language in either the statute or its legislative history  
16 exempting cities from the law's application. To the contrary, a House Committee Report states that  
17 Section 253 "is intended to remove all barriers to entry in the provision of telecommunications  
18 services." House Rep. No. 104-458. A state law precluding telecommunications services constitutes  
19 a legal requirement. Thus, any Washington law that would prohibit Tacoma from providing  
20 telecommunications service is expressly preempted by the Act.

21 In addition, the thrust of the Telecommunications Act is to encourage the availability and  
22 affordability of telecommunications services. *See, e.g.*, Section 254, requiring various mechanisms to  
23 promote universal service. Tacoma is well positioned to make telecommunications services available  
24 to the public at a competitive price, thereby furthering this federal policy.

**VI. CONCLUSION**

Under its broad powers as a first-class charter city, the City has authority to use a portion of its Telecommunications System to provide cable television service and to lease a portion of its Telecommunications System facilities or capacity to other telecommunications service providers. Federal law expressly bars any requirement that would undercut this authority. Because there is no dispute over the material facts underlying its authority, the City is therefore entitled to judgment as a matter of law.

DATED this 5<sup>th</sup> day of November, 1996.

PSRRTED STD  
U.S. POSTAGE PAID  
TACOMA, WA  
PERMIT NO. 2

March 13, 2020

**SECOND NOTICE OF POTENTIAL CHANGE IN SERVICE EFFECTIVE MARCH 31**

Dear Advanced Stream Customer:

On March 31, 2020, Click! Network, an operating entity of Tacoma Public Utilities, will transfer operational control of Click! Network to Rainier Connect, an existing ISP on Click! Network. As such, beginning April 1, 2020, Rainier Connect will become the operator of what is currently Click! Network and begin providing cable television services, Internet access services, and other related telecommunications services. Additional information on this event is available at <https://www.mytpu.org/community-environment/projects/click-network-update/>.

Advanced Stream provides your Internet access service through an agreement with Click! Network. In December of 2019, Click! Network gave notice to Advanced Stream that its ISP Advantage agreement with Click! Network will expire on March 30, 2020. This is our second notice to inform you that after March 30, there is a possibility that Advanced Stream will not continue to be an Internet service provider (ISP) on Click! Network. However, it is our understanding that Advanced Stream and Rainier Connect are in discussions regarding a new agreement that would allow Advanced Stream to continue providing internet access service after March 30.

If Advanced Stream and Rainier Connect are unable to reach an agreement, then Advanced Stream will no longer be your internet access service provider after March 30. If that happens Click! Network and Rainier Connect have agreed to continue providing internet access services to former Advanced Stream customers for a limited time after March 30. This grace period will give you time to transfer your internet access services.

If you have questions about your current service, please contact Advanced Stream. Alternatively, you are free to contact Rainier Connect, the other ISP on the Click! Network for information about their Internet access service offerings. Rainier Connect can be reached at [www.rainierconnect.com](http://www.rainierconnect.com) or by call at 253-683-2200.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jackie Flowers', is written in a cursive style.

Jackie Flowers, Director  
Tacoma Public Utilities

(c) **Operator Maintenance.** The Parties agree that Operator shall have responsibility for Maintenance of the Tacoma Power Commercial System, as described in Exhibit D hereto.

**11. ADDITIONAL CONDITIONS RELATED TO USE OF THE TACOMA POWER COMMERCIAL SYSTEM**

(a) **Tacoma Power Commercial System Upgrades.** Operator agrees to make Tacoma Power Commercial System upgrades in accordance with the terms of Exhibit E hereto.

(b) **Capital Expenditures Commitment.** Operator agrees to make Capital Expenditures to the physical assets of the Tacoma Power Commercial System as specified in Exhibit F hereto.

(c) **Equitable Access.** Operator agrees to the equitable access commitments in Exhibit G hereto.

(d) **Affordable Access.** Operator agrees to the affordable access commitments in Exhibit H hereto.

(e) **Customer Service Commitments.** Operator agrees to the customer service commitments in Exhibit I hereto.

(f) **Customer Privacy.** Operator agrees to the customer privacy commitments in Exhibit J hereto.

(g) **Net Neutrality.** Operator agrees to the net neutrality commitments in Exhibit K hereto.

(h) **Open Access to Telecommunications Assets.** Operator agrees to the open access commitments in Exhibit L hereto.

(i) **Economic Development and Educational Opportunities.** Operator agrees to the economic development and educational opportunities commitments in Exhibit M hereto.

(j) **Preserve Competition Among Providers.** Operator agrees to certain restrictions on Transfers as more fully detailed in Exhibit N hereto.

(k) **Continuity of Services.** The obligations and rights of the Parties with respect to the transition of the Tacoma Power Commercial System upon the termination of this IRU Agreement are contained in Exhibit O hereto and Section 21(f) (Survival of Certain Provisions) of this IRU Agreement.

(l) **Labor Relations.** Operator agrees that, pursuant to Section 7 of the National Labor Relations Act (29 U.S.C. § 157), all employees used in the operation of the Tacoma Power Commercial System shall have the right to self-organization, to form,

**EXHIBIT L**  
**OPEN ACCESS TO TELECOMMUNICATIONS ASSETS**

**1. OPEN ACCESS PROGRAM**

(a) Operator shall provide wholesale services over the Tacoma Power Commercial System to other telecommunications providers (but not to Operator's Affiliates except with the prior written approval of Tacoma Power) consistent with its practices and policies in other geographic areas in which it provides wholesale services, to the extent appropriate ("**Open Access Program**"). All terms and conditions of the Open Access Program shall be determined by the Operator.

(b) In furtherance of the requirements in Section 1(a), Operator agrees to conspicuously post and continuously maintain on its website a copy of its Open Access Program.

**2. ANNUAL REPORT**

(a) Operator shall provide Tacoma Power with a copy of its Open Access Program on an annual basis on the Annual Reporting Date.

**3. REMEDIES FOR NON-COMPLIANCE**

(a) Failure of Operator to maintain its Open Access Program posted on its website is a Default. Liquidated damages in the amount of Two Hundred and Fifty Dollars (\$250) per day shall accrue from the date of receipt of Notice of Default until the Default is cured.

MITCHELL SHOOK,

Plaintiff,

v.

CITY OF TACOMA,

Defendant.

**NO. 19-2-07135-0**

DECLARATION OF  
THOMAS MCCARTHY

I, Thomas McCarthy, declare as follows: I am a resident of Tacoma, ratepayer of Tacoma Public Utilities, taxpayer to City of Tacoma, and customer of Click!, the municipal broadband telecommunications system operated by Tacoma Public Utilities. I am over the age of eighteen, competent to testify in this matter, am endowed with the capacity of reason, am unschooled in legal sophistries and make this declaration on my own personal knowledge.

That as I have been an advocate for Click Network! and maintaining its public control for the benefit for Tacoma citizens in maintaining it as a public utility to increase competition with respect to price and better service, in addition to creating an advantage for our economy as has been the case for Chattanooga, TN.

1. Attached hereto as **Exhibit A** and incorporated herein by this reference is a true and

1 correct copy of a screen shot of a Facebook post I authored as visited on 7/29/22;  
2 furthermore, I affirm that I maintained service with Click until my provider was forced from  
3 serving Click! customers, and once my year's subscription expired, and Rainier Connect  
4 raised my rates from 80% for the same level of service (from \$300/year at Advanced Stream  
5 to \$45/month at Rainier connect), at which time, I was forced to seek service with  
6 CenturyLink at \$50/month, but with much higher gigabyte speed service. (See Exhibit A)  
7 Neither Rainier Connect nor Centurylink provided anywhere near the level of customer  
8 service that my initial provider did prior to the Tacoma City Council illegally privatizing  
9 Click! to Rainier Connect. Customer service is much poorer with Rainier Connect and  
10 Centurylink, involving failure to even reach tech support after hours of waiting and effort.  
11  
12

- 13  
14 2. I also affirm that having reliable internet service has been critical during the coronavirus for  
15 my wife, a managing social worker at the Veterans Administration, who worked online at  
16 home full time, and to my business, which often requires me to work from home online.  
17 Furthermore, since all schooling was forced online and at home during the pandemic,  
18 telecommunications was critical for our childrens' education. And during the pandemic, my  
19 only option in participating in several court hearings was to do so via Zoom via internet. If  
20 there was any iota of doubt or unclarity that access to internet via telecommunications  
21 systems constituted a utility, that question has been eliminated. There can be no doubt  
22 whatsoever that there is a clear public interest in telecommunications as articulated by the  
23 Washington State Supreme Court in Bremerton Municipal League v. Bremer (1942), a case  
24 of controlling precedence that has never been over-ruled and binds lower courts, as law  
25 enacted in the 1917 Act it ruled under remain fully in force.  
26

1 3. I affirm, as a student of history, the understanding that in that period over one hundred years  
2 ago when public municipalities were nascent, the motive of this law was to create a firewall  
3 against privatizing utilities which were owned by the citizens' polity, held in the public  
4 interest, which would otherwise be liable to privatization of public assets by corruptible  
5 elected officials in favor of their benefactors, private for-profit interests. Then, as now,  
6 private for-profit corporations do not want to compete with the public sector in providing  
7 utility services. Whether private power companies, or private telecommunications firms,  
8 eliminating public utilities from essential services guarantees large profits with little to no  
9 competition. Eliminating Click! as a public utility certainly met the policy goals of  
10 companies like Comcast, Centurylink, and even a bit player like Rainier Connect buying out  
11 or eliminating its two rivals within Click.

12  
13  
14 4. I affirm that the mayor of the City of Tacoma, who benefitted from over \$100,000 in  
15 political donations by Rainier Connect via direct and indirect means in her first run for  
16 mayor, immediately after election declared that people are tired at dealing with Click!, and  
17 moved quickly to privatize Tacoma's publicly owned telecommunications system...which  
18 was awarded to Rainier Connect for a tiny fraction of the \$200 million investment by the  
19 citizens of Tacoma for a paltry lease amount of \$2.5 million/year. The bidding process was  
20 transparently fixed towards being awarded to its intended recipient, Rainier Connect. The  
21 concerns that drove the 1917 Act to safeguard the public interest with regards to privatizing  
22 public utilities has not changed in relevance since the days of Homer T. Bone, an early and  
23 legendary Tacoma advocate of public utilities.

24  
25 5. Attached hereto as **Exhibit B** and incorporated herein by this reference is a true and correct  
26 screen shot of an article by the South Sound Business periodical referencing Conor

# Tacoma Councilman McCarthy Resigning to Join Comcast

John Stearns Jun 10, 2022

Tacoma City Councilman Conor McCarthy is resigning from his at-large seat after almost seven years to become the new director of government and regulatory affairs for Comcast in Washington state.

He will step down from the Council June 22 and start at Comcast a week later.

"I am excited for this opportunity, but leaving the Council is a tough decision for me, and not one I take lightly," McCarthy said in a [statement](#), adding he was proud and grateful for what Tacomans have accomplished together.

With more than 17 years of experience as a lawyer, real estate manager, and councilman, McCarthy will develop and implement the strategy for government affairs and public policy issues, and foster relationships on Comcast's behalf with elected officials, business leaders, and community influencers, Comcast said in a news release.

## I. INTRODUCTION

Darrel Bowman and Mitchell Shook (“Appellants”) appeal the February 28, 2020 decision of the Pierce County Superior Court denying Appellants’ Motion for Partial Summary Judgment, granting Respondent City of Tacoma’s (“City” or “Respondent”) Motion for Summary Judgment, and dismissing Appellants’ claims in their entirety. This response is provided to join in and support Mr. Bowman’s Motion for Accelerated Review.

This lawsuit is about the separation, disposal and “privatization” of the City of Tacoma’s municipal telecommunications utility, Click! Network (“Click!”), without voter approval, as explicitly required under state law, Chapter 35.94.020, and under Tacoma’s City Charter § 4.6.

Municipal telecommunications utilities are protected from such disposal by Chapter 35.94 RCW, or the Laws of 1917, House Bill 337, Remington RRS § 9512 -9514, (“§ 9512”): “An Act authorizing cities and towns to lease or sell any municipally-owned” utilities. In 1917 Legislators provided a long list of utilities protected from privatization by the public vote. “Telegraph and telephone lines” and any other . . . system “similar or dissimilar” were among the utilities protected. *See App. Pg. 40.*

In 1945 this list of utilities was “rewritten for brevity” by the Code Committee, providing the statutes current language of “any public utility works, plant or system owned by it or any part thereof. ..” This abbreviated version of the “Laws of 1917” was codified into RCW 80.48 in 1951. That language remains unchanged today.<sup>1</sup> *See App. Pg. 68.*

---

<sup>1</sup> A savings clause was added at RCW 1.04.020 to ensuring the laws were unchanged by the code revisor’s abbreviation.

For a detailed explanation of RRS § 9512 -9514 evolution into Chapter 35.94 RCW, please *see* App. Pgs.28-30 , Shook’s MSJ. Also, *see* App. Pgs. 66 – 68 Shook’s Reply in the MSJ.

Click! (the “System”) is a state-of-the-art advanced telecommunication system and enterprise, owned and operated by Tacoma Public Utilities (“TPU”), supporting the community’s needs for data transport and broadband services. It serves over 35,000 active TPU utility customer accounts.

TPU provides four distinct public services; water, power, rail and telecommunications under four brand names: Tacoma Water, Tacoma Power, Tacoma Rail and Click! Network. TPU’s website prominently displays Click! as one of “Our Services: Power, Water, Rail, Click!.”<sup>2</sup>

The Telecommunications System serves public institutions, such as Tacoma Public Libraries and Pierce County’s Sheriff, Planning and Public Works, Tax Assessor/Treasurer, Courts and Auditors Department. The System also supports over 1,000 commercial and institutional accounts, including hospitals and universities. The System has been in operation for over 20 years and revenues exceeded \$25 million in 2019.

Privatization of the System is a public issue involving a fundamental and urgent issue. Conveying an entire municipal telecommunications enterprise, along with exclusive possession and control of the underlying fiberoptic infrastructure, intellectual property, equipment and improvements, as a going

---

<sup>2</sup> See App. Pg. 2 TPU “Our Services” .

concern, for a period of up to 40 years, is of broad public import and requires prompt and ultimate determination.<sup>3</sup>

The City of Tacoma's municipal telecommunications system was constructed at public expense, costing over \$200 million in public utility funds, and includes 1,500 miles of fiberoptic and coaxial cable, situated in underground conduits and attached overhead to 10,000 telephone poles. The System passes 120,000 of TPU's customers' homes and business locations. TPU's website describes Click!'s as, "one of the largest municipally owned telecommunications systems in the country." <sup>4</sup>

The separation, transfer and disposal of the municipal telecommunications system, without the mandatory vote of the people, is being accomplished via the Click! Business Transaction Agreement ("CBTA"), which Tacoma City Council approved in November of 2019. Conveyance and transfer of operational control is expected to occur on April 1, 2020. The System's essential employees are generally being reassigned to other jobs within the City and the Utility.

The CBTA conveys to the buyer, a private company, all proprietary operational control and total authority over setting rates for the municipal utility's wholesale telecommunications services. The System's rates are currently set by City Council, in accordance with the Tacoma's Municipal

---

<sup>3</sup> RCW 43.330.530(3) "Broadband infrastructure" means networks of deployed telecommunications equipment and technologies necessary to provide high-speed internet access and other advanced telecommunications services to end users.

<sup>4</sup> RCW 43.330.530 (2) "Broadband" or "broadband service" means any service providing advanced telecommunications capability and internet access with transmission speeds that, at a minimum, provide twenty-five megabits per second download and three megabits per second upload.

Utility Code TMC Title 12. All public control and oversight of operations and rate setting for the System are separated under the terms of the CBTA.

Telecommunications is a utility. Chapter 35.94 RCW requires voter approval for disposal of a municipal utility works, plant, or system owned by it, or *any part thereof*, or any equipment or appurtenances. (emphasis added).<sup>5</sup>

Tacoma's City Charter 4.6 ("Charter") contains a similar directive, requiring approval by "a majority vote of the electors."

The City shall never sell, lease, or dispose of any utility system, or parts thereof essential to continued effective utility service, unless and until such disposal is approved by a majority vote of the electors voting thereon at a municipal election.

Tacoma City Council ("Council") circumvented the voter approval required under City and State law, by declaring the entire Telecommunication System "surplus" under RCW 35.94.040. This surplus declaration is an ultra vires application of the City's surplus authority.<sup>6</sup>

Council flaunts Article I, Section I of the Washington Constitution, which provides: "All political power is inherent in the people, and governments derive their just powers from the consent of the governed." Voters of Tacoma granted the City a privilege of operating the Department of Public Utilities;

---

<sup>5</sup> Railroads were the first regulated utility in Washington State, in 1905, under the Railroad Commission. Telecommunication was the second utility to be regulated, in 1909, also under the Railroad Commission See App. Pg. 20, Shook's MSJ.. As the modern extension of telegraph and telephone, Telecommunications has been regulated as a public utility since the Pacific Telegraph Act of 1860.

<sup>6</sup> See App. Pg. 30, Shook MSJ. "Legislative Intent of Surplus and Plain Language of Municipal Utility Surplus Clause."

but, they were not content to divest themselves of every managerial function normally associated with the operation of a business concern. By charter, the people retain express power over disposal of their proprietary interest in the community's municipal public utility property.

The people have reserved full power and exclusive authority to provide final approval over privatization of their telecommunications system. Council's role, essentially, is that of the people's trustee, limited to negotiating the CBTA agreement and then presenting the contract to voters for approval at the ballot—a mandatory step in the privatization process..

Chapter 35.94.040 RCW's statutory definition of surplus, as "not required for providing continued public utility service," was simply ignored—for Click! is being vested turnkey, as a going concern, and the System will continue providing the same proprietary telecommunications services, to the same utility customers, under the same brand, over the same infrastructure, only with a private company controlling rates and cashing customers' checks.

The utility System is not surplus. The System's assets and customers are simply "changing hands," lock, stock, barrel and brand. This state-of-the-art fiberoptic municipal utility system, delivering essential public utility telecommunications services, will continue providing the same services to the same loyal utility customers. Such a disposal does not reflect the Legislature's intent for "surplus." (*See App. Pg. 30, Shook's MSJ*)

In privatizing the community's pubic broadband system, essential assets are being separated. The "last mile infrastructure" is a single wire, a "data

pipeline,” to a customer’s home or business.<sup>7</sup> The “middle mile infrastructure,” of over 1,500 miles of fiber, cable, conduits, vaults, easements and equipment, is required for essential communication services.<sup>8 9</sup>

Recognizing the monopolistic nature of the industry, with huge fixed costs and barriers to entry, federal, state and local laws have fiercely protected consumers from anti-competitive consolidation of assets and ownership in the telecommunications industry for over 100 years.<sup>10</sup>

For over 20 years, the City has owned, operated and regulated Click! as a municipal-utility, establishing service levels, rates and even setting net neutrality policies. State laws and federal policies support and encourage such public, non-profit, “municipal” utility systems. Such utility systems now operate in Washington state, across the USA and around the world.<sup>11</sup>

For these reasons, Petitioner Shook respectfully requests that this Court grant Mr. Bowman’s request for accelerated disposition of this matter.

---

<sup>7</sup> RCW 43.330.530 (5) "Last mile infrastructure" means broadband infrastructure that serves as the final connection from a broadband service provider's network to the end-use customer's on-premises telecommunications equipment.

<sup>8</sup> RCW 43.330.530 (7) "Middle mile infrastructure" means broadband infrastructure that links a broadband service provider's core network infrastructure to last mile infrastructure.

<sup>9</sup> RCW 43.330.532 Findings: "The legislature finds that: (1) Access to broadband is critical to full participation in society and the modern economy"

<sup>10</sup> See 2015 Open Internet Order, 30 FCC Rcd at 5631, para. 81 n.134 (“data suggests that meaningful alternative broadband options may be largely unavailable to many Americans, further limiting the ability to switch providers. Based on the submissions from various commenters, it appears that between 65% and 70% of households have at most two options for high speed Internet access.”); see also 2010 Open Internet Order, 25 FCC Rcd at 17923, para. 32; Appendix C, Section II.A.1., Table 1 (showing that, nationwide, 97 percent of households have two or fewer providers of BIAS at download speeds of 25 Mbps).

<sup>11</sup> Tacoma Council even has its own bright-line (net neutrality) regulation.

Delay in resolution of this issue will indefinitely deprive affected constituents of their right to vote, result in the loss of institutional knowledge associated with Click! Network's terminated employees, and subject customers to suffer the potential monopolization of the public utility; In addition, pending lawsuits in state and federal courts contain virtually identical issues to this appeal, and accelerated review of this case will prevent inconsistent decisions at the trial court level and promote judicial efficiency.

For these reasons, Petitioner respectfully requests that this Court accelerate disposition of this matter.

## **II. IDENTITY OF THE PARTY**

This response is presented by one of the Appellants, Mitchell Shook.

## **III. STATEMENT OF RELIEF SOUGHT**

Appellant requests the Court grant Mr. Bowman's Motion to accelerate the disposition of this appeal pursuant to RAP 18.8 and 18.12.

## **IV. FACTS RELEVANT TO MOTION**

### **A. Establishment Of A Municipal Telecommunications System.**

In 1996, TPU commissioned a "Telecommunications Study."<sup>12</sup> The "study team" set out to determine if TPU might benefit from establishing "a modern telecommunications infrastructure." The study asked if the greater Tacoma area has the "telecommunications resources necessary for business that may want to locate in the area?" It even cited "telecommuting" and asked,

---

<sup>12</sup> For a detailed history, see App. Pg. 18-19, Shook's MSJ. "Creation of Municipal Utility's Telecommunication System and Service."

“How will the explosion in the Internet be handled?” The Study explained why the System would be built:<sup>13</sup>

One of the most significant ways a community and its *economic base* are intertwined is through an area's infrastructure, As a result, the evolution of a community's economy often depends upon the investments it makes in its transportation system, power system, and—given the *shift to the information age—its telecommunication system*, This study was therefore commissioned to investigate Tacoma's potential *economic futures* and the inter-relationship between its *economic development* and potential *telecommunication system investments*, (emphasis added).

In 1996 Council approved Ordinance 25930 establishing a “A SEPARATE SYSTEM.” Article II provided for: “Establishment Of The Telecommunications Project As A Separate System; And Adoption Of Plan And System”:<sup>14</sup>

Section 2.1. Establishment of **Telecommunication System**. The City hereby creates *a separate system* of the City's Light Division to be known as the telecommunications system (the "**Telecommunications System**"). The public interest, welfare, convenience and necessity require the creation of the **Telecommunications System**, contemplated by the plan adopted by Section 2.2 hereof, for the purposes set forth in **Exhibit A**. The City hereby covenants that all revenues received from the **Telecommunications System** shall be deposited into the Revenue Fund. (emphasis added).

“Exhibit A” of the Ordinance, included commercial broadband “Internet Access Service” and “high speed data” transport services.

In July of 1996, prior to funding construction of the System, the City sought declaratory judgement in Pierce County Superior Court to confirm

---

<sup>13</sup> See App. Pg. 129 – 132, Shook MSJ.

<sup>14</sup> See App. Pg. 13 -15 for discussion of Ordinance 25930, also the Ordinance itself on App. Pgs, 83-106 see App. Pg. 106. “Ex A “Telecommunications Project.”

authority for TPU to establish a municipal telecommunication utility system, funded by TPU bonds, to provide commercial telecommunications services.

In the City's November 1996 Memorandum In Support of Summary Judgment, the City cited RCW 35.96.030 as authority for municipal funding of the communication utility.<sup>15</sup> The City also cited authority for commercial telecommunications services in RCW 80.36.300 (5), to "Promote diversity in the supply of telecommunications services and products in telecommunications markets throughout the state."<sup>16</sup> The City's Memorandum also cited its statutory power to provide telecommunications utility services—as a first-class charter city with all powers not denied by law, "including operating and supplying of utilities and municipal services commonly or conveniently rendered by cities or towns." RCW 35A.11.020.<sup>17</sup>

The City prevailed and two Orders were issued by Pierce County Superior Court confirming TPU's authority to fund and operate the telecommunications utility.

City Council approved TPU's final plan for establishing the System in Resolution No. 33668.<sup>18</sup>

Click! became operational in 1998. Shortly thereafter, in April of 2000, Tacoma's Mayor, Professor Baarsma, and Dr. Singleton, of University of Puget Sound, authored a learned paper reviewing the creations of Click! Network. Their scholarly study, attached as App. Pgs. 134 - 138, is entitled "Creating Capacity And Competition In Broadband Telecommunications: The City Of Tacoma's

---

<sup>15</sup> App. Pgs. 146-150. The 1996 Memorandum In Support of City Of Tacoma's MSJ,

<sup>16</sup> App Pg. 148

<sup>17</sup> App. Pg. 148.

<sup>18</sup> App. Pg. 108 -109 the 1997 Resolution 33668.

Initiative.” This paper will provide an understanding of what Click! Network is, and why the community created it as a public utility. *see* App. Pgs. 51 -52 for Appellant Shook’s citations from that study, as presented in a previous brief.

This study cites the community’s need for an advanced telecommunications system with broadband capability and why it was viewed as essential. The project brought benefits in revenue diversification and economic growth, which, in turn, increased revenue from additional sales of TPU’s other utilities, water and power.<sup>19</sup>

#### **B. Disposal of City’s Municipal Telecommunication System.**

In the process leading up to pending privatization of Click! Network, there has been no appraisal of the System’s market value. There has also been no audit of the System’s profitability as a commercial enterprise. There was never a Request for Proposal (“RFP”) or any bidding for the System’s “surplus” assets. The entire privatization process has occurred in backrooms, out of the public eye, with the terms for privatization, including the vast assets that would be vested, which include valuable IP addresses and all available dark fiber, being made known only to the private company, Rainier Connect.

Appellant Bowman’s Motion correctly identifies most of the elements that create urgency for accelerated review. However, one issue Bowman fails to cite is the potential monopolization of the System by the private acquirer.

Click! is currently operated as an “Open Access” system, with TPU providing standardized wholesale rates and “packages” to the competing Internet Service Providers (“ISPs”). The ISPs then compete by reselling those

---

<sup>19</sup> App. Pgs. 134 - 138, Dr. Baarsma’s Study of Click! creation.

broadband packages to retail customers over the System. Since authority over the System is being vested in one of these ISPs, the private buyer Rainier Connect, it will allow Rainier Connect to destroy its competitor, Advanced Stream. Advanced Stream is Rainier’s only remaining competitor on the System. Rainier Connect has already acquired the other two ISPs. This conveyance will potentially facilitate a monopolization of Tacoma’s public broadband services over the municipal telecommunications system.<sup>20</sup> While the CBTA requires Rainier Connect to continue operating the system under open access policies, the definition of open access is left to Rainier Connect’s interpretation of those terms. While the outcome is not clear, Rainier Connect may attempt monopolization of the system on April 1, 2020.<sup>21</sup>

### **C. Legal Issues and Procedural History**

Appellant Shook agrees with the Appellant Bowman’s presentation of the legal issues and procedural history.

## **V. GROUNDS FOR RELIEF AND ARGUMENT**

Appellant Shook supports Appellant Bowman’s motion and agrees that RAP 18.12 provides the Court authority to “set any review proceeding for accelerated disposition.” Appellant Bowman is especially correct to cite

---

<sup>20</sup> The ISP Advanced Stream is a company owned by Appellant Mr. Shook. Advanced Stream provides ISP services, including VoIP and Email service, to over 9,000 customers and has operated on the System for over 20 years.

<sup>21</sup> See App. Pg. 154, City of Tacoma “Notice” to Advanced Stream customers, also App. Pg. 152, Rainier Connect’s mailers to the same customers advertising “no waiting for the “Cable Guy”—which is possible since Advanced Stream’s customers are on the same System (no truck roll or visit from the Cable Guy is required. The Advanced Stream customers are being switched over to Rainier Connect with a simple phone call under this promotion. If Rainier Connect’s first act, in assuming operational control, is to destroy its only competitor and monopolize the System, this does not portend well for the future.

RAP 18.8(a), for this case is a time “when it is necessary for the court to act swiftly, particularly in matters relating to affairs of the state or local government, or when irreparable harm to a party would result from delay.” *See* 3 Wash. Prac., Rules Practice, RAP 18.12 (7th ed.).

Privatization of a municipal utility system, in violation of the public’s right to vote, is appropriately accelerated for prompt and expeditious review.

There can be no doubt that Click! is a telecommunications system. By definition of RCW 80.04.010 (27): A "Telecommunications Company" is “every city or town owning, operating or managing any facilities used to provide telecommunications for hire, sale, or resale to the public”. *See* RCW 80.04.010 (28). As a municipal utility, the System is protected from privatization by the public vote requirements of RCW 35.94.020.

Justice delayed is justice denied. A review on standard appellate timelines will be harmful and: (1) deny the electorate their right to vote for an indefinite time and potentially render Appellant’s claims for injunctive relief moot; (2) create a risk of monopolization over the System by Rainier Connect; (3) result in loss of institutional knowledge in the operation of Click! from the termination and loss of the System’s municipal employees; (4) result in disclosure of confidential customer account information to a private party; (5) increase risk of inconsistent decisions and/or delay in similar ongoing lawsuits in state and federal court. For these reasons accelerated review should be granted. RAP 18.12.

**A. Accelerated Review is Necessary Because Transfer Operational Control Over the System Deprives the Electorate from Exercising Their Right to Vote for an Indefinite Time.**

Voters have a right to approve execution of conveyance of their public telecommunication utility system under RCW 35.94 and City Charter § 4.6. The City refuses to hold a municipal election, and intends to execute the CBTA imminently—on April 1, 2020. The City’s actions compel expedited review of Appellant’s claims.

Accelerated review is necessary to resolve the question of whether Respondent is depriving residents of the City their right to vote on the privatization of Click!. City’s actions will violate voters’ fundamental rights for an extended period of time. This is an important public policy question, with over 200,000 people living and reside in the City, Washington’s third largest, and tens of thousands of residents’ voting rights would be compromised by a delay of the right to vote during the appellate process.

Privatization will remove all rate control over wholesale broadband internet and telecommunications services. Such rates are now set by City Council under the City’s municipal utility code. Vesting such authority for setting rates solely in a private company would damage each interested voter in the City for the duration of appellate review.

Thus, consistent with other appeals regarding the public’s right to vote, accelerated review should be granted. *See In re February 14, 2017, Special Election on Moses Lake School District No. 161 Proposition 1, 2 Wn. App. 2d 689, 413 P.3d 577 (2018)* (accelerating review on whether constituents were denied opportunity to vote to approve a school district bond); *see also Global Neighborhood v. Respect Washington, 7 Wn. App.2d 354, 385, 434 P.3d 1024 (2019)*.

**B. Terminating Click! Employees Will Result in the Loss of Institutional Knowledge. Time is Of The Essence.**

If Appellant prevails, the CBTA will be void. Without accelerated review it becomes more difficult if for the City to recover previously terminated employees necessary for the operation of Click!. As a result, accelerated review is warranted. RAP 18.12. Click! is a technically complex system, with equipment such as core routers, provisioning systems, DNS servers, DHCP servers, switches, gateways, hubs, nodes, and many other plant assets. The institutional knowledge of Click! employees is essential to operating the system. Click! employees may more easily return after only a few months, rather than a longer period—if this Court were to ultimately rule in the Appellant’s favor on the traditional timeline. Thus, accelerated review should be granted to resolve the issues in this appeal.

**C. Destruction of Competition May Occur With Additional Loss Of Institutional Knowledge Held By Other ISP, Advanced Stream.**

Click! operates as an “Open Access” system, with TPU providing standardized wholesale rates and “packages” to two competing Internet Service Providers (“ISPs”), Rainier Connect and Advanced Stream.

These ISPs now compete on a level playing field, reselling Click!’s broadband “packages” to retail customers over the System. With authority over the System vested in Rainier Connect, Advanced Stream—Rainier’s only competitor on the System—could be ruined. A destruction of Advanced Stream would result in a loss of the support services to Advanced Stream’s

# About Click!

## Company

Click! Network is an operating section of Tacoma Power and a multi-service broadband telecommunications provider within the electric company's service area.

## Vision

**To be known for excellence in:**

- People – professionals committed to the highest level of customer service and satisfaction, who create and maintain a team environment in which trust, respect, honesty and dignity are valued.
- Products and services – specifically designed to meet and exceed our customer needs through innovative uses of technology.
- Performance – a technically superior network designed and maintained to serve both current and future telecommunications needs of Tacoma Power and of Click! Network customers.

## Mission

To develop and deliver to all Tacoma Power customers innovative products and services made possible by the convergence of telecommunications and electric technologies.

## Ownership

Click! Network is one of the largest municipally-owned telecommunications systems in the country and part of the City of Tacoma's Department of Public Utilities.

# Internet Service Providers

Click! operates an Open Access Network, which is a different business model than traditional telecommunications providers. In an open-access network there is a network owner and operator, and multiple retail service providers that deliver services over the network.

## Click! Powered Internet Gives You

KEVIN STOCK  
COUNTY CLERK  
NO: 19-2-11506-3

The Honorable Judge Shelly K. Speir  
Hearing Date: January 10, 2019  
Oral Argument Requested

**IN THE SUPERIOR COURT OF PIERCE COUNTY  
OF THE STATE OF WASHINGTON**

DARREL BOWMAN,

Plaintiff,

v.

CITY OF TACOMA,

Defendant.

**NO. 19-2-11506-3**

**PLAINTIFF MITCHELL SHOOK'S  
MOTION FOR PARTIAL SUMMARY  
JUDGMENT**

MITCHELL SHOOK,  
Plaintiff Pro Se,

v.

CITY OF TACOMA,

Defendant.

**I. Nature of The Action and Summary of Argument**

This lawsuit is about privatization of Click! Network ("Click!"), Tacoma Public Utilities' fiber-optic municipal telecommunications system, without voter approval, as explicitly required by state law and Tacoma's City Charter. Privatization conveys the municipal utility's entire

1 public broadband infrastructure and enterprise, as a going concern, including all proprietary  
2 operational control and authority over the municipal utility's rate setting functions.<sup>1</sup>

3 Click! (the "System") is an advanced telecommunication system, owned and operated by  
4 Tacoma Public Utilities ("TPU"), serving over 35,000 active utility customer accounts. The  
5 System's revenues exceeded \$25 million in 2018. (Shook Decl. 10/30/19 Ex. 9).

6 TPU's website describes Click!'s commercial telecommunications operations as, "one of the  
7 largest municipally owned telecommunications systems in the country and part of the City of  
8 Tacoma's Department of Public Utilities" (Shook Decl. 10/30/19 Ex. 1, Pg. 5).<sup>2</sup>

9 Article I, Section I of the Washington Constitution provides: "All political power is inherent  
10 in the people, and governments derive their just powers from the consent of the governed."

11 The people have reserved full power and exclusive authority to provide final approval over  
12 privatization of their telecommunications system. Council's role, essentially, is that of the  
13 people's trustee, limited to negotiating the agreement and presenting the contract to voters.

14 Chapter 35.94 RCW requires voter approval for disposal of any public utility works, plant,  
15 or system owned by it or any part thereof, or any equipment or appurtenances.

16 Tacoma's City Charter's ("Charter" or "the Charter") contains a similar directive, requiring  
17 approval by "a majority vote of the electors." (Shook Decl. 10/30/19 Ex. 5).

18 The City shall never sell, lease, or dispose of any utility system, or parts thereof  
19 essential to continued effective utility service, unless and until such disposal is  
20 approved by a majority vote of the electors voting thereon at a municipal election.

21 The City has circumvented the voter approval process and declared Click!'s entire system  
22 "surplus," under RCW 35.94.040. Tacoma City Council ("Council" or "City") approved a  
23 Declaration of Surplus Property ("DSP") and conveyance of ownership and control is set to  
24 occur in March of 2020. (Shook Decl 10/30/19 Ex. 2).

25 The City also approved the "Click! Business Transaction Agreement" ("CBTA"), privatizing  
26 Click!'s enterprise and conveying the utilities' customer accounts, Mr. Shook's home services  
included. All public control over operation and rate setting for the System is lost for 40 years.

<sup>1</sup> RCW 43.330.530(3) "Broadband infrastructure" means networks of deployed telecommunications equipment and technologies necessary to provide high-speed internet access and other advanced telecommunications services to end users.

<sup>2</sup> RCW 43.330.530 (2) "Broadband" or "broadband service" means any service providing advanced telecommunications capability and internet access with transmission speeds that, at a minimum, provide twenty-five megabits per second download and three megabits per second upload.

1 Ironically, the City acknowledges lack of authority for disposal absent voter approval. The  
2 City has admitted voters alone are vested with express power to approve separation of the  
3 municipal utility's public broadband enterprise. (Shook Decl. 12/12/19 Ex. 32, Pg. 1, Ln 20)

4 Despite knowing<sup>3</sup> it lacked authority, the City nevertheless abrogated voters' rights, with an  
5 ultra vires declaration of surplus designed to circumvent the requirements of Chapter 35.94 RCW  
6 and Charter Section 4.6. (Shook Decl. 12/12/19 Ex. 32, Pg. 1, "Whereas 4.6 Requires a vote. . "

7 The statutory definition of surplus, as "not required for providing continued public utility  
8 service," was simply ignored. Vested turnkey, as a going concern, Click! will continue providing  
9 the same proprietary services, to the same utility customers, under the same brand, over the same  
10 infrastructure, only with a private company controlling rates and cashing customers' checks.<sup>4 5</sup>

11 The utility System is not surplus. The System's assets, trademarks and customers are simply  
12 "changing hands," lock, stock, barrel and brand. A state-of-the-art fiber optic municipal utility  
13 system, delivering essential public utility services, continuing to providing the same services to  
14 the same loyal utility customers, does not reflect the Legislature's intent for "surplus."<sup>6</sup>

15 Voters of Tacoma granted the City a privilege of operating the Department of Public  
16 Utilities, they were not content to divest themselves of every managerial function normally  
17 associated with the operation of a business concern. By charter, the people retain express power  
18 over disposal of their proprietary interest in the community's municipal public utility property.

19 Disposal of Click!'s equipment, infrastructure and enterprise, all acquired for the purpose of  
20 providing telecommunication services, and required for continuing those same services, violates  
21 section Charter 4.6. Such a sale is ultra vires and void, unless approved by the voters.

22 In privatizing the community's public broadband system, essential assets are separated,  
23 including "last mile infrastructure," that single wire or "data pipeline" to a customer's home or  
24 business,<sup>7</sup> and the public's "middle mile infrastructure," of over 1,500 miles of fiber, cable,

25 <sup>3</sup> "Knowingly" is a statutorily defined term. RCW 9A.08.010(1)(b)(i) states a person "acts knowingly . . .  
26 when . . . he [or she] is aware of a fact, facts, or circumstances

<sup>4</sup> A buyer that is one of the mayor's largest campaign contributors!~ Shook Decl. 12/12/19, Ex. 47, Pg. 6.

<sup>5</sup> The Business Transaction Agreement provides "WHEREAS, the Parties have mutually agreed to  
cooperate to ensure a smooth and seamless transition of the Click! Business." Shook Decl. 11/1/19 Pg. 6

<sup>6</sup> The transaction includes use of the Click! trademark and brand name. Shook Decl. 10/30/19 Ex. 2.

<sup>7</sup> (5) "Last mile infrastructure" means broadband infrastructure that serves as the final connection from a  
broadband service provider's network to the end-use customer's on-premises telecommunications  
equipment.

1 conduits, vaults, easements and equipment, all required for accessing the services and  
2 applications critical for modern society.<sup>8 9</sup>

3 Recognizing the monopolistic nature of the industry, with huge fixed costs and barriers to  
4 entry, federal, state and local laws have fiercely protected consumers from anti-competitive  
5 consolidation of assets and ownership in the telecommunications industry for over 100 years.<sup>10</sup>

6 For over 20 years, the City has owned, operated and regulated Click! as a municipal-utility,  
7 establishing service levels, rates and even setting net neutrality policies. State laws and federal  
8 policies support and encourage such public, non-profit, "municipal" utility systems. Many such  
9 systems operate in Washington, across the USA and around the world.<sup>11</sup>

10 As the modern extension of telegraph and telephone, Click! is a utility system.  
11 Telecommunications has been a public utility since the Pacific Telegraph Act of 1860.<sup>12</sup>

12 No material issues of fact exist. This matter is properly resolved on summary judgment.<sup>13</sup>

## 13 **II. Relief Requested and Statement of the Issue**

14 This motion seeks partial summary judgment for declaratory relief, pursuant to CR 54(b).  
15 Plaintiff asks the Court to rule, as a matter of law, on the following questions:

16 1. Are telecommunication assets of a municipal utility governed by Chapter 35.94 RCW or  
17 Tacoma City Charter 4.6 ?

18 2. Does a surplus resolution facilitating privatization of an operational municipal utility  
19 telecommunication enterprise defeat the legislative intent for "surplus" in RCW 35.94.040, when  
20 the enterprise and its assets continue providing the same telecommunication services, to the same  
21 public utility customers, post-privatization?

22 <sup>8</sup> (7) "Middle mile infrastructure" means broadband infrastructure that links a broadband service  
23 provider's core network infrastructure to last mile infrastructure.

24 <sup>9</sup> RCW 43.330.532 Findings: "The legislature finds that: (1) Access to broadband is critical to full  
25 participation in society and the modern economy"

26 <sup>10</sup> See 2015 Open Internet Order, 30 FCC Rcd at 5631, para. 81 n.134 ("data suggests that meaningful  
alternative broadband options may be largely unavailable to many Americans, further limiting the ability  
to switch providers. Based on the submissions from various commenters, it appears that between 65% and  
70% of households have at most two options for high speed Internet access."); see also 2010 Open  
Internet Order, 25 FCC Rcd at 17923, para. 32; Appendix C, Section II.A.1., Table 1 (showing that,  
nationwide, 97 percent of households have two or fewer providers of BIAS at download speeds of 25  
Mbps).

<sup>11</sup> Council even has its own bright-line (net neutrality) regulation. Shook Decl. 12/12/19 Ex. 34

<sup>12</sup> Regulation over such communication was transferred from the Interstate Commerce Commission to  
Federal Communications Commission in 1934, 47 U.S. Code § 151, § 601.

<sup>13</sup> Affirmation of electorates' right to vote is curative of all ills and eliminates unnecessary litigation.

1 3. When the legislative authority of a city deems it advisable to lease, sell or dispose of a  
2 municipal utility’s operational telecommunications enterprise and system, or useful and  
3 functional in-service equipment, appurtenances, betterments and essential parts thereof, does  
4 RCW 35.94.020 or Charter 4.6 require voter approval of the proposed transaction?

5 **III. Background Facts**

6 The following facts are in the declarations of Plaintiff, Mitchell Shook (“Mr. Shook”), a  
7 taxpayer of the City, ratepayer of TPU and Click! customer, with standing to bring this action.

8 **A. Tacoma Public Utilities Ownership and Creation of Click! Network**

9 The Department of Public Utilities was established under City Charter (“Charter”) Section  
10 4.1. TPU is one of the largest municipally owned utilities in the Pacific Northwest.<sup>14 15</sup>

11 The Utility provides four distinct public services; water, power, rail and telecommunications  
12 under four brand names: Tacoma Water, Tacoma Power, Tacoma Rail and Click! Network.

13 TPU’s website prominently displays Click! as one of “Our Services: Power, Water, Rail,  
14 Click!.” *see* Shook Decl. 10/30/19, Ex. 1, Pg. 7 -about TPU.

15 Owned and operated by TPU, Click! is an “advanced telecommunication system,” delivering  
16 commercial services under its own organizational structure, to approximately 35,000 TPU  
17 customer accounts. The System’s services were launched in 1998.<sup>16</sup>

18 Click!’s state-of-the-art, carrier-grade, telecommunications system, delivers Gigabit speed  
19 BIAS, (“Broadband Internet Access Service”) over Fiber To The Home (“FTTH”) technology,  
20 VoIP prioritized DOCSIS 3.1 cable modem service, commercial “Metro Ethernet” data-transport  
21 services and cable television to customers in the in Tacoma, Fircrest, Fife, University Place,  
22 Lakewood and unincorporated Pierce County.<sup>17 18</sup>

23 The System passes 66% of the homes in Tacoma Power’s service area with 1,500 miles of fiber  
24 and cable plant.<sup>19</sup> The City describes Click! as: “This state-of-the-art technology for modern  
25 network architecture enables reliable and cost-efficient delivery of Gigabit internet services”.<sup>20</sup>

26 <sup>14</sup> Shook Decl. 10/30/19, Ex. 5.

<sup>15</sup> Official Statement: City of Tacoma Series 2017 Electric System Revenue Bond, p.1.

<sup>16</sup> “Broadband” is defined as “advanced telecommunications services” by RCW 54.16.420.

<sup>17</sup> TPU Annual Report p. 26 (Shook Decl. 12/12/19, Ex. 48, Also shows continues investment.

<sup>18</sup> Defendant’s Answer ¶23, admits point-to-point metro Ethernet broadband services.

<sup>19</sup> Defendant’s Answer ¶19. Pg. 4. Total mileage, admits 1,800.

<sup>20</sup> Admitted in Defendant’s Answer, Pg. 5, ¶22. Shook Decl. 10/30/19, Ex. 7 Click! Network 2018 Cable TV Annual Report -Pam Burgess to Jeff Leuders 2/28/19. See Shook Decl. 12/12/19, Ex. 57 for FTTH.

1 Like the City’s water and power utilities, Click!’s rates are set by Council and published under  
2 Title 12, the “Utilities” section of the Tacoma Municipal Code. Charter 4.3 allows Council to  
3 “revise such rates and charges as it may deem advisable for supplying such utility services.”<sup>21</sup>

4 Revenues and expenses for the System are accounted for separately, from other TPU  
5 operations, and appear as “Telecommunications” on TPU financial statements.

6 **B. Purpose in Creation of Click! Network -The Community’s Need For Broadband.**

7 In 1996, TPU commissioned a “Telecommunications Study.” The “study team” set out to  
8 determine if TPU might benefit from establishing “a modern telecommunications infrastructure.”  
9 The study asked if the greater Tacoma area has the “telecommunications resources necessary for  
10 business that may want to locate in the area?” It even cited “telecommuting” and asked, “How  
11 will the explosion in the Internet be handled?” Shook Decl 10/30/19 Ex. 10, Pg. 92 of 389.<sup>22</sup>

12 The Study explained why the System would be built:

13 One of the most significant ways a community and its *economic base* are intertwined is  
14 through an area's infrastructure, As a result, the evolution of a community's economy  
15 often depends upon the investments it makes in its transportation system, power  
16 system, and-given the *shift to the information age-its telecommunication system*, This  
17 study was therefore commissioned to investigate Tacoma's potential *economic futures*  
18 and the inter-relationship between its *economic development* and potential  
19 *telecommunication system investments*, (emphasis added).<sup>23</sup>

20 A “Telecommunications Business Plan” was part of the study and proposed:

21 Three types of **telecommunications services** would be offered by Tacoma City Light  
22 - wholesale high-speed telephony and **data transport, Internet data transport**, and  
23 cable television. Each of these services meet the **growing telecommunications needs**  
24 in the greater Tacoma area. . . . (emphasis added)

25 The conclusion lamented, “one could hope *that other companies would step forward.*”<sup>24</sup>

26 [T]he local market has a *growing need for better telecommunications access*. Despite  
growing local demand, the incumbent wire line service providers have stated that their  
investments in the local infrastructure will either slow without significant rate  
increases or be halted all together. *One could hope that other companies would step  
forward* and create a modem telecommunications system through out (*sic*) our  
community *but the prospects for that occurring appear dim.* (emphasis added)<sup>25</sup>

On June 21, 1996, TPU issued a “Request for Ordinance or Resolution” seeking to:

<sup>21</sup> Defendant’s Answer, Pg. 4, ¶21 -City Council approve rates. *Also see* Shook Decl. 10/30/19, Ex. 8.

<sup>22</sup> The Purpose and Conclusion is at Shook Decl. 12/12/19, Ex. 50.

<sup>23</sup> Shook Decl. 10/30/19, Ex. 10, at Pg. 142 of 398 in PDF.

<sup>24</sup> Local Telecommunications Business Plan. Shook Decl. 10/30/19. Ex. 10, at Pg. 142 of 398

<sup>25</sup> Shook Decl. 10/30/19, Ex. 10, at Pg. 186 of 398 in PDF.

1 Authorize a Bond Ordinance for City of Tacoma, Washington, Department of Public  
2 Utilities, Light Division to clarify its legal authority to develop telecommunication  
capacity for . . . certain telecommunications services,<sup>26</sup>

3 On June 26, 1996, the Board approved funding the telecommunication business plan.<sup>27</sup> On July  
4 23,1996, Council approved Ordinance 25930 establishing a “A SEPARATE SYSTEM.”  
5 Ordinance 25930 included Article II: “Establishment Of The Telecommunications Project As A  
6 Separate System; And Adoption Of Plan And System”:<sup>28</sup>

7 Section 2.1. Establishment of **Telecommunication System**. The City hereby creates *a*  
8 *separate system* of the City's Light Division to be known as the telecommunications  
9 system (the "**Telecommunications System**"). The public interest, welfare, convenience  
10 and necessity require the creation of the **Telecommunications System**, contemplated by  
11 the plan adopted by Section 2.2 hereof, for the purposes set forth in Exhibit A. The City  
hereby covenants that all revenues received from the **Telecommunications System**  
shall be deposited into the Revenue Fund. (emphasis added).

12 This “Exhibit A” of the Ordinance, included commercial broadband “Internet Access Service”  
13 and “high speed data” transport services.

14 **C. Summary Judgements Confirmed Authority to Establish Telecommunication System.**

15 In July of 1996, prior to funding construction of the System, the City sought declaratory  
16 judgement in Pierce County Superior Court to confirm authority for TPU to establish a  
17 telecommunication system to provide commercial telecommunications services. Two Orders  
were issued, confirming TPU’s authority to do so.<sup>29 30</sup>

18 In the City’s November 1996 Memorandum In Support of Summary Judgment”, the City  
19 cited RCW 35.96.030, which provides authority for municipal funding of communication utilities,  
20 as authority for the City’s proposed municipal utility telecommunication system.

21 In creating Click!, the City also cited authority for commercial BIAS services in the policy  
22 statement of RCW 80.36.300 (5), to “Promote diversity in the supply of telecommunications  
23 services and products in telecommunications markets throughout the state.”

24 <sup>26</sup> Signed by Superintendent Klein Shook Decl. 10/30/19, Ex. 11, Pg. 28, at 224 of 389 in PDF.

25 <sup>27</sup> Resolution U-9198. Shook Decl. 10/30/19 Ex. 11, Pg. 31 or Pg. 227 of 389 total pages in PDF.

26 <sup>28</sup> See Ordinance 25930 Shook Decl. 10/30/19, Ex. 11, Pg. 197 of 389 A “Separate System.”

<sup>29</sup> The 12/13/96 Order determined Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.  
The 5/9/97 Order approved authority to fund the System and carry out the business plan for offering  
wholesale telecommunication service, including retail cable tv services. Shook Decl. 10/30/19 Ex. 12, 13.

<sup>30</sup> The 5/20/97 Request for Ordinance stated: “Authorize the development of a broad band  
telecommunications network to improve electric utility service and improve the telecommunications  
infrastructure available to the community. This would include the business plan for a broad band  
telecommunications system and the implementation of the telecommunications system.

1 On March 20, 1997, in support of Res# 33668 to establish the System, TPU Director Mark  
2 Crisson wrote Council, outlining the System’s goals, saying the “Telecommunications System”  
3 would "Provide additional revenue to the Light Division and General Government through  
4 expansion of the market for telecommunications services.”<sup>31</sup>

5 "Significantly enhances regional economic development and quality of life by creating  
6 state-of-the-art telecommunications infrastructure and providing it to all businesses and  
7 residences throughout the community."

8 On April 8, 1997, Council approved Res. 33668. The Board followed with Resolution U-  
9 9258, finding provision of broadband Internet to be “prudent and economical,” stating:

10 WHEREAS the Light Division has retained consultants to review and analyze the  
11 feasibility of a **broad band telecommunications systems** for the Light Division's  
12 service area, and a **business plan** has been prepared for this purpose.

13 WHEREAS, the Public Utility Board hereby finds and determines that the Light  
14 Division's proposal for a **broad band telecommunications system** is in the best  
15 interests of the City, **will serve as a public purpose**, and should be approved.

16 BE IT RESOLVED BY THE PUBLIC UTILITY BOARD.

17 That the Board hereby **approves the Light Division's proposal** including the  
18 Business Plan for a **broad band telecommunications system**, and the Board  
19 recommends that the City Council approve a resolution to authorize the Light  
20 Division to proceed to implement said proposal for a **broad band  
21 telecommunications system..** (emphasis added). (Shook Decl. 12/12/19, Ex. 75)

22 Resolution 33668 identified other “utility purposes,” or benefits, that would be accomplished  
23 by creating Click!’s broadband system. These included revenue diversification and economic  
24 development, both having an important “nexus” to Tacoma Power’s role of producing energy.<sup>32</sup>

25 One year later, as the project gained national attention, TPU Director Mark Crisson proudly  
26 wrote the Tacoma City Manager, and forwarded a national news article and stating:

“MSNBC has written a very informative piece about Tacoma Power's Click! Network.  
It was written complete with slides of our work in progress. I know the City Council,  
as well as the Board, will be proud of this national coverage.”<sup>33</sup>

**D. Click! Network’s Commercial Telecommunication System and Operations Today**

In 2018 Click!’s total revenue exceeded \$25 Million. In August 2019, Click!’s monthly  
sales were \$2,116,912, with a \$40,070 profit after all allocations, taxes and depreciation.<sup>34</sup>

<sup>31</sup> Shook Decl. 10/30/19, Ex. 10, Pg. 4. (or Pg. 50, of 389 in PDF).

<sup>32</sup> Shook Decl. 12/12/19, Ex. 75. See first “Whereas” in Amended Resolution U-9258.

<sup>33</sup> Shook Decl. 10/30/19, Ex. 14 Pg.2 -Importantly, see the quote on Pg. 6: “The system is not being built  
as a cable system. We have got a multilayered business model.” - Deb Stewart Click Network.

<sup>34</sup> Shook Decl. 10/30/19, Ex. 9, Tacoma Power Statement 12/31/18, Click! Operational Summary 8/19

1 Click! is an FCC registered telecommunications provider, with Federal Registration Number  
2 (“FRN”) FRN 0007466642,<sup>35</sup> filing Form 499 and Form 477,<sup>36</sup> and publishing a “Transparency  
3 Disclosure,” as mandated by the FCC.<sup>37</sup> Click! provides gigabit data “*transport only*” services  
4 to the Tacoma City Library System and files FCC Form 471, allowing libraries participate in the  
5 Universal Service Administrative Company (“USAC”) “E-rate Program.” Click!’s USAC  
6 Service Provider Number (“SPN”) is SPN 143035981.<sup>38</sup> See Shook Decl. 12/12/19 Ex. 64.

7 Click! enters into “Master Service Agreements” (“MSA”) to install “dedicated transport  
8 services” over the System’s municipal “communications facilities,” often in large commercial  
9 buildings. Examples, including CenturyTel’s, are provided in Shook Decl. 12/12/19, Ex. 62.

10 “Telecommunications Installation and Service Agreements,” with multifamily dwellings,  
11 allow installation of “Telecommunications System” for providing “telecommunication services.”

12 Owner grants Click! the right to enter and access the Premises for the **purpose of**  
13 **installing telecommunications facilities** in, at and upon the Premises including, but not  
14 limited to, all wiring, cables, conduits, electronic and other equipment, antennae,  
15 switches, amplifiers, filters, traps, signal receiving/scrambling/decoding equipment, key  
16 lock box(es) and key(s), and any additional equipment that may be requested for  
17 provision of . . .telecommunication services at the Premises (“Facilities” and collectively  
18 “**Telecommunication System**”). (emphasis added) (Shook Decl.10/30/19, Ex. 17).

19 Click! holds a Franchise Agreements for Pierce County and the Cities of Tacoma, Fife,  
20 Lakewood, Fircrest, University Place and Puyallup. (Shook Decl. 12/12/19, Ex. 30).

21 Click!’s Pierce County “Telecommunications Franchise” is Ordinance No. 2004-43:  
22 Telecommunication Franchise To The City Of Tacoma, . . . Light Division, For A  
23 Telecommunications Network In Pierce County To Be In The Public Interest;

24 The Puyallup Telecommunications Ordinance grants City of Tacoma rights:

25 To Construct, Maintain, Operate, Replace And Repair A Telecommunications  
26 Network, In, Across, Over, Along, Under, Designated Public Rights-Of-Way.<sup>39</sup>

27 **E. Planned Conveyance of Click! Network’s Commercial Telecommunication System.**

28 On Nov. 5, 2019, Council approved the CBTA and Indefeasible Right of Use (“IRU”)

29 <sup>35</sup> Click! Network Disclosure and FRN, *se*, Pg. 283/389 of PDF.

30 <sup>36</sup> Shook Decl. 10/30/19, Ex. 15 All facilities-based providers are required to file data with the FCC twice  
a year (Form 477) on where they offer Internet access service at speeds exceeding 200 kbps in at least one  
direction. See Who Files What: *available at* <https://www.fcc.gov/general/broadband-deployment-data-fcc-form-477>

31 <sup>37</sup> Click! FCC Form 477 *see* Shook Decl 10/30/19 Ex. 15, *also available at* <https://perma.cc/9T9T-L4FL>

32 <sup>38</sup> Shook Decl. 10/30/19 Ex. 15, Pg. 7, Library Funding info *at* <https://www.usac.org/sl/default.aspx>

33 <sup>39</sup> Shook Decl. 12/??/2019 Ex. 79

1 agreement (the “Agreements”) to privatize Click! by transferring ownership and operations of the  
2 enterprise to Rainier Connect, a private company.<sup>40</sup> *see* Shook Decl. 12/12/19 Ex. 39.

3 Privatization transfers an active, in-service, municipal utility enterprise. It vests all proprietary  
4 operational interests in the System. Assets essential for continued provision of BIAS services to  
5 TPU’s customers would be separated and conveyed for up to 40 years.

6 All franchises agreements, contracts, warranties, operating rights, active customer account  
7 information, billing and bank payment details would be vested. All electronic equipment, software,  
8 provisioning systems, DNS servers, DHCP servers,<sup>41</sup> Caching servers, routers, hubs, nodes,  
9 trademarks, IP addresses, head end equipment, customer premise equipment, trucks, brand name,  
10 other critical assets and infrastructure are included. (Shook Decl. 11/1/19, Pg. 12)

11 It is undisputed that privatization removes all Council control over the System’s rates going  
12 forward, leaving the System’s customers without protection from future rate increases.

#### 12 IV. Argument

13 This motion is based on the pleadings, declarations and evidence filed under this cause.

14 **Summary Judgement Standard:** With only questions of law, summary judgment is appropriate  
15 under CR 56(b). When moving party shows “no issue as to a material fact,” *Scott v. Pacific West*  
16 *Mountain Resort*, 119 Wn.2d 484, 502-03 (1992), “the burden shifts to the non-moving party” to  
17 establish facts to be proven at trial. *Young v. Key Pharmaceuticals, Inc.*, 112 Wn.2d 216, 225  
18 (1989). The non-moving party must offer specific facts, not bare allegations. *Baldwin v. Sisters*  
19 *of Providence*, 112 Wn. 2d 127, 132 (1989). Conclusory assertions do not preclude summary  
20 judgment. *Grimwood v. University of Puget Sound, Inc.*, 110 Wn. 2d 355, 359-60 (1988).

#### 21 A. Click! is A Municipal Utility System Providing Municipal Utility Service.

22 By resorting to RCW 35.95.040, to surplus Click!, the City admits the System is a municipal  
23 utility, regulated by Chapter 35.94. The plain meaning of the terms “utility” and “system” seem  
24 obvious; but, if further definition is desired, courts may “look to standard English language  
25 dictionaries.” *North Pacific Ins. Co. v. Christensen*, 143 Wn.2d 43, 48, 17 P.3d 596 (2001)

26 \_\_\_\_\_  
<sup>40</sup> Ironically, to say the least, Rainier opposed Click!’s creation in 1996. Shook Decl. 12/12/19 Ex. 47.  
Also, a hearing on an Ordinance to convey the Click! Franchise Agreement was held on 12/10/19. Shook  
Decl. 12/12/19, Ex. 63

<sup>41</sup> DNS is Domain Name Service and Domain Name Servers, DHCP, Dynamic Host Configuration  
Protocol) The automatic assigning of IP addresses

1 Black's Law Dictionary's defines "*public utility*" as, "a company that provides necessary  
2 services to the public, such as telephone lines and service, electricity and water."<sup>42 43</sup>

3 Merriam Webster provides, "*system*" is "a regularly interacting or interdependent group of  
4 items forming a unified whole." Click! assets, represented by over 2000 pages in the CBTA and  
5 IRU Agreements,<sup>44</sup> constitute a telecommunication system. Click! is a "Public Utility System."

6 U.S. Code and Washington State statutory definitions confirm Click! is a municipal "utility"  
7 The 1996 Telecommunications Act provides, at 47 USC § 224(a)(1): "Utility."

8 The term "utility" means any person who is a local exchange carrier or an electric,  
9 gas, water, steam, or other public utility, and who owns, or controls poles, ducts,  
10 conduits, or rights-of-way used, in whole or in part, for any wire communications.

11 Our State Supreme Court's defines "public utility" as a service that will "subserve a *public*  
12 *use*." Also, "The crucial and final test is, does the use--utility--subserve a public purpose; does it  
13 furnish a natural need of the city or its citizens; does it contribute to his comfort, prosperity, or  
14 happiness?" *Winkenwerder v. City of Yakima*, 52 Wn.2d 617, 328 P.2d 873, (1958). Under  
15 *Winkenwerder*'s "crucial and final test," Click! is undoubtedly a utility.

16 In *Bremer*, the high court defines utility:

17 [T]he statute specifically names a long list of utilities, but does not specifically  
18 mention wharves and docks. But the statute also says, '*or any similar or*  
19 *dissimilar utility or system.*' This, we think includes any kind of utility in whose  
20 operations the public has an interest, that is to say, any public utility"  
21 see *Bremerton v Bremer*, supra

## 22 **B. Creation of Municipal Utility's Telecommunication System and Service.**

23 The term "Telecommunications" replaced "telephone" and "telegraph" in Title 80 RCW  
24 under the Laws of 1985. See Ch. 450, Sec. 13, Pgs. 1978 -1995, or Shook Decl. 12/12/19 Ex. 61.

25 Click!'s municipal telecommunications system<sup>45</sup> was carefully conceived, constructed and  
26 paid for by TPU, for the express purpose of providing broadband services to TPU customers.

<sup>42</sup> *Black's Law Dictionary* Eleventh Edition 2019 P. 1859

<sup>43</sup> Click! enables "telephone service." The transmitting and receiving ordinary-language messages is widely accomplished with Voice Over IP Protocol (VoIP) service, a disruptive technology rapidly replacing traditional switched telephone technologies. Click! offers a "Voice Package", or VoIP with QoS ("quality or service" features). that prioritize "data packets." Click!'s telecommunication system allows services that are the modern equivalent of the "telephone." Shook Decl. 12/12/19, Ex. 44

<sup>44</sup> Shook Decl. 11/1/2019, Ex. 29

<sup>45</sup> Click! is a "telecommunication system" see Shook Decl 12/12/19 Ex. 59 Decl. of Terry Dillon.

1 City's Ordinance No. 25930 created Click! upon municipal authority to supply "utility  
2 services." The City intended to establish utility services. The Ordinance provides, "WHEREAS  
3 RCW 35A.11.020 authorizes the City to operate and supply utility and municipal services  
4 commonly or conveniently rendered by cities or towns." <sup>46</sup> (Shook Decl. 10/30/19, Ex. 11, Pg. 4)

5 Prior to constructing Click!, to confirm legal authority for commercial municipal utility  
6 telecommunication services, the City brought suit for declaratory judgement in Pierce County  
7 Superior Court and succeeded, in 1996 and 1997, in obtaining two approving Orders. <sup>47 48</sup>

8 In all the briefing supporting the proposed system, City cited federal, state, and local  
9 statutory and judicial authority, as allowing construction and operation of a municipal utility  
10 "Telecommunications System" The "Introduction" of the City's brief stated:

11 The City of Tacoma (the "City") brought this declaratory judgment class action  
12 under RCW 7.24 and 7.25 and CR 23(8)(2) to confirm its authority to issue bonds  
13 for the purpose of constructing and operating a telecommunications system  
14 consisting of a hybrid fiber coaxial network (the "Telecommunications System").

15 The City's April 14, 1997 Memorandum in Support of Summary Judgment shows the City  
16 created a "Telecommunication System" as a municipal utility. *See* Shook Decl. 12/12/19 Ex. 30

17 Click!'s a "Telecommunications Company," operating a municipal *telecommunication*  
18 *system*, providing *telecommunication services*. RCW 80.04.010 (27). A "Telecommunications  
19 Company" is "every city or town owning, operating or managing any facilities used to provide  
20 telecommunications for hire, sale, or resale to the public". *See* RCW 80.04.010 (28). <sup>49 50</sup>

21 Thus, any city or town operating facilities used for transmission of information by wire, or  
22 optical cable, is a telecommunications company. This is exactly what Click! Network is: "*a*  
23 *facility for transmission of information by optical cable or similar means.*" <sup>51</sup>

24 <sup>46</sup> The bond was payable solely by TPU (not general government). Shook Decl. 10/30/19 Ex.11

25 <sup>47</sup> Pierce County Case No. 96-2-09938-0, City Of Tacoma v Taxpayers and Ratepayers of Tacoma.

26 <sup>48</sup> City's 11/5/96 Memorandum In Support Of Motion For Summary Judgment. Shook Decl 10/30/19, Ex.  
12, Ex. 13. *See* Section I, of the City's brief. These Summary Judgement Orders confirmed City's  
authority to establish a "Telecommunication System."

<sup>49</sup> The Public Service Commission, now the UTC, regulates utilities with strong police powers under  
RCW 80.04.470: "Commission to enforce public service laws. Police power."

<sup>50</sup> *see* RCW 54.16.005 "Telecommunications" has the same meaning as contained in RCW 80.04.010.

<sup>51</sup> RCW 35.99.010 "**Telecommunication Systems**" are not cable service or cable television systems..  
Telecommunication systems are operated under Master Permits. Section (3) "Master permit" "A master  
permit does not include cable television franchises" (7) "Telecommunications service" means the  
transmission of information by wire, radio, optical cable, electromagnetic, or other similar means.

1     1. Telecommunications Companies are Public Utilities.

2     Common law and statutory definitions of “Public utilities” are synonymous with “public  
3 service.” By all definitions, Click! is a “public utility” and a “public service company.”

4     Click! is a "public utility" under RCW 36.87.140:

5         The term "public utility" as used in this section shall include utilities owned,  
6         operated, or maintained by every gas company, electrical company, telephone  
7         company, telegraph company, and water company whether or not such  
8         company is privately owned or owned by a governmental entity.

9     Public utility and “public service company” share the same definition:

10         RCW 80.04.010 (23) ““Public service company" includes every gas company,  
11         electrical company, telecommunications company, wastewater company, and  
12         water company.”<sup>52</sup>

13     The Public Service Commission Law, defined a “public service company.”<sup>53</sup>

14         Rem.Rev.Stat. §10344, **The term 'service' is used in its broadest and most  
15         inclusive sense.** The term 'public service company' includes every common carrier,  
16         gas company, electrical company, water company, **telephone company, telegraph  
17         company, wharfinger and warehouseman, as such terms are further defined . . .**  
18     *Inland Empire Rural Electrification . v. Department of Public Service*, 199 Wash. 527, (1939)

19     Click! is a “utility,” as a “communications utility, with its vast underground infrastructure:

20         "Communication utility" means any utility engaged in the business of affording  
21         telephonic, telegraphic, cable television or other communication service to the  
22         public in all or part of the conversion area and includes telephone companies and  
23         telegraph companies as defined by RCW 80.04.010. (Quoting RCW 35.96.020)

24     3. Telecommunications Has Been Defined as A Public Utility in Washington Since 1909.

25     Railroads were the first regulated utility in Washington State, in 1905, under the Railroad  
26     Commission.<sup>54</sup> Telecommunication was the second utility to be regulated, in 1909, also under  
27     the Railroad Commission.<sup>55</sup>

28     The Railroad Commission became the “Public Service Commission” in 1911, with a "Public  
29     service company" including every “gas company, electrical company, water company, telephone  
30     company, telegraph company.” *See* Session Laws of 1911, Ch. 117, Pg.538.<sup>56</sup>

31     <sup>52</sup> Municipal utilities are except from Title 80 RCW -“Public Utilities” Tacoma enjoys “home-rule.”

32     <sup>53</sup> 1911, Ch. 117, Pg 546, *also* Shook Decl. 12/12/19 Ex. 35, Pg 5.

33     <sup>54</sup> Railroad Commission was established by the Session Laws of 1905, Ch. 81, Pg. 145.

34     <sup>55</sup> The U.S. Interstate Commerce Act of 1887 regulated railroads and preceded Washington state’s Laws  
35     of 1909, Ch. 93. Sec. 3 Pg. 192, 196, which did: “authorize the commission to regulate telephone and  
36     telegraph companies and their rates and charges, to prevent discrimination and extortion by such  
37     companies; and to authorize the Railroad Commission of Washington to make all necessary rules.””

38     <sup>56</sup> Since 1961 UTC has regulated utilities an under Title 80. RCW. *See* 1961 c 14 § 80.01.010

1 As an advanced “telecommunication system” and “enterprise” of TPU, generating over \$25  
2 million in revenue, providing a necessary “public service” to over 35,000 TPU utility accounts,  
3 Click! meets every definition of a “*public utility system*.”

4 4. An Attorney General’s Opinion, Professor Brown’s Definition and Eminent Domain.

5 The AGO finds “Telecommunications businesses are public utilities.” See Authority Of  
6 Cities, Towns, And Counties To Provide Telecommunications Services. AGO 2003 No. 11<sup>57</sup>

7 Consider Professor Richard E. Brown’s definition of public utilities. He wrote the book on  
8 public utilities, Business Essentials for Utility Engineers, and is a Fellow of the Institute of  
9 Electrical and Electronics Engineers (IEEE), with BSEE, MSEE and PhD degrees from the  
10 University of Washington in Seattle, an MBA degree from the University of North Carolina at  
11 Chapel Hill, and as a registered professional engineer, Prof. Brown defines “public utility” as:

12 *Public utilities* provide essential services to society. Because of their  
13 importance, legal precedent has upheld the need for specialized government  
14 oversight of these businesses to ensure that safe and reliable utility services  
15 are widely available for rates that are reasonable and non-discriminatory.<sup>58</sup>

16 Public utility services are often established via eminent domain and possess natural  
17 monopoly characteristics, with “pricing power,” thus creating a need for regulation.<sup>59 60 61</sup>

18 Click! fits the definition of “public utility,” with a brand is organized as a “system,” holding  
19 itself out<sup>62</sup> to supply telecommunication and data transport services to a class of TPU ratepayers,  
20 subject to special governmental regulation, both at the local and state levels.<sup>63 64</sup>

21 <sup>57</sup> Attorney General Opinions are “entitled to great weight.” See *Five Corners Family Farmers v. State*,  
22 173 Wn.2d 296, 308, 268 P.3d 892 (2011)

23 <sup>58</sup> Dr. Brown has provided consulting services to most major utilities in the United States and many  
24 around the world, is a frequent instructor, having taught courses in eleven countries, and is an adjunct  
25 professor at North Carolina State University. Shook Decl. 12/12/19 Ex. 40 Pg. 4

26 <sup>59</sup> Large fixed costs are associated with establishing public-utilities, like a telecommunication system, act  
as a barrier to entry, creating a “natural monopoly” with “pricing power” -or the ability to unfairly raise  
rates, since demand is “inelastic.” Buyers, needing the service, have little choice but to pay .

<sup>60</sup> Telecommunication companies are regulated in Washington State under Chapter 80.36 RCW; however,  
in deference to municipal control, RCW 80.04.500 expressly provides Tacoma with home-rule authority  
for most of the provisions of Title 80 RCW. As a result, rates and policy for Click! are set by Council.

<sup>61</sup> Broadband service is generally a monopoly in the USA. Shook Decl. 12/??/19, Ex. 46, also “market for  
local access to broadband tends to be a “natural monopoly.” See WI-FI Everywhere: Universal  
Broadband Access as Antitrust and Telecommunications Policy Hannibal Travis American University  
Law Review, Vol.55 Issue 6 (2006) Shook Decl. 12/12/19, Ex. 51

<sup>62</sup> See Shook Decl. 12/12/19 Ex. 42 Click! holds itself out as providing Broadband Telecommunications  
services. Also see RCW 54.16.005 (4) as “the provision of telecommunications services or facilities for  
resale by an entity authorized to provide telecommunications services to the general public and internet  
service providers.”

<sup>63</sup> Council fixes Click! rates and policies. The State also regulates broadband under RCW 19.385.020.

1 Constructed upon 140 years of the City’s municipal infrastructure, established under broad  
2 eminent domain authority, as represented in the many easements, conduits, vaults and facilities  
3 underlying the utility system, Click! further fits the definition of a utility.<sup>65</sup>

4 The City has broad power, “to condemn land and other property and damage the same for  
5 such and for any other public use.” As a utility, City “may acquire, construct, purchase, condemn  
6 and purchase, own, operate, control, add to and maintain lands, easements, rights-of-way.” As a  
7 telecommunication company, “The right of eminent domain is hereby extended to all  
8 telecommunications companies organized or doing business in this state.”<sup>66</sup>

9 To sum it up, a “municipal public-utility” is a non-profit enterprise, holding itself out under a  
10 brand or system to supply a “public service” to a specific class of customers, subject to special  
11 governmental regulations that insure equitable, non-discriminatory, prices and practices.<sup>67</sup>

12 5. Invention of Broadband and Reemergence of Municipal Communications Utilities.

13 At the dawn of the telecommunication age, municipal communication utilities were very  
14 commonplace. In 1907 the U.S. Census Bureau did a Special Report on Telephones and found  
15 over 580,000 non-profit community lines operated by “Mutual Systems,” “Cooperative  
16 Associations” and “Farmer Lines” across the nation.<sup>68</sup> History shows AT&T crushed such  
17 competition and monopolized this industry, but was broken up in 1984. With subsequent federal,  
18 state and local governmental support, the public is regaining control of essential communication  
19 facilities.<sup>69</sup> A revival of municipal ownership of telecommunication utilities is unfolding.<sup>70</sup>

20 Anacortes, Washington, is an example of a municipal telecommunication utility regaining  
21 control of such services. Anacortes now offers retail broadband utility service alongside their  
22 water utility. Their first customer was recently installed. (Shook Decl. 12/12/19 Ex. 58, Pg. 8)

24 <sup>64</sup> Answer, Pg. 6 ¶33. Admits Click! “partners” with local ISP “partners” to provide internet service.

25 <sup>65</sup> Transferring City’s “police power” of eminent domain, *juris privati*, is likely unconstitutional.

26 <sup>66</sup> Eminent domain authority for a City is found in the Session Laws of 1893, Ch. 84, Sec.1, Pg. 189, now  
RCW 8.12.030, for a utility in RCW 35.84.020, and a “telecommunications company,” RCW 80.36.010.

<sup>67</sup> A “public service” is a service “holding itself out, expressly or impliedly, to supply its service or  
product for use either by the public as a class or by that portion of it that can be served by the utility”  
*Inland Empire Rural Elect. v. Dept. of Public Service of Wash.*, 199 Wash. 527, 537, 92 P.2d 258 (1939)

<sup>68</sup> Shook Decl. Ex. 58, Pg.1 Department Of Commerce: The Census on Telephones: 1907

<sup>69</sup> Shook Decl. 12/12/19, Ex. 49. A Brief History of American Telecommunications Regulation.

<sup>70</sup> The Telecommunications Act of 1996 created broad opportunities for municipal ownership.

1 Click! is a public utility, by common language definitions, regulatory statutes, numerous  
2 municipal utility examples, the Attorney General's opinion, 500 years of case/common law, all  
3 of which confirm that a municipal telecommunications business, affected with a public interest,  
4 subserving a public need, exercising police power of eminent domain and rate setting, standing at  
5 the gateway of commerce, subject to public regulation, holding itself out expressly for supplying  
6 essential public services, devoted to public use and operated for the common good and benefit of  
7 Tacoma Public Utility ratepayers, is subject to an approving vote of the people. As the high court  
8 found, in *State v. Kuykendall*, 137 Wash. 602, 243 P. 834, (1926)<sup>71</sup>

9 [I]f in the beginning or during its subsequent operation the pipe line was devoted  
10 by its owner to public use, and if the right thus extended to the public has not  
been withdrawn, there can be no doubt that the pipe line is a public utility.

11 6. Additional Utility Functions, Utility Purpose and Utility Benefits.

12 Click! offsets TPU's telecommunication costs, provides revenue diversification,<sup>72</sup> and spurs  
13 economic development, all of which increases revenues for TPU's other utilities,<sup>73</sup> increasing  
14 profits and lowering rates for all Power customers. Click! is a utility with a true nexus to Tacoma  
15 Power's primary purpose.<sup>74 75</sup>

16 The community, at large, benefits from lower broadband rates due to competition in the  
17 market for broadband services. Competition between Click!'s Internet Service Providers  
18 ("ISPs") partners, over Click!'s open access system, results in fierce competition for Comcast.  
19 This results in lower rates for the region. All of which spurs economic growth and serves to  
20 benefit TPU's other utility purposes.<sup>76 77 78</sup>

21 <sup>71</sup> Drawing on *Budd v. People*, 12 S.Ct. 468, 143 U.S. 517, 36 L.Ed. 247 (1892), quoting *Munn v. Illinois*,  
22 94 U.S. 113, 24 L.Ed. (1877).

23 <sup>72</sup> Similarly, Chattanooga's Electric Power Board ("EPB") experiences savings. In the 2017 annual report,  
24 EPB announced: "Lower Power Rates: Because EPB Fiber Optics pays such substantial allocations and  
access fees to EPB Electric Power, the electric system has been able to avoid a significant electric rate  
increase. As a result, all electric customers are enjoying lower electric rates regardless of whether they are  
EPB Fiber Optics customers or not." Shook Decl 12/12/19 Ex. 38.

25 <sup>73</sup> This provides a "sufficiently close nexus to the purpose and object" of TPU's non-telecommunication  
26 utilities, water and power. *City of Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 696 (1987).

<sup>74</sup> The threshold for nexus is quite low. Utility buying art to beautify its own facilities was sufficient nexus;  
but, utility could not buy art to benefit the general public. "Such projects beautify employee workspaces and  
customer service areas and thereby helped increase the efficiency of workplace operations and acted to the  
benefit of City Light." *Okeson v. City of Seattle*, 130 Wash. App. 814, 125 P.3d 172 (2005) (Okeson II).

<sup>75</sup> Chattanooga, Tennessee operates an electric provider known as the Electric Power Board (EPB). In re  
City of Wilson, North Carolina, 30 FCC Rcd. 2408, 2015 WL 1120113, at \*7 (2015)

<sup>76</sup> Shook Decl. 12/12/19, Ex. 52, see Harvard Study on Broadband confirming lower prices.

1 **C. Municipal Utilities Commonly Provide Telecommunication Utility Services**

2 “The municipal corporation is allowed to go into the business only on the theory that thereby  
3 the public welfare will be subserved.” *Springfield Gas & Elec. Co. v. Springfield*, 257 US 66 -  
4 Supreme Court 1921. Municipal communication systems, owned and operated by non-profit,  
5 community entities, commonly provide broadband services in the modern era.<sup>79</sup>

6 Mr. Shook’s report, A Sampling of Municipal Broadband Utilities in the USA (2019),  
7 reviews 25 such utilities, with a short “description” of each utility’s services, taken directly from  
8 each utility’s own website. **Please See** Shook Decl. 10/30/19 Ex. 18.

9 Kansas Municipal Utilities (“KMU”) represents 178 cities and communities that have  
10 decided municipal utilities are the best choice for providing electricity, natural gas, water, sewer  
11 and telecommunications services. The KMU website states:

12 Kansas has a long history of municipal utility operation. When private business  
13 would not or could not serve the utility needs of its citizens, city governments  
14 stepped up to provide essential utility needs – electric, gas, water, wastewater,  
15 stormwater, **and telecommunication services**. These community-owned  
16 utilities are municipal by choice. (Emphasis added)<sup>80</sup>

17 1. Washington’s Public Utility Districts Operate Telecommunication Utilities.<sup>81</sup>

18 Courts may interpret a statute by looking to “other statutes dealing with the same subject  
19 matter.” The PUD statutes are related statutes and helpful when “read together and harmonized.”  
20 *Harmon v. Dept. of Social and Health Services*, 134 Wn.2d 523, 530, 951 P.2d 770 (1998)

21 Municipal ownership and operation of telecommunication systems is common in Washington  
22 State. Public Utility Districts (“PUDs”) are non-profit municipal corporations organized to

---

23 <sup>77</sup> Defendant’s Answer, Pg. 6, ¶33. admits competition between local Internet Service Providers.

24 <sup>78</sup> See *City of Wilson, North Carolina Petition for Preemption of North Carolina General Statute Sections*  
25 *160A-340 et seq. et al.*, Memorandum Opinion and Order, 30 FCC Rcd 2408, 2434, paras. 52-54 (2015)  
26 (*Municipal Broadband Preemption Order*) (finding Time Warner Cable’s rates lower in Wilson than in  
other areas of North Carolina and that Time Warner Cable improved its BIAS speed offerings after  
Wilson entered the market)

<sup>79</sup> The Executive Office of the President: Community-Based Broadband Solutions The Benefits Of  
Competition And Choice For Community Development And Highspeed Internet Access. (2015) Shook  
Decl. 10/30/19 Exhibit 21, Pg. 14, 15.

<sup>80</sup> KMU website, last accessed 11/19/19, available at <https://www.kmunet.org/page/Benefits?> Also  
available at Perma Link <https://perma.cc/8FDZ-XX8D> and as Shook Decl. 10/??/19 Ex.

<sup>81</sup> See RCW 54.04; also *Wash. Natural Gas Co. v. PUD 1*, 77 Wn.2d 94, 97, 459 P.2d 633 (1969).

1 provide public utility services. With less authority than charter cities like Tacoma, fourteen  
2 PUDs currently operate telecommunication “utility” systems across our state.<sup>82 83 84</sup>

3 Washington’s UTC considers broadband a “utility.”<sup>85</sup> (Shook Decl. 12/12/19 Ex. 41 Pg.1).

4 PUDs recognize broadband is “utility service,” vital to education, economic growth and  
5 employment.”<sup>86</sup> Kitsap County PUD calls “Broadband” a “utility.”

6 PUDs were formed in 1930 to provide equitable access to modern utilities for  
7 Washington's communities. Today, this *includes broadband*  
8 *telecommunications*. Watch our video to see how Kitsap PUD is continuing  
9 the mission and working to bring *this essential utility* to all of Kitsap's  
10 communities. (emphasis added).

11 Municipal broadband utilities are defined in Title 54, RCW -Public Utility Districts, in RCW  
12 54.16.420 “Retail internet service.” (1)(a) "Broadband" means high-speed internet access and  
13 other advanced telecommunications services.<sup>87</sup> (b) "Broadband network" means networks of  
14 deployed telecommunications equipment and technologies necessary to provide broadband.

15 PUDs are regulated, under RCW 54.16.420(15): “A public utility district providing retail  
16 internet service must separately account for any revenues and expenditures.” RCW 54.16.330,  
17 rates may not be “discriminatory or preferential,”: Provision of Telecommunications Services:

18 (2) A public utility district providing **wholesale or retail telecommunications services**  
19 shall ensure that rates, terms, and conditions for such services are not unduly or  
20 unreasonably discriminatory or preferential.

21 Regulation of PUD broadband utilities demonstrates Click! is also a utility, providing  
22 essential utility services. Chapter 35.94 RCW applies to such municipal utility assets.<sup>88</sup>

23 **D. The City’s Telecommunication System Provides Essential Utility Services.**

24 <sup>82</sup> See RCW 54.16.330(1)(a) A public utility district . . . may construct, purchase, acquire, develop . . .  
25 operate, and maintain any telecommunications facilities . . .

26 <sup>83</sup> First class cites conferred with an omnibus grant of power under RCW 35.22.570 .

<sup>84</sup> “district is publicly owned and operated and that it has no profit motive.” *Snohomish County Pub. Util.*  
*Dist. 1 v. Broadview Television.*, 91 Wn.2d 3, 8-9, 586 P.2d 851 (1978)

<sup>85</sup> The Australia’s Commonwealth has funded a National Broadband Network. Every Australian will have  
access to 100 Mbps service. 11 million homes are now ready to connect. Shook Decl. 12/12/19 Ex. 60.

<sup>86</sup> Shook Decl. 12/12/19 Ex. 38. Washington PUD Association (“WPUDA”) website, last accesses on  
11/23/19 “Widely available and reliable access to broadband service is important to our state’s economic  
health, access to education and essential services, and quality of life. Public utility districts play an  
important role in connecting communities by providing access to high-speed broadband service.”

<sup>87</sup> See 47 U.S. Code § 1302 (d)(1) The term “advanced telecommunications capability” is defined, without  
regard to any transmission media or technology, as high-speed, switched, broadband telecommunications  
capability that enables users to originate and receive high-quality voice, data, graphics, and video  
telecommunications using any technology.

<sup>88</sup> Click! services were conceived as a “utility purpose.” Shook Decl. 12/12/19, Ex. 30, Pg. 10, 11.

1 Broadband is commonly considered an essential utility.<sup>89</sup> State, federal and local public policy  
2 support broadband as a municipal utility service.<sup>90</sup> The City describes its own “Mission” in  
3 provision of these services as “vital to our quality of life.” (Shook Decl. 12/12/19, Ex 48, Pg. 8).

4 Washington state’s “Broadband Office,” established in 2019, with “AN ACT Relating to  
5 expanding affordable, resilient broadband service to enable economic development, public  
6 safety, health care, and education” *see* RCW 43.330.532 Broadband office—Established:<sup>91</sup>

7 The legislature finds that: (1) Access to broadband is critical to full participation in  
8 society and the modern economy provides a public benefit to the citizens of  
9 Washington by enabling access to health care, education, and essential services,  
10 providing economic opportunities, and enhancing public health and safety. *Id.*

11 In RCW 43.330.400 the Legislature found broadband technology advancements:

12 [E]nhance economic development and public safety . . . improved health care,  
13 access to consumer and legal services, increased educational and civic participation  
14 opportunities, and a better quality of life for the state's residents.

15 In July 2019, Pierce County Council passed a Resolution stating:

16 "Broadband" - forms the basis of an essential 21st Century infrastructure in our  
17 digital world and economy. It is vital to the economic development and quality of  
18 life for the residents, businesses and institutions of Pierce County and throughout  
19 Washington. (*see* Shook Decl. 12/12/2019 Ex. 37, and for Resolution *see* Ex. 54)

20 Pierce County Council’s 2019 Broadband Study concluded:

21 Broadband is essential, much like education, electricity, and water or sewer. It has  
22 become a primary enabler of economic mobility and prosperity, a “*fourth utility*” *Id*

23 Federal policy supports municipal communications.<sup>92</sup> Benefits are widely known and broadly  
24 promoted. Like roads, broadband is essential infrastructure for a modern economy. Broadband is  
25 a core utility for households, businesses and community institutions.<sup>93 94</sup>

26 <sup>89</sup> *See* 47 U.S. Code § 1301 (2) “Continued progress in the deployment . . . of broadband technology is  
vital to ensuring that our Nation . . . continues to create business and job growth.

<sup>90</sup> RCW 80.36.630 (c) "Broadband service" means any service providing advanced telecommunications  
capability, including internet access and access to high quality voice, data, graphics, or video.

<sup>91</sup> *See* RCW 43.330.532 – Findings 2019 c 365 The legislature finds Broadband (2) “serves a fundamental  
governmental purpose and function and provides a public benefit to the citizens of Washington. Also,

<sup>92</sup> *See* 47 U.S. Code § 1301 (4) “The Federal Government should also recognize and encourage  
complementary State efforts to improve the quality and usefulness of broadband data and should  
encourage . . . the continued growth of broadband services . . . for the . . . the Nation.

<sup>93</sup> Shook Decl. 10/30/19, Ex. 21, *see generally* Report from the executive office of the president:  
Community-Based Broadband -The Benefits Of Competition And Choice For Community Development  
And Highspeed Internet Access. (January 2015).

<sup>94</sup> Shook Decl. 10/30/19 Ex. 22, Pg. 3 -*see generally* A Light in Digital Darkness: Public Broadband after  
Tennessee v. FCC 20 Yale J. L. & Tech. 311 (2018).

1 “Today, **broadband** is taking its place alongside water, sewer and electricity as essential  
2 infrastructure for communities”. Quoting USDA Report (Shook Decl. 10/30/19, Ex. 23).<sup>95</sup>

3 **Broadband is crucial for increased health, educational and economic opportunities,**  
4 **as well as for job and business creation and growth.** Broadband can help close the  
5 digital divide between rural and urban communities. (USDA Rural Development’s  
6 Rural Utilities Programs website, *last visited* 10/30/19)

7 **E. Click! is a Municipal Utility “System Requiring a Vote under Charter 4.6**

8 Charter 4.6 requires a vote upon disposal of a “System.” Click!’s services are not general,  
9 sovereign, government functions, provided for the common good of the general public at large,  
10 to customers who do not request service. Click! is a municipal utility enterprise, providing  
11 proprietary public utility services for the benefit of the Utility and its customers.

12 That Click! is a “System,” operating under an “organizational structure,” with a general  
13 manager providing oversight, is important to note.<sup>96</sup> The “proprietary” services Click! provides  
14 define Click! as an “enterprise.” An enterprise is a system.<sup>97</sup> (Shook Decl 12/12/19, Ex.26)

15 Click!’s services are provided, as a proprietary function, to the Utility’s customers.

16 In the context of utilities, the focus is on whether the utility "operates for the benefit of  
17 its customers, not the general public," or, stated differently, whether it "will [provide  
18 service] to a customer that does not request service." Okeson, 150 Wn.2d at 550. If it  
19 operates to serve customers, a utility is serving a proprietary function.

20 *City of Wenatchee v. Chelan County Public Utility District*, 181 Wn.App. 326, (Div. 3 2014)

21 Washington decisions have held that the operation of a water system or other utility  
22 serving billed customers is a proprietary function. *Russell v. City of Grandview*, 39  
23 Wn.2d 551, 553, 236 P.2d 1061 (1951)

24 **F. The City Confirms Click! is Part of a Utility by Taxing it as a Utility.**

25 Further admission is found in the City’s organization, labeling, treatment and Taxation of  
26 Click!, which show the City has consistently demonstrated its expressed intention that Click! is a  
public utility “system.”<sup>98</sup>

The Washington Constitution provides, in Article VII Section 5: Taxes, How Levied, that “  
every law imposing a tax shall state distinctly the object of the same to which only it shall be

<sup>95</sup> Shook Decl. 10/30/19, Ex. 23. USDA Rural Utilities Service - Telecommunications Programs:

<sup>96</sup> Shook Decl. 10/30/2019, Ex. 9, Pg. 3

<sup>97</sup> “Enterprise” is a “a business organization,” also, “a systematic purposeful activity.” “Systematic” is  
“relating to or consisting of a system. Merriam-Webster.com Dictionary Accessed 11 December 2019

<sup>98</sup> Shook Decl. 10/30/19, Ex. 17, Showing the \$629,716. The City Website states: “City Utility Tax”  
refers to a tax on public service businesses, including businesses that engage in telecommunications

1 applied.” The City’s collects a 7.5% “utility tax” on Click! activities, including broadband  
2 revenue, as a “public utility.” In 2018 this tax amounted to \$629,716 on broadband alone.<sup>99</sup>

3 The City’s taxation of Click! as a public utility, shows an express intent that Click! is a  
4 public utility. The City’s taxation policy, City Charter 4.4, allows taxation “upon any of the City-  
5 operated utilities.” By collecting the City’s B&O “utility tax” on Click!’s broadband services,  
6 City demonstrates for the Court that Click! is a utility in Tacoma. (Shook Decl. 10/30/19, Ex. 9).

7 Tacoma’s utility tax rate increased, from 6% to 7.5%, by Proposition 3. It was a “utility tax  
8 increase,” and Click!’s tax rate increased accordingly. More evidence that Click! is seen as a  
9 utility. (Shook Decl. 12/12/19 Ex. 56, Pgs. 3, 4, 6) (Shook Decl. 10/30/19 Ex. 16).

10 Tacoma’s website provides: “Tax Classifications: Business income is reported under a tax  
11 classification *depending on the type of business activity*.” Click!’s “Business Activity” is a  
12 “*utility*” under the City Tax Code. (Shook Decl. 12/12/19 Ex. 56, Pg. 3).

13 **G. Laws of 1917 and Origin of Right To Vote on Separation of Municipal Utility Assets.**

14 Struggles between private and public interests over municipal utility assets are nothing new.  
15 The instant case is a good example of why the laws of 1917 were established. Private interests,  
16 who might benefit from privatizing municipal utilities, are held in check by the vote.

17 The contemporaneous events, surrounding enactment of the 1917 statute, inform the Court  
18 of the Legislature's intent in requiring voter approval for privatization. A central figure in the  
19 “public power struggles,” between public and private utilities, was the Honorable Homer T.  
20 Bone, Chairman of the 1925 Tacoma City Charter Committee that provided Charter 4.6’s  
21 protective vote. His speech, during his 1932 senate campaign, provides context for interpreting  
22 RCW 35.94 and Charter 4.6.<sup>100</sup> (Shook Decl. 12/12/19, Ex. 67, Pg. 6).

23 The power trust of this nation has junked every standard of decency in its dealing  
24 with the public. It has debauched our institutions of learning and our legislative  
25 bodies. It has brazenly gouged the pocketbooks of the people to maintain a flood  
26 of propaganda calculated to deceive the public mind. Its victims have been  
compelled to pay for the flood of corruption it has loosed upon the country. It has  
set up a long train of abuses and usurpation of power pursuing invariably the

---

<sup>99</sup> Pursuant to City Charter 4.4, which permits tax “upon any of the City-operated utilities.” This defines Click! as a utility, given its taxation of as a utility. Res.# 39236 “earnings tax on utility companies.”

<sup>100</sup> Homer Truett Bone, In the early 1920s served as attorney for Port of Tacoma and Tacoma City Light, the city’s municipally owned utility. U.S. Senator, 1932-1944; judge, U.S. Circuit Court of Appeals, Ninth Circuit, San Francisco, 1945-1954.. Shook Decl. 12/12/19, Ex. 67 Pg. 12.

same object which is reducing the American people to a state of vassalage to the greatest instrument of plunder the world has yet produced.

The people must not only destroy the power of this insolent organization, but *write into the laws of the land* new guards for future security against such monstrous invasions of their rights.

One only need look at the record of the Washington State Legislature to perceive how completely a public body can be dominated by a power trust lobby. The thing has become a stench in the nostrils of decency in the state of Washington which *led to the people of this great state to rise in their wrath and pass the Grange Power measure by a big majority in 1930.* (emphasis added). (Shook Decl. 12/12/19 -Part II Ex. 67 )

RCW 35.94, the Laws of 1917, originally codified as Remington’s Revised Statutes (“RRS”) 1917 c 137 §§ 9512–14, included “telephone or telegraph plant and lines, or any system embracing all or any one or more of such works or plants or *any similar or dissimilar utility or system.*” That legislative intent remains today, unchanged. (Shook Decl. 12/12/19 Ex. 33, Pg. 8)

The consequences of privatizing municipal utility property without an approving vote of the public was memorialized in 1942, by our high court’s finding that two wharves, which had been privatized, were “part of” a municipal utility. *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 237–39, 130 P.2d 367 (1942). *Bremer*, cited RRS § 9512 thus:

'It is and shall be lawful for any city or town in this state now or hereafter owning any water works, gasworks, electric light and power plant, steam plant, street railway line, street railway plant, telephone or telegraph plant and lines, or any system embracing all or any one or more of such works or plants or *any similar or dissimilar utility or system*, to lease for any term of years or to sell and convey the same or any part thereof, with the equipment and appurtenances, in the manner hereinafter prescribed.'

The appellants point out that the statute specifically names a long list of utilities, but does not specifically mention wharves and docks. But the statute also says, '*or any similar or dissimilar utility or system.*' This, we think includes any kind of utility in whose operations the public has an interest, that is to say, any public utility.<sup>101</sup>

In 1917, the legislature included a list of public services considered municipal utilities for protection under RCW 35.94. This list was left dramatically open. The Legislators could have simply said “not limited to,” instead, with the emphatic phrase of “*any similar or dissimilar utility or system,*” Legislators were assertive in issuing the inhabitants of a city the right to vote over disposal of their municipal utility property.

---

<sup>101</sup> Such struggles continue, now between public broadband and private “broadband trusts,” to this day. Click! is target with equivalent tactics. Shook Decl. 12/12/19, Ex. 45. See Ms. Lachelle letter.

1            *Bremer* found a frivolous “abandonment,” done in anticipation of making the lease in  
2 question, had the “appearance of having *been made to circumvent the provisions* of sections  
3 9512-9514, inclusive, of the statutes.” (Emphasis added). As the *Bremer* court stated:

4            The appellants urge that the wharves had been abandoned. . . .As we read the  
5 record, the Front street wharf was not abandoned--or if so, only in anticipation of  
6 making the lease in question, for the ordinance approving the lease was passed on  
7 first reading by the city commission . . . it may well be doubted whether an  
8 abandonment would be approved which has the appearance of having been made  
9 to circumvent the provisions of sections 9512-9514, inclusive, of the statutes. *Id.*

10           The System telecommunication functionality is not just “similar or dissimilar” to the  
11 communication functionality contemplated in Chapter 35.94, it is identical. The System enables  
12 phone calls, using interconnected VoIP service. A lifesaving 911 call can be made over the  
13 System. The FCC’s Lifeline program subsidizes broadband as an advanced telecommunication  
14 service, with VoIP and broadband treated on the basis as traditional POTS service.<sup>102 103</sup>

15           Low-income consumers receive a standard \$9.25 monthly discount on Lifeline-supported  
16 VoIP or broadband Internet access service (Shook Decl. 12/12/19 Ex. 44).

17           1. Legislative Intent of Surplus and Plain Language of Municipal Utility Surplus Clause

18           RCW 35.94.040 was adopted in 1973, the legislative history shows the City was keenly  
19 interested in the bill. Senator “Slim” Rasmussen, 29<sup>th</sup> District, sponsored the bill, and  
20 Representative R. J. Kelley, Tacoma’s 28<sup>th</sup> District introduced it in the House.<sup>104</sup> TPU Director A. J.  
21 Benedetti, wrote supportive letters and testified on the need for the bill. In his March 5, 1973 letter  
22 to the House of Representatives, and his March 20, 1973 letter to the Chairman and Committee  
23 Members of the Senate Committee on Local Government, the Director acknowledged and agreed

24 <sup>102</sup> See 47 CFR § 54.400 (n) *Supported services*. Voice Telephony services and broadband Internet access  
25 services are supported services for the Lifeline program. The services are recognized equally under the  
26 FCC’s Lifeline program, providing subscribers a discount on monthly telephone service, broadband  
Internet access service, or voice-broadband bundled service. *Also* FCC Order 19-111 Released: November  
14, 2019 Bridging the Digital Divide. *also see* Shook Decl. 12/12/19 Ex. 44, Pg. 3

<sup>103</sup> See 47 CFR § 9.3 Interconnected VoIP service: Enables real-time, two-way voice communications and  
permits users generally to receive calls that originate on the public switched telephone network and to  
terminate calls to the public switched telephone network. VoIP capability includes *Automatic Number  
Identification* (“ANI”). A system that identifies the billing account for a call. For 911 systems, the ANI  
identifies the calling party and may be used as a call back number.

See 47 CFR § 54.400(m) Voice telephony service. “Voice telephony service” is defined as voice grade  
access to the public switched network or its functional equivalent; . . . access to the emergency services  
provided by local government or other public safety organizations, such as 911 and enhanced 911. . .

<sup>104</sup> House Bill 939, and Senate Bill 2835 Shook Decl. 12/12/19, Ex. 33, Pgs. 23, 31

1 with the importance of “*the confirming approval of the voters*” for surplus of “*operating*” utility  
2 assets.<sup>105</sup>

3 Director Benedetti assured Legislators that, “*Such procedure, of course, is desirable* when in  
4 fact all or *an integral part of an operating utility* is to be so disposed of.” The Director added:

5 This bill will accomplish procedural flexibility in such transactions without  
6 repealing the formalized procedures required in the situations involving utility  
operating plant and properties. (*see* Shook Decl. 12/12/19, Ex. 33, Pgs. 5, 6).

7 The Local Government Committee took up the matter. In an April 6, 1973 memo, Legislative  
8 Executive Secretary J.W. Gunther wrote Chairman Rep. Haussler, explaining the purpose of the bill.

9 Under the existing law, there is a long, detailed requirement for the calling of bids,  
10 passing of resolutions and all this appears to be rather cumbersome for the purpose  
of disposing of surplus properties. (*see* Shook Decl. 12/12/19, Ex. 33, Pg. 18)

11 At the first reading of the bill in the Senate, on March 14, 1973, surplus assets were defined by  
12 the term “*unusable property*,” and real estate defined as “unimproved lands.” In a hand written  
13 note, the terms “unusable” and “unimproved” were identified for removal as “*superfluous*,”  
14 indicating the word “surplus” was clear enough.<sup>106</sup> (Shook Decl. 12/12/19, Ex. 33, Pg. 3)

15 On March 16, 1973, Mr. Nolan, Deputy City Attorney for TPU, spoke to the House Local  
16 Government committee and assured Legislators this bill would simply allow TPU “*the same*  
17 *privileges*” for surplus enjoyed by Public Utility Districts. (Shook Decl. 12/12/19 Ex. 33, Pg. 38)

18 A direct comparison to the PUD “*privileges*,” and assurance of seeking identical limitations on  
19 surplus authority, was also cited in Director Benedetti’s letters. The Director confirmed for the  
20 Legislators, that the authority to surplus was “consistent with that *long enjoyed by the Public Utility*  
21 *Districts* under RCW 54.16.180.” (Shook Decl. 12/12/19 Ex. 33, Pg. 18 ).

22 The Director’s comparison was fair. PUDs and “cities and towns” are municipal corporations  
23 with “the same powers” and “same duties” for disposal of utility assets. RCW 54.16.180 (9)

24 ***Districts are municipal corporations for the purposes of this section.*** A commission  
25 shall be held to be the legislative body, a president and secretary shall have the same  
26 powers and perform the same duties as a mayor and city clerk, and the district resolutions  
shall be held to be ordinances ***within the meaning of statutes governing the sale, lease,  
or other disposal of public utilities owned by cities and towns.*** (emphasis added).

Which makes sense, given both surplus statutes, RCW 35.94.040 and RCW 54.16.180(2)(b),

<sup>105</sup> Shook Decl. 12/12/19, Ex. 33, Pgs. 5, 6.

<sup>106</sup> Shook Decl. 12/12/19, Ex. 33, Pgs. 22. - terms “unusable” and “unimproved” as superfluous.

1 share a common origin, *in the Laws of 1917* and the same protective statues in RRS §§ 9512 -9514.

2 From 1945 to 1955, the City and PUDs shared identical statutory authority for disposal of their  
3 utility property. Surplus was regulated in *exactly the same way*, under *exactly the same laws*. The  
4 Laws of 1945. House Bill 342, Chapter 143, Section 6(m), Page 413, specifically linked PUD's and  
5 the City's process for the sale, lease or disposal of the people's assets.<sup>107</sup>

6 It is, and shall be lawful for any public utility district organized hereunder to sell and  
7 convey, lease or otherwise dispose of all or any part of the works, plants, systems,  
8 utilities and properties authorized by this act and owned by it after proceedings and  
9 approval by the voters of the district as provided for in chapter 137, Laws of 1917,  
(sections 9512, 9513 and 9514 of Remington's Revised Statutes of Washington).

10 Only two amendments have ever been made to the surplus language in the 1945 statute. The  
11 first came in 1955, when PUDs gained “flexibility in procedure,” with surplus authority, With the  
12 newly created RCW “chapter and section” numbering system, PUDs were regulated under Title 54,  
13 when Legislators first modified RRS §§ 9512 -9514's cumbersome process for disposal of surplus  
14 utility property in the Laws of 1955, Senate Bill 367. Thus was created RCW 54.16.180. <sup>108</sup>

15 To this day, RCW 54.16.180 represents the unmistakable legislative intent regarding the term  
16 “surplus” in relationship to municipal utility property under RRS §§ 9512 -9514.

17 It would be 18 more years until Tacoma gained surplus authority. During that time, the PUDs  
18 surplus statue remained unchanged. In 1973 RCW 54.16.180 was the template for the same  
19 surplus authority Tacoma now sought for improving the same “rather cumbersome” process.<sup>109</sup>

20 The Tacoma Utility Director and two Tacoma City Attorneys testified that the surplus  
21 authority they sought was “the same privilege,” “consistent with that long enjoyed by the Public  
22 Utility Districts under RCW 54.16.180.”<sup>110</sup> Here is RCW 54.16.180 as it appeared in 1973. This  
23 is the surplus authority Tacoma sought. Legislative intent for surplus under RRS § 9512 is here.

24 That a district may sell, convey, lease, or otherwise dispose of all *or any part of the*  
25 *property owned by it*, may sell, convey, lease, or otherwise dispose of to any person or  
26 public body, any part, either within or without its boundaries, which has become  
unserviceable, inadequate, obsolete, worn out or unfit to be used in the operations of the  
system and which is no longer necessary, material to, and useful in such operations,  
without the approval of the voters. (*see* Laws of 1955, Ch. 390, Pg. 1685.) (emph. added)

<sup>107</sup> The Laws of 1945, Ch. 143 Pg. 413. Shook Decl. 12/12/19, Ex. 33, Pg. 5.

<sup>108</sup> See the Laws of 1955, Ch. 390, S.B. 367, Section 19, Pg. 1685. Shook Decl. 12/12/19, Ex. 33, Pg. 4

<sup>109</sup> Shook Decl. 12/12/19, Ex. 33, Pg. 18 – Legislative Executive Secretary J.W. Gunther wrote Chairman  
Rep. Haussler, explaining the purpose of the bill.

<sup>110</sup> Quoting Director Benedetti's letters, *surpa..* All of this represents legislative intent for surplus.

1 This 1973 version of RCW 54.16.180 shows the legislative intent for “surplus” under RCW  
2 35.94.040. This is the very statute which RCW 35.94.040 was intended to replicate. It was  
3 presented to Legislators, as a direct comparison and a basis for their unanimous adoption of  
4 RCW 35.94.040. It represents what Legislators intended to accomplish, in 1973, by modifying  
5 the 55-year old legacy of RRS §§ 9512 -9514. Legislative intent for “surplus” under RCW  
6 35.95.040 is revealed for the Court in this 1973 version of RCW 54.16.180.

7 Understanding the legislative intent behind RCW 35.94.040 provides context for statutory  
8 interpretation of “surplus” in the instant case. The statutes terms, such as “obsolete,” “worn out,”  
9 “unserviceable,” “no longer useful” or “unfit to be used” in the operation of the system, do not  
10 describe a state-of-the-art fiber optic system, earning \$25 million a year, and being “leased” for 40  
11 years, with a reversionary interest. The Court cannot substitute its judgement for that of the  
12 legislators. Click!’s status, as an operational enterprise, simply does not meet the Legislator’s intent  
13 of the term “surplus.” When considering the meaning of “surplus,” associated words placed in the  
14 statute control the meaning of a word. *Cito v. Rios*, 3 Wn. App. 2d 748, 759, 418 P.3d 811, review  
15 denied, 191 Wn.2d 1017, 426 P.3d 747 (2018).

16 Only one other change has ever been made to the 1955 version of RCW 54.16.180. That came  
17 in 2008, with the Laws of 2008, Ch. 198, Pg. 8, Sec. 5, and further confirms legislative intent over  
18 disposal of surplus assets. Legislators made “surplus” even clearer, by adding the emphatic phrase,  
19 “**no longer useful in such operations, to any person or public body**.” The statute reads today: <sup>111</sup>

20 RCW 54.16.180 (2) A district may, without the approval of the voters, sell, convey, lease,  
21 or otherwise dispose of all or any part of the property . . . which has become  
22 unserviceable, inadequate, obsolete, worn out or unfit to be used in the operations of the  
23 system and which is no longer necessary, material to, **and useful in such operations, to  
24 any person or public body.** (emphasis added).

25 The words, “**useful in such operations to any person or public body**” shows legislative intent to  
26 protect assets from “**any person**” that would use productive public utility assets to continue  
providing the same utility service, or “such operations.”<sup>112</sup> In Click!’s case, the System is absolutely  
“**useful.**” The private buyer will provide exactly the same “**operations,**” for the next 40 years.

---

<sup>111</sup> Substitute House Bill 2639

<sup>112</sup> Consider a water pipeline, or water system, for example. The phrase “**useful in such operations**” would prohibit “surplus” from being applied to assets being sold to someone who would use them to continue supplying water. They pipeline could be salvaged for scrap, but not continue in public service.

1 “In resolving the meaning of a statutory term, we adopt the interpretation that best advances the  
2 legislative purpose.” *Citizens Alliance for Property Rights Legal Fund v. San Juan County*, 184  
3 Wn.2d 428, 437, 359 P.3d 753 (2015), and find the statutes plain meaning as “derived from the  
4 context of the entire act as well as any ‘related statutes which disclose legislative intent about the  
5 provision in question.’” *Jametsky*, 179 Wn.2d at 762 (quoting *Dep’t of Ecology v. Campbell &*  
6 *Gwinn, LLC*, 146 Wn.2d 1, 11, 43 P.3d 4 (2002)).

7 **H. Click! Serves a Useful Purpose and Disposal by Surplus is Substantive Ultra Vires..**

8 Click!’s fiber optic cable is used for data transport. All of the “fiber” is sheathed within one  
9 “outer jacket.” It is essentially one pipe consisting of a number of “tubes,” with each tube having  
10 a specific number of fiber “strands.” *See* (Shook Decl. 12/12/19 Ex. 31, Pg. 3)

11 On Click!’s system, there are 12 fiber optic strands in each “tube.” ***Click! currently uses one***  
12 ***“tube” for all Click!’s commercial services.*** There are *15 additional* “tubes” of dark fiber,  
13 representing the communities’ potential for future use. Click!’s current use of this fiber optic  
14 “backbone” is shown in “purple” on the City’s slide presentation from October 29, 2019.<sup>113</sup>

15 Privatization not only transfers complete control over the twelve strands of fiber currently  
16 used by Click!, but also vests complete control all over the ***additional 9 tubes, or 108 additional***  
17 ***strands of dark fiber***, needed for the community’s access to broadband services in the future.  
18 Explosive growth in data usage and broadband telecommunications is upon us. The community  
19 will require all this infrastructure and more. (Shook Decl. 12/12/19 Ex. 31, Pg. 14).

20 Equally as important are the DNS servers, DHCP servers, Caching servers, routers, switches,  
21 hubs, nodes, and intellectual property that enable the system. A most notable example an asset  
22 that is obviously not surplus is the IPv4 address, included in the CBTA. The agreement provides,  
23 in connection with the IRU, Tacoma Power will assign IPv4 addresses to Operator from CIDR  
24 131.191.0.0/17 and 192.173.160.0/20.”<sup>114</sup>

25 IP Addresses are numbers owned by the City and assigned to each customer device via  
26 Click!’s DHCP server, allowing devices to connect directly to the world wide web. The world

---

<sup>113</sup> *See* Shook Decl. 12/12/19 Ex. 31, Pg. 3 All required in increasingly digital world, to connect with friends and family, access goods and services. The IDC predicts the Global Datasphere, estimated to be 33 ZB in 2018, will grow to 175 ZB by 2025.

<sup>114</sup> The City owns the valuable IPv4 addresses included in the IRU. These are not “surplus.” All devices that connect to the Internet require an Internet Protocol (IP) address and IP addresses are a valuable commodity. Demand has exhausted the global supply of IPv4 addresses.

1 supply of IPv4 address is exhausted. They are a precious and valuable commodity, with a long  
2 waiting list of over a year. *See* Shook Decl. 12/12/19 Ex. 65.<sup>115</sup>

3 Defendant admits Click! is part of a municipal utility, providing a public service. These  
4 services are “municipal utility services.” If portions of Click! qualify as the “works, plant, *or*  
5 *system* owned by it or ***any part thereof***,” then vesting via surplus is ultra vires. A direct violation of  
6 statute. *Finch v. Matthews*, 74 Wash.2d 161, 172, 443 P.2d 833 (1968)

7 Property “originally acquired for public utility purposes” is not surplus, when that property  
8 continues providing “public utility service.” All the assets being conveyed were “originally  
9 acquired for public utility purposes.” The System was established to deliver telecommunication  
10 services to TPU customers, diversify TPU revenue, drive economic growth and offset costs for  
11 TPU. The property is not idle, or its operations discontinued. If privatized, the System would  
12 continue providing TPU customers with the same services. A property is not surplus, when  
13 continuing to provide the same municipal utility services.<sup>116 117</sup>

14 The City’s Resolution 40467, declaring surplus utility-owned property, inventory,  
15 equipment, and vehicles allocated to Click! Network, enables Resolution 40468, which  
16 authorizing execution of the CBTA to convey ownership of Click!. Together these Resolutions  
17 circumvent the public vote requirement in RCW 35.94.020. No bidding has been occurred in the  
18 surplus process, as is generally seen. (Shook Decl. 12/12/19, ¶ 1, and City Policy Ex. 54, Pg. 4)

19 A municipality does not have unbounded discretion to declare a utility surplus. *South Tacoma*  
20 *Way, LLC v. State*, 169 Wn.2d 118, 123, 233 P.3d 871 (2010) (governmental acts without authority  
21 are *ultra vires*). A municipality’s action is void, if contrary to law.

22 City’s “Declaration of Surplus Property” does not meet the standard of “surplus” under RCW  
23 35.94.040, which applies to property “not required for providing continued public utility  
24 service.” Since Click!’s “surplus” property will continue providing the same public utility  
25 broadband services to the same public utility customers, Council’s surplus Resolutions is an ultra  
26 vires application of the statute. A “contract contrary to the terms and policy of a legislative  
enactment is illegal and unenforceable. *South Tacoma Way, LLC v. State*, 169 Wn.2d 118, 233

---

<sup>115</sup> Cable modem customers receive 5 routable IP addresses with service, and FTTH users get 1,

<sup>116</sup> Imagine a public school being declared as “surplus” and privatized; but, in fact students still in attendance, only forced to pay whatever tuition of lunch program charges the private company requires.

<sup>117</sup> Under RCW 35.94.040, the System itself is required for “providing continued public utility service.”

1 P.3d 871 (2010) , *Hederman v. George*, 35 Wash.2d 357, 362, 212 P.2d 841 (1949); *State v. Nw.*  
2 *Magnesite Co.*, 28 Wash.2d 1, 26-27, 182 P.2d 643 (1947).

3 The City’s authority in exercising its proprietary power is limited. Tacoma may not act  
4 beyond the purposes of the statutory grant of power, *State ex rel. PUD 1 v. Wylie*, 28 Wash.2d  
5 113, 182 P.2d 706 (1947), or contrary to express statutory or constitutional limitations.  
6 *Metropolitan Seattle v. Seattle*, 57 Wash.2d 446, 459-60, 357 P.2d 863 (1960);

7 "Ultra vires acts are those done wholly without legal authorization or in direct violation of  
8 existing statutes." *Metro. Park Dist. of Tacoma v. State*, 85 Wash.2d 821, 825, 539 P.2d 854 (1975)

9 Click!’s public broadband system provides a valuable and “effective” way for TPU customers  
10 to connect to the Internet. Without Click!, “continued effective utility service” is impossible.  
11 Circumventing this process is a substantive violation of the statue and *ultra vires* act., rendering the  
12 contract void ab initio. *Failor's Pharmacy v. Dep't of Soc. & Health Servs.*, 125 Wash.2d 488, 499,  
13 886 P.2d 147 (1994) This “right to vote” prevents corrupt disposal of public assets. Failure to allow  
14 the vote is an ultra vires action.

15 “Historically, the unauthorized contracts of both corporate and governmental  
16 entities, which by their nature represent the interests of groups of individuals,  
17 have been rendered void and unenforceable under the ultra vires doctrine.” *Noel*  
18 *v. Cole*, 98 Wash.2d 375, 655 P.2d 245 (1982).

19 Also, “where the procedure followed has not been in accordance with law, proceedings had  
20 thereunder must be held void,,” *Jones v. City of Centralia*, 157 Wash. 194, 289 P. 3, (1930), and,  
21 “the lease here in question was void ab initio, and that the warrants issued in payment  
22 therefor are invalid, because both the making of the lease and the issuance of the  
23 warrants, without the assent of the voters, were ultra vires of the town council.” *See*  
24 *State v. Town of Newport*, 70 Wash. 286, 126 P. 637, (1912)

25 The doctrine of ultra vires applies to governmental action to "protect the citizens and taxpayers  
26 from unjust, ill-considered, or extortionate contracts, or those showing favoritism" *see 10 E.*  
27 *McQuillin*, Municipal Corporations § 29.02, at 200 (3d ed. 1981)

28 A municipal election cannot be avoided in conveying a going concern. Vesting a municipal  
29 utility’s telecommunications system, with in-service assets, active customer accounts, under  
30 surplus, is fundamentally a legal question of statutory interpretation. No factual issues require  
31 determination. Privatization removes all public oversight of operations and rates. As a sale,  
32 lease, and/or disposal of Click! Mr. Shook is entitled to the relief requested.

33 **I. Good Public Policy Prevents Ultra Vires Act Circumventing People Right to Vote.**

34 Plaintiff Mitchell Shook’s Motion For Partial  
35 Summary Judgement. NO. 19-2-11506-3

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

1 The right to vote is curative of all ills and the fundamental basis of all democracy.. See  
2 *Madison v. State*, 161 Wn.2d 85, 98, 163 P.3d 757 (2007). A vote is mandatory in this case.  
3 Preventing the ultra vires destruction of that right is good public policy.

4 Council’s authority is expressly limited, by extraordinary Charter and state statutory  
5 requirements for a public vote. Express authority is in the electorate. Circumventing the law  
6 cannot be validated. The matter must be “submitted to the voters of the city for their approval or  
7 rejection at the next general election.”

8 If Click! is surplus, any private company could pilfer the public treasury by deploying large  
9 campaign contributions to sway policymakers into privatizing utility assets. No such loophole  
10 should be opened by the Court. Protecting the people’s property from plunder and preserving  
11 them for the people who paid for them, is the purpose of the policies in RCW 35.94. The Court  
12 would be well informed by taking judicial notice of the fact that municipal utility ownership  
13 (“MO”) has always faced fierce opposition and criticism from entrenched powerful private  
14 interests facing municipal competition. <sup>118</sup> (Shook Decl. 12/12/19, -Part II, Ex. 67 )

15 When all the facts are considered together, the business plan, the Ordinance establishing  
16 Click!, the abundant statutory and judicial authority cited in City’s 1996 and 1997 Memorandum  
17 for the Summary Judgement, the legislative intent and history of RRS §9512 in Chapter 35.94  
18 RCW, the common definitions of “system,” “utility,” the bare fact Click! is owned and operated  
19 by a utility, taxed as a utility, provides essential service to 35,000 active accounts, earns \$25  
20 Million annually in revenue, has significant brand recognition, for all these reasons, Click! is  
21 obviously a municipal utility system providing the same services for which it was established.

22 The surplus resolution has every *appearance of having been made to circumvent the*  
23 *provision of Chapter 35.94 RCW*. It is procedurally *ultra vires*. The public’s investment in these  
24 assets must be protected, especially from the very same powerful private interests who opposed  
25 the creation of the system in the first place and would profit from privatization of these assets.<sup>119</sup>

26 <sup>118</sup> Consider the contemporary opposition, in 1917 and 1925, from private municipal rail, gas, telephone,  
water and power companies at the time Chapter 35.94 RCW and the Tacoma City Charter were written.  
Propaganda published at the time demonstrate the lobbying tactics, and motives, of those opposing to the  
hated “MO” (municipal ownership). For examples, see Shook Decl., 12/12/19 PART II Ex. 67.

<sup>119</sup> Thanks in large part to substantial lobbying efforts, twenty-one states have legislative barrier to  
municipal broadband networks Shook Decl. 12/12/19, Ex. 46, Pg. 601. Casting a Wider Net: How And  
Why State Laws Restricting Municipal Broadband Networks Must Be Modified. Many Communities see  
existing broadband offerings not meeting needs and are building municipal broadband networks.

When private companies cannot, or will not, deliver the essential infrastructure required for participating in modern society, municipalities must have the right to take such important matters into their own hands, as the citizens of Tacoma did, over 20 years ago, by creating, arguably, the nation’s first municipal broadband public utility system.

Voters can choose to “privatize” their municipal broadband telecommunication network, if they so desire. The law gives them that right and also spells out the process, including an approving vote of the people, required to accomplish it.

Defendant’s surplus declaration skirts the law and this Court must prevent disposal of an entire utility system without a vote of the people. Such a determination supports important public policy and protects voter rights.<sup>120</sup>

The laws of 1917 plainly encompass telecommunication systems such as Click!. On its face, the statute is not ambiguous. The people’s assets are serving a useful public purpose and require protection from wrongful privatization. Government officials are “trustees” and the electorate’s right to vote ensures accountability. Privatization requires a vote of the people.

**Conclusion**

For the forgoing reasons, the Court should grant Mr. Shook’s motion and declare City’s surplus resolution ultra vires

Respectfully submitted this 12<sup>th</sup> day of December 2019.

DARREL BOWMAN,  
Plaintiff,  
v.  
CITY OF TACOMA,  
Defendant.

**NO. 19-2-11506-3**

**PLAINTIFF MITCHELL SHOOK'S  
RESPONSE TO DEFENDANT'S MOTION  
FOR SUMMARY JUDGMENT**

MITCHELL SHOOK,  
Plaintiff Pro Se,  
v.  
CITY OF TACOMA,  
Defendant.

I. INTRODUCTION

The definition of “public utility” is found in the Laws of 1917, House Bill 337, or Remington RRS § 9512 -9514, (“§ 9512”) now Chapter 35.94 RCW, titled: “An Act authorizing cities and towns to lease or sell any municipally-owned” utilities.<sup>1</sup> Providentially, Legislators provided a list of “utilities” protected from privatization by the public vote. The long list included “telegraph and telephone lines and plants and any other . . . system similar or dissimilar in character.”<sup>2</sup>

CHAPTER 137.

[H. B. 337.]

SALE OR LEASE OF PUBLIC UTILITIES OWNED BY CITIES OR TOWNS.

AN ACT authorizing cities and towns to lease or sell any municipally-owned water works, gas works, electric light and power plants, steam plants, street railway plants and lines, telegraph and telephone lines and plants and any other municipally-owned public utility, or public utility system similar or dissimilar in character.

Section 1 provided:

It is and shall be lawful for any city or town in this state now or hereafter owning any water works, gas works, electric light and power plant, steam plant, street railway line, street railway plant, *telephone or telegraph plant and lines*, or any system embracing all or any one or more of such works or plants or any similar or dissimilar utility or system, to lease for any term of years or to 'sell and convey the same or any part thereof, with the equipment and appurtenances. . . (emphasis added)

In 1945, this long list of municipally-owned utilities was “rewritten for brevity” by the Code Committee. <sup>3</sup> This “abbreviation” removed “telephone or telegraph plant and lines,” along with the long list and the emphatic language, “any similar or dissimilar utility.” <sup>4</sup>

Even broader language was substituted, with “any public utility works, plant or system owned by it or any part thereof. . .” With this one abbreviation, the “Laws of 1917” entered the RCW under Chapter 80, see image below. That language remains unchanged today.

<sup>1</sup> Passed by the Senate on March 6, 1917 and approved by the Governor March 15, 1917.  
<sup>2</sup> Shook Decl. 12/30/19, Ex.81, Reviser's Notes Volume 2, Revised Code of Washington, 1946, At 80-7, (stating RRS § 9512 was "rewritten for brevity.")  
<sup>3</sup> Shook Decl. 12/30/19, Ex. 81, Laws of 1942, Ch. 252, Sec. 1. (“continuing Code Committee with full power of revision and codification of the laws.”)  
<sup>4</sup> Important to note, because “Telegraph and Telephone” later becomes “Telecommunication” and the Ordinance creating Click!, and Court cases approving it, created a “Telecommunication System.”

CHAPTER 80.12  
SALE OR LEASE OF MUNICIPAL UTILITIES

Sections

- 80.12.01 Authority to sell or let.
- 80.12.02 Procedure.
- 80.12.03 Execution of lease or conveyance.

80.12.01 A city may lease for any term of years or sell and convey any public utility works, plant, or system owned by it or any part thereof, together with all or any equipment and appurtenances thereof.

80.12.02 The legislative authority of the city, if it deems it advisable to lease or sell such works, plant, or system, or any part thereof, shall

In 1985, the terms “*Telegraph and telephone*” were broadly replaced by the modern term “*Telecommunications*.”<sup>5</sup> Consequently, Chapter 35.94 (“Laws of 1917”) now encompass “Telecommunication,” as a municipal “utility.” Click! is a “*municipally-owned*” telecommunication (“Telecom”) system, hence protected from privatization by the public vote.

**WASHINGTON LAWS, 1985**

**Ch. 450**

Sec. 17. Section 80.36.030, chapter 14, Laws of 1961 and RCW 80-36.030 are each amended to read as follows:

Such (~~telegraph or telephone~~) telecommunications company may appropriate so much land as may be actually necessary for its telecommunications line (~~of telegraph or telephone~~), with the right to enter upon lands

Try as they may to recast the facts, Defendant’s attempt to convert a cancelled pilot meter program into a surplus declaration over Click!’s entire telecommunication enterprise runs headlong into the undisputed material fact that Click! was expressly created, designed and built to fulfill the community’s pressing need for an advanced “Telecommunication System.”

Click!’s services would continue under privatization, therefore Click! is “*required for providing continued public utility service*.”<sup>6</sup> Given Click!’s system is “useful” and “*required*” for continued service, Click! is not surplus. Privatization requires a vote of the people.<sup>7</sup>

The careful planning and construction of Click! included costly investments to secure “Additional Capacity,” which Click! utilizes and relies on today. Click! paid for these improvements, and continues to pay more than its share.<sup>8</sup> Defendant asserts Click! was built for Tacoma Power’s (“Power’s”) abandoned pilot meter program. This is misleading and wrong.

<sup>5</sup> Shook Decl. 12/12/19, Ex. 61, (examples of substitution). See Shook’s MPSJ, Pg. 10. See also Laws of 1985, Ch. 450, Senate Bill No. 3305, Pgs. 1978 -1995 (examples).

<sup>6</sup> RCW 35.94.040 limits surplus, with: “and is not required for providing continued public utility service.”

<sup>7</sup> Legislative intent for surplus under the Laws of 1917 is found in the PUD laws of 1945.

<sup>8</sup> See Shook Decl. 12/30/19, ¶ 1, (shared costs), E.g. Ex. 76, Operational Summaries (depreciation costs).

1 Defendant has substituted its judgment upon matters within the province of the City's  
2 Freeholders and State Legislators, who long ago determined the right to dispose of Tacoma's  
3 municipal utility assets rests in the electorate. There is no justification for Defendant's attempt to  
4 circumvent laws placing an express limitation on City's authority.

5 Citizens of Tacoma are not unique in reserving the right to vote on disposal of their municipal  
6 utility assets, *see Clark v. City of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d 669

7 [W]hen the voters of South Haven granted the privilege to generate power, they  
8 were not content to divest themselves of every managerial function normally  
9 associated with the operation of a business concern. By their city charter they  
10 have retained express power over the discontinuance of their public utility. The  
11 contract in question has the effect of violating section 13.5 of the charter for the  
12 city of South Haven and is therefore void unless approved by the voters as  
13 required by the charter."

14 Click! ("System") was created and funded as a "utility." The City's detailed 1996 plan, for a  
15 municipally-owned advanced telecom system, was a revolutionary and controversial concept.  
16 Authority to establish and fund the utility was blessed by two Court Orders.<sup>9</sup> Click! was born,  
17 built, bought and paid for as a utility system.<sup>10</sup> Municipal competition was divisive when first  
18 proposed.<sup>11</sup> It remains controversial across our nation today.<sup>12</sup> Power Superintendent at the  
19 time, Steve Klein, described the opposition in those early days,

20 My sense -- and this is my sense when I was there, and it's fairly accurate -- is the  
21 people in Click were wonderful. The service was wonderful. It was a local  
22 utility trying to do and doing good. How do you attack something like that? And  
23 so basically the opposition came up with, well, how do you attack it? You make  
24 people feel like they're being ripped off. And so every so many years, this theme  
25 would build up again, and here -- here it was again. (Shook Decl, Ex. 75, Pg. 19)

26 <sup>9</sup> In *City of Tacoma v. Taxpayers and Ratepayers of Tacoma*, 96-2-09938-0. Superior Court issued two  
orders, one authorizing the System (1996 Order), the other authorizing utility bonds to fund it (1997  
Order). Taxpayers argued Click! was general government's obligation, and a public vote was required to  
fund the System. City prevailed, arguing the System was a utility and must be funded by utility bonds.  
Relying on that decision, for 20 years, City is legally and equitably estopped from alleging otherwise.

<sup>10</sup> Shook Decl. 10/30/19, ex. 11, The enabling Ordinance 25930, creating Click!, cited authority in RCW  
35.95.020. Also, in Section 1.3, it cited the City Charter (as authority for funding Click! as a "utility."  
("Charter § 4.1 The City shall possess all the powers granted to cities by state law to construct, condemn  
and purchase, purchase, acquire, add to, maintain, and operate").

<sup>11</sup> Nineteen states have laws restricting municipalities to from establishing telecommunication utilities,  
such as Click!. The Supreme Court confirmed state authority to preempt municipal competition in *Nixon v.*  
*Mo. Mun. League*, 541 U.S. 125, 140-41 (2004). The FCC attempted to preempt such state laws, but was  
overruled in *Tennessee v. FCC*, 832 F.3d 597, 610 (6th Cir. 2016).

<sup>12</sup> Shook Decl. 12/30/19, Ex. 69, Broad-Banned: The FCC's Preemption of State Limits on Municipal  
Broadband, Vol. 68 Emory L.J. 407 (2018). Municipal utilities threaten incumbent monopoly's profits  
("Broadband Trusts"), The Broadband Trusts lobby fiercely to preserve their entrenched market power.

1 Presenting no issue of material fact, feigning confusion over the meaning of utility, Defendant  
2 urges we harmonize Chapter 35.94 RCW’s clear language with Chapter 35.92, and search in vain  
3 for imagined support in three unrelated cases, *Issaquah, King County* and *Clark*.<sup>13</sup> Yet, the  
4 meaning of “public utility” and Charter §4.6 is fully well known to Defendant, as confirmed by  
5 Defendants’ own Resolution U-10828 citing the vote requirement, here: <sup>14</sup>

6  **AMENDED RESOLUTION NO. U-10828**  
7 1 A RESOLUTION relating to Click! Network; authorizing Click! to prepare a  
8 2 business plan to provide, in addition to retail cable television, retail  
9 3 internet services including voice over data internet (“VoIP”) protocol,  
10 20 commercial broadband and Gigabit service (“Retail Services”).  
11 21 WHEREAS the City Charter Section 4.6 requires a vote of the people  
12 22 before the City may sell, lease, or dispose of any utility system, or parts thereof  
13 essential to continued effective utility service, and

11 Defendant knows the definition of utility, and that the laws protecting municipally-owned  
12 utility assets from disposal require a public vote.<sup>15</sup> This Court can do justice, by upholding the  
13 law and reminding them of their solemn duty on this crucial public policy matter. *See Fondren* <sup>16</sup>

## 14 II. COUNTERSTATEMENT OF FACTS

15 Shook incorporates herein by this reference all facts set forth in this Motion and Declaration  
16 in Support, and in Plf.[’s] Motion for Partial Summary Judgment (“MPSJ”), and Mo. for TRO,  
17 and all declarations filed in this matter. Following is a summary of facts relevant to Def[’s]  
18 arguments in response to Defendant’s cross MPSJ.

19 Click! is a self-described “Telecommunications System,” providing competitive Telecom  
20 services, as shown in this 2001Click! press release:<sup>17</sup>

21 **July 24, 2001**  
22 Click! Network is an operating section of Tacoma Power and is the nation’s largest municipally  
23 owned telecommunications system. Click! provides competitive telecommunications services in  
24 the City of Tacoma, including cable television, high-speed data transport and Internet services.  
More information about Click! services is available at [www.click-network.com](http://www.click-network.com)  
or by calling 253-502-8900.  
**Contact:** Diane Lachel, 253-502-8537; Cyndi Wikstrom, 253-502-8763

25 <sup>13</sup> Def.[’s] MSJ, Pg. 14. *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980), *King County v. King*  
*County Water Districts et. al.*, Wash. No. 96360-6, Slip Op. (December 5, 2019). *Clark v. Olson*, 177  
26 Wash. 237 (1934).

<sup>14</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. ( Def.[’s] Resolution citing public right to vote. ).

<sup>15</sup> “we do not construe a statute that is unambiguous.” *Food Servs. of Am. v. Royal Heights, Inc.*, 123  
Wn.2d 779, 784-85, (1994).

<sup>16</sup> *Fondren v. Klickitat County*, 79 Wn. App. 850, 856, 905 P.2d 928 (1995) (decisions of the State  
Supreme Court are binding on all lower state courts). *See also, Bremerton Municipal League v. Bremer*,  
130 P.2d 367, 15 Wn.2d 231 (Wash. 1942).

<sup>17</sup> Shook Decl. 12/30/19, Ex. 83. (taken from Click! website).

1 Click! was carefully built, based on an extensive “Telecommunications Study” and Business  
2 Plan to provide crucial telecommunication services for the community. Click!’s vital services are  
3 not rendered “surplus” by a failed pilot meter program.

4 Considerable investment was made in the additional equipment and infrastructure needed for  
5 Click!’s essential system, to create the vital services the community relies on. Over \$69 million  
6 was appropriated in 1997 alone.<sup>18</sup> Approximately \$200 million in historical costs are invested in  
7 Click!’s System.<sup>19</sup> *E.g.* Some of Click!’s core routers cost over \$1 million each.<sup>20</sup>

8 Click!’s services are enjoyed by governmental, commercial and residential customers alike.<sup>21</sup>

9 Before embarking on this major undertaking, Tacoma Power pulled together a  
10 panel of fourteen experts from an array of disciplines to review and pass on a final  
11 business plan. That plan, which was given the stamp of approval by the panel,  
12 called for retail and wholesale applications.<sup>22</sup>

13 As the Telecommunication Study concluded, “*One could hope. . .*”<sup>23</sup>

14 [T]he local market has a growing need for better telecommunications access.  
15 Despite growing local demand, the incumbent wire line service providers have  
16 stated that their investments in the local infrastructure will either slow without  
17 significant rate increases or be halted all together. *One could hope* that other  
18 companies would step forward and create a modem telecommunications system  
19 throughout our community but the prospects for that occurring appear dim.

20 Click! was built out of necessity, as an alternative to the incumbent monopoly, who refused  
21 to upgrade their “*crummy*” system and provide the telecom services Tacoma’s policymakers  
22 believed were required for economic growth in the information age.<sup>24</sup>

23 Click! provides “lit” wholesale telecommunication service.<sup>25</sup> It enables retail ISP partners to  
24 provide BIAS.<sup>26</sup> Cable modems are owned by Click!’s ISP partners, or by the ISP’s customers,  
25 the “end-users.”<sup>27</sup> <sup>28</sup> On Click!’s DOCSIS, coaxial, portion of telecom platform, Click! installs

26 <sup>18</sup> Shook Decl. 12/30/19, Ex. 85 Tacoma Ord.#26141, 10/28/97, ( additional \$67 million funding ).

27 <sup>19</sup> Shook Decl. 12/30/19, Ex. 75, Pg. 1 Click! Asset Study, 3/18/13, by Rates, Planning & Analysis Dept.

28 <sup>20</sup> Shook Decl. 12/30/19, ¶ 2. Ex. 73. (Board’s Cisco CRB-8 Resolution U-10884, router \$1,034,100).

29 <sup>21</sup> Shook Decl. 12/12/19 Ex. 64 ( Click! provides data-transport and broadband to Tacoma’s Libraries).

30 <sup>22</sup> Shook Decl. 12/30/19 Ex. 70, (“Creating Capacity and Competition in Broadband Telecommunications:  
31 The City of Tacoma’s Initiative,” April 2000. Mayor Baarsma and Prof. Ross Singleton. ).

32 <sup>23</sup> Shook Decl. 10/30/19. Ex. 10, at Pg. 186 of 398, (Conclusions of Telecommunications Business Plan).

33 <sup>24</sup> Shook Decl. 12/30/19, Ex. 74. Pg. 12 (Superintendent Klein’s comment on “*crummy* system” and  
34 monopoly’s TCI’s attitude that City must consent to TCI’s terms or go “Jump in the Lake.” ).

35 <sup>25</sup> “Lit” means Click! provides all electronics, systems and technology required for the telecommunication  
36 system to transport data to and from all endpoints on the Internet for the ISPs customers.

<sup>26</sup> “BIAS” is Broadband Internet Access Service. Click! is “telecommunications inputs” or “transmission  
facilities” used to access the Internet. *Nat’l Cable & Telecom. v. Brand X.*, 54 U.S. 967, (2005)

<sup>27</sup> There are only two remaining ISPs operating on Click!, Advanced Stream and Rainier Connect.

<sup>28</sup> Click! provides wholesale FTTP, DOCSIS and Ethernet services. DOCSIS is “Data Over Cable Service  
Interface Specification”, a telecommunication standard for broadband data transfer over coaxial cables.

1 end-users' data outlets, provides network monitoring, maintenance, hosting and provisioning of  
2 DHCP services, assigns and manages IP addresses and DNS services, among many other things.

3 The ISPs provide their customers, the "end-users," tech support, Email, VoIP, web-hosting,  
4 spam and virus filtering, managed Wi-Fi services, and process customer's monthly payments.

5 Click! also provides a fully lit wholesale FTTP service. This symmetrical fiber optical Gigabit  
6 speed service uses no coaxial cable facilities.<sup>29</sup> With FTTP, Click! installs, operates and  
7 maintains all customer premise equipment required to make the FTTP services operational.<sup>30</sup>

8 Click! also provides Tacoma Public Libraries, and 100 other institutional customers, with  
9 Metro Ethernet service.<sup>31</sup> This provides a transparent data path, and involves no "change in the  
10 form or content of the information as sent and received."<sup>32</sup> It is a pure data transport service.

11 1. Click! is A "Telecommunications System" Not a Cable TV System.

12 Every Ordinance, Resolution, Franchise, Court Case, Contract, Federal, State and Municipal  
13 Code relating to the System, recognizes Click! is a "Telecom System."<sup>33</sup> See 47 U.S.C. Sec 153  
14 (53) "telecommunications services are treated as telecommunications services regardless of the  
15 facility used to provide them." Defendant's comparison of Click! to cable TV and citation to TV  
16 statutes and *Issaquah*, are irrelevant and outdated.<sup>34</sup> Telecom is NOT cable television.<sup>35</sup>

17 Click! is a telecom system, with two-way communication, capable of sending and receiving  
18 data, of the user's choosing, to and from all "end points" of the World Wide Web.<sup>36</sup>

19 Cable TV ("cable system") is a closed-off, "one way" system, with "closed transmission  
20 paths."<sup>37</sup> One-way capability is not telecom.<sup>38</sup> Compare 47 U.S.C. § 522(7), with 47 USC §  
21 153(50). Click!'s physical infrastructure, "the pipes," is a wire "communication system."<sup>39</sup>

22 <sup>29</sup> Fiber to the Premises, is fiber optic telecommunications directly to customers' premises.

23 <sup>30</sup> Shook Decl. 12/12/19, Ex. 57, Pg. 326/423. (Click! Network Role and Responsibilities).

24 <sup>31</sup> Shook Decl. 12/12/19, Ex. 64, Pgs.1, 2-9 (Tacoma Public Library Contract No. 16-01 ). Click also  
25 provides retail BIAS to the Libraries, which maybe a breach of the ISP's non-compete clause.

26 <sup>32</sup> 47 U.S.C. Sec 153(50) "the transmission, between or among points specified by the user, of information  
of the user's choosing, without change in the form or content of the information as sent and received."

27 <sup>33</sup> Shook Decl. 10/30/19, Ex. 6, (TPU Annual Report, describes "telecommunications system"), Ex. 11,  
28 (Ordinance creating Click!), Ex. 12, 13, (1996 and 1997 Orders affirming System and utility funding), Ex.  
29 17, (Installation Contract). Shook Decl. 12/12/19 Ex. 62, (Century Link Contract) Ex. 64 (Library  
30 Contract) Ex. 65. (County Franchise) *E.g.*, RCW 35.99.010 (1) ("Cable television service" means the one-  
31 way transmission to subscribers of video programming and other programming service and subscriber  
32 interaction, if any, that is required for the selection or use of the video programming. . .).

33 <sup>34</sup> See Def.[']s] SJM, Pgs. 13, 14, 15, 17, 18, and 21.

34 <sup>35</sup> *E.g.* RCW 82.04.065 (27) ("Telecommunications service" does not include television and video  
programming service). RCW 80.36.630 (State Law mirrors federal code. "Telecommunications" has the  
same meaning as defined in 47 U.S.C. Sec. 153.) Television is also expressly distinguished.

35 <sup>36</sup> Shook Decl. 12/12/19 Ex. 59, (Telecommunications definition by Mr. Dillon, retired Click! Manager).

1 As a telecom system, with vast underground facilities, as seen in the IRU, Shook Decl.  
2 11/1/19, Ex 29, 30. Click! is a “communication utility” by RCW 35.96.020’s definition,

3 **RCW 35.96.020**

4 “Communication utility” means any utility engaged in the business of affording telephonic,  
5 telegraphic, cable television or other communication service to the public in all or part of the conversion  
6 area and includes telephone companies and telegraph companies as defined by RCW 80.04.010.

7 RCW 35.96.020 provides “as defined by” RCW 80.04.010, where we see Click! is a utility. A  
8 Telecommunication Company,” to be precise, includes “every city or town.”

9 (28) “Telecommunications company” includes every corporation, company, association, joint stock  
10 association, partnership and person, their lessees, trustees or receivers appointed by any court  
11 whatsoever, and every city or town owning, operating or managing any facilities used to provide  
12 telecommunications for hire, sale, or resale to the general public within this state.

13 2. The Defendant’s “Pilot Meter” Program Is A Red Herring.

14 Click!’s assets are not rendered “surplus,” or “excess capacity” by Power’s abandoned meter  
15 program. That failed pilot program is unrelated to the community’s vital need for, and increasing  
16 usage of, Click!.<sup>40</sup> Data usage and revenues are rising. Click! generated \$695,919 in Data  
17 Transport and Broadband revenues in October 2018, increasing to \$768,573 by Oct. of 2019.<sup>41</sup>

18 The primary objective in creating Click! was to fulfill the community’s need for an alternative  
19 to the incumbent monopoly provider.<sup>42</sup> The pilot meter program was an afterthought, only  
20 developed in “the mid-2000s,” nearly 10 years after policymakers first envisioned the  
21 community’s pressing need for Click!’s system.<sup>43</sup> The community’s needs are only increasing.

22 Click!’s facilities continue fulfilling the original mandate, providing a competitive, publicly  
23 owned and operated alternative to the incumbent monopoly, TCI (now Comcast). Over 35,000  
24 loyal government, business and residential customer accounts continue to rely on Click! every  
25 day, including Pierce County, Tacoma Public Libraries and over 100 institutional customers.

26 <sup>37</sup> 47 U.S.C. § 522(7). (Cable System: a facility, consisting of closed transmission paths).

<sup>38</sup> 47 U.S.C. § 522(6). (Cable Service is one-way transmission to subscribers of video programming, and  
subscriber interaction for the selection or use of such video programming or programming service).  
*Compare with*, 47 USC § 153(50) telecommunications” means the transmission, between or among points  
specified by the user, of information of the user’s choosing.

<sup>39</sup> 47 USC § 153(59) “wire communication” or “communication by wire” means the transmission of ...  
pictures, and sounds of all kinds by aid of wire, cable, or like connection.”

<sup>40</sup> Shook Decl. 12/30/19, ¶ 4, Ex. 76. (Data usage and revenues over the System are increasing).

<sup>41</sup> Shook Decl. 12/30/19, ¶ 4., Ex. 76 (Operational Summaries for Oct 2018 and Oct 2019).

<sup>42</sup> Shook Decl. 12/30/19 Ex. 70. Mayor Baarsma and Professor Singleton’s Paper on Click! “Creating  
Capacity” (“The City built a broadband telecommunications system with the express purpose of providing  
competitive telecommunications services to businesses and residents within the City”).

<sup>43</sup> Tenzin Gyaltzen Decl. Pg. 3, ¶ 7. (“During the mid-2000s, Tacoma Power developed” smart meters.)

1 Click!'s enterprise and facilities are not surplus. They are functional, useful "additional  
2 capacity." <sup>44</sup> These are valuable, vital municipal assets. The sophisticated equipment, software,  
3 switches, fiber-optics, franchises, intellectual property, trademarks, IP addresses, customer  
4 accounts, contracts and "data pipes" are not "excess capacity." See, Shook Decl. 12/30/19 Ex. 70  
5 ("Additional Capacity" created). Also, Ex. 74 Pg. 3, ¶¶ 7, 8, and 9. (the business plan).

6 **§ 9512. Sale or Lease of Public Utilities.**

7 **It is and shall be lawful for any city or town in this state now or**  
8 **hereafter owning any water works, gasworks, electric light and power**  
9 **plant, steam plant, street railway line, street railway plant, telephone or**  
10 **telegraph plant and lines, or any system embracing all or any one or more**  
11 **of such works or plants or any similar or dissimilar utility or system, to**  
12 **lease for any term of years or to sell and convey the same or any part**  
13 **thereof, with the equipment and appurtenances, in the manner hereinafter**  
14 **prescribed. [L. '17, p. 573, § 1.]**

15 Right to vote was settled under *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231 (1942);  
16 *Bremer* guides the Court, under *Fondren v. Klickitat County*, 79 Wn. App. 850, 856, 905 P.2d  
17 928 (1995) (decisions of the State Supreme Court are binding on all lower state courts).

18 **III. ISSUES PRESENTED**

19 1. Are a municipal utility's functional telecommunications assets subject to the public vote  
20 requirements of Chapter RCW 35.94.020 ? Yes.

21 2. Is legislative intent in RCW 35.94.040 destroyed by City declaring a municipal  
22 telecommunication system "surplus," when such system is a going concern achieving revenues  
23 of \$25 million a year, and will be leased, turn key, to a private company for continuing the same  
24 utility services, to same utility customers, for up to 40 years, while City maintains reversionary  
25 interest in the valuable surplus utility assets? Yes.

26 **IV. EVIDENCE RELIED UPON**

This Response to Defendant's Motion for Summary Judgment is based upon all the pleadings  
and filings of record in the above-captioned matter, and including without limitation:

1) The 10/30/19 Motion for TRO and Declaration of Mitchell Shook; 2) The 11/1/2019  
Declaration of Mitchell Shook; 3) Shook's 12/12/19 MSJ and Declaration; 4) 12/30/19 Declaration  
of Mitchell Shook in Support of this Summary Judgement Motion.

---

<sup>44</sup> Shook Decl. 12/30/19, Ex. 85 Tacoma Ord.#26141, 10/28/97, providing additional \$67 million funding.

## V. ARGUMENT AND AUTHORITIES

Telecommunications is a public utility under federal, state and local law.<sup>45</sup> Telecom has been a regulated public utility since 1909 in Washington.<sup>46</sup> Even longer than electric power.<sup>47</sup>

Telecommunications (“Telecom”) companies are “utilities,” with authority rooted in Washington’s Constitution, Article XII, Section 19: Telegraph And Telephone Companies. “The right of eminent domain is hereby extended to all telegraph and telephone companies.”<sup>48</sup>

Defendant has conceded the public’s statutory right to vote, in Council’s own resolution.<sup>49</sup> *Lenci v City of Seattle*, 36 Wn. 664, 668 (1964). *Cf.* RCW 35.94.020.<sup>50</sup> (Council findings are presumed valid). Two decades ago Defendant argued Click! was a utility, in securing two Court Orders to build it; and, recently in *Coates*. City is equitably estopped from arguing otherwise.<sup>51</sup>

### **A. Telecommunication Assets are Public Utilities Under Chapter 35.94 RCW.**

Defendant argues the word “utility” and the term “public utility” are not “statutorily defined,” and urges us to harmonize RCW Ch 35.94 with Ch 35.92.”<sup>52</sup>

But the definition of “public utility” is provided by name, in the statute itself, in the long list of protected utilities.<sup>53</sup> The Committee’s abbreviation of § 9512, substituting that long list with the all-encompassing, “any public utility works, plant or system owned by it or any part thereof,” did *not* remove or change the definition of public utility. It’s still there, when you dig a bit.

Simply “rewritten for brevity,” there was no change in the law, as RCW 1.04.020 confirms “The previously existing laws shall control.”<sup>54</sup> In *Arnott v. Spokane*, 6 Wash. 442, (1893):

<sup>45</sup> In 47 U.S. Code Title 47, state at Chapter 80.36 RCW, local in Tacoma Municipal Code Title 16 B.

<sup>46</sup> Session Laws of 1909, Ch. 93. Sec. 3 Pg. 192, 196, (“authorize the commission to regulate telephone and telegraph companies and their rates and charges, to prevent discrimination and extortion by such companies; and to authorize the Railroad Commission of Washington to make all necessary rules.”).

<sup>47</sup> Electricity regulated by Laws of 1911, Ch. 117, Pg. 538, *See also* Shook Decl. 12/12/19 Ex. 36, Pg. 2.

<sup>48</sup> In 1985, the term “Telecommunications” widely replaced “telephone” and “telegraph” in Title 80 RCW *See generally* Laws of 1985. Ch. 450, Sec. 13, Pgs. 1978 -1995, *E.g.*, Shook Decl. 12/12/19 Ex. 61.

<sup>49</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. ( Def.[’s] own Resolution citing public right to vote. )

<sup>50</sup> Requires a public vote. “We will not read a statute in such a way as to render a provision meaningless. *Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008).

<sup>51</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20. Resolution is an express admission of a party-opponent, and assurance of promised of future action, with the government then failing to carry out those acts. *Munich v. Skagit Emergency Commc’ns Ctr.*, 175 Wn.2d 871, 288 P.3d 328, (2012)

<sup>52</sup> Def.[’s] MSJ., 12/12/19, Pg. 16, Ln.10.

<sup>53</sup> “If the statute is ambiguous, the courts must construe the statute so as to effectuate the legislative intent. In so doing, we avoid a literal reading if it would result in unlikely, absurd or strained consequences. *State v. Elgin*, 118 Wn.2d 551, 555, 825 P.2d 314 (1992).

<sup>54</sup> Laws of 1951 (“rule of rule of construction, in case of any omissions or inconsistency between any of the revised code as so supplemented or modified and the laws existing immediately preceding this enactment, the previously existing laws shall control”).

1 [W]here the mode of contracting is expressly provided by law, no other mode can  
2 be adopted which will bind the corporation. This principle results from the fact  
3 that municipal corporations derive all their powers from their charters.<sup>55</sup>

4 City is free to negotiate a sale/lease of Click!, but the statutory requirement for a public vote  
5 is inalienable. As *Arnott* says, the “mode of contracting,” is “expressly provided” in RCW 35.94.

6 1. Telecommunications And Electric Power Are Two Types of Utilities.

7 Power and Telecommunications (“Telecom”) are distinct utility services, often provided,  
8 managed and organized by a single municipal entity. The American Public Power Association,  
9 the “voice of community-owned utilities” that power 2,000 towns and cities nationwide, labels  
10 these entities as “Multiservice Utilities.”<sup>56</sup> TPU is a “multiservice provider,” with four utility  
11 services; water, power, rail and telecommunication. (Shook Decl. 12/30/19, Ex. 68, Pg.1).

12 Many public power utilities provide more than electric service for their  
13 communities; they might also manage the area’s water, wastewater, internet,  
14 waste, gas, and *telecommunications services*. For these utilities, being a  
15 *multiservice provider* brings opportunities in streamlining how work gets done,  
16 organizing the workforce, and giving back to the communities they serve.

17 Physically, Click!’s “*commercial network*” and TPU’s “*power communication network*” share  
18 a common fiber optic backbone, but even this “backbone” *is separated* into discrete “tubes,”  
19 with unique fibers separating the infrastructure of the two utility systems.<sup>57</sup>

20 Click!’s telecom system and Power’s electrical system offer distinct services, separate in  
21 both a physical and organizational sense, with distinct brands, websites, organizational  
22 structures, financial reports, monthly invoicing, employee newsletters and customer loyalty  
23 programs, etc. Even federal, state and local regulations differentiate the two systems.<sup>58</sup>

24 Click! was established for more than TPU’s needs.<sup>59</sup> By sharing common infrastructure,  
25 easements and rights of way, Click! and Tacoma Power maximize the value of their assets,  
26 generating operational synergies.<sup>60</sup> This was the original purpose of the System.<sup>61</sup>

24 <sup>55</sup> *Arnott v. City of Spokane*, 6 Wash. 442, (1893) citing 1 Dill. Mun. Corp. (4th Ed.) 449, (373);.

25 <sup>56</sup> APPA website ( Multiservice utilities: A one-stop shop for communities). <https://perma.cc/BF37-FN29>

25 <sup>57</sup> See Shook MPSJ, Pg. 26, discussion of fibers and “tubes.” *Also see*, Shook Decl. 12/12/19 Ex. 31, Pg. 4)

26 <sup>58</sup> Shook Decl. 10/30/19, Ex. 26 (Organizational Chart), Ex. 75 (Employee Newsletter), Ex. 76 (Financial Statements and Purple Perks Program). FCC regulates Click! and FERC regulates Power. As municipal utilities, Power and Click! are regulated under distinct sections of Tacoma’s Municipal Utilities Code.

<sup>59</sup> Shook Decl. 12/30/19 Ex. 70, -(City of Tacoma’s Initiative, April 2000. Mayor Baarsma).

<sup>60</sup> Shook Decl. 10/30/19, Ex. 12. *See also*, Shook’s MPSJ, Pg. 15, Ln. 12. ( Click!’s Nexus to power, diversifying TPU revenue, driving economic growth, offsetting costs for a system TPU needs anyway ).

<sup>61</sup> Shook Decl. 10/30/19, Ex. 12, Pg. 9, Memo. In Support Of City Of Tacoma’s MPSJ. ( “revenue to help offset the costs of constructing and operating the Telecommunications System.” )

1 **B. Creation of Click!. The Community's Need for a Telecommunication Utility System.**

2 Click! was established as a municipal communication utility, with a clear mandate to  
3 provide commercial communication services. The extensive Telecommunication Study and  
4 Business Plan prepared in creating Click!, and other historical evidence, demonstrate Click! was  
5 created for much more than supporting Tacoma Power's aborted pilot meter program.<sup>62</sup>

6 The circumstances and events surrounding the creation of Click! reveal Tacoma's desperate  
7 need for a municipal telecommunication utility and explain why Click! was established.

8 The significance of the utility system's creation is revealed in a 1998 letter, from TPU  
9 Director Crisson to City Council, along with his attached MSNBC article describing the City's  
10 communications project. Director Crisson said, "I know the City Council, as well as the Board,  
11 will be proud of this national coverage." The MSNBC article was titled, "*Tacoma Power to give  
12 TCI a jolt. Municipal utility prepares to jump into cable.*"<sup>63</sup> Some excerpts:

13 While AT&T officials congratulate themselves on their \$48 billion purchase of Tele-  
14 Communications Inc., they might want to keep an eye on the Northwest corner of  
15 TCI's sprawling cable empire. Tacoma Power, the city-owned utility of Tacoma,  
16 Wash. will soon turn on **a \$100 million broadband communications network** that  
17 will enable it to sell cable TV and Internet access as well as water and electricity -  
18 making it a direct competitor to TCI.

19 IF THE PROJECT is successful, it is sure to encourage more municipal utilities to  
20 take on TCI and other cable monopolies across the country. The effort is already  
21 getting attention from local governments weary of residents' complaints about **high  
22 prices and poor service from their incumbent cable provider**. Tired of waiting for  
23 new competitors to shake things up, many cities and towns are thinking about either  
24 constructing their own cable network, or encouraging their local utility to do it for  
25 them. Tacoma Power's Click! Network is the largest such effort to date.

26 **Concerned cable industry officials** are launching a public relations counter-offensive,  
citing studies that question the viability of such projects and complaining that access  
to public funds give government-backed systems an unfair competitive edge.

Click! was established for more than supporting Tacoma Power's pilot meter program. The  
news article's very premise, "it is sure to **encourage more municipal utilities** to take on TCI and  
other cable monopolies across the country," shows Click! was not simply supporting a future  
pilot meter program. That "**Concerned cable industry officials** are launching a public relations

---

<sup>62</sup> Shook's MPSJ., Section B, pages 5, 6 and 7.(Additional not "excess" Capacity). Shook Decl. 10/10/19, Ex. 10, (Excerpts from Business Plan and Telecommunication Study).

<sup>63</sup> Shook Decl. 10/30/19 Ex. 14. (Mr. Crisson's Letter to City Manager Corpuz, MSNBC Article).

1 counter-offensive,” demonstrates Click! was controversial for, famously, pioneering the public  
2 broadband movement now sweeping our nation and the world. <sup>64</sup> So much more than meters. <sup>65</sup>

3 In April 2000, Mayor Baarsma and Dr. Singleton, of University of Puget Sound, authored a  
4 paper on Click!, Creating Capacity And Competition In Broadband Telecommunications: The  
5 City Of Tacoma's Initiative. <sup>66</sup> Excerpts from their paper show Click! was not about meters: <sup>67</sup>

6 ABSTRACT: This paper describes the process by which the City of Tacoma,  
7 Washington came to build an open access, broadband telecommunications system  
8 designed to promote effective competition in the provision of Internet and other  
9 telecommunications services.

10 The City of Tacoma has designed and built a broadband telecommunications  
11 system with the *express purpose of providing* competitive telecommunications  
12 services to businesses and residents within the City.

13 But before making the multi-million-dollar investment, the utility's director  
14 requested that Tacoma Power's citizen oversight body, the Utility Board, authorize  
15 an outside review by a consultant group--the Stanford Research Institute.

16 The Board approved and soon SRI's consultants came back with an interesting  
17 idea: Why not *invest more dollars* to expand the fiber optic pipe? Then Tacoma  
18 Power could offer its customers an array of services--cable television, competitive  
19 Internet access, telephony and data transport. The Telecommunications Act signed  
20 into law by President Bill Clinton in 1996 had, in fact, given Tacoma Power this  
21 option by eliminating barriers to entry into the telecommunications market. This  
22 led Tacoma Power's superintendent to proclaim: "The new law afforded us the  
23 opportunity to embark on a broader strategy. . ."

24 The next step was to conduct a marketing survey. The findings . . . forecast over  
25 33,000 cable customers in three years of operation. Within ten years time, the  
26 entire investment of \$100 million would be paid off. . . . But before embarking on  
this major undertaking, Tacoma Power borrowed once again from the private  
sector. The utility pulled together a panel of fourteen experts from an array of  
disciplines to review and pass on a final business plan. That plan, which was given  
the stamp of approval by the panel, called for retail and wholesale applications.

The political dynamics revolving around Tacoma Power's plans to build a fiber  
optic system soon changed once the management team broadened their strategy to  
include an array of telecommunications services. The manager of the incumbent  
cable provider (TCI) sent a scathing critique of the utilities' business plan to the  
Tacoma City Manager. The twenty-one page letter ended with the warning:

<sup>64</sup> Shook Decl. Ex. 74, Pgs. 18, 20. Mr. Klein (political attacks on Click! formation -Hendery & Crowley).

<sup>65</sup> See, e.g., Shook Decl. 10/30/19, Ex. 18, A Sampling of Municipal Broadband Utilities in the USA. See also Shook Decl. 10/30/19 Ex. 21, Pg. 20 Appendix 1: (U.S. Municipalities with Broadband Networks, Report from The Executive Office of the President. Benefits Of Competition And Choice For Community Development And Highspeed Internet Access. (January 2015)). Compare with, Shook Decl. 12/12/19, Ex. 60, (Australia's NBN, open access project passes 11 million homes).

<sup>66</sup> Mayor Baarsma was a professor at the University of Puget Sound and on City Council at the time, even voting on the creation of Click! in 1996. Shook Decl. 10/30/19, Ex. 11 Pg. 33, or 229/389.

<sup>67</sup> Shook Decl. 12/30/19 Ex. 70, "Creating Capacity and Competition in Broadband Telecommunications: The City of Tacoma's Initiative," April 2000. Even the title indicates Click! was "created capacity."

1 "(Tacoma's policy makers should)...pause and let the euphoria of the benefits you  
2 may now expect be replaced by a realistic appreciation of the *pitfalls and risks*  
3 *associated with municipal ownership* of what is traditionally an entertainment  
4 service provided by private enterprise." After numerous public hearings, two  
5 declaratory judgements from the state superior court, a plea from the cable  
provider's national president and an additional due diligence review by three  
outside consultants, the city policy makers moved forward with the \$100 million  
overbuild. (emphasis added).

6 The Professors' Paper shows the System's primary objective was a "broader strategy," the  
7 community's need for advanced telecommunication services. The prospect of \$100 million in  
8 Additional Capacity creating municipal competition was alarming to the incumbent, TCI, who  
9 warned Tacoma of "the *pitfalls and risks* associated with municipal ownership."<sup>68</sup> (*supra*)

10 In preparing the Business Plan, a detailed "Marketing Survey" was conducted, to study "The  
11 Current Business Market."<sup>69</sup> This Survey excerpt shows Click! was more than meters:

12 To help assess current business market support for advanced telecommunications  
13 services in the greater Tacoma area, Tacoma City Light pursued two avenues of  
14 consumer research: A telephone survey of 200 businesses, with 25 or more  
15 employees. . . This group represents a pool of "Potential Customers."

16 Based upon the results of 200 telephone interviews with medium to large Tacoma  
17 area businesses, the Potential Customer business market is on the brink of being  
18 ready for advanced telecommunications technologies. The money is there,. . .key  
19 findings show these customers account for more than \$5 billion dollars in annual  
20 revenues and 25,000 jobs. What's more, they currently spend over \$10 million  
21 dollars annually on telecommunications services. They perceive telecommunications  
22 links are extremely important to the success of their businesses, and many believe  
23 their telecommunications needs will increase rapidly, particularly for Internet access  
24 and local data networks.

25 As the Business Plan and Marketing Survey indicate, Click!'s creation was seen as vital for  
26 Tacoma to remain economically competitive and prosper.<sup>70</sup> Like the arrival of the Northern  
Pacific railroad in Tacoma in the 1870's, such infrastructure was considered essential for success  
in the digital era. A monopoly existed in Tacoma and policymakers wanted a better system and  
service. This was the primary reason for establishing Click!.

<sup>68</sup> Shook Decl. 12/30/19, Ex. 74, Pgs. 25, 28 ( TCI, later AT&T, President Leo Hindery opposed Click!'s creation, publicly scolded Superintended Klein and sponsored studies to discredit Click!

<sup>69</sup> See Shook Decl. 10/30/19, Ex. 10, Pg. 115/389, ( Market Demand Summary -Potential Market They are more concerned about reliability than price for their local phone service, and very concerned about getting quick response from any telecommunications vendor.).

<sup>70</sup> Shook Decl. 10/30/19, Ex. 10, ( "One of the most significant ways a community and its economic base are intertwined is through an area's infrastructure. As a result, the evolution of a community's economy often depends upon the investments it makes in its transportation system, power system, and-given the shift to the information age-its telecommunication system." (emphasis added).).

1 Defendant's MacGuffin, a failed pilot meter project, conceals the true purpose behind the  
2 creation of Click!'s System. In April 2000, five years before the pilot meter program, Price  
3 Waterhouse prepared a "Performance Review" for Click!, and said:<sup>71</sup>

4 Click! continues to be at the forefront among public and private utility  
5 telecommunications efforts. This position has brought considerable national  
6 recognition to Tacoma, and also significant tangible benefits. From a review of local  
7 press clippings, at least 400 new jobs, five building renovation projects, enhanced  
8 University of Washington and UPS academic programs, and several development  
9 projects are all linked to the development and presence of Click!. Establishing Click!  
10 prompted AT&T (TCI and Excite @home) to upgrade services to Tacoma residents  
11 much earlier than otherwise would have happened.

12 The success of Click! and its continuing value to the community depends on a team  
13 effort among business, civic and education leaders to create a unique region with  
14 considerable growth potential. The fiber/coax network is literally and figuratively the  
15 thread that ties them together and enables this potential. Working together, this team  
16 can leverage the Click! asset to attract major new businesses, create jobs, attract  
17 students to programs that provide the skills for those jobs and generally enhance the  
18 whole community.

19 This Review cites "significant tangible benefits" from leveraging Click! "to attract major  
20 new businesses, create jobs, attract students to programs that provide the skills for those jobs and  
21 generally enhance the whole community." Even telecommuting was cited in the original plan.<sup>72</sup>

22 There is no mention of Power's pilot meter program. In the revolutionary excitement of  
23 creating "America's Most Wired City," meters were not cited in the Performance Review,  
24 Business Plan, Marketing Study or other documentation relating to the creation of Click!.

25 Click! was revolutionary in 1996. All media reports, scholarly papers and professional  
26 evaluations, show that creating an advanced telecommunication utility system for the community  
was Click!'s primary purpose.<sup>73</sup> Click! was never "excess capacity." Click!'s assets were  
"additional capacity," purchased and installed to enable vital services. They remain essential for  
continuing to provide these same telecom ("utility") services today.

Notably, Tacoma's visionary investment in the System occurred 12 years before Congress  
made broadband a national priority with the Broadband Data Improvement Act in 2008, and

<sup>71</sup> Shook Decl. 12/30/19, Ex. 71, Pgs. 16, 17. ( Click! Network Financial Performance Review ).

<sup>72</sup> *E.g.*, Today Tacoma maintains a robust Commute Trip Reduction Program. Tacoma Municipal Code Section 13.15.020 (Z). "Teleworking/telecommuting" means the use of . . . technology to permit an employee to work from home. *See also* RCW 70.94.521 (automotive traffic is the major source of emissions of air contaminants), (reduce single-occupant vehicle commuting.) RCW 28B.130.005 (Intent. Telecommuting -mitigate the adverse . . . effects of auto dependency and traffic congestion.)

<sup>73</sup> Shook Decl. 12/30/19, Ex. 70 (Mayor's paper and newspaper article.) *also* Ex. 71, (Auditors Review).

1 providing §101 of the Act, codified in 47 U.S.C. § 1301.:

2 (1) The deployment and adoption of broadband technology has resulted in enhanced  
3 economic development and public safety for communities across the Nation,  
4 improved health care and educational opportunities, and a better quality of life for all  
5 Americans.

6 (2) [P]rogress in the deployment and adoption of broadband technology is vital to  
7 ensuring that our Nation remains competitive and continues to create business and  
8 job growth.

9 **C. Click! is Built on “Additional Capacity” Not “Surplus Capacity”.**

10 Click! was established as a “separate system” and is a separate “department.”<sup>74</sup> Click! has its  
11 own unique brand, loyal customers, annual sales of \$25 million a year, and assets coveted by a  
12 private entity. The City has every right to organize its utility departments as a “multiservice  
13 utility.”<sup>75</sup> For organizational convenience, Click! is a department of Tacoma Power.

14 Ignoring Click!’s vibrant and successful enterprise, Defendant argues Click! is “excess  
15 capacity,” claiming Click! is not essential for Tacoma Power’s purposes.<sup>76</sup> *But*, Power’s needs  
16 are not the issue. Click! was never intended to be “*essential*” for Power’s purposes.

17 In TPU’s lobby, Click! has a separate customer service counter. Click! is a separate  
18 department and system, with a life and brand of its own. Click! is essential to Click! end-users.<sup>77</sup>

19 The enabling Ordinance 25930 provides: “The City **hereby creates** a separate system of . . .  
20 City Light.”<sup>78</sup> Click! was born as a “Separate System.” Click! is “Telecommunication System.”

21 **ARTICLE II**  
22 **FINDINGS; ESTABLISHMENT OF THE TELECOMMUNICATIONS PROJECT AS A**  
23 **SEPARATE SYSTEM; AND ADOPTION OF PLAN AND SYSTEM**  
24 **Section 2.1. Establishment of Telecommunication System.** The City hereby creates a  
25 separate system of the City's Light Division to be known as the telecommunications system  
26 (the "Telecommunications System"). The public interest, welfare, convenience and necessity

Click!’s “separate system” is essential to Click! users, who depend on the infrastructure in  
everyday life.<sup>79</sup> Click! was established to fulfill the community’s need for an advanced telecom

<sup>74</sup> Finance Dept, does not track performance of other Power divisions. Shook Decl. 12/30/19, ¶ 2.

<sup>75</sup> Tacoma has broad authority in organizing its utilities; but, cannot sell them without public vote.

<sup>76</sup> “Shouts” is more accurate, since the “Excess” phrase appears capitalized 35 times in Defendant’s brief.

<sup>77</sup> Shook Decl. 12/12/19, Ex. 42, Pg. 2.

<sup>78</sup> Shook Decl. Ex. 11, Pg. 8 (Article II creates a separate system, adopts Click! business plan.”

<sup>79</sup> RCW 43.330.532 [B]roadband is critical to full participation in society and the modern economy . . . by enabling access to health care, education, and essential services, providing economic opportunities, and enhancing public health and safety. *Also*, Shook Decl. 10/30/19, Ex. 21, Shook Decl. 12/12/2019 Ex. 37

1 system.<sup>80</sup> It is a municipal alternative to the incumbent monopoly provider, who, at the time,  
2 “could care less” about Tacoma.<sup>81</sup>

3 In 1996, when Click! was first proposed to Council, the incumbent monopoly, TCI (now  
4 Comcast), had no interest in upgrading their system. After repeated requests by the City, TCI’s  
5 attitude was, “*go jump in the lake.*” Power Superintendent Steve Klein recalled TCI’s attitude:<sup>82</sup>

6 [C]ity council, they're having a heck of a problem with the incumbent  
7 cable provider who still has the crummy system, refuses to upgrade it.  
8 And they don't come to the table to negotiate the franchise agreement.  
9 They can just tell the city government to jump in the lake. And if you  
10 don't like it, we'll just shut it -- we'll shut it down.

11 Monopoly incumbents can afford such cavalier arrogance.<sup>83</sup> Most consumers have no  
12 alternative for access. Monopoly and oligopoly control of broadband in America is the norm.  
13 FCC data shows nearly 85 percent of Americans have either one choice or no choice for speeds  
14 in excess of 100 Mbps.<sup>84</sup> This is why the FCC, FTC and DOJ closely regulate mergers of the  
15 powerful telecommunication conglomerates.<sup>85</sup>

16 Click!’s costly construction was never “excess capacity.” Council prudently and specifically  
17 resolved to provide “Additional Capacity,” with additional, incremental investment, funding  
18 equipment, abundant optical fiber, including dark fiber, and the skilled staff to cobble it all  
19 together.<sup>86</sup> required to create Click!’s essential services.<sup>87</sup> Click! was built to accommodate the  
20 community’s anticipated, ever-increasing, need for the data flow and for the explosive growth  
21 projected in the future.

22 On Click!’s website, Power Superintendent Steve Klein, the “Father of Click! Network,”  
23 explained the project’s origins and cited the “further review” that led to the additional investment  
24 in additional capacity for “expanding the network.” (Shook Dec. 12/12/19, Ex. 74, Pg. 8.)

25 <sup>80</sup> See generally, Shook Decl. 10/30/19, Ex. 23 (“[B]roadband is taking its place alongside water, sewer  
26 and electricity as essential infrastructure for communities”. Quoting USDA Report).

<sup>81</sup> Section 706(d)(1) defines “advanced telecommunications capability” as high-speed, switched,  
broadband telecommunications capability that enables users to originate and receive high-quality voice,  
data, graphics, and video telecommunications using any technology.

<sup>82</sup> Shook Decl. 12/30/19, Ex. 74, Pg. 12. (Power Superintendent’s Steve Klein deposition).

<sup>83</sup> Shook Decl. 12/30/19 Ex. 78, (monopoly power closely monitored. DOJ and FTC guidelines.)

<sup>84</sup> FCC, Annual Internet Access Services Report (2018), see also, FCC Fact Sheet Communications  
Marketplace Report GN Docket No. 18-231 Report; GN Docket No. 18-231 Ex. D-3.

<sup>85</sup> See AT&T-DIRECTV Order, 30 FCC Rcd at 9141, para. 20, 21; Comcast-NBCU Order, 26 FCC Rcd at  
4248, para. 24, (The FCC and DOJ, consider market power of incumbent and barriers to entry).

<sup>86</sup> Shook Decl. 12/30/19, Ex. 85 (City’s 1997 Emergency Res. for \$69 Million, includes telecom team).

<sup>87</sup> Shook Decl. 10/30/19, Ex. 21, Pg. 4, Ord.# 25930 (“WHEREAS, the City has determined that it is  
prudent and economical to provide *additional capacity* on such telecommunications system”).

1 Tacoma Power originally planned to build a fiber-optic network to control its  
2 substations. Further review indicated that expanding the network and offering a wide  
3 range of telecommunications services would benefit our customers and our  
4 community.<sup>88</sup>

5 Fiber must be activated, or “lit,” before it can be used to provide communication services.  
6 At great expense, TPU invested tremendous “additional” public treasury in providing the optical  
7 equipment, modulating electronics, equipment and staff necessary to light this fiber and make it  
8 capable of carrying services. There is nothing “excess” or surplus in Click!’s enterprise or fiber.

9 Power’s incremental investment to establish Click!, created a functional telecom system,  
10 addressing the community’s need for Broadband services. The “lit” fiber, and the currently  
11 unused dark fiber, are not “excess” capacity. These assets were intentionally included, as  
12 “*additional capacity*” in the original Ordinance and Business Plan. It is worth remembering  
13 Mayor Baarsma and Professor Singleton’s Paper, which described that incremental investment:<sup>89</sup>

14 *Why not invest more dollars to expand the fiber optic pipe?* Then Tacoma  
15 Power could offer its customers an array of services--cable television,  
16 competitive Internet access, telephony and data transport.

17 Click!’s assets are performing their intended purpose and function. They are useful and  
18 required for Click’s current and future needs in delivering essential services to the community.

19 The fact Click!’s fiber, both lit and dark, are included in the scheme, in exchange for \$2.5  
20 million a year, shows these are valuable assets. These fibers are not obsolete or surplus.<sup>90</sup>

21 Telecommunications has been a regulated public utility since the Pacific Telegraph Act of  
22 1860.<sup>91</sup> AT&T monopolized the industry for most of the 20<sup>th</sup> century.<sup>92</sup>

23 The Communications Act of 1934 created the FCC. AT&T’s monopoly was broken up by  
24 1983.<sup>93</sup> Congress recognizes telecom is an essential public utility.<sup>94</sup> In Section 706(a) of the

25 <sup>88</sup> Shook Decl. 12/30/19, Ex. 83, (“About us” description of Click! and historical screen shots of Click!’s  
26 website form the Wayback Machine, digital archive of the World Wide Web.).

<sup>89</sup> Shook Decl. 12/30/19 Ex. 70, Creating Capacity and Competition in Broadband Telecommunications.

<sup>90</sup> Click Business Transaction Agreement, Indefeasible Right of Use, or “Privatization Agreements.”

<sup>91</sup> See C. 137, U.S. Statutes 36th Congress, 1st Session, June 16, 1860, *also*, The FCC, formed by the  
Comm. Act of 1934. 47 U.S. Code § 151, § 601, took over wire communication regulation from the ICC.

<sup>92</sup> Shook Decl. 12/12/19, Ex. 49 Pg. 3. (Kingsbury Commitment did not hinder AT&T).

<sup>93</sup> Judge Greene’s opinion, *United States v. American Tel. and Tel. Co.*, 552 F. Supp. 131 (D.D.C. 1983).

<sup>94</sup> *See generally*, Shook Decl. 12/12/19, Ex. 31, Pg. 8, (We are approaching a new era of the Data Age,  
autonomous cars, humanoid robots, intelligent personal assistants, smart home devices, the world is  
undergoing a fundamental change, transforming our lives. Broadband connects us with friends and family,  
allows access to education, goods and services, and affects nearly every aspect of life.).

1 Telecom Act, 1996 (P.L. 104-104), Congress directs the FCC to encourage deployment of  
2 advanced telecom capabilities to all Americans on a timely basis.

3 Defendant argues Power is the only “real utility,” and Click! is just a silly old “cable TV”  
4 system, best viewed in the context of *Issaquah*. While Power did initially breathe life into the  
5 System, by funding Click!’s creation, Click! is a utility in its own right. Not a cable TV system.<sup>95</sup>

6 **D. Telecommunications is a Utility. A Monopoly or Separate Undertaking is Not Required.**

7 Defendant asserts the public has NO right to vote, if Click! is not a monopoly, a “separate  
8 undertaking,” or Title II regulated facility. All baseless arguments. *Contra*, Such “last mile”  
9 systems are effective “gateways,” with “bottleneck monopoly power” and all the “dangers this  
10 power poses.” *Turner Broadcasting System, Inc. v. FCC*, 512 US 622, 661 (1994)

11 This “monopoly power” was one of the reasons Click! was built. *See ante* Pg. 16, and Mr.  
12 Klein’s “Go Jump in The Lake” comment. Also, see Mr. Klein comment on limited pole space.<sup>96</sup>

13 1. Monopoly is Not a Prerequisite to Public Vote on Disposal of Community’s Assets.

14 Defendant argues Click! is not “a monopoly” and, therefore NOT deserving of the protective  
15 vote under RCW 35.94. Def. MSJ, Pg. 17. *Contra*, “Cable operators possess a local monopoly  
16 over cable households.” *Turner Broadcasting v. FCC*, 520 U.S. 180, 197 (1997).

17 Defendant argues public’s statutory right to vote is forfeited if Click! has a competitor. *But*  
18 *see* “[T]he question of whether or not a monopoly actually existed is not a controlling feature.”  
19 *State v. Kuykendall*, 137 Wash. 602, 609 (1926). *Cf.*, “It will readily be seen, then, that it makes  
20 ***no difference whether a monopoly existed.***” *Id.* at 610. (emphasis added).

21 Monopoly status is not a controlling feature in determining citizen’s right to vote. The Laws  
22 of 1917 provide a protective vote, regardless of a “monopoly.” Legislators knew from firsthand  
23 experiences, fresh in their minds, of dirty tactics deployed by private “Power Trusts,” who  
24 devoted armies of lobbyists and vast resources in destroying municipal utilities.”

25 Click! is protected by a public vote because its assets were paid for by the people and its  
26 property is devoted to public use. And because Legislators purposefully provided the Laws of  
1917 protected municipal utility property.<sup>97</sup>

<sup>95</sup> Shook Decl. 12/12/19, Ex. 59, Declaration of Terry Dillon.

<sup>96</sup> Shook Decl. 12/30/19, Ex. 24, Pg. 23 (US West and TCI had used up all available pole space.)

<sup>97</sup> Similarly, just as “purposefully,” policymakers provided “Additional Capacity” in building Click!. This investment must not be confused by defendant’s claim such investment was ever “excess capacity.”

1 Judge Bone explains why in his Letter, as reprinted in the Congressional Record in 1944. See  
2 generally Shook Decl. 12/30/19 Ex. 80.<sup>98</sup>

3 Tugboats, towboats, barges, silos, wharfs, warehouses, taxi cabs and pipelines are all “public  
4 utilities” because they are “devoted to public use,” not because they are monopolies.<sup>99</sup> Click!’s  
5 wires are *data pipelines*, “and no doubt” a public utility. In *State v. Kuykendall* it was found:<sup>100</sup>

6 [I]f in the beginning or during its subsequent operation the pipe line was devoted  
7 by its owner to public use, and if the right thus extended to the public has not been  
8 withdrawn, there can be no doubt that the pipe line is a public utility. *Kuykendall*,  
9 at 834

10 [T]he question of whether or not a monopoly actually existed is not a controlling  
11 feature; nor can courts know what considerations were pressed upon the  
12 Legislature to justify the passage of the act. It is enough for us to follow the  
13 holding in *Munn v. Illinois*, supra, where the court said: 'For our purposes we  
14 must assume that, if a state of facts could exist that would justify such legislation,  
15 it actually did exist when the statute now under consideration was passed. For us  
16 the question is one of power, not of expediency. If no state of circumstances could  
17 exist to justify such a statute, then we may declare this one void, because in  
18 excess of the legislative power of the state; but, if it could, we must presume it  
19 did.' As to the *propriety of legislation* in force within the scope of the legislative  
20 power the Legislature is the exclusive judge. (emphasis added).

21 Likewise, this Court must not question “*the propriety of legislation*” in § 9512, providing a  
22 protective public vote, preventing potential privatization of public utilities. It is a legislative  
23 prerogative. Neither can the Court question legislative intent in the definition of “surplus,” as  
24 “unserviceable, inadequate, obsolete, worn out or unfit to be used.”<sup>101</sup> Shook Decl. 12/30/19, Ex.  
25 80. Pg. 22 (“Power fight”).

26 Nothing in the statute requires a monopoly, although one nearly exists.<sup>102</sup> Property simply  
needs to be owned by the municipal utility and “useful.” Click!, with \$25 million a year in  
revenue is clearly performing that telecommunication purpose.

Consolidation in the telecom industry is highly scrutinized by the DOJ, FTC and the FCC to  
prevent market concentration.<sup>103</sup> Comcast’s 2015 bid for Time Warner Cable would have

<sup>98</sup> Shook Decl 12/30/19, Ex. 80, Pg. 7 (Homer T. Bone Letter, from Congressional Record, citing 1913  
“manipulation” of legislation by private power trusts, and Rep. Heinly’s “two lines” added to irrigation bill  
repealing City’s right to sell power outside the City limits). Pg. 23, (Judge Bone’s “Thorn Interview”.)

<sup>99</sup> *State v. Kuykendall*, 137 Wash. 602, 611 243 P. 834, (1926), “taxicab company was a public utility.”

<sup>100</sup> *Kuykendall*, at 611, Drawing on *Budd v. People*, 12 S.Ct. 468, 143 U.S. 517, 36 L.Ed. 247 (1892),  
quoting *Munn v. Illinois*, 94 U.S. 113, 24 L.Ed. (1877). As briefed in Plf. Shook’s MPSJ, Pg. 15.

<sup>101</sup> RCW 54.16.180 (represents clear legislative intent and definition of “surplus” for municipally-owned  
utility property.) See Shook’s MPSJ., Pgs. 24, 25, (detailed history of surplus statute).

<sup>102</sup> Tacoma suffers oligopoly, with two alternatives for BIAS, generally. Because of Click!’s existence.

1 consolidated 30 million subscribers.<sup>104</sup> Comcast unilaterally offered to divest nearly 4 million  
2 customers just in hopes of gaining approval for the deal. It was killed by DOJ scrutiny, anyway,  
3 seen as creating an “unavoidable gatekeeper for Internet-based services.”

4 2. A Separate Entity or Undertaking is Not Required For the Right To Vote.

5 Organizing Click! as a “Department” under Tacoma Power, or providing multiple utility  
6 services under one entity, does not destroy the public’s right to vote under RCW 35.94. The City  
7 has full discretion over organizing its utility departments.<sup>105</sup> Click! is still a utility asset.

8 Many public power utilities provide more than electric service for their communities, “they  
9 might also manage the area’s water, wastewater, internet, waste, gas, and *telecommunications*  
10 *services*,” says the American Public Power Association, who refers to such entities as  
11 “Multiservice Utilities.” Such organization structure are common.<sup>106</sup>

12 “Operationally, one advantage we see in being a *multiservice utility* is having  
13 the ability to coordinate our various activities,” said Ken Weber, chief executive  
14 officer of Harlan Municipal Utilities (HMU), which supplies electric, gas,  
15 water, and *telecommunications services* to some 5,100 people in Harlan, Iowa.  
16 Weber points to the convenience for customers that his utility can provide as a  
17 single point of contact for contractors and movers.

18 Coordination impacts field operations, too, said Gabriel Khalife, borough  
19 manager for Kutztown, Pennsylvania, a municipality about the same size as  
20 Harlan that also offers a gamut of services: water, wastewater, gas, electric,  
21 *telecommunications*, and waste management. (emphasis added.)

22 Defendant asserts *Coates v. Tacoma* prevents this Court from finding Click! is anything other  
23 than “part of” a public utility.<sup>107</sup> Perfect! “Part of ” is sufficient to win the right to vote.

24 Not that it matters, but Click! is more than a “part of.” Click! is a “Department” and System  
25 in its own right. The issues, evidence and arguments in *Coates* were entirely different. An  
26 accountancy act violation, compared with a right to vote.

*Coates* does not cut in defendants’ favor. Plaintiff claimed Click! was not a utility, was losing  
money, violated the accountancy act and any losses are general government’s obligation<sup>108 109</sup>

103 Shook Decl. 12/30/19 Ex. 69, Pgs. 38, 39, (DOJ 4/24/15 DOJ Press release “significant concerns that the merger would make Comcast an unavoidable gatekeeper for Internet-based services that rely on a broadband connection to reach consumers.” ). See also Pg. 39 (Comcast’s divestiture offer).

104 Shook Decl. 12/30/19 Ex. 69 (30 million subscribers, also 30 % of the total United States market).

105 *Tacoma v. Taxpayers of Tacoma*, 108 Wn.2d 679, 695, (“ court leaves the choice of means used in operating the utility to the discretion of municipal authorities.”).

106 Shook Decl. 12/30/19, Ex. 68, Pg.1. (Info from American Public Power Association website).

107 *Coates v. Tacoma*, Division II, Unpublished Decision No. 51695 12/10/19 (Alleged City violated Washington’s local government accounting statute, RCW 43.09.210.)

1 City defended, arguing Click! was a utility and part of Tacoma Power. City was right, and  
2 prevailed. The court found, “Therefore, we conclude that Click! and Tacoma Power's electric  
3 utility are one undertaking for purposes of RCW 43.09.210(3).” *Coates*, at Pg. 9.

4 As “one undertaking,” *Coates* establishes Click! is, at least, “any part thereof,” triggering the  
5 mandatory vote in RCW 35.94 and § 4.6. Any other reading leads to absurd results.

6 The *Coates* “part of” finding is a thoughtful solution. It avoided a long trial over  
7 controversial accounting methodology.<sup>110</sup> It preserved federal and state policy goals furthering  
8 municipal broadband.<sup>111</sup> Shook Decl. 10/30/19, Ex. 21 (White House Report).

9 Charter § 4.6 has no surplus clause.<sup>112</sup> The *Coates* finding triggers a vote, regardless of  
10 surplus. With Judge Bone Chairman of the 1926 Charter Committee, the intent of §4.6 is clear. <sup>113</sup>

11 RCW 35.94.040 reads, “equipment originally acquired for public utility purposes.” Thus, it is  
12 the ownership of the property, not the definition of the assets’ function, that compels a public  
13 vote. When a utility buys an asset, with a “nexus” to the utilities purpose, it’s statutorily  
14 protected by the vote, unless surplus. Even artwork, that brighten employees’ day. <sup>114</sup>

15 Power and Click! are “one undertaking” under *Coates*, which establishes Click! is a bona-  
16 fide “utility,” and not a general government obligation. Since Click! is a “system,” by common  
17 definition, and *Coates*’ confirms Click! is part of a “municipal utility,” organizational  
18 convenience and institutional naming aside, the right to vote is mandatory. <sup>115</sup>

19 3. An FCC Designation Is not A Controlling Factor Over People’s Right to Vote.

20 Defendant raises unrelated issues, of cable TV “regulation” and the FCC’s politically  
21 inspired Restoring Internet Freedom (“RIF”) order. <sup>116</sup>Title I or Title II designation of BIAS does  
22 not preempt state laws the right to vote on disposal of a public communication system. <sup>117</sup>

23 <sup>108</sup> *E.g.* City of Tacoma’s 4/20/19 MPSJ. on The Nature or Mandamus Relief, *Coates v City of Tacoma*,  
Pierce County Superior Court 17-2-08907-4., Page-3.

24 <sup>109</sup> Losses were disputed issue and no finding on losses was ever made.

25 <sup>110</sup> Shook Decl. 12/12/19, Ex. 55 (Council Resolution for an Audit of controversial Click! accounting.)

26 <sup>111</sup> RCW 43.330.532, (Access to broadband critical to full participation in society and modern economy).

<sup>112</sup> Shook Decl. 12/30/19, Ex. 89 (Tacoma City Charter Article 4 -Utilities.)

<sup>113</sup> Shook Decl. Part Two 12/12/19, Ex. 67 Pg. 3 (Judge Bone elected Chair of Charter Committee).

<sup>114</sup> *E.g.* Shook’s MPSJ., Pg. 15, Fn. 74. (utility purpose, nexus to power, and *Okeson* line of cases).

<sup>115</sup> “If the statute is ambiguous, the courts must construe the statute so as to effectuate the legislative intent.  
In so doing, we avoid a literal reading if it would result in unlikely, absurd or strained consequences.”  
*State v. Elgin*, 118 Wn.2d 551, 555, 825 P.2d 314 (1992).

<sup>116</sup> FCC’s Restoring Internet Freedom Order (“RIF”) restored Title I regulation of BIAS. *Protecting and  
Promoting the Open Internet*, 30 FCC Rcd 5601, 5757-77 ¶¶ 355-387 (2015) (*Title II Order*).

1           *Mozilla* vacated the FCC’s RIF “Preemption Directive,” which would have prohibited state  
2 “bright-line” consumer protection regulation of net neutrality.<sup>118</sup> Washington State’s own net  
3 neutrality laws support broadband’s vital role as an essential utility.<sup>119</sup>

4           If Defendant’s argument is accepted, that Title II regulation of information flowing over the  
5 physical facilities defines a utility, then our State’s identical Title II bright-line regulations, in  
6 RCW 19.385.020, confirm Click!’s utility-status.<sup>120</sup> RCW 19.385’s “Open Internet Act,”  
7 preserved Title II’s bright-line regulations in Washington State, preempting the authority sought  
8 by the FCC in reclassifying BIAS to Title I.<sup>121</sup>

9           The Communication Act of 1934 expressly grants states authority to promote and regulate  
10 “telecommunications services, and safeguard the rights of consumers.”<sup>122</sup>

11           All “information services” are accessed via telecommunications.” Click! is a physical  
12 telecommunications system.<sup>123</sup>

13           Municipal ownership of Click!’s infrastructure, fibers, routers, servers, switches, pipes, poles  
14 and customer accounts is what triggers the right to vote, not the FCC’s shifting regulatory  
15 authority, or “non-authority,” in regulating data flow, or activity, over the physical infrastructure.  
16 Such regulation has no bearing on voter’s inalienable right to approve conveyance of Click!’s  
17 property.

18  
19  
20 <sup>117</sup> See generally “nowhere in the general charge to “promote competition in the telecommunications  
21 market” is a directive to do so by preempting a state’s allocation of powers between itself and its  
22 subdivisions.” *Tennessee V. FCC*, 832 F. 3d 597 - Court of Appeals, 6th Circuit (2016).

23 <sup>118</sup> *Mozilla Corp. v. FCC*, 940 F.3d 1, 63 (D.C. Cir. 2019), “ Commission lacked the legal authority to  
24 categorically abolish all fifty States’ statutorily conferred authority to regulate intrastate communications.  
25 For that reason, we vacate the Preemption Directive, 2018 Order ¶¶ 194–204.” *Mozilla*, at 86, The court  
26 rejected the FCC’s preemption efforts, finding the FCC has no authority to regulate BIAS under Title I,  
and, hence no authority to tell states they cannot regulate it. The FCC, by arguing BIAS was not subject to  
FCC regulation, in effect, deprived itself of any authority to preempt state regulation.

<sup>119</sup> *Mozilla*, in rejecting FCC preemption, confirmed Washington State’s authority for bright-line regulation  
of BIAS. *Mozilla*, at 62, stated “the harms from blocking and throttling during a public safety emergency  
are irreparable. People could be injured or die.” Also finding “arbitrary and capricious the Commission’s  
failure to consider the implications for public safety” and “the 2018 Order was arbitrary and capricious in  
this respect, we remand” *Mozilla v FCC, Dist. of Col.* 2019 USCA Case #18-1051.

<sup>120</sup> The City of Tacoma and Washington state have their own bright-line regulation, of “No blocking; no  
throttling; no paid prioritization.” A *Title II* designation of BIAS would have provided federal authority.

<sup>121</sup> Chapter 19.385 RCW (may not: Block content, Impair internet traffic or Engage in paid prioritization).

<sup>122</sup> As amended by the Telecom. Act of 1996. See 47 U.S. Code § 253 (b) (shall not affect ability State to . . .  
protect public safety and welfare, ensure telecommunications services, safeguard rights of consumers).

<sup>123</sup> 47 USC § 153(50): transmission between points specified by the user, of information of user’s choosing.

1 Congress removed barriers, in 1996, authorizing the FCC to encourage the development of  
2 such systems.<sup>124</sup> The City even cited the Telecom Act, in seeking this Court's authority to  
3 establish Click! in 1996.<sup>125</sup>

4 [T]he thrust of the Telecommunications Act is to encourage the availability and  
5 affordability of telecommunications services. . . Tacoma is well positioned to make  
6 telecommunications services available to the public at a competitive price, thereby  
7 furthering this federal policy. (Shook Decl. 10/30/19 Ex. 12, pg. 10)<sup>126</sup>

8 Also, in this same 1996 Brief, at Pg. 12, ¶ B ( 3.), City cited its authority to provide "utilities,"

9 3. The City Has Authority Under Washington Statutes To Provide Telecommunications  
10 Services.

11 The City's statutory powers include the authority to provide telecommunications services.  
12 First, the City, as a first class charter city having code city powers as well, has all powers not denied  
13 by law, "including operating and supplying of utilities and municipal services commonly or  
14 conveniently rendered by cities or towns." RCW 35A.11.020. Tacoma may conveniently render

15 Tacoma may conveniently render telecommunications services because the Light  
16 Division has an existing citywide electric system of connections to customers'  
17 homes, because it has existing billing relationships with customers, and because  
18 it can provide services economically. Second, there is no express statutory  
19 prohibition against city provision of municipal telecommunications services.  
20 *Winkenwerder*, supra. To the contrary, the Legislature has acknowledged that  
21 cities provide communications services through enacting a statute providing for  
22 the burying of city-owned communications facilities. RCW 35.96.030. Finally,  
23 the Legislature has determined that competitive markets for telecommunications  
24 services serve the public interest. RCW 80.36.300; *In re Electric Lightwave, Inc.*,  
25 123 Wn.2d 530, 538-39 (1994) (noting that "it is the state's policy to promote  
26 diversity in the supply of telecommunications services and products in  
telecommunications markets throughout the state"). The City's provision of  
telecommunications services will make the market more competitive, thus  
furthering the public interest recognized by the Legislature.

27 Defendant argues cable modem service is not telecommunications, citing *Brand X*.<sup>127</sup> But,  
28 FCC designations aside, information service still requires telecommunications. Under USC 47  
29 153( 23) "information service" is the acquiring of "information via telecommunications." It's  
30 these physical facilities the people have a right to vote over. "[T]elecommunications is part and

<sup>124</sup> Under 47 U.S.C. § 1302(a), the Federal Communications Commission is charged with "encouraging the deployment on a reasonable and timely basis of advanced telecommunications capability to all Americans," Congress also entrusted this responsibility to state commissions.

<sup>125</sup> Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110 Stat. 70 (1996).

<sup>126</sup> 1996 Memorandum In Support Of City's Summary Judgement. See Shook Decl. 10/30/19 Ex. 12.

<sup>127</sup> *Nat'l Cable & Telecommunications Ass'n v. Brand X Internet Servs.*, 54 U.S. 967 (2005)

1 parcel of cable modem service ”*Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash.  
2 2008). *See also, Brand X*, at 1006. “the high-speed data transmission (telecommunications) that  
3 is an input used to provide this service”. Click! is still a communication utility. An FCC  
4 regulation does not magically convert it into a library, pizza store or pet shop. Click!’s physical  
5 transmission facilities, components and other assets are not surplus.

6 Click! is not an ISP. Click! is a pure telecom system providing wholesale FTTP, Metro  
7 Ethernet and lit data transport services, with established wholesale rates.<sup>128</sup> The retail ISP  
8 partners provide the end-user cable modem services, troubleshooting and maintaining their  
9 modems and competing in delivering retail BIAS services to the community.

10 This free market competition keeps end-user rates low. Privatizing Click! removes  
11 Council’s oversight of wholesale rate. End users include elderly, low-income, governmental and  
12 student customers, who could be harmed by unreasonable price increases, if Click! is sold to a  
13 private company.

14 Click!’s wholesale telecom operations are comparable to TPU’s wholesale water and power  
15 operations, where wholesale rates are also set by Council. In 2018 TPU earned over \$50 million  
16 in wholesale water and power sales. (Shook Decl. 12/30/19, ¶ 1, Ex. 75, Pgs. 19, 20.).

17 Privatization is both substantively and procedurally ultra vires.<sup>129</sup> Procedurally, there was no  
18 “RFP” issued for the sale of Click!, as Defendant alleges. Only an “RFI/Q”, for “information.”<sup>130</sup>  
19 Council never audited Click!’s financial performance.<sup>131</sup> They voted to go “All-In,” to expand  
20 Click!. The *Coates* lawsuit dashed those hopes, forcing Council to change direction.<sup>132</sup>

21 No bidding or appraisal has occurred in this process of privatization. Bidding typically  
22 follows a “surplus property declaration.” Council has no basis for determining a fair valuation of  
23 the System’s assets.<sup>133</sup> Fortunately, “the public vote is curative of all ills.”

24 <sup>128</sup> Shook Decl. 12/12/19, Ex. 57, Pg. 326/423. (Click! FTTP Role and Responsibilities). Ex. 64, Pgs.2-9, (Tacoma Public Library Broadband Agreement).

25 <sup>129</sup> Substantive ultra vires briefed in Pl. Shook’s MSJ., Pgs. 26, 27 and 28.

26 <sup>130</sup> Def.[’s] 12/12/19 MSJ., Pg. 6, Ln. 10. Def. deceptively adds a (“P”) in describing the RFI process. City did NOT prepare a RFP. It was an RFI and NOT an “RFI/Q/P.” The City issued an RFI. There was no “P”, Shook Decl. 12/30/19, ¶ 15, *also* Ex. 72. This is not “Wheel of Fortune,” Def. can’t just, “give me a P!”

<sup>131</sup> Shook Decl. 12/30/19, ¶¶ 1, 2, 3, and 13. No audit, disputed losses, no bidding, no valuation. Only basis for privatization was fear of adverse decision in *Coates*, *also* Ex. 72. Advanced Stream’s RFI response.

<sup>132</sup> *Edward E. Coates, et. al., v. City of Tacoma*, Division II, No. 51695-1 Unpublished decision, 12/10/19, see Shook Decl. 12/30/19, ¶¶10, 11 (explanation and evidence of switch from “All In, to “All-Out.”). Plaintiff’s in that suit, Mr. Crowley, have opposed Click! since before its creation.

<sup>133</sup> Shook Decl. 12/30/19, Ex. 82 Shook’s Email to Council, informing them of failure to follow process.

1 Plaintiff's CPA claim should not be dismissed. Naturally the CPA does not apply to City's  
2 "legitimate acts." Cities necessarily operate monopolies and enjoy sovereign immunity from CPA  
3 claims for doing so. But, tortious acts, and conspiracy with a private party, in restraint of trade are  
4 not legitimate ministerial functions.<sup>134</sup> The CPA claim involves many facts. Discovery and a trial  
5 could be required.<sup>135</sup> If justice prevails, the CPA claim will soon be moot and can be withdrawn,  
6 when the Court upholds the people's right to vote. The right to vote being "curative of all ills."<sup>136</sup>

7 Finally, telecommunications is not a luxury. You can't add a "rooftop antenna" and get it.<sup>137</sup>  
8 The flow of such "information" requires a "pipeline," a fiber optic backbone, for transferring  
9 customer's data.<sup>138</sup> Click! Network is our community's ' public data pipeline, that "information  
10 highway." It is a utility. The additional capacity and fibers, paid for by the people, are the  
11 equivalent of lanes on this advanced public highway. Defendant's definitions of "utility" and  
12 "surplus" would return us to an era of private "toll roads," and allow any municipally-owned  
13 utility asset to be sold, to large campaign contributors, without a public vote. Could a water,  
14 power or rail facility be next?

## 14 VI. Conclusion

15 For the forgoing reasons, the Court should deny Defendants Motion for Summary Judgement  
16 and grant Mr. Shook's Motion and declare City's surplus resolution ultra vires.

17 Respectfully submitted this 30<sup>th</sup> day of December 2019.

v.  
  
CITY OF TACOMA,  
  
Defendant.

**NO. 19-2-11506-3**  
  
PLAINTIFF SHOOK'S REPLY IN SUPPORT  
OF MOTION FOR PARTIAL SUMMARY  
JUDGEMENT GRANTING DECLARATORY  
RELIEF

MITCHELL SHOOK,  
Plaintiff Pro Se,  
  
v.  
  
CITY OF TACOMA,  
  
Defendant.

Plaintiff Shook's Reply In Support Of  
Motion for Partial Summary Judgment

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

- 0 -

1 As the Court considers this motion, please keep in mind *two* important observations:

2 *First*, Plaintiff’s motion only asks the Court to declare what the City’s own legislative body,  
3 *has already said*: An approving “vote of the people” is required to “sell, lease or dispose” of any  
4 utility property *essential for continued* utility services. <sup>1</sup>

5 *Second*, Click! provides advanced telecommunications “*services*,” using the public’s municipal  
6 utility *assets* and *appurtenances*. The public’s “assets” are *essential for continued* provision of  
7 Click!’s vital public telecom services.<sup>2</sup> The law requires a vote for the disposal of public utility  
8 “*assets*,” not just utility “*systems*,” as Defendant continues to mischaracterize this case.

9 As seen here, in the City’s own Click! Resolution, the City’s own finding cites the people’s  
10 right-to-vote under Charter §4.6: *See also*, Shook Dec. 12/12/19, Ex. 32, Pg. 1:20.

11 20 WHEREAS the City Charter Section 4.6 requires a vote of the people  
12 21 before the City may sell, lease, or dispose of any utility system, or parts thereof

13 Defendant admits that “telegraph and telephone,” now known as “telecommunications” or  
14 “telecom,” was one of the protected utilities, on the *long-list* of municipal utilities requiring a  
15 vote of the people, in the original version of RCW 35.94, the “Laws of 1917.” <sup>3</sup>

16 As a result, City’s only remaining opposition boils down to one main argument, that the  
17 Laws of 1917 were “repealed” in 1965, eliminating the “long-list” and any vote of the people  
18 requirement for the public’s telecom assets.<sup>4</sup> As seen here, page 10, line 17 of Def.’s Response: <sup>5</sup>

19 17 of the statute as it existed in 1917. However, it is unnecessary for the Court to decide this question  
20 18 because Chapter 137 of the Laws of 1917, including the reference to telephone plant and lines,  
21 19 was repealed in its entirety in 1965.

22 Defendant erroneously asserts, “reference to telephone plant and lines, was repealed in its  
23 entirety in 1965.” That is not true. The Law of 1917 was “repealed and replaced,” in its *entirety*.  
24

25 <sup>1</sup> Shook Decl. 12/12/19, Ex. 32. Pg. 1, Ln. 20, ¶ 4. (Def.’s own Res. U-10828 citing public’s right to vote.).  
26 <sup>2</sup> As evidenced by over 2,100 pages of essential assets listed in the Click! IRU privatization agreement, without  
which Click!’s telecom services cannot continue in operation. Shook Decl. 11/1/19, Ex. 29, 30.  
<sup>3</sup> Def’s Resp., Pg. 14:10, (“cable modem and metro-ethernet services are a form of telecommunications”).  
<sup>4</sup> “Laws of 1917” refer to the RRS §§9512-9514, “Sale or Lease of Public Utilities Owned by Cities.”  
<sup>5</sup> Def.’s Response, Pg. 10:17, Defendant states: “the Laws of 1917, including the reference to telephone plant  
and lines, was repealed in its entirety in 1965.”

Plaintiff Shook’s Reply In Support Of  
Motion for Partial Summary Judgment  
Mitchell Shook, Plaintiff  
3624 6<sup>Th</sup> Ave Suite C, Tacoma, WA 98406

1 The Laws of 1917 did not change in 1965 and a search for a definition of “utility” is not  
2 required. The statute defines telecom as the utility. Since Click! is owned by a city, and it doesn’t  
3 matter which Department of the city owns it, the popular vote requirement survives.

4 **A. The People’s Right to Vote was Not Extinguished by the Laws of 1965.**

5 The City’s main argument, that the Laws of 1917 were “repealed” in 1965, is easily dispelled,  
6 by examining 1951’s inaugural Chapter 80.48, incorporated as Chapter 35.94 in 1965.<sup>6</sup>

7 The 1951 version is identical to the statute today. Nothing was changed in 1965.<sup>7</sup> Seen here is  
8 RCW 80.48.010 as it appeared in 1951; and, as it remains today: Shook Dec. 1/6/20, Ex. 92:

9 **Chapter 80.48**  
**SALE OR LEASE OF MUNICIPAL UTILITIES**

10 **Sections**

- 11 80.48.010 Authority to sell or let.  
80.48.020 Procedure.  
80.48.030 Execution of lease or conveyance.

12 **80.48.010 Authority to sell or let.** A city may lease for any term  
13 of years or sell and convey any public utility works, plant, or sys-  
tem owned by it or any part thereof, together with all or any equip-  
ment and appurtenances thereof. [1917 c 137 § 1; RRS § 9512.]

14 Today’s Title 35 version is identical to the Title 80 version from 1951. The 1965 enactment of  
15 Chapter 35 RCW did not “repeal” or change the previous Chapter 80.48 RCW. Since the statutes  
16 were identical, before and after the 1965 enactment of Title 35, the law falls under Chapter 35.98’s  
17 “Construction” statement, in RCW 35.98.010, which provides, “The provisions of this title . . . shall  
18 be construed as restatements and continuations, and not as new enactments.” Chapter 35.94’s  
19 enactment was, simply, “restatements and continuations” of the law, with no change in the law.  
20 Thus, it remains intact as originally enacted.

21 **Chapter 35.98**  
**CONSTRUCTION**

22 **35.98.010 Continuation of existing law.** The provisions of this  
23 title insofar as they are substantially the same as statutory provi-  
24 sions repealed by this chapter, and relating to the same subject  
25 matter, shall be construed as restatements and continuations, and  
26 not as new enactments.

<sup>6</sup> Shook Decl. 1/6/20, Ex. 95 (Laws of 1965 savings clause, and Laws of 1951 with the statute as it existed at the inception of the RCW, as Chapter 80.48 RCW, showing RCW 35.94 was never changed.

<sup>7</sup> “Laws of 1917” were RRS §§9512-9514, “Sale or Lease of Public Utilities Owned by Cities or Towns.”

1 As a “Continuation of existing law,” the language in RCW 35.94.020 necessarily still  
2 encompasses “telegraph and telephone plants and lines, **or any system embracing all or any one**  
3 **or more of such works or plant or any similar or dissimilar utility system.**”<sup>8</sup> (Emphasis added).

4 Click!’s telecommunication system is the modern equivalent of “telegraph and telephone plants  
5 and lines,” and it is also a “similar or dissimilar” system. Thus, the protective popular vote-of-the-  
6 people requirement remains in effect under current statutory language.

7 So the City has negotiated the terms of the IRU, Business Agreement and Ordinance to assign  
8 the Click! Franchise. The statute requires City do those things. But there is a final step, which the  
9 statute requires, with a *clear statement* that the “ordinance shall not take effect until it has been  
10 submitted to the voters of the city for their approval or rejection at the next general election.”<sup>9</sup>

### 11 **1. Continuation of the Laws of 1917 into the 1951 Inauguration of RCW**

12 It is worth remembering the Laws of 1917 were “abbreviated” prior to codification into RCW  
13 80.48 in 1951.<sup>10</sup> A savings clause was added at RCW 1.04.020.<sup>11</sup>

14 When the statute was “Rewritten for brevity,” the long-list of utilities, with “telegraph and  
15 telephone,” was shortened to a generality encompassing “any public utility works, plant, or system  
16 owned by it or any part thereof, together with all or any equipment and appurtenances thereof.”

17 In 1946, the Code Revision & Recompilation Committee provided a letter, which explained that  
18 all “major changes in the course of revision” would be documented in a “third column,” with a  
19 “catch-line” containing the “reviser’s explanation in parenthesis.” The original letter can be found  
20 in Shook Decl. 12/30/19, Ex. 81 pg. 15 (pg. 330 of 507). Seen here, is an excerpt from that letter:<sup>12</sup>

21 **The third column contains the catch-line of each section as set**  
22 **forth in the revision itself, together with the reviser’s explan-**  
23 **ation in parenthesis of the major changes made in the course of**

4  
5  
6 **B. Telecommunications Service is Not a Cable TV Service.”**

7 In City’s other argument against the public vote, which I call the “Hail Mary,” for being sillier  
8 than surplus, Defendant admits Click! is a telecommunication system, providing telecom services;  
9 yet denies they ever “intended” Click! to be a telecommunication system.<sup>14</sup>

10 All “intentions” aside, the argument is flawed. First, it’s false. Second, the City is legally and  
11 equitably estopped from asserting that it is not a telecom system because it has previously taken  
12 the position that it is.

13 Click! is owned by the City’s public utility, it provides telecom services and this case is not  
14 about “intentions.” Defendant’s own pleadings and business plans, in the 1996 case confirming  
15 authority for utility funding of Click!, prove Defendant’s “intention” was to establish a commercial  
16 telecom system, as part of the public utility, to deliver municipal telecom services.<sup>15</sup> Furthermore,  
17 Defendant admits Click! is a “telecommunications network” and its services are “a form of  
18 telecommunications.”<sup>16</sup> As seen the Response, on Page 14:10.

19 | defendant does not dispute that Click! Network operates over a network that meets the definition  
20 | of telecommunications. The HFC Network was built as a telecommunications network, and cable  
21 | television, cable modem and metro-ethernet services are a form of telecommunications.

22 Defendant urges viewing Click! as a “one-way” TV system, as in *Issaquah*.<sup>17</sup> The  
23 distinctions between TV and Click! was briefed in Plaintiff’s Response on Pages 6-7.

24  
25 <sup>13</sup> Decl. 12/30/19, Ex. 81 pg.19, or page 334/507 in the PDF. (reviser’s note rewritten for brevity)

26 <sup>14</sup> City’s Resp., Pg. 20:13, (“City had no intention of allowing Click! to operate as a telecommunications utility”).

<sup>15</sup> Shook Decl., 12/30/19 Ex. 88, *City of Tacoma v. Taxpayers and Ratepayers of Tacoma*,

<sup>16</sup> 47 USC § 153(53) The term “telecommunications service” means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used.

<sup>17</sup> *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980).

**1. Telecommunications is Easily Distinguished From Cable TV**

Since Click! is a “communication system,” Defendant’s argument is moot under the Laws of 1917, which require a vote, and under federal, state and local statutes, and case law, which *all* fully distinguish cable TV from telecom.<sup>18</sup>

The legalities and complexities of advanced telecommunications technology and regulations can be perplexing, but some recent cases are helpful. *Community Telecable’s* ruling differentiates cable TV from Click!’s “two-way” telecommunications.<sup>19</sup> The Oregon State Supreme Court distinguishes cable TV and telecom systems, in explaining why Comcast’s cable modem services should be taxed as telecom and not cable TV.<sup>20</sup> As seen in *City of Eugene v. Comcast*, here:

Thus, considering the Telecommunications Act in context, we conclude that it created a regulatory scheme that focuses on the function of the service provided rather than on the communications facility used to provide it. Within that scheme, telecommunications services are generally treated as telecommunications services and cable services as cable services, regardless of who provides the service or how. *Id.* at 551

The FCC has recognized that, as it relates to distinguishing cable, telecommunications, and information services, none of those classifications “rests on the particular types of facilities used. Rather, each rests on the function that is made available.” *In re Inquiry Concerning High-Speed Access to the Internet*, 17 FCC Rcd 4798 at 4821; *see also* 47 USC § 522(6) (defining “cable services”); 47 USC § 153(53) (defining “telecommunications service”); 47 USC § 153(24) (defining “information service”). That is expressly the case for “telecommunications service,” which the Act defines as “the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, *regardless of the facilities used.*” 47 USC § 153(53) (emphasis original) *Id.* at 551.

**C. City Charter and Franchise Agreement do Not Prohibit Telecommunications Business.**

Defendant’s disingenuous and ill-conceived contention that City Charter Section 4.1 prohibits the City from providing telecom services is deeply insulting to the legacy of Tacoma’s own

<sup>18</sup> *E.g. Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008) differentiates TV from Telecom. *See also*, 47 USC § 153(50) *compare with* 47 U.S.C. § 522(6), *E.g.* RCW 82.04.065 (27), Tacoma Municipal Code Title 16 B. (“Telecom service” does not include television and video programming service).

<sup>19</sup> *E.g. Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008) differentiates TV from Telecom. *See also*, 47 USC § 153(50) *compare with* 47 U.S.C. § 522(6), *E.g.* RCW 82.04.065 (27), Tacoma Municipal Code Title 16 B. (“Telecommunications service” does not include television and video programming service).

<sup>20</sup> *City of Eugene v. Comcast of Oregon II, Inc.*, 359 Or. 528, 375 P.3d 446 (2016)

Plaintiff Shook’s Reply In Support Of  
Motion for Partial Summary Judgment

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

1 Honorable Judge Homer T. Bone, who authored that language. It places no such limitation on the  
2 types of utility services the City may “sell and deliver.” It affords “all the powers granted to cities  
3 by “state law,” and specifically provides “not by way of limitation.” As seen here,:

4 **Article IV**  
**PUBLIC UTILITIES<sup>13</sup>**

**General Powers Respecting Utilities**

5 **Section 4.1** – The City shall possess all the powers granted to cities by state law to construct, condemn  
6 and purchase, purchase, acquire, add to, maintain, and operate, either within or outside its corporate  
7 limits, including, but not by way of limitation, public utilities for supplying water, light, heat, power,  
8 transportation, and sewage and refuse collection, treatment, and disposal services or any of them, to the  
9 municipality and the inhabitants thereof; and also to sell and deliver any of the utility services above  
10 mentioned outside its corporate limits, to the extent permitted by state law.

11 The Charter’s history is fascinating, not only for the strong protection it affords citizens, with  
12 Section 4.6’s right to vote in protecting utility assets from wrongful privatization, but also for the  
13 fact it contains contributions by Hon. Judge Bone, the “Father of Public Power.”<sup>21</sup> Judge Bone was  
14 Chairman of the City’s Freeholder Charter Committee in 1926.<sup>22</sup> In Judge Bone’s personal letter,  
15 published in the 1944 Congressional Record, he describes his leadership role in creating Tacoma’s  
16 City Charter. *see* Shook Decl. 12-30-19, Ex. 80 pg. 5.

17 In 1926 a charter revision commission was elected by the people of Tacoma  
18 for the purpose of revising the city charter. I was elected to that commission,  
19 receiving many thousands more votes than anyone else who had been a  
20 candidate, and without objection was made chairman of the charter revision  
21 commission. Naturally, I made every effort to see that the revised (and  
22 present) city charter which was the outgrowth of the work of this commission,  
23 contained suitable provisions respecting franchises for private utilities. I  
24 wrote, and had incorporated into the new charter, a provision authorizing a  
25 referendum on any franchise which might be granted a private utility.

26 **D. Status as “System” or Departmental Organization is Unrelated to Right to Vote.**

Defendant describe the dispute as whether “Click! Network is a separate public utility from  
Tacoma Power.”<sup>23</sup> Also, that Click! was “intended” to be a municipal service. But “separate utility”

<sup>21</sup> Shook Decl. 1/6/20 Ex.96 Death Of Former Senator Homer T. Bone Congressional Record- Senate Mr.  
Magnuson. Mr. President, with a sense of great sorrow I announce to the Senate the passing yesterday of a  
former distinguished Member of this body, Homer T. Bone of the State of Washington. He was 87 years old.  
He served here for two terms with great distinction. . . . he was one of the most brilliant men ever to grace  
this body. He was a determined advocate of the development of power through the use of natural resources,  
particularly hydro-electric development. Out in the Pacific Northwest *we considered him to be the father of  
public power*, and also the Rural Electrification Administration.

See also, In 2016 Homer T. Bone Award went to Congressman Norm Dicks, last accessed 1/5/20, at  
<https://www.vnf.com/norm-dicks-recipient-of-homer-t-bone-award>, *also*, <https://perma.cc/Y5X2-SF5J> .

<sup>22</sup> Shook Decl. Part Two 12/12/19, Ex. 67 Pg. 3 (Judge Bone Chairman of 1926 Freeholders Charter  
Commission, and Member of the Utilities, Franchises; Public and Local Improvements Committee.)

<sup>23</sup> Quoting Def.’s Response Pg. 3:6.

1 is not the issue, or the standard for triggering the public vote.<sup>24</sup> Click!’s assets and appurtenances,  
2 by virtue of their public ownership, are “*any part thereof*” of a utility, triggering the vote.<sup>25</sup> In  
3 Shook’s Motion, under “Relief Requested” Shook asks, “Are telecom *assets* of a municipal utility”  
4 protected by the laws. Seen here, Page 3, of Shook’s MPSJ, here:

5 15 || 1. Are telecommunication assets of a municipal utility governed by Chapter 35.94 RCW or ||  
6 16 || Tacoma City Charter 4.6 ? ||

7 Defendant admits the assets and appurtenances were acquired for utility purpose.<sup>26</sup> Unless  
8 these assets are obsolete, worn out and no longer useful in performing the public purpose for which  
9 they were acquired, i.e. “surplus,” which they are not, they are protected by law. Defendant does  
10 not deny the assets are useful and valuable for the very same utility purposes for which they were  
11 acquired, nor can they deny it, given the assets are now earning \$25 million a year in revenue and  
12 will continue doing so under privatization.<sup>27</sup>

13 **1. Organizational Status Does Not Affect Click!’s Status as a Communication Utility.**<sup>28</sup>

14 Defendant’s theory that City created Click! to provide “municipal services,” not to create a  
15 “utility,” is irrelevant. As *Seen* here, from Defendant’s Response, pg. 19. In 9:<sup>29</sup>

16 Converting Click!’s ownership, from the Department of Utilities (“TPU”), to place it under  
17 general government’s control, does not magically convert the System into some other type of  
18 municipal service, such as a library, theater or ball park. Click! will never be anything other than a  
19 communications utility, regardless of administrative organization or “naming.”

20 <sup>24</sup> Plaintiff’s “Any Part Thereof” arguments are in the Plaintiff’s 10/30/19 Motion for TRO, hereby  
21 incorporated, *see* Pages 17-18 for the “Any Part Thereof” standard and threshold for triggering a public  
22 vote. *See also*, Page 12 where plaintiff cites the City of Duvall’s process for surplus property, as an  
23 example of best practices adhering to the surplus property requirements of RCW 35.94.040, *See also* Shook  
24 Decl. 10/30/19, Ex. 19. (Seattle Classified ad), *See also*, Shook’s “Email to Tacoma City Council” on  
25 Duvall process, Shook Decl. 12/30/19, Exhibit 82. Informs the Court and explains why Shook’s “any Part  
26 Thereof” resolves this case.

<sup>25</sup> See Shook moving brief, Pg. 27, Ln 3. If portions of Click! qualify as the “works, plant, *or system* owned  
by it or *any part thereof*,” then vesting via surplus is *ultra vires*.

<sup>26</sup> Def’s Response Pg. 22:10 (“The City does not dispute that the entire HFC Network was acquired for  
public utility purposes—nor, that operation of Click! Network was also for public utility purposes, i.e.”)

<sup>27</sup> For the full briefing on the history of RCW 35.94.040 and the legislative intent of “surplus,” see  
Shook’s Motion, on Pages 23-25. Surplus and “any part thereof,” are the issues before this Court.  
They determine the vote of the people over disposal of our assets.

<sup>28</sup> Click! is a “communication utility” by statutory definition RCW 35.96.020. Also RCW 80.04.010(28)  
Click! is a utility and “Telecommunication Company,”

<sup>29</sup> Defendant discusses authority under RCW 35A.11.020 and claims Click! was not “intended to be a utility.

1 Institutional naming and organizational convenience aside, it doesn't matter if the utility is an  
2 obligation of TPU or general government. Calling it a "municipal service," does not destroy the  
3 Laws of 1917 that have protected municipal telecom from privatization for over 100 years.<sup>30</sup>

4 TPU initiated the creation of Click!, not general government. TPU funded Click!, with approved  
5 of Council at the request of the TPU Board. TPU management saw a need to upgrade infrastructure  
6 and hired consultants to study the prospect of a telecom system. The consultants advised TPU of  
7 efficiencies and benefits that could be realized by increasing the original budget by an additional  
8 \$50 million, to include "*additional capacity*." Defendant has stated, "The original cost estimate for  
9 the network was \$15 million and the consultant's recommendation made to the city was to spend  
10 more and also bring telecommunications services to customers."<sup>31</sup> The additional capacity was  
11 costly; "The approved cost estimate for the network was **\$65 million**, but by the time Click! was  
12 launched to customers in July 1998 the cost grew to **\$89 million**."<sup>32</sup> (emphasis added.)

13 The community's need for an advanced telecom system with broadband capability was viewed  
14 as essential and projected to yield benefits in revenue diversification and economic growth, which,  
15 in turn, would increase sales of other utilities. Council approved TPU's plan, in Resolution No.  
16 33668 establishing the System:<sup>33</sup> Council determined, "the City Light Division's broadband  
17 telecommunications proposal is in the best interests of the City, will serve a public purpose and . . .  
18 that the proposed broadband telecommunications system shall be owned, operated and controlled  
19 by the City of Tacoma Department of Public Utilities Light Division." Click! is a utility asset.<sup>34</sup>

---

20 <sup>30</sup> Click! is a municipal "communication utility." RCW 35.94 makes no distinction based on what  
21 "department" a city places its utilities in. The protective public vote emanates from the fact Click! is a  
22 telecom system and named utility, protected on the "long-list" of utilities, in the Laws of 1917; plus, that  
23 right to vote was confirmed in *Bremer* by our Supreme Court. *see Bremerton Municipal League v.*  
24 *Bremer*, 15 Wn.2d 231 (1942); *Bremer* guides the Court, under *Fondren v. Klickitat County*, 79 Wn. App.  
25 850, 856, 905 P.2d 928 (1995) (Supreme Court binding on state courts).

26 <sup>31</sup> Shook Decl. 1/6/20, Ex. 93, Pg. 5. (Click! Network Business Plan Revised 3-20-17 Tenzin Gyalzen.)  
<sup>32</sup> *Id.* at 5 ("The approved cost estimate for the network was **\$65 million**, but by the time the Click! was  
launched to customers in July 1998 the cost grew to **\$89 million**.").

<sup>33</sup> Shook Decl. 10/30/19, Ex. 10:4 Res. 33668, also, Ex. 11 Ordinance 25930 (creating System.) Ex. 50  
(Conclusions of Business Plan for establishing Click!) 12/30/19, Ex. 74 Klein deposition and statements. Ex.  
70 (Baarsma Singleton Paper on Creating Capacity.), Ex. 83, historical website statements, press releases  
and news articles about Click! creation. Ex. 85 incremental cost to construct System, Ex. 88 briefs from '96  
and '97 case approving Click!.

<sup>34</sup> Click! was built and paid for by TPU and is a municipal utility protected by the public vote  
under the Laws of 1917. A separate department or designation as a "system" is not required to  
trigger the public vote. Click!'s services compels the public vote.

1        Instead of disputing Plaintiff’s facts, which they cannot, City pretends they never “intended”  
2 Click! to be a telecom system, that it was just another “municipal service;” and that departmental  
3 naming magically extinguishes citizens’ “right to vote,” allowing Defendant to surplus Click!.  
4 Defendant cites Click!’s cable TV franchise, an agreement with themselves, as proof that Click! is  
5 just a “municipal service” and not really a part of TPU, a municipal utility. Defendant goes on to  
6 compare Click! with and old worn out service vehicle or work truck.<sup>35</sup>

7        Not so fast! Some long-lost progressive era policymakers, Judge Bone among them, still have a  
8 say about privatization here, via their City Charter and the Laws of 1917. Bless their souls, for they  
9 knew about such things, having endured their own impossible scandals, over 100 years ago. The  
10 protections they provided, in clear, emphatic, language, from wrongful privatization, in case  
11 anything “similar or dissimilar” should ever happen again, survive today.<sup>36</sup>

12        Defendant admits Click! is a telecom system providing telecom services; but claims citizens  
13 have no right to vote over its disposal, since it is not a “separate” utility system. There is no law that  
14 requires the City to organize Click! more separately than it already has. Click!’s organization, as a  
15 sub-fund of Tacoma Power, is not precluded by law. The City accounts for Click! revenue and  
16 expenses appropriately. Furthermore, the City’s chosen and convenient method for organizing  
17 Click! under TPU recently passed judicial scrutiny in *Coates v Tacoma*.<sup>37</sup>

18        **2. Assets Will Continue Performing Utility Purpose For Which They Were Acquired.**

19        The Court need not find Click! is a “separate system,” rather, only that its assets are “any part  
20 thereof, and whether those assets are “property, or equipment originally acquired for public utility  
21 purposes,” which they were.<sup>38</sup> Then, are the assets surplus, which they are not; since they continue  
22

---

23 <sup>35</sup> Def’s Response, Page 20:21, (“For instance, if the City surplused a work vehicle, ostensibly it would still  
24 be continuing on in the same capacity as a vehicle.”)

25 <sup>36</sup> See Shook Decl. 12/30/19, Ex. 80 (Honorable Homer T. Bone’s Letter in the 1944 Congressional Record,  
26 published upon Judge Bone’s departure from the Senate, having been appointed a Judge to the Ninth Circuit.  
Also, “similar or dissimilar” is a play on that emphatic phrase, found in the Laws of 1917. It just shows how  
serious these legislators were about making their intentions clear.

<sup>37</sup> And why not? Click! supports Power’s purpose, of efficiently providing electrical power, and has a true  
nexus to such purpose, by offsetting costs, increasing revenue thru economic growth and diversifying  
revenues. Institutional naming, or organizational departmentalizing, do not turn Click! into a non-utility  
“municipal service,” such as a public gathering facility, service, a ball park, library or luxury TV service.

<sup>38</sup> Direct quote from RCW 35.94.040. (Lease or sale of property originally acquired for utility purposes.)

1 providing the same “utility purpose” for which they were acquired.<sup>39</sup> Thus, the assets are not  
2 surplus under the clear statement in RCW 35.94. The meaning of the term “surplus” is found in the  
3 legislative history that show the intent of RCW 35.94.040<sup>40</sup>

4 Furthermore, under the City Charter, there is no “surplus” clause at all. A vote is required  
5 regardless of surplus. The fact that the assets themselves are essential is obvious. Without them  
6 there is no municipal Click! telecommunication service available for the community.

7 Click!’s essential assets will continue serving the same customers with the same services, which  
8 Defendant does not deny, for it’s true. Click!’s assets are not surplus. Defendant maintains a  
9 reversionary interest in the assets and fiber optic network.

10 In Defendant’s example of a surplus work truck, Defendant argues the truck, once sold,  
11 continues performing the same function, that of a work truck. Perhaps, but not for TPU; nor in  
12 performing the very “utility purpose” for which the truck was acquired.<sup>41</sup>

13 Imagine a water truck, acquired by TPU to deliver customers’ water. The truck and water  
14 enterprise cannot be sold to a private party, to continue delivering water to the same customers,  
15 with the same truck, only with the private company then setting rates for customers’ water service.  
16 Selling a truck, or Click!, this way, violates the spirit of the surplus statute, which limits surplus  
17 to useless assets “not required for providing continued public utility service,”<sup>42</sup> and defines the  
18 items as “unserviceable, inadequate, obsolete, worn out or unfit to be used.”<sup>43</sup>

19 Also, when TPU sells a surplus truck, it retains no reversionary interest, requiring the truck be  
20 returned after 20 years. When something is surplus, the asset is “disposed of.” Cities do not retain  
21 reversionary interests when disposing of surplus assets under RCW 35.94.040.

22 <sup>39</sup> A detailed analysis of proper procedures for conveying public property, is available on MRSC : at  
23 <http://mrsc.org/Home/Explore-Topics/Legal/General-Government/Sale-of-Surplus-City-or-Town-Property.aspx> Also at- <https://perma.cc/XY4T-UQLS> None of which Defendant has, admittedly, followed;  
24 as Defendant cites authority for gifting of public funds via “ negotiated disposition of surplus TPU assets if  
25 approved” by the Board” See Def’s MJS, Pg. 22.

26 <sup>40</sup> See Shook’s moving brief, page 23. Defendant has not disputed that the assets are not actually  
surplus, nor do they deny the legislative history and intent of surplus, for they cannot. Click! assets  
are valuable and not “obsolete” or “useless.”

<sup>41</sup> Defendant’s work truck example is irrelevant. Service vehicles are not named in the “long-list” of utilities  
protected by the Laws of 1917, and do not bear the distinction of being the second “pubic utility” ever  
regulated in Washington State, as was “telephone and telegraph,” under the Railroad Commission.

<sup>42</sup> Quoting RCW 35.94.040.

<sup>43</sup> RCW 54.16.180 (showing clear legislative intent and definition of “surplus” for municipally-owned utility  
property.) See Shook’s moving brief., Pgs. 24, 25, (detailed history of surplus statute).

1 Defendant is conveying, unforgivably, the community’s broadband system, and the beloved  
2 Click! brand and trademark. Privatization is an offensive gift of public funds; a lending of the  
3 good name, and credit, of the government to a private party, a most basic gifting violations.<sup>44</sup>

4 **3 Cable TV Franchise is Irrelevant and Does Not Limit Authority for Telecom Services.**

5 Federal statutes distinguish TV from Telecom. The City’s self-issued cable TV franchise only  
6 requires Click! obtain a separate telecom license. It does not convert Click! into a cable TV system.  
7 All modern cable television franchise agreements are careful to distinguish telecom as a separate  
8 activity. This is done, not to prevent the provision of broadband services, but so TV revenues are  
9 not confused with such services or telecommunications, which are generally exempt from taxation  
10 under the ITFA. By specifying that the agreement does not cover telecommunications, cities avoid  
11 creating unnecessary difficulty in collecting their 5% cable TV franchise fee. The City’s references  
12 to cable TV regulations do not apply to telecommunications, under 47 USC § 541(b)(3)(A)(ii). *City*  
*of Eugene v. Comcast*, is again helpful:

13 “If a cable operator \* \* \* is engaged in the provision of telecommunications  
14 services, \* \* \* the provisions of *this subchapter* shall not apply to such cable  
15 operator or affiliate for the provision of telecommunications services.” 47 USC  
16 § 541(b)(3)(A)(ii) (emphasis added). That provision is best read as establishing  
17 that telecommunications services are not to be regulated as cable services, and  
not subject to cable franchising requirements, merely because those  
telecommunications services are provided over a cable system.

18 **E. Reply to Miscellaneous Citations in Defendant’s Response**

19 Defendant cites *Clark, Issaquah* and *King County*.<sup>45</sup> *King County* is cited simply to show  
20 “*Issaquah* is still good law,” the silly implication being Click!’s advanced telecom network is the  
21 equivalent to an old cable TV system, which *Issaquah* considered a “luxury,” or “something you can  
22 do with a rooftop antenna.”<sup>46</sup> Both *Clark* and *Issaquah* support plaintiff’s case. *Clark*’s definition of  
23 “utility” is broad enough to include the butcher, the baker and the broadband-maker.<sup>47</sup> More than

24 <sup>44</sup> *Port of Longview V. Taxpayers* 85 Wn.2d 216, at 222, 1974 (municipality borrowing money in its own  
name in form of municipal bond, and loaning that same money to a private corporation.)

25 <sup>45</sup> Def.[’s] MSJ, Pg. 14. *Issaquah v. Teleprompter, Inc.*, 93 Wn.2d 567 (1980), *King County v. King County*  
*Water Districts et. al.*, Wash. No. 96360-6, Slip Op. (Dec. 5, 2019). *Clark v. Olson*, 177 Wash. 237 (1934).

26 <sup>46</sup> *Issaquah*, at 574, “It’s something you can do with a rooftop antenna. In that sense, it’s not a utility.”

<sup>47</sup> *Clark* provides that a “dedication to a public use” constitutes a utility. *Clark* also explains “public  
use” or “public utility” are established by “implication” and accommodation. *Clark* provided many  
examples of how “public use was implied.”<sup>47</sup> Those examples can be translated to Click!, further  
establishing Click!’s status as a municipally owned “utility.” Under *Clark*, Click! is a utility because

1 implying Click! is a utility, Defendant admits taxing Click! as a utility, on page 22 of their response,  
2 at line 17, seen here:

3 17 || TPU. Thus, because Click! Network generates revenue accruing by reason of transaction of  
4 18 || business, it is taxed under the GET as a business unit of TPU. Therefore, Mr. Shook's argument

5 *Issaquah* defines Click! as a "communication utility," properly citing RCW 35.96.020, "a  
6 statute dealing with the conversion of electric and communication facilities to underground  
7 facilities in cities and towns," and recognizing that Cable TV did not fit that definition. Since Click!  
8 is admittedly a communication system, indubitably Click! fits the standard of RCW 35.96.020.<sup>48</sup>

### 9 **Right to Vote is Constitutionally Protected**

10 In a free and democratic society, the power to vote is a fundamental right afforded citizens.  
11 The Washington State Constitution, Article I, Section 19 provides, "No power, civil or military,  
12 shall at any time interfere to prevent the free exercise of the right of suffrage."<sup>49</sup>

13 Defendant's freewheeling disposal of Click! destroys citizens' fundamental Constitutional  
14 right to vote on the disposal of their valuable municipal utility assets. The right to vote, "in a free  
15 and unimpaired manner is preservative of other basic civil and political rights, any alleged  
16 infringement of the right of citizens to vote must be carefully and *meticulously scrutinized*."  
(emphasis added) *Reynolds v. Sims*, 377 U.S. 533, 561-62, (1964).

17 When citizens of Tacoma granted City officials the privilege of managing their utilities, they  
18 were not content to divest themselves of every managerial function normally associated with the  
19 operation of a business concern. By their charter they have retained express power over the  
20 divestiture of their functional public utility property, or "*any part . . . any equipment and*  
21 *appurtenances thereof*." The contract in question has the effect of violating the charter for the  
22 City of Tacoma and is therefore void unless approved by the voters as required by the charter.<sup>50</sup>

23 \_\_\_\_\_  
24 "public use was implied" by Click! holding itself out as a utility, by providing services to a certain class of  
25 the public, by Council setting rates, by funding and organizing Click! within the Dept. of Utilities, by the  
26 System being installed under the right of eminent domain, by Click! holding FCC licenses, by entering into  
telecom franchises agreements and contracts, by sharing lobby space within TPU headquarters for customer  
service purposes, and by City's treatment and taxation of Click! as a utility.

<sup>48</sup> *Issaquah*, at 574, cited the definition of "communication utility" in RCW 35.96.020, calling it "a statute  
dealing with the conversion of electric and communication facilities to underground facilities in cities and  
towns". Cable TV did not fit that definition, but Click! certainly does.

<sup>49</sup> *Madison v. State*, 161 Wn.2d 85, 163 P.3d 757 (2007)

<sup>50</sup> Drawing inspiration from *Clark v. City of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d 669.

Plaintiff Shook's Reply In Support Of  
Motion for Partial Summary Judgment

Mitchell Shook, Plaintiff  
3624 6<sup>th</sup> Ave Suite C, Tacoma, WA 98406

1 The facts set forth in plaintiff's motion have not been refuted, for they are true.<sup>51</sup> Finally,  
2 please note, as stated in *Tacoma v. Taxpayers of Tacoma*,

3 Tacoma's municipal utility authority has limits. In exercising its proprietary power,  
4 Tacoma may not act beyond the purposes of the statutory grant of power, *State ex*  
5 *rel. PUD 1 v. Wylie*, 28 Wash.2d 113, 182 P.2d 706 (1947), or contrary to express  
6 statutory or constitutional limitations. *Metropolitan Seattle v. Seattle*, 57 Wash.2d  
7 446, 459-60, 357 P.2d 863 (1960); 12 E. McQuillin, *supra* at § 35.35.<sup>52</sup>

#### 8 **F. Conclusion**

9 For the foregoing reasons, the Court should deny Defendant's Motion and grant Plaintiff's  
10 motion for partial summary judgement by declaring council's actions to dispose of Click! by  
11 surplus ultra vires and require the matter be put to a vote of the people, as required under City  
12 Charter 4.6 and RCW 35.94.020.

13 Respectfully submitted this 6<sup>th</sup> day of January 2020.

14 

15 \_\_\_\_\_  
16 Mitchell Shook, Plaintiff

17  
18  
19  
20 <sup>51</sup> These undisputed facts encompass the historical information of Click! showing, the "Telecommunication  
21 Business Plan," the "Study Team," the original goals behind Click!'s creation, the funding, construction,  
22 marketing, and promotion, that resulted in an enterprise with \$25 million in annual revenue, a separate  
23 organizational chart and structure, expenses accounted for separately, growing profits and revenues,  
24 delivering Gigabit speed Broadband Internet Access Service, Fiber To The Home ("FTTH"), VoIP  
25 prioritized DOCSIS 3.1 modem and "Metro Ethernet" services, over *state-of-the-art technology*, with  
26 expansive operations, serving 35,000 residential, institutional and governmental customer accounts,  
including Tacoma's Public Libraries, holding telecom licenses, franchises and agreements; paying City's  
public utility Gross Earning Tax on telecom revenue, as a telecom utility, owning essential routers, servers,  
hubs, nodes, and IP addresses, that are not surplus and will *continue* providing the same utility services, to  
the Utility's same customers; with wholesale rates set by Council, published in Title 12-Utilities in the  
Municipal Code; privatization eliminating Council control over rates; Click! held out as one of four utility  
services; water, power, rail and telecommunications, under four distinct brand names: Tacoma Water,  
Tacoma Power, Tacoma Rail and Click! Network, sharing common customer service facilities in the lobby  
space of TPU's headquarters, appearing together on TPU's website as "Our Services: Power, Water, Rail,  
Click!." Not insignificant facts; yet, all undisputed.

## ORDINANCE NO. 25930

AN ORDINANCE of the City of Tacoma, Washington establishing a telecommunications system as part of the Light Division, supplementing Ordinance No. 23514 and providing for the issuance and sale of the City's Electric System Revenue Bonds in the aggregate principal amount of not to exceed \$1,000,000 to provide part of the funds necessary for the acquisition, construction and installation of additions and improvements to the telecommunications system.

WHEREAS, the City of Tacoma (the "City") owns and operates an electric utility system (the "Electric System"); and

WHEREAS, the Ordinance provides that the City may create a separate system as part of the Electric System and pledge that the income of such separate system be paid into the Revenue Fund; and

WHEREAS, RCW 35A.11.020 authorizes the City to operate and supply utility and municipal services commonly or conveniently rendered by cities or towns; and

WHEREAS, RCW 35.92.050 authorizes cities to construct and operate works and facilities for the purpose of furnishing any persons with electricity and other means of power and to regulate and control the use thereof or lease any equipment or accessories necessary and convenient for the use thereof; and

WHEREAS, the Utility Board and the Council have determined that it is in the best interest of the City that it install a telecommunications system among all of its Electric System substations in order to improve communications for automatic substation control; and

WHEREAS, the City has determined that it is prudent and economical to provide additional capacity on such telecommunications system to provide the Electric System with sufficient capacity to perform or enhance such functions as automated meter reading and billing, appliance control, and load shaping; and

WHEREAS, the Light Division may wish to connect such telecommunications system to individual residences and businesses in its service area or to other providers of telecommunications services; and

WHEREAS, the City has determined that it should create a telecommunications system as part of the Electric System in order to construct these telecommunications improvements; and

WHEREAS, the City by Ordinance No. 23514 passed November 20, 1985 (as amended and supplemented, the "Ordinance"), authorized Electric System Revenue Bonds (the "Bonds") of the City to be issued in series, made covenants and agreements in connection with the issuance of such Bonds and authorized the sale and issuance of the first series of such Bonds in the aggregate principal amount of \$125,505,000 (the "1985 Bonds") for the purpose of refunding all of the City's then outstanding light and power revenue bonds; and

WHEREAS, the 1985 Bonds were issued under date of December 1, 1985 and are now outstanding; and

WHEREAS, the City has heretofore issued ten additional series of Bonds on a parity with the 1985 Bonds, which bonds were issued and are now outstanding:

Authorizing Ordinance	Bonds Dated	Principal Amount Issued
23663	July 1, 1986	\$ 30,000,000
24073	May 1, 1988	60,400,000
24296	May 1, 1989	48,500,000
25004	December 1, 1991	13,800,000
25004	December 5, 1991	42,400,000
25004	December 5, 1991	42,400,000
25089	May 1, 1992	31,295,000

WHEREAS, after due consideration, it appears to the City Council and the Public Utility Board (the "Board") that it is in the best interest of the City to create and construct a telecommunications system and to issue Electric System Revenue Bonds to finance a portion of the costs of such construction and that the exact amount of Bonds and terms of the Bonds shall be determined by resolution of the Council; and

WHEREAS, Section 10.1 of the Ordinance provides that the City may, without the consent of the owners of any Bonds, adopt an ordinance supplemental to or amendatory of the Ordinance to provide for the issuance of Future Parity Bonds and to prescribe the terms and conditions pursuant to which such Bonds may be issued, paid or redeemed; and

WHEREAS, the City desires to provide that the issuance and sale of the Bonds will be issued and secured under the Ordinance as amended and supplemented by Ordinance No. 23663, Ordinance No. 24073, Ordinance No. 24296, Ordinance No. 25004, Ordinance No. 25089, Ordinance No. 25165, Ordinance No. 25333, Ordinance No. 25489 and this Ordinance;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY OF TACOMA:

ARTICLE I

DEFINITIONS AND AUTHORITY

Section 1.1. Supplemental Ordinance. This Ordinance No. 25930 is supplemental to and is adopted in accordance with Section 5.1 and Article X of the Ordinance and shall be known as the Eighth Supplemental Electric System Revenue Bond Ordinance (the "Eighth Supplemental Ordinance").

Section 1.2. Definitions.

A. All terms that are defined in Section 1.1 of the Ordinance shall have the same meanings, respectively, in this Eighth Supplemental Ordinance as such terms are given in

Section 1.1 of the Ordinance, as amended and supplemented by the First, Second, Third, Fourth, Fifth, Sixth, and Seventh Supplemental Ordinances.

B. In this Eighth Supplemental Ordinance:

"Arbitrage and Tax Certification" means the certificate executed by the Director of Finance of the City pertaining to the calculation and payment of any Rebate Amount with respect to the Bonds.

"Bond Sale Resolution" means the resolution to be adopted by the City Council setting forth the final terms of the Bonds.

"Bonds" means the Electric System Revenue Bonds, 199\_\_, of the City issued pursuant to the Ordinance and this Eighth Supplemental Ordinance.

"Code" means the Internal Revenue Code of 1986, as amended, together with corresponding and applicable final, temporary or proposed regulations and revenue rulings issued or amended with respect thereto by the United States Treasury or the Internal Revenue Service, to the extent applicable to the Bonds.

"Eighth Supplemental Ordinance" means this Ordinance No. 25930.

"Rebate Amount" means the amount, if any, determined to be payable with respect to the Bonds by the City to the United States of America in accordance with Section 148(f) of the Code.

Section 1.3. Authority for this Eighth Supplemental Ordinance. This Eighth Supplemental Ordinance is adopted pursuant to the provisions of the laws of the State of Washington, the Tacoma City Charter and the Ordinance.

ARTICLE II

FINDINGS; ESTABLISHMENT OF THE TELECOMMUNICATIONS PROJECT AS A SEPARATE SYSTEM; AND ADOPTION OF PLAN AND SYSTEM

Section 2.1. Establishment of Telecommunication System. The City hereby creates a separate system of the City's Light Division to be known as the telecommunications system (the "Telecommunications System"). The public interest, welfare, convenience and necessity require the creation of the Telecommunications System, contemplated by the plan adopted by Section 2.2 hereof, for the purposes set forth in Exhibit A. The City hereby covenants that all revenues received from the Telecommunications System shall be deposited into the Revenue Fund.

Section 2.2. Adoption of Plan; Estimated Cost. The City hereby specifies and adopts the plan set forth in Exhibit A for the acquisition, construction and implementation of the Telecommunications System (the "Telecommunications Project"). The City may modify details of the foregoing plan when deemed necessary or desirable in the judgment of the City. The estimated cost of the Telecommunications Project, including funds necessary for the payment of all costs of issuing the Bonds, is expected to be approximately \$40,000,000.

Section 2.3. Findings of Parity. The Council hereby finds and determines as required by Section 5.2 of the Ordinance as follows:

A. The Bonds will be issued for financing capital improvements to the Electric System.

B. At the time of issuance and delivery of the Bonds, there will be no deficiency in the Bond Fund and no Event of Default shall have occurred.

C. At the time of issuance and delivery of the Bonds, there will be on file with the City Clerk the certificate of the Director of Finance required by Section 5.2(B)(1) or Section 5.2(C) of the Ordinance.

20  
21  
22  
23  
24  
25  
26

The applicable limitations contained in Section 5.2 of the Ordinance having been complied with in the issuance of the Bonds, the Bonds will have a lien upon the Net Revenues of the Electric System for the payment of principal thereof and interest thereon equal in priority to the lien upon the Net Revenues of the Electric System for the payment of the principal of and interest on the 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds and the 1994 Bonds.

Section 2.4. Due Regard. The Council and Board hereby find and determine that due regard has been given to the cost of the operation and maintenance of the Electric System and that it has not obligated the City to set aside into the Bond Fund for the account of the Bonds a greater amount of the revenues and proceeds of the Electric System than in its judgment will be available over and above such cost of maintenance and operation.

Section 2.5. Findings. The Council and Board hereby find it to be necessary and in the best interests of the City to issue the Bonds in order to provide part of the funds necessary to finance the Telecommunications Project.

ARTICLE III

AUTHORIZATION OF BONDS

Section 3.1. Principal Amount, Designation and Series. Pursuant to the provisions of the Ordinance, a series of Bonds of the City entitled to the benefit, protection and security of such provisions is hereby authorized in the aggregate principal amount of not to exceed \$1,000,000. Such Bonds shall be designated as, and shall be distinguished from the Bonds of all other series by the title, "City of Tacoma, Washington Electric System Revenue Bonds, 199\_."

Section 3.2. Purpose. The purpose of the Bonds is to provide part of the funds necessary to finance the Telecommunications Project, make any necessary deposit to the Reserve Account and to pay the costs of issuance and sale of the Bonds.

18  
19  
20  
21  
22  
23  
24  
25  
26

Section 3.3. Date, Maturities and Interest. The Bonds shall be issued in the aggregate principal amount of not to exceed \$1,000,000 and shall be dated as of the date provided in the Bond Sale Resolution and shall bear interest from their dated date to their stated dates of maturity or prior redemption. The exact principal amount of the Bonds shall be established by the Bond Sale Resolution. The Bonds shall mature on the dates of the years and in the principal amounts and shall bear interest payable semiannually on the dates and at the rates per annum set forth in the Bond Sale Resolution.

Section 3.4. Denomination and Numbers. The Bonds shall be issued in fully registered form in the denominations of \$5,000 or any integral multiple of \$5,000 within a maturity. The Bonds shall be numbered separately in such manner and with any additional designation as the Registrar deems necessary for purposes of identification. The Bond Sale Resolution may provide for the Bonds to be held in book-entry only form.

Section 3.5. Redemption Terms. By the Bond Sale Resolution, the City Council may determine that all or a portion of the Bonds shall be subject to redemption prior to maturity at the option of the City, in whole or in part, on any date and at the respective redemption prices specified in the resolution. The City Council may designate certain Bonds as Term Bonds that will be subject to redemption by operation of the Bond Retirement Account through Sinking Fund Requirements in the years and amounts set forth in the resolution.

Section 3.6. Reservation of Right to Purchase. The City reserves the right to use money in the Revenue Fund or any other legally available funds at any time to purchase any of the Bonds in the open market provided there is no deficiency in the accounts within the Bond Fund. Any purchases of Bonds may be made with or without tenders of Bonds and at either public or private sale.

Section 3.7. Tax Exemption. The City shall comply with the provisions of this section unless, in the written opinion of nationally-recognized Bond Counsel to the City, such

compliance is not required in order to maintain the exemption of the interest on the Bonds from federal income taxation.

The City hereby covenants that it will not make any use of the proceeds from the sale of the Bonds or any other funds of the City which may be deemed to be proceeds of such Bonds pursuant to Section 148 of the Code and the applicable regulations thereunder which will cause the Bonds to be "arbitrage bonds" within the meaning of said Section and said regulations. The City will comply with the applicable requirements of Section 148 of the Code (or any successor provision thereof applicable to the Bonds) and the applicable regulations thereunder throughout the term of the Bonds.

The City further covenants that it will not take any action or permit any action to be taken that would cause the Bonds to constitute "private activity bonds" under Section 141 of the Code.

Section 3.8. Arbitrage Rebate. The City will pay the Rebate Amount, if any, to the United States of America at the times and in the amounts necessary to meet the requirements of the Code to maintain the federal income tax exemption for interest payments on the Bonds, in accordance with the Arbitrage and Tax Certification.

ARTICLE IV

REGISTRATION, FORM AND GENERAL TERMS

Section 4.1. Registrar and Paying Agent. The initial Registrar and Paying Agent shall be the fiscal agencies for the state of Washington in Seattle, Washington, and New York, New York.

Section 4.2. Transfer and Exchange. So long as the Bonds are not in book-entry form, any Bond may be transferred pursuant to its provisions at the Registrar's principal office for such purpose by surrender of such Bond for cancellation, accompanied by a written instrument of transfer, in form satisfactory to the Registrar, duly executed by the registered owner in

39

1 person or by the registered owner's duly authorized attorney. Upon payment of any applicable  
2 tax or governmental charge, the City will execute and the Registrar will authenticate and  
3 deliver at the principal office of the Registrar (or send by registered mail to the owner thereof  
4 at the owner's expense), in the name of the transferee or transferees, a new Bond or Bonds in  
5 authorized denominations of the same interest rate, aggregate principal amount and maturity,  
6 dated as of the last interest payment date to which interest has been paid so that there shall  
7 result no gain or loss of interest as a result of such transfer. To the extent of authorized  
8 denominations, one Bond may be exchanged for several bonds of the same interest rate and  
9 maturity, and for a like aggregate principal amount, and several Bonds of the same interest rate  
10 and maturity may be exchanged for one or several Bonds, respectively, of the same interest  
11 rate and maturity and for a like aggregate principal amount.

12 In every case of a transfer or exchange of any Bonds, the surrendered Bonds shall be  
13 canceled by the Registrar and a certificate evidencing such cancellation shall be promptly  
14 transmitted by the Registrar to the City. As a condition of any such transfer or exchange, the  
15 City at its option may require the payment of a sum sufficient to reimburse it for any tax or  
16 other governmental charge that may be imposed thereon. All Bonds executed, authenticated  
17 and delivered in exchange for or upon transfer of Bonds so surrendered shall be valid  
18 obligations of the City evidencing the same debt as the Bonds surrendered, and shall be entitled  
19 to all the benefits and protection of the Ordinance to the same extent as the surrendered  
20 Bonds.

21 Section 4.3. Limitation on Transfer or Exchange of Bonds. The City shall not be  
22 required to (a) issue, transfer, or exchange Bonds after the 15th day of the month prior to any  
23 interest payment date therefor, or (b) to register, discharge from registration, transfer or  
24 exchange any Bonds which have been designated for redemption within a period of 30 days  
25 next preceding the date fixed for redemption.

Section 4.4. Effect of Payment. All payments of or on account of interest to any registered owner of any Bond, and all payments of or on account of principal to any registered owner of any Bond (or to his or her assigns), shall be valid and effectual and shall be a discharge of the City, the Paying Agent and the Registrar in respect of the liability upon the Bonds or claims for interest, as the case may be, to the extent of the sum or sums paid.

All Bonds upon the payment or redemption thereof shall be canceled and destroyed by the Paying Agent, and a certificate evidencing such payment, cancellation and destruction shall be promptly transferred by the Paying Agent to the City.

Section 4.5. Mutilated, Lost, Stolen or Destroyed Bonds. In case any Bond shall at any time become mutilated or be lost, stolen or destroyed, the City in the case of such mutilated Bond shall, and in the case of such lost, stolen or destroyed Bond in its discretion may, execute and direct the Registrar to authenticate and deliver a new Bond of the same interest rate and maturity and of like tenor and effect in exchange or substitution for and upon surrender and cancellation of such mutilated Bond, or in lieu of or in substitution for such destroyed, stolen or lost Bond. If such stolen, destroyed or lost Bond shall have matured or have been called for redemption, instead of issuing a substitute therefor, the City may without the surrender of such Bond at its option pay the same (in which case the City shall promptly file a certificate to that effect with the Paying Agent and Registrar) or cause the same to be paid by the Paying Agent by a certificate of the City directing such payment filed with the Paying Agent. Except in the case where a mutilated Bond is surrendered, the applicant for the issuance of a substitute Bond shall furnish to the City and the Registrar evidence satisfactory to them of the theft, destruction or loss of the original Bond, and also such security and indemnity as may be required by the City or the Registrar, and no such substitute Bond shall be issued unless the applicant for the issuance thereof shall reimburse the City and the Registrar for the expenses incurred in connection with the preparation, execution, authentication, issuance and

delivery of the substitute Bond. Any such substitute Bond shall be equally and proportionately entitled to the security of the Ordinance with all other Bonds issued hereunder, whether or not the Bond alleged to have been lost, stolen or destroyed shall be found at any time. The Registrar shall cancel all mutilated Bonds surrendered to it.

Section 4.6. Execution and Authentication of Bonds. The Bonds shall be executed on behalf of the City with the manual or facsimile signature of the Mayor and attested with the manual or facsimile signature of the City Clerk and the seal of the City shall be imprinted or impressed on each of the Bonds. The Bonds shall bear thereon a certificate of authentication, in the form set forth in Section 4.7 of this Eighth Supplemental Ordinance, executed manually by the Registrar. Only such Bonds as shall bear thereon such certificate of authentication shall be entitled to any right or benefit under the Ordinance and no Bond shall be valid or obligatory for any purpose until such certificate of authentication shall have been duly executed by the Registrar. Such certificate of the Registrar upon any Bond executed on behalf of the City shall be conclusive evidence that the Bond so authenticated has been duly authenticated and delivered under the Ordinance and that the owner thereof is entitled to the benefits of the Ordinance.

In case any of the officers who shall have signed or attested any of the Bonds shall cease to be such officers before the Bonds so signed or attested shall have been actually delivered, such Bonds shall be valid nevertheless and may be issued by the City with the same effect as though the persons who had signed or attested such Bonds had not ceased to be such officers.

Section 4.7. Form of Bonds.

(a) The Bonds shall be in substantially the following form:

UNITED STATES OF AMERICA  
STATE OF WASHINGTON  
CITY OF TACOMA  
ELECTRIC SYSTEM REVENUE BOND, 199\_

No. \_\_\_\_\_ \$ \_\_\_\_\_  
Interest Rate: \_\_\_\_\_ Maturity Date: \_\_\_\_\_ CUSIP No: \_\_\_\_\_  
\_\_\_\_\_% \_\_\_\_\_  
Registered Owner: \_\_\_\_\_  
Principal Amount: \_\_\_\_\_ DOLLARS

The City of Tacoma, a municipal corporation of the State of Washington (hereinafter called the "City"), for value received, hereby promises to pay to the Registered Owner identified above, or registered assigns, on the Maturity Date identified above, the Principal Amount indicated above and to pay interest on such principal amount from the date hereof or the most recent date to which interest has been paid or duly provided for, at the Interest Rate set forth above per annum, payable \_\_\_\_\_, 199\_, and semiannually thereafter on the first day of each \_\_\_\_\_ and \_\_\_\_\_ until payment shall have been made or provided for.

Principal of and interest on this bond are payable solely out of the special fund of the City known as the "Electric System Revenue Bond Fund" created and established by Ordinance No. 23514 of the City (the "Bond Fund"). Both principal of and interest on this bond are payable in lawful money of the United States of America. Interest shall be paid by mailing a check or draft or by wire transfer as provided in the Bond Ordinance (as hereinafter defined) to the registered owner or assigns at the address shown on the bond register as of the 15th day of the month prior to the interest payment date. Principal shall be paid to the registered owner or assigns upon presentation and surrender of this bond at the principal office of the Paying Agent or Agents which initially are the fiscal agencies of the State of Washington in Seattle, Washington, and New York, New York. (Such fiscal agencies also act, and are hereinafter referred to collectively, as the "Bond Registrar").

This bond shall not be valid or become obligatory for any purpose or be entitled to any security or benefit under the Bond Ordinance until the Certificate of Authentication hereon shall have been manually signed by the Bond Registrar.

26

This bond is one of a duly authorized series of bonds aggregating \$ \_\_\_\_\_ in principal amount and designated as "Electric System Revenue Bonds, 199\_." This bond and the bonds of this series (the "Bonds") are issued under and pursuant to Ordinance No. 23514 as amended and supplemented by Ordinance No. 23663, Ordinance No. 24073, Ordinance No. 24296, Ordinance No. 25004, Ordinance No. 25089, Ordinance No. 25165, Ordinance No. 25489 and Ordinance No. 25930 of the City (together the "Bond Ordinance"), and under the authority of and in full compliance with the Constitution and laws of the State of Washington.

The Bonds are issued for the purpose of providing part of the funds necessary for financing capital improvements to the Electric System. The Bond Ordinance permits the issuance of Future Parity Bonds payable from the Bond Fund ranking on a parity with the 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds, the 1994 Bonds and the Bonds and secured by an equal charge and lien on the Net Revenues and permits the costs associated with certain Contract Resource Obligations to be included in the Electric System's Operating Expenses (as such terms are defined in the Bond Ordinance). The 1985 Bonds, the 1986 Bonds, the 1988 Bonds, the 1989 Bonds, the 1991 Bonds, the 1992 Bonds, the 1992B Bonds, the 1993 Bonds, the 1994 Bonds, the Bonds and any Future Parity Bonds are hereinafter collectively referred to as the "Parity Bonds."

Copies of the Bond Ordinance are on file at the office of the City Clerk and at the principal office of each Paying Agent for this bond. Reference is hereby made to the Bond Ordinance and to any and all modifications and amendments thereof for a more complete description of the Revenues available for the payment of the principal of and interest on the Bonds and the rights and remedies of the owners of the Bonds with respect thereto, the terms and conditions upon which the Bonds have been issued, and the terms and conditions upon which this bond shall no longer be secured by the Bond Ordinance or deemed to be outstanding thereunder if money or certain specified securities sufficient for the payment of this bond shall have been set aside in a special account and held in trust for the payment thereof. Capitalized terms used herein and not otherwise defined shall have the meanings set forth in the Bond Ordinance.

Under the Bond Ordinance, the City is obligated to set aside and pay into the Bond Fund out of the Revenues of said Electric System certain fixed amounts sufficient to pay the principal of and interest and premium, if any, on all Parity Bonds at any time outstanding as the same become due and payable, all as is more fully provided in the Bond Ordinance. The Bonds and the interest thereon constitute the only charge against the Bond Fund and the amount of the Net Revenues pledged to said Bond Fund, as provided in the Bond Ordinance.

In and by the Bond Ordinance, the City covenants to establish, maintain and collect rates and charges for electric energy sold through the ownership or operation of the Electric

System and all other services, facilities and commodities sold, furnished or supplied by the City in connection with the ownership or operation of the Electric System which shall be fair and adequate to provide Revenues sufficient for the payment of the Parity Bonds and all payments which the City is obligated to set aside in the Bond Fund and for the proper operation and maintenance of the Electric System, including payment of certain Contract Resource Obligations, all necessary repairs, replacements and renewals thereof and other costs thereof, as provided in the Bond Ordinance.

The Bonds maturing on and after \_\_\_\_\_ 1, \_\_\_\_\_ are subject to redemption prior to maturity at the option of the City on any date on and after \_\_\_\_\_ 1, 20\_\_\_\_, in whole or in part, upon written notice as provided hereinafter, at the redemption prices with respect to each Bond (expressed as a percentage of the principal amount of the Bonds to be redeemed) set forth below, together with the interest, if any, accrued thereon to the date fixed for redemption:

Redemption Period	Redemption Price
-------------------	------------------

If less than all of the Bonds subject to optional redemption are to be called for redemption, the City shall choose the maturities to be redeemed. In the event that less than all of the Bonds of any maturity are called for redemption, the particular Bonds of such maturity to be redeemed shall be selected by lot by the Bond Registrar, or, so long as the Bonds are held in book-entry form, by the Securities Depository.

The Bonds maturing on \_\_\_\_\_ 1, \_\_\_\_\_ (hereinafter referred to as the "Term Bonds") shall be redeemed prior to maturity by lot, not later than \_\_\_\_\_ 1 in the years \_\_\_\_\_ through \_\_\_\_\_, inclusive, from amounts credited to the Bond Retirement Account in the Bond Fund as sinking fund installments therefor (to the extent such amounts have not been used to redeem or purchase such Bonds as provided below) and in the principal amounts as set forth below, upon written notice as provided hereinafter by payment of the principal amount thereof, together with the interest, if any, accrued thereon to the date fixed for redemption.

Year	Amount
------	--------

The City may purchase or redeem the Term Bonds through the application of part or all of the respective sinking fund installments therefor at any time prior to any \_\_\_\_\_ 1 due date.

18  
19  
20  
21  
22  
23  
24  
25  
26

Any money not so used to redeem or to purchase such Term Bonds shall be substantially exhausted by application to the redemption of such bonds on such succeeding \_\_\_\_\_ 1. If, as of any \_\_\_\_\_ 1, the principal amount of Term Bonds retired by purchase or redemption from any source exceeds the cumulative requirement for sinking fund installments through such date, such excess may be credited against the sinking fund installment for the next fiscal year.

Written notice of redemption shall be given by first class mail, postage prepaid, not less than 30 days nor more than 60 days before the redemption date to the registered owners of the Bonds to be redeemed in whole or in part at their last addresses, if any, appearing on the Bond Register, but any defect with respect to the redemption of any bond shall not invalidate the redemption of any other bond. Notice of redemption having been given by mailing, as aforesaid, the Bonds so called for redemption shall on the date specified in such notice become due and payable at the applicable redemption price herein provided, and from and after the date so fixed for redemption (except as to any bond, or portion of any bond, not so redeemed in accordance with such call for redemption) interest on said Bonds so called for redemption shall cease to accrue.

A portion of the principal sum of this bond in the amount of \$5,000, or any integral multiple thereof, may be redeemed, and if less than all of the principal sum hereof is to be redeemed, in such case upon the surrender of this bond at the principal office of the Bond Registrar, there shall be issued to the registered owner, without charge therefor, for the then unredeemed balance of the principal sum hereof, fully registered bonds of like series, maturity and interest rate in any of the denominations authorized by the Bond Ordinance.

This bond shall be transferable by the registered owner at the principal offices of the Bond Registrar upon surrender and cancellation of this bond, and thereupon a new registered bond or bonds of the same principal amount and interest rate and maturity will be issued to the transferee as provided in the Bond Ordinance. The City, the Bond Registrar, the Paying Agents and any other person may treat the person in whose name this bond is registered as the absolute owner hereof for the purpose of receiving payment hereof and for all purposes and shall not be affected by any notice to the contrary, whether this bond be overdue or not.

It is hereby certified, recited and declared that all acts, conditions and things required by the Constitution and statutes of the State of Washington to exist, to have happened and to have been performed precedent to and in the issuance of this bond do exist, have happened and

ARTICLE V

APPLICATION OF PROVISIONS OF ORDINANCE TO BONDS

Section 5.1. Issuance of Future Parity Bonds. The provisions of Article V of the Ordinance relating to the issuance of Future Parity Bonds shall apply to the Bonds.

Section 5.2. Contract Resource Obligations. The provisions of Article VI of the Ordinance relating to Contract Resource Obligations shall apply to the Bonds.

Section 5.3. Application of Sections 7.1 through 7.3 of Ordinance Relating to Special Funds and Accounts. Except as otherwise provided below in Section 5.10, the provisions of

48

1 Sections 7.1 through 7.3 of the Ordinance relating to the Revenue Fund and the accounts  
2 therein, the Bond Fund and the accounts therein, the Cumulative Reserve Fund, and the  
3 investment of money held for the credit of such Funds shall apply to the Bonds.

4 Section 5.4. Covenants to Secure Bonds. The provisions of Article IX of the  
5 Ordinance setting forth the covenants to secure Bonds, as amended by Article VII of the First  
6 Supplemental Ordinance, shall apply to the Bonds.

7 Section 5.5. Supplemental and Amendatory Ordinances. The provisions of Article X  
8 of the Ordinance relating to supplemental and amendatory ordinances shall apply to the Bonds.

9 Section 5.6. Defaults and Remedies. The provisions of Article XI of the Ordinance  
10 relating to defaults and remedies shall apply to the Bonds.

11 Section 5.7. Amendments and Bondowners' Meetings. The provisions of Article XII  
12 of the Ordinance relating to amendments and bondowners' meetings shall apply to the Bonds.

13 Section 5.8. Miscellaneous. The provisions of Article XIII of the Ordinance relating  
14 to the City's contract with the owners of Bonds, money held by the Paying Agent one year  
15 after the due date, the benefits of the Ordinance and severability shall apply to the Bonds.

16 Section 5.9. Rights of AMBAC. The provisions of Article X of the Second  
17 Supplemental Ordinance and Article VII of the Fifth Supplemental Ordinance and Article VIII  
18 of the Sixth Supplemental Ordinance relating to the rights of AMBAC Indemnity Corporation  
19 are incorporated herein by reference and shall be in force and effect so long as any 1988 Bond,  
20 1992 Bond or 1992B Bond, respectively, is Outstanding and insured by the municipal bond  
21 guaranty insurance policy therein authorized.

22 Section 5.10. Reserve Subaccount. There is hereby established within the Reserve  
23 Account a special subaccount entitled the "199\_\_ Reserve Subaccount." Funds in such  
24 Reserve Subaccount shall be treated in all respects as other funds in the Reserve Account. The  
25 City shall make transfers into the Reserve Subaccount from money and investments in the

Reserve Account, from proceeds of the Bonds, or from other available money in amounts sufficient to satisfy the Reserve Account Requirement with respect to the Bonds.

The City is authorized to satisfy the requirements of Section 7.2 of the Ordinance with respect to the Reserve Account as to the Bonds through the use of Qualified Insurance, or a Qualified Letter of Credit, which may be purchased on the date of closing of the Bonds or after the issuance of the Bonds and substituted for amounts in the Reserve Subaccount pursuant to the provisions of Section 7.2 of the Ordinance.

ARTICLE VI

DISPOSITION OF BOND PROCEEDS

Section 6.1. Construction Account. A special fund of the City has heretofore been created and designated the "City of Tacoma Electric System Construction Fund" (the "Construction Fund"). There is hereby created within the Construction Fund a special account to be known as the "199\_\_ Bonds Construction Account" into which shall be deposited from the proceeds of sale of the Bonds. Money in the Construction Account shall be used for paying part of the costs of the acquisition, construction and installation of the additions and improvements described in Exhibit A, and for paying all expenses incidental thereto (including but not limited to costs of issuance of the Bonds, engineering, financing, legal or any other incidental costs) and for repaying any advances heretofore or hereafter made on account of such costs, and such money or so much thereof as may be necessary be and hereby is appropriated for such purpose.

All proceeds of the Bonds so deposited in the Construction Account shall be continuously and fully invested to the extent practicable in Permitted Investments. Interest earned and income or profits derived by virtue of such investments shall remain in the account and be used for the purposes for which the Bonds are issued or other lawful purposes. Money in the Construction Account may be transferred to the Bond Fund in such amounts as shall be

50

1 necessary to pay principal of and interest on Bonds, and may be used to pay any Rebate  
2 Amount.

3 Section 6.2. Disposition of Proceeds. The proceeds of the Bonds are hereby  
4 appropriated for the following purposes and shall be deposited as follows:

5 1. The amount equal to the interest accruing on the Bonds from their dated  
6 date to the date of their delivery shall be deposited in the Interest Account in the Bond Fund  
7 and invested in Permitted Investments.

8 2. To the extent permitted by the Code, the amount that when added to  
9 other money in the Reserve Account will ensure that the total amount in the Reserve Account  
10 equals the Reserve Account Requirement shall be deposited in the Reserve Account in the  
11 Bond Fund.

12 3. The balance of the Bond proceeds shall be deposited in the Construction  
13 Account and used for the purposes specified in Sections 6.1, including payment of costs of  
14 issuance of the Bonds.

15 ARTICLE VII

16 SALE OF BONDS

17 Section 7.1. Sale of Bonds. The Bonds may be sold by competitive or negotiated sale,  
18 which sale shall be approved by the Bond Sale Resolution.

19 Section 7.2. Official Statement; Insurance. The Director and/or Deputy Director of  
20 Utilities are authorized to prepare a preliminary official statement for the marketing of the  
21 Bonds and to solicit bids for bond insurance. The Bond Sale Resolution shall approve the  
22 preliminary and final official statements and any bond insurance.

ARTICLE VIII  
MISCELLANEOUS

Section 8.1. Defeasance. In the event that the City, in order to effect the payment, retirement or redemption of any Bond, sets aside in the Bond Fund or in another special account, advance refunding bond proceeds or other money lawfully available or direct obligations of the Department of the Treasury of the United States of America ("Government Obligations"), or any combination of such proceeds, money and/or Government Obligations, in amounts which, together with known earned income from the investment thereof are sufficient to redeem, retire or pay such Bond in accordance with its terms and to pay when due the interest and redemption premium, if any, thereon, and such proceeds, money and/or Government Obligations are irrevocably set aside and pledged for such purpose, then no further payments need be made into the Bond Fund for the payment of the principal of and interest on such Bond, and the owner of such Bond shall cease to be entitled to any lien, benefit or security of the Ordinance except the right to receive payment of principal, premium, if any, and interest from such special account, and such Bond shall be deemed not to be outstanding hereunder.

Section 8.2. Undertaking to Provide Ongoing Disclosure. In the Bond Sale Resolution the City shall undertake to provide certain ongoing disclosure for the benefit of the owners of the Bonds as required by Section (b)(5) of the Securities and Exchange Commission's Rule 15c2-12 under the Securities and Exchange Act of 1934.

Section 8.3. Severability. If any one or more of the provisions of this Eighth Supplemental Ordinance is or are held by any court of competent jurisdiction to be contrary to law, then such provision or provisions shall be null and void and shall be deemed separable from the remaining provisions and shall in no way affect the validity of the other provisions of this Eighth Supplemental Ordinance or the Bonds.

CLERK'S CERTIFICATE

I, the undersigned, the duly chosen, qualified and ~~acting~~ City Clerk of the City of Tacoma, Washington, and keeper of the records of the City Council (herein called the "Council"), DO HEREBY CERTIFY:

1. That the attached Ordinance No. 25930 (herein called the "Ordinance") is a true and correct copy of an Ordinance of the Council, as finally passed at a regular meeting of the Council held on the 23<sup>rd</sup> day of July, 1996 and duly recorded in my office.

2. That said meeting was duly convened and held in all respects in accordance with law, and to the extent required by law, due and proper notice of such meeting was given; that a legal quorum was present throughout the meeting and a legally sufficient number of members of the Council voted in the proper manner for the passage of said Ordinance; that all other requirements and proceedings incident to the proper adoption of said Ordinance have been duly fulfilled, carried out and otherwise observed, and that I am authorized to execute this certificate.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of the City as of this 24<sup>th</sup> day of July, 1996.

Rick Rosenblatt  
City Clerk  
City of Tacoma, Washington

EXHIBIT A  
TELECOMMUNICATIONS PROJECT

The Telecommunications Project will include some or all of the following elements:

Infrastructure improvements

Construct a hybrid fiber coax ("HFC") telecommunications infrastructure consisting of fiber optic rings and branches connecting nodes throughout the Light Division service area. This telecommunications system will be asymmetrically two-way capable. It will interconnect all Light Division substations. Connections may also be made with Light Division customers and with other providers of telecommunications infrastructure and services. This telecommunications system will have 500 channels. It will utilize existing Light Division rights-of-way.

Functions to be performed by infrastructure improvements

Through construction of the HFC telecommunications system, the Light Division's Telecommunications System will be capable of performing some or all of the following functions:

- conventional substation communications functions
- automated meter reading (electric and water)
- automated billing (electric and water)
- automated bill payment (electric and water)
- demand side management (DSM) functions, such as automated load (e.g. water heater) control
- provision of information to customers that is relevant to their energy and water purchasing decisions (e.g. information on time-of-use or "green" power rates)
- distribution automation
- remote turn on/turn off for electric and water customers
- city government communications functions
- CATV service
- transport of signals for service providers offering telecommunications services (e.g. Personal Communications Service (PCS), video on demand, high speed data, as well as conventional wired and wireless telecommunications services)
- Internet access service

# REQUEST FOR ORDINANCE OR RESOLUTION

CITY CLERK USE

Request #:	6366
Ordinance #:	
Resolution #:	33668

1. Date: **March 20, 1997**

Requesting Department/Division/Program	Sponsored By	Phone/Extension
2. <b>Tacoma Public Utilities/Light Division</b>		
Contact Person (for questions):		Phone/Extension
3. <b>Steven J. Klein</b>		502-8203

4. Preparation of Resolution is requested for the City Council meeting of Tuesday April 8, 1997

5. Summary Title/Recommendation: (A concise sentence, as it will appear on the Council Agenda)

Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community. This would include the business plan for a broad band telecommunications system and the implementation of the telecommunications system.

6. Background Information/General Discussion: (Why is this request necessary? Are there legal requirements? What are the viable alternatives? Who has been involved in the process?)

The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment and research on similar activities in other municipalities. It is projected that the cost for the construction and installation of this system will be approximately \$55 million to construct, plus more than \$10 million for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division and its customers will exceed the projected costs.

In addition to the benefits to the Light Division that the system would deliver through improved communication abilities, the system will also have the ability to transport data, provide high speed Internet access and deliver full cable television service.

7. Financial Impact: (Future impact on the budget.)

8. List all material available as backup information for the request and indicate where filed:

Request for Board meeting

CITY OF TACOMA  
DEPARTMENT OF PUBLIC UTILITIES

U-9258

of March 26, 1997

REQUEST FOR RESOLUTION

Date: March 19, 1997

INSTRUCTIONS: File request in the Office of the Director of Utilities as soon as possible but not later than nine working days prior to Board meeting at which it is to be introduced. Completion instructions are contained in Administrative Policy POL-104.

1. Summary title for Utility Board agenda: (not to exceed twenty-five words)  
Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community.

2. A resolution is requested to: (brief description of action to be taken, by whom, where, cost, etc.)  
Approve the Light Division's proposal including the business plan for a broad band telecommunications system and authorize the Light Division to proceed to implement the telecommunications system.

The Light Division projects that the cost for the construction and installation of this telecommunications system will be approximately \$55 million dollars to construct, plus more than \$10 million dollars for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division, and its customers will exceed the projected costs.

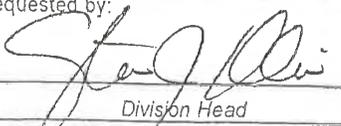

3. Summarized reason for resolution:  
The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment, and research on similar activities in other municipalities. Presentations have been made to neighborhood councils, chambers of commerce, local economic development groups, and the Tacoma Public School Board. A public hearing on the proposed telecommunications system was held by the Public Utility Board on March 12, 1997, and another public hearing was held by the City Council on March 18, 1997. Information summarizing the Telecommunications study and our recommendations was made available at the presentations and public hearings.

In addition to the benefits to the Light Division that the system would deliver through improved communications abilities, the system will also have the ability to transport data, provide high speed Internet access, and deliver full cable television service.

### RESOLUTION NO. U-

#### RECOMMENDATION

The Light Division requests approval by the Public Utility Board and the City Council to develop a broad band telecommunications network as described in the Light Division Telecommunication Study. This action authorizes project implementation and the initiation of design and contract specifications. The Light Division will bring subsequent requests for construction contract and debt issuance approval to the Public Utility Board and City Council as the project progresses. Both policy bodies will also be periodically advised of project status during the development process.

#### BACKGROUND

In preparation for this request, the Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment, and research on similar activities in other municipalities. Staff has made presentations to neighborhood councils, chambers of commerce, local economic development groups, the Tacoma Port Commission, and the Tacoma Public School Board. Two joint Public Utility Board/City Council study sessions were held. A public hearing on the proposed telecommunications system was held by the Public Utility Board on March 12, 1997, and another public hearing was held by the City Council on March 18, 1997. Information summarizing the Telecommunications study and our recommendations was made available at the presentations and public hearings.

The Light Division estimates the cost of this telecommunications system will be approximately \$55 million dollars for construction and installation, plus more than \$10 million dollars for startup operations. The business plan indicates excellent financial potential even under conservative revenue and market penetration assumptions. We recognize the plan's projections are no guarantee of success, but we think the project risks are manageable and justified given the project benefits. These benefits include:

- Improves electric service by enabling distribution system automation, market access, and real-time, interactive communication with customers
- Provides better telecommunications and cable television service sooner and cheaper than other providers will deliver
- Significantly enhances regional economic development and quality of life by creating state-of-the-art telecommunications infrastructure and providing it to all businesses and residences throughout the community
- Creates opportunities for public private partnerships in the wholesale leasing of system capacity to retail telecommunications service providers
- Provides additional revenue to the Light Division and General Government through expansion of the market for telecommunications services

**SUMMARY**

The proposed telecommunications system will strengthen the Light Division's competitive position in the electric power industry through the provision of enhanced electric and telecommunication services to *all* Light Division customers. This system will serve a public purpose and is in the best interests of the City.

Very truly yours,

Mark Crisson  
Director of Utilities

# REQUEST FOR ORDINANCE OR RESOLUTION

CITY CLERK USE

Request #:  
Ordinance #:  
Resolution #:

1. Date: *March 20, 1997*

Requesting Department/Division/Program	Sponsored By	Phone/Extension
2. <i>Tacoma Public Utilities/Light Division</i>		
Contact Person (for questions):		Phone/Extension
3. <i>Steven J. Klein</i>		<i>502-8203</i>

4. Preparation of Resolution is requested for the City Council meeting of Tuesday April 8, 1997

5. Summary Title/Recommendation: (A concise sentence, as it will appear on the Council Agenda)

Authorize the development of a broad band telecommunications network to improve electric utility service and improve the telecommunications infrastructure available to the community. This would include the business plan for a broad band telecommunications system and the implementation of the telecommunications system.

6. Background Information/General Discussion: (Why is this request necessary? Are there legal requirements? What are the viable alternatives? Who has been involved in the process?)

The Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment and research on similar activities in other municipalities. It is projected that the cost for the construction and installation of this system will be approximately \$55 million to construct, plus more than \$10 million for startup operations. However, the Light Division believes that the overall benefits to the City, the Light Division and its customers will exceed the projected costs.

In addition to the benefits to the Light Division that the system would deliver through improved communication abilities, the system will also have the ability to transport data, provide high speed Internet access and deliver full cable television service.

7. Financial Impact: (Future impact on the budget.)

8. List all material available as backup information for the request and indicate where filed:

Source Documents/Backup Material	Location of Document
----------------------------------	----------------------

Letter to the Public Utility Board and City Council from Mark Crisson dated March 20, 1997      Attached

9. Funding Source: (Enter amount of funding from each source)

### RESOLUTION NO. U- 9258

#### RECOMMENDATION

The Light Division requests approval by the Public Utility Board and the City Council to develop a broad band telecommunications network as described in the Light Division Telecommunication Study. This action authorizes project implementation and the initiation of design and contract specifications. The Light Division will bring subsequent requests for construction contract and debt issuance approval to the Public Utility Board and City Council as the project progresses. Both policy bodies will also be periodically advised of project status during the development process.

#### BACKGROUND

In preparation for this request, the Light Division has undertaken an extensive telecommunications study that includes market research, telecommunications industry analysis, an examination of the regulatory environment, and research on similar activities in other municipalities. Staff has made presentations to neighborhood councils, chambers of commerce, local economic development groups, the Tacoma Port Commission, and the Tacoma Public School Board. Two joint Public Utility Board/City Council study sessions were held. A public hearing on the proposed telecommunications system was held by the Public Utility Board on March 12, 1997, and another public hearing was held by the City Council on March 18, 1997. Information summarizing the Telecommunications study and our recommendations was made available at the presentations and public hearings.

The Light Division estimates the cost of this telecommunications system will be approximately \$55 million dollars for construction and installation, plus more than \$10 million dollars for startup operations. The business plan indicates excellent financial potential even under conservative revenue and market penetration assumptions. We recognize the plan's projections are no guarantee of success, but we think the project risks are manageable and justified given the project benefits. These benefits include:

47

- Improves electric service by enabling distribution system automation, market access, and real-time, interactive communication with customers
- Provides better telecommunications and cable television service sooner and cheaper than other providers will deliver
- Significantly enhances regional economic development and quality of life by creating state-of-the-art telecommunications infrastructure and providing it to all businesses and residences throughout the community
- Creates opportunities for public private partnerships in the wholesale leasing of system capacity to retail telecommunications service providers
- Provides additional revenue to the Light Division and General Government through expansion of the market for telecommunications services

**SUMMARY**

The proposed telecommunications system will strengthen the Light Division's competitive position in the electric power industry through the provision of enhanced electric and telecommunication services to *all* Light Division customers. This system will serve a public purpose and is in the best interests of the City.

Very truly yours,

Mark Crisson  
Director of Utilities

WHEREAS the City of Tacoma, Department of Public Utilities, Light Division desires to: (1) develop a state-of-the-art fiber optic technology to support enhanced electric system control, reliability and efficiency; (2) develop capability to meet the expanding telecommunications requirements in an evolving competitive electric market, the most critical of which is real-time, two-way interactive communications with individual energy consumers, (3) create greater revenue diversification through new business lines (i.e. internet transport, cable TV, etc.), (4) enhance traditional products and service, and (5) maximize return on Light Division assets, and

WHEREAS these desired capabilities can be provided with a broad band telecommunications system for all of the Light Division's service area, and

WHEREAS a broad band telecommunications system will have available capacity for future Light Division needs and will also have the capacity to provide Telecommunications services for data transport, high speed internet access, full cable television service, and other uses, and

WHEREAS the Light Division has retained consultants to review and analyze the feasibility of a broad band telecommunications systems for the Light Division's service area, and a business plan has been prepared for this purpose (copies are on file with the Clerk), and

WHEREAS the cost of constructing, installing and commencing to operate a broad band telecommunications system will be approximately \$65 million dollars, but the benefits to the Light Division, the City and the Light Division customers are projected to exceed and justify the initial cost, and

# Telecommunications Study

by Tacoma City Light

Tacoma City Council  
Public Utility Board  
Joint Study Session  
February 18, 1997

## Why should a Publicly Owned Electric Utility be involved in Telecommunications?

- Board initiated RFP process in 1995
- Enhanced Telecommunication capability vital to the Utility in order to continue to improve service and provide choice to customers in rapidly changing environment.
- Investment in the community that provides a pathway to choice and competition.
- Over 100 years ago, Tacoma took steps to improve vital infrastructure to better serve our citizens.

## Key Operational Advantages to Tacoma City Light

- Electric system control and outage reporting
  - Savings to Tacoma City Light
  - Savings to customers
- Electric system performance monitoring and preventive maintenance
- Providing interactive communication link to customers

## Telecommunications Study Team

- Bruce Campbell, Metro Utility Communications Group
- F. Paul Carlson, Ph.D., Metropolitan Communications Consultants
- Linda Dethman, Dethman & Associates
- Stuart Hauser, Metro Utility Communications Group
- Peggy sue Heath, A.B.D., APEX Business Solutions
- Sandy Hunt, Ph.D., APEX Business Solutions
- Richard C. T. Li, P.E., Metropolitan Communications Consultants
- Bruce Mann, Ph.D., University of Puget Sound
- Catherine Rudolph, APEX Business Solutions
- Susan V. Marr, Metro Utility Communications Group
- Gene Starr and the research team at Market Data Research
- Staff team: Chandra Enos, Lisa Steadmon, and Steve Roberts, P.E.

# Telecommunications Study

## Brief Review of Part One

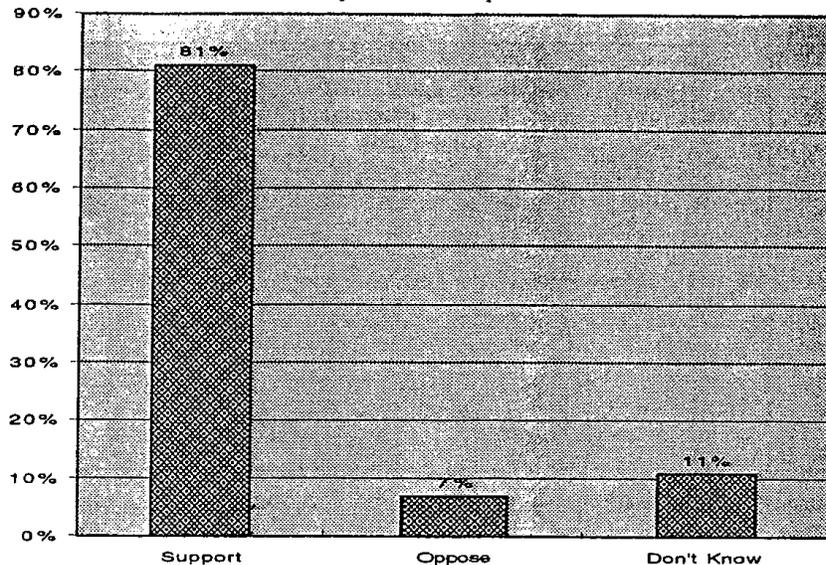

- Telecommunications technology
- Telecommunication companies
- Regulation: Federal, State, and Local
- Other cities and communities
- Local telecommunications history
- Existing telecommunications options in our local communities

## Business Market Research

- Survey of 200 businesses:
  - representing \$5 billion in revenue & 25,000 jobs
  - average of three locations in greater Tacoma area
- Importance of telecommunications links
  - 74% say links are extremely important to their success
  - 62% reported that a link being out one day would cause serious harm to their business; 20% said that it would shut them down
- 61% of businesses use Internet (but with limited access)
- 14% of employees telecommute (increasing to 18% in 2yr)
- Limited Experience with High Speed Lines
  - Two-thirds were not familiar with ISDN lines or T-1 lines

## Support for Tacoma City Light Telecommunications System

To what degree do you support Tacoma City Light building this new communications system to improve service to customers?

## Economic Development Impacts

- Market trends
  - Change in economic base
  - Downtown development activities
- Business Environment
- Telecommunications needs
  - Development activities at military bases
  - The expanding health services industry
  - Professional & financial services
  - Port of Tacoma

## ABSTRACT

This paper describes the process by which the City of Tacoma, Washington came to build an open access, broadband telecommunications system designed to promote effective competition in the provision of Internet and other telecommunications services. The decision by the City's electric utility to build a state-of-the-art communications system as a strategic response to deregulation in the electric utility industry is detailed. And, the decision to provide open access to the telecommunications system to promote competition in the broadband Internet services market is considered in light of telecommunications deregulation. Tacoma's open access cable system is analyzed in the context of contestable market theory. The state of broadband Internet competition is described, as is the current regulatory framework monopoly.

## INTRODUCTION

*I don't think society has figured out how to come up with a business model that is conducive for companies to make the size of investments that are necessary to solve that problem (a shortage of bandwidth in the 21<sup>st</sup> century) with a reasonable expectation of profit but without ending up with a monopoly position. [4]*

Andy Grove, Chairman of Intel Corp.  
Live Internet E\*Trade Interview  
Nov. 14, 1998

In this paper the authors place the Tacoma initiative within the context of existing regulations and current competitive conditions within the telecommunications and electric utility industries. The paper begins with a brief case study narrative of the events that transpired in Tacoma. The reader is given insight into the strategic decision-making and political considerations that led to the City's policy makers' decision to approve the telecommunications overbuild—the largest even undertaken by a municipally owned utility.[8] The paper will continue with a broader perspective. Four different broadband, Internet access technologies including cable, telephony (DSL), wireless, and satellite, are described. The rationale for the FCC's refusal to regulate Internet cable access is considered. And the current legal

challenges to the main cable Internet access provider (ATT/TCI) undertaken by the City of Portland and by a coalition of telephony-based DSL Internet access providers are described.

The authors' thesis that Tacoma has developed a viable business model for building broadband capacity without creating monopoly is introduced.

## **TACOMA'S BUSINESS STRATEGY DECISION: A RESPONSE TO DEREGULATION**

### **Background and context**

When President George Bush stood on an oil platform in the Gulf of Mexico to sign the 1992 National Energy Policy Act, Tacoma Power's management team knew that they had to plan for more than the electric utility's centennial celebration scheduled for the following year.[6] The century old municipally owned utility would now have to provide open access transmission service to wholesale or bulk rate providers and customers on an "unbundled" basis. And although "retail wheeling" was excluded from the federal statute, state policy makers were authorized to require the same open access for those providers and potential customers as well.[9] The days of a stable, regulated and monopolized marketplace would soon be ending for Tacoma Power.

Tacoma Power's management team faced this challenge by going to the private sector for advice. They queried a number of managers from other deregulated industries—airlines and banking—in a search for new models to deal with restructuring during uncertainty. What they learned was that the successful enterprises were led by managers who could think strategically. They were also told to know computers and follow technology, invest in process automation, learn to be more efficient and, most importantly, know your customer. The last point—know your customer—led to some disquieting findings from their own market research. While Tacoma Power's customers were satisfied, they were not loyal—in fact only ten percent of their customer based expressed loyalty.[6] The management team concluded that they were facing a true paradigm crisis where "all of the traditional rules blurred, experimentation was spreading rapidly, and practices once so accepted that they were simply a part of the woodwork were (now) being called into question." [3 p. 323]

### **A new strategy evolves**

The utility's managers chose to respond strategically by recognizing that their core business really was the reliant and efficient delivery of electrons. Thus, they sought a new paradigm—one that would steer the business, make it more reliable and customer friendly and, importantly, follow the technology. The technology in this case was fiber optics and the construction of a state-of-the art communication system for the purpose of automating the utility's distribution infrastructure.

Tacoma Power's managers realized that such a system would add considerable value for the customer: instant information on the time and location of power outages, remote connection and disconnection of services, information about electricity consumption patterns, real time pricing and appliance control systems.[2] As the utility's superintendent described it: "So what do we accomplish? We will keep the revenues going, the customers happy and we will be dispatching the crews where the problems are at." [6] In sum, the value-added services would truly put customers in the driver's seat and allow them "to control the resources" (real time pricing and appliance control) as well as to "choose the destination and route." [3 p. 181] The end result would be greater customer loyalty.

### **Building the system**

The question now was how to build such a system. An obvious option was a strategic alliance with the private sector. But those partnerships were not available. The local phone company, cable provider and a number of competitive access providers turned down overtures from Tacoma Power's management team.[6] And so the utility decided to move forward on its own—to build the infrastructure itself. But before making the multi-million dollar investment, the utility's director requested that Tacoma Power's citizen oversight body, the Utility Board, authorize an outside review by a consultant group—the Stanford Research Institute.

The Board approved and soon SRI's consultants came back with an interesting idea: Why not invest more dollars to expand the fiber optic pipe?[6] Then Tacoma Power could offer its customers an array of services—cable television, competitive Internet access, telephony and data transport. The Telecommunications Act signed into law by President Bill Clinton in 1996 had, in fact, given Tacoma Power this option by eliminating barriers to entry into the telecommunications market. This led Tacoma Power's superintendent to proclaim: "The new law afforded us the opportunity to embark on a broader strategy—one that would allow us to add smart electrons to the worker bee electrons the utility was providing for over 100 years." [6]

### **Testing the market**

The next step was to conduct a marketing survey. The findings were more than promising. Tacoma Power far outdistanced the competition as the preferred provider for cable television service.[10] And a financial analysis of the current market showed that a 25 percent penetration of the current customer base for cable service alone would lead to an operating profit within three years.[11] The pro forma income statement forecast over 33,000 cable customers in three years of operation. Within ten years time, the entire investment of \$100 million would be paid off and Tacoma Power would have enough revenue left over to plow into system upgrades.[11] But before embarking on this major undertaking, Tacoma Power borrowed once again from the private sector. The utility pulled together a panel of fourteen experts from an array of disciplines to review and pass on a final business plan. That plan, which was given the stamp of approval by the panel, called for retail and wholesale applications. On the retail side, the planned offerings included more reliable distribution of electricity, cable television, digital audio broadcasts, Internet over television and broadband services with customized point-to-point connectivity. On the wholesale side, Tacoma Power would offer a first-of-its-kind open platform highway for Internet Service Providers and their high speed modems.

### **Political currents**

The political dynamics revolving around Tacoma Power's plans to build a fiber optic system soon changed once the management team broadened their strategy to include an array of telecommunications services. The manager of the incumbent cable provider (TCI) sent a scathing critique of the utilities' business plan to the Tacoma City Manager. The twenty-one page letter ended with the warning: "(Tacoma's policy makers should)...pause and let the euphoria of the benefits you may now expect be replaced by a realistic appreciation of the pitfalls and risks associated with municipal ownership of what is traditionally an entertainment service provided by private enterprise." [5] After numerous public hearings, two declaratory judgements from the state superior court, a plea from the cable provider's national president and an additional due diligence review by three outside consultants, the city policy makers moved forward with the \$100 million overbuild.

The following section will discuss how contestable market theory applies to the Tacoma case and will bring the reader up-to-date on current and national developments.

## **THE ECONOMIC RATIONALE: CREATING CONTESTABILITY IN BROADBAND TELECOMMUNICATIONS AND ENHANCING COMPETITION IN THE CABLE TV MARKET**

### **Creating a Contestable Market in Broadband Telecommunications**

There are often strong parallels between the deregulation experiences of very diverse industries. In the early years of airline deregulation, Elizabeth Bailey, then a member of Civil Aeronautics Board, called for municipalities to bear the sunk costs associated with developing new airports in an effort to make the airline industry more contestable.[1] Entry by new airlines would be much more likely, she reasoned, if they did not have to bear the risk associated with investing in their own airports - investments which presumably could not be recovered if a new airline failed.

Similarly, entry into various branches of the telecommunications industry would be more likely if municipalities bore the sunk costs associated with broadband capacity. New telecom entrants could (for an appropriate charge) simply ride the municipal system much like new airlines contract for terminal space at the municipal airport. Moreover, as the telecom market becomes more contestable (as barriers to entry are reduced through public ownership of broadband capacity), the mere threat of potential competition becomes a more viable disciplinary force within the market. Existing providers of telecom services will be less likely to charge excessive prices or permit X-inefficient practices and less

likely to become technologically lethargic because of the constant threat of potential competition. A truly contestable telecommunications market, then, will provide consumers with an increasing variety of services produced in an efficient manner and offered at competitive prices.

The City of Tacoma has designed and built a broadband telecommunications system with the express purpose of providing *competitive* telecommunications services to businesses and residents within the City. By creating an open-access architecture (a feat which, until recently, AT&T contended was economically impossible), the City has made it possible for many competing Internet service providers to gain access to the system. It would appear that Tacoma's initiative provides one possible answer to Andy Grove's lament (as expressed earlier) that there appears to be no viable model for building much needed broadband capacity without creating a monopoly position.

#### **Creating Competition in the Cable TV Market**

As noted above, the telecommunications system developed by the City also created the capacity to compete with TCI, the local cable TV provider. Though this was not the primary rationale for constructing the system, the possibility of injecting competition into the cable TV market was very attractive to local policy makers because of the poor quality of service then offered by the existing cable TV provider.[13]

The advent of competition did have its intended effect in Tacoma as the incumbent provider (now AT&T/TCI) responded to the City's entry into the market by upgrading its service. By adding fiber to its delivery system and moving to a digital format, the incumbent was able to match (or exceed) the various channel offerings the City's new system delivered. No such upgrades were provided by TCI in nearby Seattle, leaving that city at odds with its only cable TV provider.[13]

#### **RECENT DEVELOPMENTS**

Presumably in response to legal challenges from the City of Portland, GTE and the Open NET Coalition, AT&T recently announced that it will open its broadband cable Internet system to ISP providers by 2002 when its contract with @Home, the sole provider currently riding its system, expires.[14] AT&T's general counsel had previously argued, "Regulation [a requirement to provide open access] would undercut the investment needed to expand cable's broadband services. It also would deter the private investment necessary to fund the construction of new broadband facilities, which will damage competition, not spur it." [7] According to AT&T, then, monopoly control of its broadband system was technologically determined. This, in effect, constitutes a natural monopoly argument, which would appear a dangerous position for AT&T to take.

However, the FCC, under William Kennard's leadership, has supported AT&T's position, arguing "At this nascent stage in the development [of broadband], one should not presume to have a regulatory cure for every anticipated marketplace ailment. It would be imprudent to act now. We must allow the marketplace to evolve." [7] The FCC recognizes at least four developing broadband technologies – cable access, DSL access provided by telephone companies, satellite access and wireless access.

Although AT&T's promise to open its system includes a pledge to not penalize customers for choosing a provider not affiliated with AT&T, the question lingers as to whether or not those independent providers of broadband services may be at some competitive disadvantage to AT&T's affiliates. The public ownership model developed by Tacoma represents a viable alternative – an alternative which should provide a more level playing field for ISP competition.

By the end of 1999, with substantial technical assistance from Cisco Systems, Tacoma's public utility had completed the construction of an open architecture, broadband telecommunications system. It was serving over 11,000 homes with cable TV services (exceeding the 25 percent penetration goal) and had contracted with one ISP to begin the provision of residential high-speed Internet services with other ISP providers in the wings. The utility also provides high-speed data transmission services to several major companies in the Tacoma area in competition with the regional Bell telephone company. As one of only three U.S. cities wired with a fiber-optic telecommunications system, Tacoma is attracting a variety of new high-tech businesses.[12] The economic development benefits of a truly competitive, broadband telecommunications system are clear and the public ownership model Tacoma has developed appears viable.

No. 96 2 09938 0

CITY OF TACOMA'S MOTION FOR  
SUMMARY JUDGMENT

Plaintiff City of Tacoma ("City") requests that this Court enter a judgment declaring that:

1. The Court has jurisdiction over the subject matter and parties in this action.
2. Tacoma City Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.
3. The City has authority under the laws of the State of Washington and the United States to provide cable television service in the Light Division service area.
4. The City has authority under the laws of the State of Washington and the United States to lease telecommunications facilities and capacity to telecommunications providers.
5. The City has authority under the laws of the State of Washington and the United States to issue the Bonds for the purposes set for in paragraphs (3) and (4) above and in the manner set forth in the Bond Ordinance.

**I. INTRODUCTION**

The City of Tacoma (the "City") brought this declaratory judgment class action under RCW 7.24 and 7.25 and CR 23(B)(2) to confirm its authority to issue bonds for the purpose of constructing and operating a telecommunications system consisting of a hybrid fiber coaxial network (the "Telecommunications System"). On July 23, 1996, the Tacoma City Council adopted Ordinance No. 25930, which authorized the sale of Electric System revenue bonds (the "Revenue Bonds") in order to finance the first phase of constructing and operating the Telecommunications System. The City will utilize the Telecommunications System to enhance electric service to customers of its Light Division. The City may also utilize a portion of the Telecommunications System to provide cable television service to customers in the Light Division service area, and lease Telecommunications System facilities or capacity to providers of telecommunications services.

**II. RELIEF REQUESTED**

The City requests that the Court enter judgment declaring that:

1. The Court has jurisdiction over the subject matter and parties in this action.
2. Tacoma City Ordinance No. 25930 (the "Bond Ordinance") was properly enacted.
3. The City has authority under the laws of the State of Washington and the United States to provide cable television service in the Light Division service area.
4. The City has authority under the laws of the State of Washington and the United States to lease telecommunications facilities and capacity to telecommunications providers.
5. The City has authority under the laws of the State of Washington and the United States to issue the Bonds for the purposes set for in paragraphs (3) and (4) above and in the manner set forth in the Bond Ordinance.

**IV. EVIDENCE RELIED UPON**

17 The City believes that the following facts are undisputed in every material respect. These  
18 facts are contained in the Declaration of Jon Athow in Support of the City's Motion for Summary  
19 Judgment ("Athow Decl.").

20 Plaintiff, the City of Tacoma, is a municipal corporation and a city of the first class of the  
21 State of Washington. The Defendants herein are taxpayers of the City of Tacoma and ratepayers of  
22 its electrical utility, which is known as the Light Division of the Department of Public Utilities (the  
23 "Light Division"). Harold E. Nielsen, Jr., the taxpayer and ratepayer representative, is a resident and  
24 taxpayer of the City and a customer of the Light Division. The City currently owns and operates,  
25 through its Light Division, an electric utility (the "Electric System") for the purpose of providing  
26 electricity and other energy services throughout the City and other portions of Pierce County.

The Telecommunications System will be used to improve the speed and capability of the  
existing real-time communications among certain Electric System substations, and to extend such  
real-time communications to the remaining substations. In addition, the Telecommunications System  
may be used to enhance such existing energy services as demand management, identification of  
outages, meter reading, billing and payment, and resource dispatch. The Telecommunications System  
may be used to perform similar functions for the City's provision of water service. The City's  
authority to issue the Revenue Bonds to finance the purposes discussed in this paragraph is not at  
issue.

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 4

O:\LARI24624-00.015\SJMEMRA.DOC

1 The City may also utilize a portion of the Telecommunications System to provide cable  
2 television service to customers within the Light Division service area, and to lease facilities or  
3 capacity to providers of video-on-demand, data transport, telephony, and other telecommunications  
4 services. By providing cable television service and/or leasing facilities or capacity to  
5 telecommunications providers, the City can ensure a range of choices for consumers, provide public  
6 interest television programming, and improve the availability of competitively priced  
7 telecommunications services.

8 The City also estimates that by providing cable television service and/or leasing facilities or  
9 capacity, it could generate substantial revenue to help offset the costs of constructing and operating  
10 the Telecommunications System. Because the infrastructure for the telemetry improvements designed  
11 to meet Electric System needs represents a substantial portion of the costs of the Telecommunications  
12 System, the relative cost of these additional revenue-producing capabilities is low.<sup>1</sup>

13 The Tacoma City Council enacted Ordinance No. 25930 (the "Bond Ordinance") on July 23,  
14 1996, at a regular meeting.<sup>2</sup> The Bond Ordinance provides for the construction and operation of a  
15 Telecommunications System within the Light Division and for the issuance and sale of Electric  
16 System revenue bonds in the aggregate principal amount of \$1,000,000.

17 **V. ARGUMENT**

18 **A. Summary Judgment Standard**

19 Summary judgment is appropriate to dispose of actions or parts thereof when no genuine  
20 issues of material fact exist or when only a question of law exists. CR 56(c). "The burden is on the  
21 moving party to demonstrate that there is no issue as to a material fact." *Scott v. Pacific West*  
22 *Mountain Resort*, 119 Wn. 2d 484, 502-03 (1992). If the party seeking summary judgment  
23 successfully carries its initial burden, the burden shifts to the non-moving party to establish the

24 <sup>1</sup> Declaration of Jon Athow in Support of Motion for Summary Judgment ("Athow Decl."), ¶ 10.

25 <sup>2</sup> A true and correct copy of the Bond Ordinance is attached as Exhibit C to Mr. Athow's Declaration.

1 existence of the facts on which it has the burden of proof at trial. *Young v. Key Pharmaceuticals,*  
2 *Inc.*, 112 Wn. 2d 216, 225 (1989). The non-moving party must respond with specific facts and  
3 cannot rely on bare allegations contained in his or her pleadings. *Baldwin v. Sisters of Providence,*  
4 112 Wn. 2d 127, 132 (1989). Conclusory statements or argumentative assertions raised in affidavits  
5 are insufficient to raise an issue of fact and do not preclude summary judgment. *Grimwood v.*  
6 *University of Puget Sound, Inc.*, 110 Wn. 2d 355, 359-60 (1988).

7 In the instant case, there are no issues of material fact. The facts bearing on the City's  
8 authority to provide cable television service and to lease telecommunications facilities and capacity to  
9 telecommunications providers are undisputed. Only questions of law remain. The case should  
10 therefore be resolved on summary judgment.

11 **B. The City Has Authority Under Washington Statutes To Construct and Operate the**  
12 **Entire Telecommunications System and To Lease Portions of the System's Capacity or**  
13 **Facilities.**

14 1. **A Charter City Has Broad Powers.**

15 The Washington Constitution grants broad powers to first-class charter cities such as Tacoma.  
16 It states, "Any city containing a population of ten thousand inhabitants, or more, shall be permitted to  
17 frame a charter for its own government, consistent with and subject to the Constitution and laws of  
18 this state . . . ." Wash. Const. art XI, § 10. Under Chapter 35 RCW, a charter city has "all the  
19 powers which are conferred upon incorporated cities and towns by this title or other laws of the state,  
20 and all such powers as are usually exercised by municipal corporations of like character and degree."  
21 RCW 35.22.570. In addition to this "omnibus" grant of power, RCW 35.22.900 provides that grants  
22 of power to first-class cities must be liberally construed to carry out the objectives of chapter 35.22  
23 RCW. *See also Citizens for Financially Responsible Government v. City of Spokane*, 99 Wn. 339,  
343 (1983).

24 In light of these constitutional and statutory provisions, the Washington Supreme Court has  
25 held that "the only limitation on the power of cities of the first class is that their action cannot  
26

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 6

O:\LAR\24624-00.015\SIJMEMRA.DOC

1 contravene any constitutional provision or any legislative enactment. . . . [A] city of the first class has  
2 as broad legislative powers as the state, except when restricted by enactments of the state legislature."  
3 *Winkenwerder v. City of Yakima*, 52 Wn. 2d 617, 622 (1958).

4 2. A City Has Even Broader Powers When It Is Operating a Utility.

5 The powers of a city under Washington law are especially broad when the city is performing a  
6 proprietary, as distinguished from a governmental, function. In *Tacoma v. Taxpayers*, 108 Wn.2d  
7 679 (1987), the Washington Supreme Court stated that while municipal authority must be narrowly  
8 construed when the function is governmental, "when the Legislature authorizes a municipality to  
9 engage in a business, it may exercise its business powers much in the same way as a private individual.  
10 . . . We have viewed the Legislature as implicitly authorizing a municipality to make all contracts, and  
11 to engage in any undertaking necessary to make its municipal electric utility system efficient and  
12 beneficial to the public." *Id.* at 694-95. *See also Hite v. Public Utility Dist. No. 2*, 112 Wn.2d 456,  
13 459 (1989) ("It is clear that in the production and sale of electricity, a municipal corporation acts in  
14 its proprietary capacity. . . . In that capacity, a municipal corporation acts as the proprietor of a  
15 business enterprise for the private advantage of the city and may exercise its business powers in much  
16 the same way as a private individual or corporation.")<sup>3</sup>

17 In addition, the courts have recognized many instances in which public utility districts, which  
18 are municipal corporations with more limited powers than cities, may engage in activities that are  
19 incidental to their expressly authorized functions of providing electric or other utility service. *See,*  
20 *e.g., Puget Power and Light Co. v. Public Utility District No. 1 of Chelan County*, 17 Wn. App. 861  
21 (1977) (involving public utility district's provision of recreational facilities); *Snohomish County*  
22 *Public Utility District No. 1 v. Broadview Television Co.*, 91 Wn.2d 3, 8 (1978) (upholding district's

23  
24  
25 <sup>3</sup> *Hite* and *Taxpayers* made clear that the holding in *Chemical Bank v. Washington Public Power Supply*  
26 *System*, 99 Wn.2d 772 (1983), does not detract from the broad authority that cities enjoy when acting in a proprietary  
capacity.

1 authority to lease pole attachments even though activity is "only incidental to the accomplishment of  
2 the district's primary purpose, the distribution and sale of electricity").

3 3. The City Has Authority Under Washington Statutes To Provide Telecommunications  
4 Services.

5 The City's statutory powers include the authority to provide telecommunications services.  
6 First, the City, as a first class charter city having code city powers as well, has all powers not denied  
7 by law, "including operating and supplying of utilities and municipal services commonly or  
8 conveniently rendered by cities or towns." RCW 35A.11.020. Tacoma may conveniently render  
9 telecommunications services because the Light Division has an existing citywide electric system of  
10 connections to customers' homes, because it has existing billing relationships with customers, and  
11 because it can provide services economically. Second, there is no express statutory prohibition  
12 against city provision of municipal telecommunications services. *Winkenwerder, supra*. To the  
13 contrary, the Legislature has acknowledged that cities provide communications services through  
14 enacting a statute providing for the burying of city-owned communications facilities. RCW  
15 35.96.030. Finally, the Legislature has determined that competitive markets for telecommunications  
16 services serve the public interest. RCW 80.36.300; *In re Electric Lightwave, Inc.*, 123 Wn.2d 530,  
17 538-39 (1994) (noting that "it is the state's policy to promote diversity in the supply of  
18 telecommunications services and products in telecommunications markets throughout the state").  
19 The City's provision of telecommunications services will make the market more competitive, thus  
20 furthering the public interest recognized by the Legislature.

21 4. Washington Case Law Recognizes the City's Authority To Provide  
22 Telecommunications Services.

23 The Washington Supreme Court in *Issaquah v. Teleprompter Corp.*, 93 Wn. 2d 567 (1980),  
24 recognized the power of a code city under RCW 35A.11.020 to utilize its telecommunications system  
25 to provide telecommunications services, including cable television service. The Court held in  
26 *Teleprompter* that a city was authorized by statute to operate a cable television system under the

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 8

O:\LAR\24624-00.015\SIJMEMRA.DOC

1 broad authority of RCW 35A.11.020 because there was "no general law which conflicts with the  
2 city's authority under the optional municipal code to operate such a system." *Id.* At 575. First class  
3 charter cities such as Tacoma have all the powers granted to code cities. RCW 35.22.570. Thus,  
4 under *Teleprompter* the City is clearly authorized to use its Telecommunications System to offer  
5 cable television service.

6 Tacoma's authority is not limited to the provision of cable television service.  
7 *Teleprompter* provides no basis for distinguishing cable television from other telecommunications  
8 services. The Washington Legislature views cable television as a telecommunications service. *See,*  
9 *e.g.*, RCW 80.04.010 (defining "telecommunications" as "the transmission of information by wire,  
10 radio, *optical cable*, electromagnetic, or other similar means) (emphasis added); RCW 80.36.370  
11 (exempting cable television from the Washington Utilities and Transportation Commission's  
12 regulation of telecommunications services). Thus, *Teleprompter* clarifies the authority for Tacoma to  
13 provide telecommunications services.

14 5. The City Has Authority To Lease City-Owned Telecommunications Facilities

15 The City has authority under its charter and under state law to lease excess capacity and  
16 facilities of its Telecommunications System to other telecommunications providers. Tacoma's Charter  
17 expressly permits the City to lease City property. Tacoma, Wash., Code § 9.1. Under state law, a  
18 first class city has the power to:

19 control the finances and property of the corporation, and to acquire, by purchase and  
20 otherwise, such lands and other property as may be necessary for any part of the  
21 corporate uses provided for by its charter, and to dispose of any such property as the  
interests of the corporation may, from time to time, require.

22 RCW 22.280(3). The Washington Supreme Court has upheld the authority of cities to lease  
23 municipal property to private parties as long as the lease does not interfere with public use.  
24 *Winkenwerder, supra* at 624. Cities are specifically authorized to lease surplus utility property and  
25 equipment. Ch. 35.94 RCW.

26

MEMORANDUM IN SUPPORT OF CITY OF TACOMA'S  
MOTION FOR SUMMARY JUDGMENT - 9

O:\LARI\24624-00.015\SIJMEMRA.DOC

1 C. Federal Law Requires that the City Be Allowed To Provide Telecommunications  
2 Service.

3 The City's authority to provide telecommunications services must be recognized under the  
4 Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110 Stat. 70 (1996) (the "Act"), as a  
5 consequence of the Act's prohibition against barriers to the entry of any entity into the  
6 telecommunications market. Federal law can preempt state utility regulation. *Public Utility District*  
7 *No. 1 of Pend Oreille County v. Federal Power Commission*, 308 F.2d 318 (D.C. Cir. 1962) (holding  
8 that the Federal Power Act preempted Washington statute purporting to limit city's ability to  
9 condemn property for power plant). The *Pend Oreille* court found that preemption was required  
10 merely by implication of a federal law. Here, the case for preemption is far stronger because the Act  
11 expressly preempts state interference in the telecommunications market. Section 253 of the Act  
12 states, "No state or local statute or regulation, or other state or local legal requirement, may prohibit  
13 or have the effect of prohibiting the ability of *any entity* to provide *any* interstate or intrastate  
14 telecommunications service." Telecommunications Act of 1996, Pub. L. No. 104-104, § 253, 110  
15 Stat. 70 (1996) (emphasis added). There is no language in either the statute or its legislative history  
16 exempting cities from the law's application. To the contrary, a House Committee Report states that  
17 Section 253 "is intended to remove all barriers to entry in the provision of telecommunications  
18 services." House Rep. No. 104-458. A state law precluding telecommunications services constitutes  
19 a legal requirement. Thus, any Washington law that would prohibit Tacoma from providing  
20 telecommunications service is expressly preempted by the Act.

21 In addition, the thrust of the Telecommunications Act is to encourage the availability and  
22 affordability of telecommunications services. *See, e.g.*, Section 254, requiring various mechanisms to  
23 promote universal service. Tacoma is well positioned to make telecommunications services available  
24 to the public at a competitive price, thereby furthering this federal policy.

**VI. CONCLUSION**

Under its broad powers as a first-class charter city, the City has authority to use a portion of its Telecommunications System to provide cable television service and to lease a portion of its Telecommunications System facilities or capacity to other telecommunications service providers. Federal law expressly bars any requirement that would undercut this authority. Because there is no dispute over the material facts underlying its authority, the City is therefore entitled to judgment as a matter of law.

DATED this 5<sup>th</sup> day of November, 1996.

**SECOND NOTICE OF POTENTIAL CHANGE IN SERVICE EFFECTIVE MARCH 31**

Dear Advanced Stream Customer:

On March 31, 2020, Click! Network, an operating entity of Tacoma Public Utilities, will transfer operational control of Click! Network to Rainier Connect, an existing ISP on Click! Network. As such, beginning April 1, 2020, Rainier Connect will become the operator of what is currently Click! Network and begin providing cable television services, Internet access services, and other related telecommunications services. Additional information on this event is available at <https://www.mytpu.org/community-environment/projects/click-network-update/>.

Advanced Stream provides your Internet access service through an agreement with Click! Network. In December of 2019, Click! Network gave notice to Advanced Stream that its ISP Advantage agreement with Click! Network will expire on March 30, 2020. This is our second notice to inform you that after March 30, there is a possibility that Advanced Stream will not continue to be an Internet service provider (ISP) on Click! Network. However, it is our understanding that Advanced Stream and Rainier Connect are in discussions regarding a new agreement that would allow Advanced Stream to continue providing internet access service after March 30.

If Advanced Stream and Rainier Connect are unable to reach an agreement, then Advanced Stream will no longer be your internet access service provider after March 30. If that happens Click! Network and Rainier Connect have agreed to continue providing internet access services to former Advanced Stream customers for a limited time after March 30. This grace period will give you time to transfer your internet access services.

If you have questions about your current service, please contact Advanced Stream. Alternatively, you are free to contact Rainier Connect, the other ISP on the Click! Network for information about their Internet access service offerings. Rainier Connect can be reached at [www.rainierconnect.com](http://www.rainierconnect.com) or by call at 253-683-2200.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jackie Flowers', is written in a cursive style.

Jackie Flowers, Director  
Tacoma Public Utilities

(c) **Operator Maintenance.** The Parties agree that Operator shall have responsibility for Maintenance of the Tacoma Power Commercial System, as described in **Exhibit D** hereto.

**11. ADDITIONAL CONDITIONS RELATED TO USE OF THE TACOMA POWER COMMERCIAL SYSTEM**

(a) **Tacoma Power Commercial System Upgrades.** Operator agrees to make Tacoma Power Commercial System upgrades in accordance with the terms of **Exhibit E** hereto.

(b) **Capital Expenditures Commitment.** Operator agrees to make Capital Expenditures to the physical assets of the Tacoma Power Commercial System as specified in **Exhibit F** hereto.

(c) **Equitable Access.** Operator agrees to the equitable access commitments in **Exhibit G** hereto.

(d) **Affordable Access.** Operator agrees to the affordable access commitments in **Exhibit H** hereto.

(e) **Customer Service Commitments.** Operator agrees to the customer service commitments in **Exhibit I** hereto.

(f) **Customer Privacy.** Operator agrees to the customer privacy commitments in **Exhibit J** hereto.

(g) **Net Neutrality.** Operator agrees to the net neutrality commitments in **Exhibit K** hereto.

(h) **Open Access to Telecommunications Assets.** Operator agrees to the open access commitments in **Exhibit L** hereto.

(i) **Economic Development and Educational Opportunities.** Operator agrees to the economic development and educational opportunities commitments in **Exhibit M** hereto.

(j) **Preserve Competition Among Providers.** Operator agrees to certain restrictions on Transfers as more fully detailed in **Exhibit N** hereto.

(k) **Continuity of Services.** The obligations and rights of the Parties with respect to the transition of the Tacoma Power Commercial System upon the termination of this IRU Agreement are contained in **Exhibit O** hereto and Section 21(f) (Survival of Certain Provisions) of this IRU Agreement.

(l) **Labor Relations.** Operator agrees that, pursuant to Section 7 of the National Labor Relations Act (29 U.S.C. § 157), all employees used in the operation of the Tacoma Power Commercial System shall have the right to self-organization, to form,

**EXHIBIT L**  
**OPEN ACCESS TO TELECOMMUNICATIONS ASSETS**

**1. OPEN ACCESS PROGRAM**

(a) Operator shall provide wholesale services over the Tacoma Power Commercial System to other telecommunications providers (but not to Operator's Affiliates except with the prior written approval of Tacoma Power) consistent with its practices and policies in other geographic areas in which it provides wholesale services, to the extent appropriate ("**Open Access Program**"). All terms and conditions of the Open Access Program shall be determined by the Operator.

(b) In furtherance of the requirements in Section 1(a), Operator agrees to conspicuously post and continuously maintain on its website a copy of its Open Access Program.

**2. ANNUAL REPORT**

(a) Operator shall provide Tacoma Power with a copy of its Open Access Program on an annual basis on the Annual Reporting Date.

**3. REMEDIES FOR NON-COMPLIANCE**

(a) Failure of Operator to maintain its Open Access Program posted on its website is a Default. Liquidated damages in the amount of Two Hundred and Fifty Dollars (\$250) per day shall accrue from the date of receipt of Notice of Default until the Default is cured.

AFFIDAVIT OF SERVICE

I declare under penalty of perjury of the laws of the State of Washington that on March 23, 2020, I served true and correct copies of:

1). PETITIONER SHOOK'S RESPONSE IN SUPPORT OF PETITIONER BOWMAN'S MOTION FOR ACCELERATED REVIEW

This document was delivered via the Washington State Appellate Courts' Secure Portal Electronic Filing system to all Council appearing in this case, and additionally thru Email to the Attorneys for the Respondent: Zachary B Parker, at zach@christielawgroup.com, Robert L. Christie, at bob@christielawgroup.com, Joseph Sloan, at joseph.sloan@cityoftacoma.org and Tom Morrill, at TMorrill@ci.tacoma.wa.us and Chris Bacha at CBacha@ci.tacoma.wa.us., and Appellant Bowman's attorney, Kent Roland Van Alstyne at kvanalstyne@phillipsburgesslaw.com

THE HONORABLE BRYAN CHUSHCOFF  
COUNTY CLERK  
NO. 19-2-07135-0  
Date: 8/15/22

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE

MITCHELL SHOOK,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

No. 19-2-07135-0

DEFENDANT CITY OF  
TACOMA'S COMBINED  
RESPONSE TO ANDERSON'S  
PARTIAL SUMMARY  
JUDGMENT MOTION AND  
MCCARTHY'S MOTION FOR  
SUMMARY JUDGMENT

THOMAS MCCARTHY and CHRISTOPHER  
T. ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

**Noted for Consideration:**  
**August 26, 2022**  
***Oral Argument Requested***

Defendant City of Tacoma respectfully requests this Court grant its Motion for Summary Judgment and deny Plaintiff Anderson's Motion for Partial Summary Judgment. The City further request that the Court disregard entirely McCarthy's "Motion for Summary Judgment", which was

DEFENDANT CITY OF TACOMA'S  
COMBINED RESPONSE TO PLAINTIFFS'  
MOTIONS FOR SUMMARY JUDGMENT - 1  
(19-2-07135-0)

**CHRISTIE LAW GROUP, PLLC**

1 filed without a Note for Motion, something PCLR 7.a.3.A requires. The City has separately moved  
2 to strike the bulk of what both plaintiffs have filed in conjunction with their motions on several  
3 grounds that will not be repeated here.

4 Plaintiffs filed their motions as if this Court and other courts have never addressed the central  
5 issues. The identical legal issue over whether the Click! Network is a separate “utility” from Tacoma  
6 Power has been decided. It is not a separate utility. Neither plaintiff discusses Judge Spier’s ruling  
7 on that identical issue or her ruling that the City’s surplus declaration was not arbitrary or capricious.  
8 Res judicata bars plaintiffs from relitigating those issues here. Further, neither plaintiff even mentions  
9 the Court of Appeals decision in *Coates v. City of Tacoma*, 11 Wn.App.2d 688, 697, 457 P.3d 1160  
10 (2019)<sup>1</sup>, holding specifically that “Click! and Tacoma Power are not separate “utilities.” And neither  
11 even mention this Court’s determination on July 24, 2020 that, subject to receiving more information  
12 on two metering projects, the “rest of the sale is fine, and there’s no problem.” (Transcript p. 12, lines  
13 14-16; Ex. D to Declaration of Christie dated July 20, 2022).

14 In addition to ignoring this Court’s analysis set forth in the July 24, 2020 hearing on the City’s  
15 motion, both plaintiffs act as if this Court never entered its July 19, 2019 Order Denying Motion for  
16 Writ of Prohibition and for Preliminary Injunction. In that Order and at the July 2020 summary  
17 judgment hearing, the Court articulated its reliance on *City of Issaquah v. Teleprompter Corp.*, 93  
18 Wn.2d 567, 574-75 (1980) to conclude that “Click! is not a utility for purposes of RCW 35.94.” (Order  
19 p. 8). Anderson unpersuasively re-hashes the *Teleprompter* decision in his motion, but never even  
20 references *Coates*, a binding decision issued 20 years later and specific to Click! The City’s re-filed  
21

22 \_\_\_\_\_  
<sup>1</sup> This decision was ordered published on February 11, 2020.

1 Motion for Summary Judgment, noted for hearing contemporaneously with these motions, addresses  
2 these issues in full and that analysis will not be repeated her.

3 At the time of the July 2019 hearing on the motion for a preliminary injunction the Court  
4 noted in its Order that “. . . the Gateway Meter Project does still use a portion of Click! that apparently  
5 is the subject of the negotiations between defendant and Rainier Connect. Certainly, to the extent it  
6 is used by Tacoma Power, it constitutes a part of the utility system. Defendant claims that it will  
7 retain this capacity as a result of any agreement with Rainier Connect until it is no longer needed by  
8 the utility. This could mean that the Gateway Meter capability will not be part of the agreement and  
9 would be disposed of (possibly) only after it is no longer needed.” (Emphasis original). Indeed, what  
10 caused this Court concern at the last summary judgment hearing two years ago were unanswered  
11 questions concerning the status of the Gateway metering project and another commercial metering  
12 project called Stark. As fully addressed in the City’s renewed motion, prior to the transfer of  
13 operational control of the Tacoma Power Commercial System (aka Click!) to Rainier Connect on  
14 April 1, 2020, Tacoma Power “ended its use of the [Click! network] for transmission of data collected  
15 from Gateway and Stark meters. This included, shutting down the Gateway meter service and reading  
16 Gateway meters manually, using a wireless network to transmit data from Stark meters, and reading  
17 Stark Meters manually when a wireless connection could not be made to a Stark meter.” Supplemental  
18 Declaration of Tenzin Gyalsten, Par. 7, p. 2, line 19-p. 3, line 2. Put simply, those two metering  
19 programs are dead.

20 With this additional information in hand, and there being no genuine issue of material fact,  
21 this Court should grant the City’s motion for summary judgment and dismiss plaintiffs’ Complaint  
22 with prejudice. Anderson’s motion for partial summary judgment should be denied. Should the Court

8  
9 MITCHELL SHOOK,  
10 Plaintiff,

11 v.

12 CITY OF TACOMA,  
Defendant.

NO. 19-2-07135-0

**PLAINTIFF ANDERSON'S  
RESPONSE TO CITY OF TACOMA'S  
MOTION FOR SUMMARY  
JUDGMENT**

13  
14 THOMAS McCARTHY and CHRISTOPHER  
T. ANDERSON,

15 Plaintiffs,

16 v.

17 CITY OF TACOMA,  
18 Defendant.

19 **I. INTRODUCTION**

20 In this latest attempt to disenfranchise its own citizens, the City of Tacoma ("the City") again asks  
21 this Court to "dismiss" Plaintiff Anderson's Complaint, claiming that Plaintiff Anderson's claims are  
22 barred by the doctrine of *res judicata*. However, this Court has already denied the City's request to dismiss  
23 this case based on the doctrine of *res judicata*, since there is no evidence that factual issues concerning  
24 meters were ever raised in Cause No. 19-2-11506-3, or otherwise considered by, Judge Speir.

PLAINTIFF ANDERSON'S RESPONSE TO  
CITY OF TACOMA'S MOTION FOR SUMMARY JUDGMENT

- 1 -

THE LAW OFFICE OF JAMES P. GRIFO, LLC  
164 Dougherty Lane  
Friday Harbor, WA 98250  
(P): 360-370-5186

1 Furthermore, even if the doctrine of *res judicata* could be applied in this case, then it should not, because  
2 this consolidated lawsuit was not an action “subsequent to” the matter in which Judge Speir ruled on the  
3 parties’ cross motions for summary judgment: Cause No. 19-2-11506-3 was commenced on October 16,  
4 2019, and the above-captioned matter was commenced on May 15, 2019. Moreover, Plaintiffs Anderson  
5 and McCarthy did not bring this case in the same legal capacity or with the same interests as that of  
6 Mitchell Shook and Darrel Bowman in the case decided before Judge Speir. While it is true that Mr.  
7 Shook and Mr. Bowman attempted to litigate many of the pending issues, Mr. Shook was largely self-  
8 represented, and most importantly, he had a vested and distinct interest in the subject matter. Mr. Shook  
9 was litigating as the proprietor and owner of a private business that operated on Click! Network, which  
10 was shuttered as a result of the unlawful transfer of Click! Network to Rainier Connect – Mr. Shook’s  
11 competitor. Mr. Shook was litigating his claims to protect his livelihood and the decades of work that he  
12 put into creating Advanced Stream; not as a voter in the City of Tacoma. The fact that Mr. Shook settled  
13 all of his lawsuits with the City, which included abandoning the appeal in Division II prior to the appellate  
14 court’s consideration of the issues, in exchange for the City forgiving his company debt in the amount of  
15 several hundreds of thousands of dollars highlights the capacity in which Mr. Shook was litigating his  
16 claims. Unlike Mr. Shook, Plaintiffs Anderson and McCarthy are litigating as persons who have been  
17 deprived of their fundamental right to vote on the disposition of Click! Network to a private company.  
18 This lawsuit represents the last chance that the citizens of Tacoma have to challenge the propriety of the  
19 City’s disposition of a public asset without a vote of the people. Furthermore, the doctrine of *res judicata*  
20 is an equitable doctrine based on public policy, and its purpose is to relieve the court from the burden of  
21 twice trying the same issue between the same parties. If the doctrine of *res judicata* were applied at this  
22 late date in this case, then it would only serve to deprive Plaintiffs Anderson and McCarthy of their day  
23 in court and their right to seek appellate review of the significant issues of widespread consequence raised  
24 in this case. Certainly, the law – an equitable doctrine nonetheless – cannot be construed to work such  
an injustice.

Moreover, issues presented in this case, including whether Tacoma Public Utilities (“TPU”)

1 continued to use any of the Click! Network infrastructure for metering of utility services was not ever  
2 considered by Judge Speir when she ruled on the City’s Motion for Summary Judgment.

3 Finally, the Court of Appeals decision in *Coates v. City of Tacoma*, 11 Wn. App.2d 688, 457 P.3d  
4 1160 (2019) concerned a legal issue distinct from those now before the Court; but, if the *Coates* decision  
5 were to be considered in the context of this proceeding, then the Court will quickly see that *Coates* actually  
6 supports the positions advanced by Plaintiffs Anderson and McCarthy; not the City. As is extensively  
7 briefed in Plaintiff Anderson’s Motion for Summary Judgment, which – along with the supporting  
8 declarations – is hereby incorporated in full, the Tacoma City Charter requires a vote of the people before  
9 the City may sell, lease, or dispose of any utility system, or parts thereof. Similarly, under Chapter 35.94  
10 RCW, a city may lease, sell, or convey any public utility works, plant, or system that it owns or “any part  
11 thereof,” following a vote of the people. As the City highlights, the *Coates* Court concluded, for the  
12 purposes of RCW 43.09.210(3), that Click! Network constitutes “a part of” Tacoma Public Utilities.  
13 Thus, if Click! Network is a part of Tacoma Public Utilities, then by the plain language of the Tacoma  
14 City Charter and Chapter 35.94 RCW, a vote of the people was required before the City could lawfully  
15 lease Click! Network to Rainier Connect.

16 Respectfully, for all of the reasons set forth in Plaintiff’s Anderson’s Motion for Summary  
17 Judgment and supporting declarations, and for the reasons set forth herein, this Court should grant  
18 summary judgment to Plaintiff Anderson and order the relief requested in Plaintiff Anderson’s moving  
19 papers, and deny the City’s latest Motion for Summary Judgment.

18 **II. COUNTERSTATEMENT OF MATERIAL FACTS**

19 Plaintiff Anderson incorporates his Motion for Partial Summary Judgment, and all documents  
20 filed in support thereof, and all records and pleadings on file, as though fully set forth herein. Mr. Shook  
21 filed suit against the City of Tacoma on April 17, 2019, under Cause No. 19-2-07135-0. On May 15,  
22 2019, Plaintiffs Anderson and McCarthy filed suit against the City of Tacoma, under Cause No. 19-2-  
23 07873-7. On June 10, 2019, these two lawsuits were consolidated under Cause No. 19-2-07135-0. Darrel  
24 Bowman then filed suit against the City on October 16, 2019, under Cause No. 19-2-11506-3. This case

1 was then consolidated with another suit brought by Mr. Shook on October 28, 2019, which was assigned  
2 Cause No. 19-2-11760-1, on December 2, 2019. After Plaintiff Anderson's case was consolidated with  
3 one of Mitchell Shook's lawsuits against the City of Tacoma, Mitchell Shook amended his Complaint to  
4 assert claims under federal law, and the City sought removal of this consolidated case to federal court. It  
5 is unclear why the City did not seek to consolidate all the pending lawsuits concerning the substantive  
6 issues raised in this action, but Plaintiff Anderson never had any opportunity to participate in the lawsuit  
7 against the City pending before Judge Speir. Plaintiff Anderson also did not have any right or opportunity  
8 to appeal Judge Speir's ruling. Mr. Shook sought direct review by the Washington State Supreme Court  
9 of Judge Speir's ruling, which petition for review was denied, and the matter was transferred to Division  
10 II of the Court of Appeals for consideration. *See, McCarthy Declaration of August 1, 2022, Ex. C.*  
11 Without any briefing or argument before the Court of Appeals, Mr. Shook then entered into a Settlement  
12 Agreement with the City, releasing all claims in all of his lawsuits pending against the City, and which  
13 included Mr. Shook agreeing to abandon the right to appeal any decision in any of those lawsuits. Grifo  
14 Decl. ISO Response, Ex. A. In exchange for dismissing his lawsuits, the City agreed to forgive Mr. Shook  
15 and his company more than \$200,000.00, which his Company, Advanced Stream, purportedly owed to  
16 TPU. *Id.* As a result of this settlement, the appeal of Judge Speir's ruling was abandoned, and the case  
17 was dismissed. Then, on June 1, 2020, in this consolidated case, the City filed a Motion for Summary  
18 Judgment. The City argued that Plaintiffs' claims are barred by the doctrine of *res judicata*, but this Court  
19 properly denied the City's Motion for Summary Judgment and the City's argument that Plaintiffs' claims  
20 should be barred by *res judicata*. Plaintiff Anderson then filed a Motion for Partial Summary Judgment  
21 and set the matter to be heard without oral argument on July 1, 2022. The City informally requested an  
22 extension so that the Court could entertain the parties' cross-motions for summary judgment, and  
23 Plaintiff Anderson re-noted his Motion for Partial Summary Judgment to be heard on August 26, 2022,  
24 which is the same day as the City's instant Motion.

### III. ISSUES PRESENTED

A. Whether the equitable defense of *res judicata* applies in this case, when Plaintiffs Anderson

1 and McCarthy are litigating in a different capacity than Mr. Shook and Mr. Bowman, when it would be  
2 inequitable and only operate to deprive the last two citizens of the City of Tacoma who have raised the  
3 pending issues from having their day in Court, when the application of the doctrine would arguably violate  
4 Plaintiffs' due process rights, and when this case was filed and pending prior to the case in which Judge  
5 Speir's decision was rendered?

6 B. Whether the Court of Appeal's decision in *Coates* controls even though *Coates* construed  
7 and interpreted an entirely different statute to resolve distinctly different issues than those presented in  
8 this case?

9 C. Whether the City's phasing out its metering projects affects the ultimate questions of  
10 whether the City had the authority to dispose of Click! Network without a vote of the people required  
11 under the Tacoma City Charter and Chapter 35.94 RCW?

#### 12 IV. EVIDENCE RELIED UPON

13 This response to the City's latest Motion for Summary Judgment is based on all of the pleadings  
14 and files on record in this consolidated case, and the documents filed concurrently herewith.

#### 15 V. ARGUMENT AND AUTHORITY

16 A. ***Res Judicata* is an Equitable Doctrine, Which the City Should be Precluded from  
17 Invoking Since the City Failed to Consolidate the Actions When it Had the Opportunity to do  
18 so, and Since it Would Significantly Prejudice the Plaintiffs and the People of Tacoma if it were  
19 Applied in this Case.**

20 At its core, *res judicata* is an equitable doctrine. There would be nothing equitable about denying  
21 Plaintiffs Anderson and McCarthy their day in court by invoking the doctrine in this proceeding and at  
22 this juncture. "[W]hen considering whether *res judicata* precludes a party from litigating a claim, we are  
23 careful to not 'deny the litigant his or her day in court.'" *Hisle v. Todd Pacific Shipyards Corp.*, 151 Wn.2d  
24 853, 865, 93 P.3d 108 (2004) (quoting *Schoeman v. N.Y. Life Ins. Co.*, 106 Wn.2d 855, 860, 726 P.2d 1  
(1986)). The doctrine of *res judicata* is also based on public policy. *Luisi Truck Lines, Inc. v. Washington  
Utilities and Transportation Commission*, 72 Wn.2d 887, 435 P.2d 654 (1967). "Its purpose is to relive the

1 court from the burden of twice trying the same issue between the same parties. There is nothing,  
2 however, in the doctrine or its historic application which encourages the court to so apply it as to ignore  
3 principles of right and justice and the court should be hesitant to so apply the doctrine as to deprive any  
4 person of property rights without having his day in court.” *Id.*, at 896.

5 Not only would the application of *res judicata* deprive Plaintiffs Anderson and McCarthy of their  
6 day in court, but it would also result in depriving the electorate of the City of Tacoma of their right to  
7 vote on the City’s lease of a public utility codified in RCW 35.94.020 and the Tacoma City Charter. The  
8 statute at the heart of this case has not been interpreted and construed by Washington Courts since the  
9 Supreme Court’s decision in *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 130 P.2d 367 (1942), and  
10 everyone in the State of Washington would benefit from the appellate courts’ consideration of the issues  
11 presented in this case.

12 Moreover, the City of Tacoma should be estopped from invoking the doctrine of *res judicata*, since  
13 the City is responsible for the piecemeal consolidation of cases that now allows the City to argue Plaintiffs’  
14 claims should be barred by the equitable doctrine of *res judicata*. In the vein of the doctrine of unclean  
15 hands, the City had the full and complete ability to consolidate this matter with Mr. Shook’s Pierce County  
16 Superior Court Cause No. 19-2-11506-3, and the City could have coordinated a meaningful opportunity  
17 for Plaintiffs in this case to participate in the case pending before Judge Speir. Instead, the City removed  
18 this action to federal court, where Plaintiffs Anderson and McCarthy were stuck waiting for Mr. Shook  
19 to adjudicate his federal claims, and all the while the City continued litigating its other case against Mr.  
20 Shook in Pierce County Superior Court before Judge Speir. Plaintiffs Anderson and McCarthy had no  
21 meaningful opportunity to participate in the matter before Judge Speir and had no opportunity to appeal  
22 her decision to the Court of Appeals. The City should not be allowed to sideline the Plaintiffs in this  
23 action so that it can pick the parties against whom it litigates only to then turn around and tell other parties  
24

1 in a separate proceeding that they have been deprived of their day in court because a different party lost  
2 in another Superior Court matter and then abandoned the appeal in exchange for hundreds of thousands  
3 of dollars in debt relief. Regardless of how this Court rules on the merits in this case, an appeal of that  
4 decision is certain. These important, complex, and novel legal issues have never had the opportunity to  
5 be considered by the appellate courts, and for that reason alone this Court should deny the City's request  
6 to dismiss Plaintiffs' claims based on the doctrine of *res judicata* and decide this case on the merits.

7 **B. Even if *Res Judicata* Could be Applied to this Case, There is No Concurrence of**  
8 **Identity with Respect to the Persons and Parties or the Quality of the Persons for or Against**  
9 **Whom the Claim is Made.**

10 For *res judicata* to apply, a prior judgment must have a concurrence of identity with a subsequent  
11 action in (1) subject matter, (2) cause of action, (3) persons and parties, and (4) the quality of the persons  
12 for or against whom the claim is made. *Rains v. State*, 100 Wn.2d 660, 663, 674 P.2d 165 (1983). Elements  
13 numbered three and four are not satisfied in this case.

14 There can be no dispute that Plaintiffs Anderson and McCarthy were not parties to Pierce County  
15 Superior Court Cause No. 19-2-11506-3. Thus, there can be no concurrence of identity with regard to  
16 persons and parties. Plaintiffs Anderson and McCarthy are also not in privity with Mr. Shook and Mr.  
17 Bowman. Washington Courts have not adopted an all-inclusive definition to determine whether parties  
18 are in privity for the purposes of *res judicata*. Trautman, Philip A., CLAIM AND ISSUE PRECLUSION IN  
19 CIVIL LITIGATION IN WASHINGTON, Wa. Law Rev., Vol. 60, No. 4, P. 819 (1985). Mr. Shook and Mr.  
20 Bowman were litigating to protect Advanced Stream, which was an Internet Service Provider on Click!  
21 Network. With the primary focus of protecting business interests, Mr. Shook was forced to settle all his  
22 lawsuits with the City of Tacoma in order to be relieved from his business debts. See Grifo Decl. ISO  
23 Response, Ex. A. On the contrary, Mr. Anderson is litigating this case as a ratepayer and as a citizen of  
24 Tacoma who was deprived of his right to vote on this valuable public asset. Anderson Decl. ISO

1 Response.

2 The different capacities in which Mr. Shook and Mr. Bowman were prosecuting their claims from  
3 the Plaintiffs in this case also means that the quality of the persons for whom the claim is made is different.  
4 In *Bordeaux v. Ingersoll Rand Co.*, 71 Wn.2d 392, 429 P.2d 207 (1967), the court determined there was a lack  
5 of quality between the persons and parties to the proceedings, as prescribed by the fourth element of res  
6 judicata, since the first proceeding involved a “nonadversary,” while the second proceeding involved an  
7 “avowed adversary.” *Id.*, at 397-98. Quite simply, the Plaintiffs in this case are advancing their claims  
8 solely as ratepayers and citizens of Tacoma who by statute and under the City Charter should have had  
9 the right to vote on the City’s disposition of Click! Network. There are no ulterior motives or other  
10 interests driving this litigation, and Plaintiffs are committed to having these legal questions of broad public  
11 import resolved by the appellate courts, if necessary.

12 **C. Applying *Res Judicata* in this Case Would Violate Plaintiffs’ Due Process Rights.**

13 Finally, the application of *res judicata* in this case implicates due process requirements. The United  
14 States Supreme Court has made it clear that there is a due process component to *res judicata*. *Richards et al*  
15 *v. Jefferson County, Alabama, et al*, 517 U.S. 793, 116 S. Ct. 1761 (1996). The limits on the power of state  
16 courts to develop estoppel rules reflect the general consensus that one is not bound by a judgment in a  
17 litigation in which he is not designated as a party or to which he has not been made a party by service of  
18 process. *Id.*, at 798 (citing *Hansberry v. Lee*, 311 U.S. 32, 40, 61 S. Ct. 115 (1940)). There is an exception  
19 to the general rule where it can be said that there is privity between a party to the second case and a party  
20 who is bound by an earlier judgment, but adequate representation of a party in a second case will not be  
21 found when he has not been informed that the matter is pending and did not have the opportunity to  
22 choose for himself whether to appear or default, acquiesce or contest. *Id.*, at 799 (citing *Mullane v. Central*  
23 *Hanover Bank Trust Co.*, 339 U.S. 306, 70 S. Ct. 652 (1950)). It has further been held that mere notice may  
24

1 not suffice to preserve one’s right to be heard in a case. The general rule is that the law does not impose  
2 upon any person absolutely entitled to a hearing the burden of voluntary intervention in a suit to which  
3 he is stranger. *Chase National Bank v. Norwalk*, 291 U.S. 431, 441, 54 S. Ct. 475 (1934). Here, the City  
4 availed itself of procedural mechanisms to sideline the Plaintiffs in this case – Plaintiffs who filed their  
5 claims against the City prior to the parties who participated in the proceeding before Judge Speir – only  
6 to then turn around and argue that Plaintiffs in this case should be barred from having their day in court.  
7 The City could have invited the Plaintiffs in this case to participate in the proceeding before Judge Speir;  
8 but it did not. The City could have consolidated all of the lawsuits concerning the City’s unlawful  
9 disposition of Click! Network in violation of RCW 35.94.020 and the Tacoma City Charter; but it did not.  
10 The application of *res judicata* in this case would violate Plaintiffs’ due process rights, and this Court should  
11 deny the City’s request for dismissal based on this equitable doctrine.

12 **D. This Case Cannot be Barred by *Res Judicata*, Since it is Not a Subsequent Action.**

13 It is black letter law that “the threshold requirement of *res judicata* is a valid and final judgment on  
14 the merits **in a prior suit.**” *Hisle v. Todd Pac. Shipyards Corp.*, 151 Wn.2d 853, 865, 93 P.3d 108 (2004)  
15 (emphasis supplied). Here, Plaintiffs Anderson and McCarthy commenced this action by filing a  
16 Complaint on May 15, 2019. Pierce County Superior Court Cause No. 19-2-11506-3, the consolidated  
17 matter in which Judge Speir ruled on the parties’ cross-motions for summary judgment, was commenced  
18 **after** Plaintiffs Anderson and McCarthy first sought redress for their claims. Since the matter resulting  
19 in Judge Speir’s ruling was not an action “subsequent to” the above-captioned matter, *res judicata* cannot  
20 apply. *Reeves v. Mason County*, 509 P.3d 859, 868 (2022) (“Under Washington law, for the doctrine of *res*  
21 *judicata* to apply, a prior judgment must have a concurrence of identity **with a subsequent action** in (1)  
22 subject matter, (2) . . .”) (emphasis supplied).

1           **E.     The *Coates* Decision Concerned a Different Legal Question Under a Different**  
2 **Statutory Framework and Offers This Court Limited Guidance on the Issues Presented in this**  
3 **Case.**

4           In *Coates*, the Court of Appeals only considered whether TPU was unlawfully subsidizing Click!  
5 Network in violation of the local government accounting statute, RCW 43.09.210, and the Tacoma  
6 City Charter art. IV, Sec. 4.5. *Coates v. City of Tacoma*, 11 Wn. App.2d 688, 457 P.3d 1160 (2019). The  
7 *Coates* matter compelled the Court of Appeals “to decide what constitutes an ‘undertaking’ and a  
8 ‘public service industry’ **for the purposes of the [local government accounting] statute**” *id.*,  
9 (Fearing, J., dissenting) (emphasis supplied); not a “utility” under Chapter 35.94 RCW or Section 4.6  
10 of the Tacoma City Charter. While the City is quick to highlight that TPU’s electric utility and Click!  
11 Network are one “undertaking” for the purposes of RCW 43.09.210(3), the City misses the mark. If  
12 *Coates* stands for anything in this case, it is the proposition that Click! Network was established under  
13 the Tacoma Public Utilities umbrella, and it constituted just one more utility service provided by the  
14 City, through TPU, to the citizens of Tacoma. *See, Grifo Decl., Part One* (Substitute Resolution No.  
15 33668: “That the Council hereby finds and determines that the City Light Division’s broad band  
16 telecommunications proposal is in the best interests of the City, will serve a public purpose . . . That  
17 the proposed broad band telecommunications system shall be owned, operated, and controlled by the  
18 City of Tacoma Department of Public Utilities Light Division with the Public Utility Board providing  
19 oversight and approval of business and third party agreements, as appropriate, . . . and the City Council  
20 shall continue to be involved in the major policy decisions including construction contracts, rate  
21 setting policies, debt financings, the public rights-of-way for telecommunications agreements and  
22 quarterly reviews.”). The *Coates* decision was careful not to opine on whether Click! Network is a  
23 public utility for the purposes of Chapter 35.94 RCW or Section 4.6 of the Tacoma City Charter. If  
24 this Court were to agree with Plaintiffs and conclude that a vote of the people was required before the

1 City leased Click! Network to a private party, then such a ruling would not conflict with *Coates* in any  
2 way; neither would the remedies sought by Plaintiff Anderson in this case. This case is not concerned  
3 at all with the “financial structure” between Click! Network and TPU; but, the fact that TPU installed,  
4 maintained, used, and operated the telecommunications system at issue in this case for the benefit of  
5 the citizens of the City certainly militates in favor of the arguments advanced by the Plaintiffs.

6 This case turns on the question of whether Click! Network constitutes: “any public utility  
7 works, plant, or system owned by it or any part thereof, together with all or any equipment and  
8 appurtenances thereof,” RCW 35.94.010 (the modern incarnation of RRS § 9512), or whether Click!  
9 Network constitutes: a “utility system, or parts thereof essential to continued effective utility service,  
10 . . . .” under Section 4.6 of the Tacoma City Charter. In this case, unlike in *Coates*, the question of  
11 whether the City’s telecommunications system constitutes a “public utility” or “utility system” is  
12 answered by the plain language of RCW 35.94.010-.020, the legislative history of this provision,  
13 Section 4.6 of the Tacoma City Charter, and the Supreme Court’s decision in *Bremerton Municipal League*  
14 *v. Bremer*, 15 Wn.2d 231, 130 P.2d 367 (1942). The *Bremer* Court even held that a wharf used at times  
15 by the public constituted a public utility, finding that it was “a similar or dissimilar utility or system”  
16 under the statute. *Id.*, at 237. The *Bremer* Court went on to define the term “utility,” for the purposes  
17 of the statute now codified as RCW 35.94.020 – and at issue in this case – “includes any kind of utility  
18 in whose operations the public has an interest, that is to say, any public utility.” *Id.* For these reasons,  
19 the Court of Appeals’ decision in *Coates*, and the fact that the City may have discontinued operation  
20 of its smart meters prior to the transfer of operational control of Click! Network to Rainier Connect,  
21 are both unavailing. Plaintiffs strenuously contend that Click! Network – TPU’s two-way broadband  
22 telecommunications system – is a utility in which the public had an interest, and is therefore subject  
23  
24

1 to the requirements of RCW 35.94.020 and Section 4.6 of the Tacoma City Charter. As such, the City  
2 had to hold a vote of the people before it decided to dispose of this important public asset.

3 **F. Conclusion.**

4 For all of the foregoing reasons, Plaintiff Anderson respectfully requests the Court deny the  
5 City's Motion for Summary Judgment and grant Plaintiff Anderson's Motion for Partial Summary  
6 Judgment in its entirety.

7 DATED this 15<sup>th</sup> day of August 2022.

11 CITY OF TACOMA,

12 Defendant.

**NO. 19-2-07135-0**

**DECLARATION OF CHRISTOPHER  
T. ANDERSON IN SUPPORT OF  
PLAINTIFF ANDERSON'S  
RESPONSE TO THE CITY OF  
TACOMA'S MOTION FOR SUMMARY  
JUDGMENT**

13 THOMAS McCARTHY and CHRISTOPHER  
T. ANDERSON,

14 Plaintiffs,

15 v.

16 CITY OF TACOMA,

17 Defendant.

18 I, Christopher T. Anderson, hereby declare as follows:

- 19 1. I am one of the Plaintiffs named in the above-captioned matter.
- 20 2. I am over the age of 18, and competent to testify to the following based upon my personal  
21 knowledge.
- 22 3. I petitioned this Court for relief as a citizen of the City of Tacoma, and as a voter entitled to cast  
23 a vote on the City's disposition of Click! Network under RCW 34.94.020 and Section 4.6 of the Tacoma  
24

25 DECLARATION OF CHRISTOPHER T. ANDERSON  
26 ISO ANDERSON'S RESPONSE - 1 -

THE LAW OFFICE OF JAMES P. GRIFO, LLC  
164 Dougherty Lane  
Friday Harbor, WA 98250  
(P): 360-370-5186

1 City Charter. I did not pursue this action to support Mitchell Shook or his company, Advanced Stream.

2 4. Mr. Shook paid for the lawyer that previously represented me and Mr. McCarthy in this lawsuit  
3 while it was pending in federal court, and when Mr. Shook decided to settle his claims with the City, Mr.  
4 McCarthy and I lost our legal representation.

5 5. At no time during the pendency of this action did I ever understand or believe that I had any  
6 right or opportunity to participate in the consolidated Pierce County Superior Court Cause No. 19-2-  
7 11506-3 before Judge Speir. Neither the City nor the Court ever invited me to participate in that  
8 proceeding. I also had no right or opportunity to appeal Judge Spier's decision to the Court of Appeals  
9 or the Washington State Supreme Court. As such, I have never had my day in Court, and I respectfully  
10 request that the Court rule on the merits of the issues presented in this case.

11 6. Regardless of how the Court rules in this case, it is certain that an appeal will follow. With all due  
12 respect to the Superior Court, sometimes trial courts reach the wrong decision; sometimes the courts of  
13 appeal reach the wrong decision. Our judicial branch contains several layers of appellate review to ensure  
14 that the laws of the State of Washington are properly construed and applied, and all I am asking for is a  
15 chance to have the issues presented in this case decided in a transparent, full, and fair proceeding for all  
16 parties – including the City of Tacoma – and to have the issues raised in this case considered by the  
17 Superior Court and all Courts of Appeal that this case may come before.

18 I certify and declare under penalty of perjury under the laws of the State of Washington that the  
19 foregoing is true and correct.

20 Signed this 12<sup>th</sup> day of August 2022, in Tacoma, Washington.

**EXHIBIT A**

1 Hereafter the parties are collectively referred to as “Parties” and individually as Party.

2 **III. PURPOSE**

3 The purpose of this Settlement Agreement (Agreement) is to resolve forever any and  
4 all outstanding Claims and Litigation, as defined below, upon the terms and conditions of this  
5 Agreement, to support the transfer of operational control of the Tacoma Power Commercial  
6 Network, and to ensure that there are minimal impacts to service for all customers.  
7

8 **IV. DEFINED TERMS**

9 The terms defined below where capitalized shall have the meaning as given herein.

10 “Advanced Stream” shall mean and refer to Advanced Stream, Inc. together with any  
11 subsidiaries and affiliates.

12 “City” shall mean and refer to the City of Tacoma, a municipal corporation, inclusive of the  
13 Tacoma Public Utilities Department and its business units.

14 “Claim(s)” shall mean and refer to any and all claims, demands, causes, actions and lawsuits  
15 seeking recovery of damages, costs (including attorney’s fees), penalties, equitable or contract  
16 remedies, or other relief, of Advanced Stream and Mitchel Shook and his marital community,  
17 and their assigns, and against the City, its officers (elected and appointed), employees,  
18 attorneys, agents, contractors, consultants, or volunteers, and Rainier Connect North, LLC or  
19 its parent, affiliates or subsidiaries, and their officers, employees, attorneys, agents,  
20 contractors, consultants, or volunteers, arising out of or related in any way to the Click!  
21

22 Business Transaction Agreement (CBTA) executed by and between Rainier Connect North,  
23 LLC, Mashell Inc., and the City on or about November 8, 2019, or the circumstances leading  
24

1 to and including, the negotiation and execution of the CBTA, the transfer of operational  
2 control of the Tacoma Power Commercial Network to Rainier Connect North, LLC, the  
3 surplus declarations related to the CBTA, and facts and circumstances leading to and included  
4 the divestment of approximately 34.6 miles of Mountain Division rail line to WRL, LLC in  
5 2016 and the divestment of approximately 4.4 miles of Mountain Division rail line in 2019.

6 “Customer” shall mean and refer to all residential, retail or commercial customers of  
7 Advanced Stream receiving internet, e-mail, voice and other services over the Click! Network  
8 both prior to and after the transfer of control to Rainier Connect North, LLC pursuant to the  
9 CBTA.  
10

11 “Litigation” shall mean and refer to the following: Mitchell Shook v. City of Tacoma,  
12 Mountain Rail Division (U.S. Dist. Ct, Wa. W. Dist., Case No. 3:19cv05794BHS; Wa.  
13 Thurston County Sup. Ct., Case No. 19-2-03950-34); Mitchell Shook v. City of Tacoma (U.S.  
14 Dist. Ct, Wa. W. Dist., Case No. 3:19cv05829BHS Wa. Sup. Ct., Case No 19-2-07135-0)  
15 consolidated with Thomas McCarthy and Christopher T. Anderson v. City of Tacoma;  
16 Mitchell Shook v City of Tacoma (Wa. Sup. Ct., Case No. 19-2-11760-1) consolidated with  
17 Bowman v City of Tacoma, and associated petition for review/appeal (Washington Supreme  
18 Court No. 98229-5); Advanced Stream, LLC v City of Tacoma (Wa. Sup. Ct., Case No. 19-2-  
19 11949-2).  
20  
21

22 “Modem” shall mean and refer to retail, commercial and residential modems, and related  
23 equipment, such as EMTA (Embedded Multimedia Terminal Adapter), MTA (Multimedia  
24

1 Terminal Adapter) and similar equipment, used to support or provide voice, video or data  
2 services.

3 **V. AGREEMENTS BY THE PARTIES**

4 A. Advanced Stream and Mitchell Shook agree, that as a precondition of City's  
5 obligations set forth herein, they shall undertake and complete the following obligations.  
6

- 7 1. Advanced Stream agrees to approve entry of an agreed order of dismissal of all  
8 Litigation in which it is a party, and each and every claim therein stated or implied,  
9 with prejudice, with all parties to bear their own costs, and agrees that it will not  
10 support directly or indirectly any prosecution of such claims or related litigation or  
11 appeals.
- 12 2. Mitchell Shook agrees to approve entry of an agreed order of dismissal without  
13 qualification of all Litigation in which he is a party, and each and every claim therein  
14 stated or implied, with prejudice, with all parties to bear their own costs, and agrees  
15 that he will not support directly or indirectly prosecution of any such claims or related  
16 litigation or appeals. In the matters consolidated with Bowman and  
17 McCarthy/Anderson referenced in the definition of Litigation in Article IV, the  
18 foregoing obligation of dismissal applies only to the Claims brought by Mitchell  
19 Shook.
- 20 3. Advanced Stream releases, holds harmless, and forever discharges the City, its officers  
21 (elected and appointed) employees, attorneys, agents, contractors, consultants, and  
22 volunteers, and Rainier Connect North, LLC, and its parent Mashell Inc., affiliates and  
23 subsidiaries, and their officers, employees, attorneys, agents, contractors, consultants,  
24 and volunteers, from and against any and all Claims and agrees to indemnify and  
25 defend the same from and against any claims, demands, causes, actions and lawsuits  
26 seeking recovery of damages, costs (including attorney's fees), penalties, equitable or  
contract remedies, or other relief, made or brought by third parties, to the extent  
caused by the acts or omissions of Advanced Stream.
4. Mitchell Shook releases, holds harmless, and forever discharges the City, its officers  
(elected and appointed) employees, attorneys, agents, contractors, consultants, and  
volunteers, and Rainier Connect North, LLC, and its parent Mashell Inc., affiliates and  
subsidiaries, and their officers, employees, attorneys, agents, contractors, consultants,  
and volunteers, from and against any and all Claims, and agrees to indemnify and  
defend the same from and against any claims, demands, causes, actions and lawsuits  
seeking recovery of damages, costs (including attorney's fees), penalties, equitable or

1 contract remedies, or other relief, made or brought by third parties, to the extent  
2 caused by the acts or omissions of Mitchell Shook occurring either prior to the  
3 effective date of this Agreement or within six (6) years following the effective date of  
4 this Agreement.

- 5 5. The Parties acknowledge and agree that upon the expiration of the Advanced Stream  
6 ISP Advantage agreement on March 30, 2020, Advanced Stream will no longer be an  
7 internet service provider on the Click! Network and will no longer provide retail  
8 internet services to Customers. Advanced Stream further acknowledges and agrees  
9 that it will have no use for the Customer Modems and that the cost of regaining  
10 possession of the Modems from Customer premises will far exceed the salvage value  
11 of the Customer Modems. Further, Advanced Stream recognizes that under the  
12 current health crisis and declared state of emergency, maintaining internet services to  
13 Customer is important to protect public health, safety and welfare. Advanced Stream  
14 therefore releases and assigns any and all right, title and interest it may have in and to  
15 the Modems that are installed on Customer premises, to the Customer identified on the  
16 Customer account for the Modem(s), free and clear of any and all encumbrances, and  
17 further, agrees to promptly take all steps necessary to remove any and all  
18 encumbrances upon such modems, and related equipment, at Advanced Stream's  
19 expense. Advanced Stream agrees to execute all documents that are requested by a  
20 Customer or the City that is reasonable and necessary to effectuate or document this  
21 release.
- 22 6. Advanced Stream and Mitchell Shook agree to engage in good faith efforts to  
23 cooperate with the City and Rainier Connect North, LLC in the transfer of Customers  
24 to the Click! Network and the subsequent transfer of any Customers who request a  
25 transfer of service to Rainier Connect North, LLC, and in furtherance thereof will  
26 assign Advanced Stream staff during regular business hours (Monday – Friday) until  
close of business on April 14, 2020 to support these efforts and to remove or minimize  
any impediments or barriers that could lead to a disruption in service to a Customer or  
to the transfer. Advanced Stream further agrees to continue to maintain e-mail and  
voice services for Customers transferred to Click! Network until either May 31, 2020  
or until the Customer has initiated e-mail and voice services with another provider,  
whichever time-period is shorter.
7. Mitchell Shook in his personal capacity, and in his capacity as president and CEO of  
Advanced Stream, shall not, following the effective date of this Agreement and for a  
period of five (5) years thereafter, disparage this Agreement, the Click! Network, the  
CBTA, the parties to the CBTA, the transfer of operational control of the Tacoma  
Power Commercial Network to Rainier Connect North, LLC, and the facts and  
circumstances underlying the transfer of operational control of the Tacoma Power  
Commercial Network to Rainier Connect. For purposes of this section, disparage shall

1 mean, whether written or oral, any negative, false, or inflammatory statement, and a  
2 statement to bring discredit or reproach upon. The Parties agree and acknowledge that  
3 this non disparagement provision is a material term of this Agreement, the absence of  
4 which would have resulted in the City refusing to enter into this Agreement.”

- 5 8. Mitchell Shook withdraws all public records requests submitted to the City of Tacoma  
6 since January 1, 2018.

7 B. City agrees that it will, as a condition of the obligations of Advanced Stream and  
8 Mitchell Shook as set forth herein, complete the following obligations:

- 9 1. The City agrees that in consideration for the obligations set forth in this Agreement,  
10 Click! Network shall apply a credit of **\$284,187.22** (the “Credit”) against the  
11 Advanced Stream’s outstanding account balance due and owing to the Click! Network  
12 for the billing period of January 20, 2020 through February 19, 2020.

- 13 2. The City shall apply the Credit to Advanced Stream’s account balance in installments  
14 as follows:

15 (a) The first installment shall be comprised of a credit of **\$142,093.61** and shall be  
16 applied upon the Court’s approval of the last agreed order of dismissal to be filed  
17 pursuant to Article V, Sections A.1 and A.2;

18 (b) The second installment shall be comprised of a credit of **\$142,093.61** and shall be  
19 applied on June 30, 2020, provided that the obligations of Advanced Stream and  
20 Mitch Shook hereunder have been satisfactorily completed. All late penalties, fees  
21 and interest on the Credit shall be suspended from the effective date of this Agreement  
22 through June 30, 2020.

## 23 VI. EFFECT OF SETTLEMENT AGREEMENT

24 This Agreement, when satisfactorily fulfilled as described above, constitutes the full  
25 and final resolution of the Parties. It is intended that Rainier Connect North, LLC, its parent,  
26 affiliates and subsidiaries are intended third party beneficiaries of the release given under  
Article V, Sections A.3 and A.4 of this Agreement, and that the Customers are intended third

1 party beneficiaries of the release and assignment given under Article V, Section A.5 of this  
2 Agreement.

3 **VII. PARTIES BOUND AND AUTHORITY**

4 This Agreement applies to and is binding upon the signatories and their successors and  
5 assigns. The parties each represent and warrant that they have full power and actual authority  
6 to enter into this Agreement and carry out all actions required of them by this Agreement.  
7

8 Advanced Stream and Mitchell Shook represent and warrant that no Claims have been  
9 assigned, delegated or attorned by them to a third party. The Parties agree and acknowledge  
10 that these representations and warranties are materials terms of this Agreement, the absence of  
11 which would have resulted in the City refusing to enter into this Agreement.

12 **VIII. COMPLIANCE WITH OTHER LAWS**

13 Nothing in this Agreement shall be construed as excusing the Parties from compliance  
14 with any applicable federal, state or local statutes, ordinances or regulations applicable to the  
15 activities governed by this Agreement.  
16

17 **IX. MODIFICATION**

18 This Agreement may be modified only upon written agreement and amendment by the  
19 parties.  
20

21 **X. FULL UNDERSTANDING AND INDEPENDENT LEGAL COUNSEL**

22 The parties each acknowledge, represent and agree that they have read this Agreement and  
23 that they have been fully advised by their own legal counsel regarding their legal rights with  
24 respect thereto.

**XI. EFFECTIVE DATE OF SETTLEMENT AGREEMENT**

This Agreement shall take effect upon the signatures of both parties.

CONSTANCE R. WHITE  
COUNTY CLERK  
NO: 19-2-07135-0

The Honorable Judge Brian Chushcoff  
Hearing Date: August 26, 2022

**IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE**

MITCHELL SHOOK,

Plaintiff Pro Se,

**NO. 19-2-07135-0**

v.

CITY OF TACOMA,

Defendant.

**PLAINTIFF MCCARTHY'S  
RESPONSE TO DEFENDANT'S  
MOTION FOR SUMMARY  
JUDGEMENT**

THOMAS MCCARTHY; and  
CHRISTOPHER T. ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

**I. RELIEF REQUESTED**

Plaintiff Tom McCarthy ("McCarthy") respectfully request the Court deny Defendant City of Tacoma's ("the City") Motion for Summary Judgment with prejudice. Moreover, McCarthy requests that this Court grant Plaintiffs Anderson and McCarthy's Motion for Summary Judgement.

1 **II. INTRODUCTION**

2 This is a very simple case, for two reasons: **First**, the recent Covid-19 pandemic has made  
3 it obvious that a municipal telecommunication system is an even more essential public utility  
4 than anyone ever expected.

5 During the pandemic’s “lock downs”, when people were confined to their homes, Tacoma  
6 Public Utilities’ telecommunication system, Click! Network (the System), allowed people to  
7 “telecommute.” Students attended school online, Courts and public meeting moved to online  
8 formats, people worked remotely, utilized telemedicine applications to visit doctors, attended  
9 virtual meetings, obtained essential news and information, ordered food, medicine and other  
10 essentials —all online, over Click! Network.

11 Click! demonstrated its role as a vital, integrated, part of our City’s 129-year-old municipal  
12 utility. Tacoma Public Utilities’ (TPU’s) telecommunications system continues to serve a  
13 public role, as an essential “connection” to the world, as the community’s municipal  
14 “information highway.” The Covid-19 pandemic made clear how very essential this vital  
15 public telecommunication utility service is.

16 What foresight the City Council, TPU Board, Staff and Community leaders had in 1998,  
17 when creating, funding, constructing and launching the Click! System, to recognize what an  
18 essential public utility “Telecommunication Services” would become.<sup>1</sup>

19 The Covid-19 pandemic makes it simple for this Court to understand why the System’s is  
20 obviously not “surplus.” Click! remains a valuable state-of-the-art fiber optic network, which  
21 continues providing telecommunication services exactly as it was built to do, (with the only  
22 exception being that a private company is now setting rates and casing the ratepayers’ checks).

23 The **Second** reason this case is simple is that the City’s 1996 & 1997 Resolutions and  
24 Ordinances, which authorized the funding, construction and operation of the System, all cite  
25 “*public benefits*”, and “*public interest, welfare, convenience and necessity*” as reasons for

26 <sup>1</sup> 47 USC § 153(53) The term “telecommunications service” means the offering of telecommunications  
for a fee directly to the public, or to such classes of users as to be effectively available directly to the  
public, regardless of the facilities used.

1 creation of the System.<sup>2</sup> These terms are the basic and most essential elements of any public  
2 utility.

3 For example, on June 26, 1996, The TPU Board passed RESOLUTION NO. U-9198, stating:

4 WHEREAS by the installation of additional  
5 telecommunications capacity, this system would have the  
6 capability of providing additional public benefits for the  
City, and Light Division ratepayers,

7 *see* Grifo Decl. Part One, 5/18/22, Ex. 11, Pg. 326 to 331, Emphasis added

8 Also, on July 23, 1996, the City passed Ordinance No. 25930, “An Ordinance of the City of  
9 Tacoma Establishing a Telecommunications System”

10 ARTICLE II  
11 FINDINGS; ESTABLISHMENT OF THE TELECOMMUNICATIONS PROJECT  
AS A SEPARATE SYSTEM; AND ADOPTION OF PLAN AND SYSTEM

12 Section 2.1. Establishment of Telecommunication System. The City  
13 hereby creates a separate system of the City's Light Division to be  
14 known as the telecommunications system (the "Telecommunications  
15 System"). The public interest, welfare, convenience and necessity  
require the creation of the Telecommunications System, contemplated  
by the plan adopted by Section 2.2 hereof, for the purposes set forth in  
16 Exhibit A.

17 *see* Grifo Decl. Part 1, 5/18/22, Ex. 11, pg. 299/932 -emphasis added.

18 On April 8, 1997, City Council’s Resolution No. 33668 approved the “Telecommunication  
19 System” Business Plan:

20 WHEREAS the City Council hereby finds and determines  
21 that the Light Division’s proposal for a broadband  
22 telecommunications system is in the best interests of the City,  
will serve a public purpose and that said Business Plan is  
sufficient and adequate, therefor

23 *see* Grifo Decl. Part 1, 5/18/22, Ex. 10(a), pg. 130/932:

24 On April 9, 1997, TPU Board’s Amended Substitute Resolution U-9258 passed, stating:  
25  
26

---

<sup>2</sup> The terms “Public Benefit” & “Public Purpose”, the defining elements of a public utility, are repeated in all the Ordinances and Resolutions creating the Telecommunications System. .

1 WHEREAS the Public Utility Board hereby finds and  
2 determines that the Light Division’s proposal for a  
3 broadband telecommunications system is in the best interests  
4 of the City, will serve a public purpose, and should be  
5 implemented, Now, therefor . . .

6 *see* Grifo Decl. Part 1, 5/18/22, Ex. 10(a), pg. 128/932):

7 With Click! thus established, as an integrated asset of TPU, constructed with public utility  
8 funds, City and State laws relating to disposal of utilities clearly compel an approving public  
9 vote on the disposal of our community’s vital municipal telecommunication utility assets.

10 **III. STATEMENT OF MATERIAL FACTS**

11 This Response to Defendant’s Motion for Summary Judgment is based upon the facts in  
12 McCarthy’s Motion for Summary Judgment, as well as the declaration filed in conjunction with  
13 that motion and all the other pleadings and filings of record in the above-captioned matter.–

14 **IV. STATEMENT OF THE ISSUES**

- 15 1. Whether this complaint should be dismissed due to the *Coates v. City of Tacoma*<sup>3</sup>  
16 decision in the Court of Appeals — a decision which simply found Click! was properly  
17 established as a “betterment,” or “part” of TPU, and if *Coates* has any bearing on the  
18 question of declaring a state-of-the-art telecommunication system as “surplus.”? (No,  
19 *Coates* has no bearing.)
- 20 2. Whether TPU’s discontinuation of a failed smart meter program authorizes the City to  
21 avoid the public vote requirements found in City and State law and dispose of a vital state  
22 of the art public telecommunications System to a private party, who will completely  
23 control the system, setting rates and cashing customer’s monthly checks, even as the  
24 System continues to operate and provide TPU ratepayers with the very broadband  
25 telecommunications services for which it was created? (No, meters are not the issue.)  
26

---

<sup>3</sup> *Coates v. City of Tacoma*, 11 Wn. App.2d 688, 457 P.3d 1160 (2019)

1 3. Is res judicata an equitable doctrine that insists and affords Plaintiff McCarthy his “day in  
2 court”, allowing for a full, fair and final determination of his legal right to vote upon the  
3 disposal his municipal utilities’ vital telecommunication system? (Yes, it is.)

4 **V. EVIDENCE RELIED UPON**

5 This motion is based on the declarations, pleadings and papers filed under this cause.

6 **VI. LEGAL AUTHORITY AND ARGUMENT**

7  
8 **A. Summary Judgment Standard.**

9 Summary judgment is appropriate if there are no genuine issues of material fact, and the  
10 moving party is entitled to judgment as a matter of law. *Zonnebloem, LLC v. Blue Bay Holdings,*  
11 *LLC*, 200 Wn. App. 178, 182, 401 P.3d 468 (2017); CR 56(c). A genuine issue of material fact  
12 exists if reasonable minds could disagree on a factual issue. *Id.* at 182-83. Courts view all facts  
13 and reasonable inferences in the light most favorable to the nonmoving party. *Id.* at 182

14 **B. *Coates* only Proves Click! is part of a Utility, which Supports the Plaintiff’s Claim  
15 for the Right to Vote.**

16 The City points out that the *Coates* case demonstrates Click! is “part of” a utility system not  
17 a “separate” utility system unto itself. *See Coates v. City of Tacoma*, 11 Wn. App.2d 688, 457  
18 P.3d 1160 (2019). However, this argument does not help the City, for the City Charter and State  
19 law protect even “parts” of a utility system —especially parts that are actually in service by the  
public utility, continuing to provide the very public services they were constructed to provide.

20 Defendant asserts *Coates v. Tacoma* prevents this Court from finding Click! is anything  
21 other than “part of” a public utility. Defendant fails to realize that even “part of ” a utility  
22 system is sufficient to win McCarthy his right to vote.

23 The findings in *Coates* do not cut in the defendants’ favor, for it is the actual disposal of a  
24 functional public utility asset that triggers McCarthy’s right to vote. It matters not if Click! is a  
25 “System” or simply a functional “part of” TPU.

26 Yet, Click! is most certainly a “Telecommunication System.” For over 20 years, Click! was  
an integrated “Department” of Tacoma Power, with its own brand identity and organizational

1 structure tasked with building and operating the “System” while maintaining its own accounting  
2 records, separately tracking income and expenses, and producing monthly reports.<sup>4</sup>

3 *Coates* found that:

4 ¶5 The City of Tacoma owns Tacoma Public Utilities  
5 (TPU). TPU is governed by the Public Utility Board and  
6 consists of Tacoma Power, Tacoma Water, and Tacoma  
7 Rail. **Click! is one of six sub-units** that comprise Tacoma  
8 Power. The other five sub-units consist of more traditional  
9 electric-distribution functions like generation, power  
10 management, and technology services. Tacoma Power's  
11 expenses and revenues are accounted for in the City's Power  
12 Fund. **Financially, Click! is intended to operate**  
13 **independently, and as a result, Click! maintains a sub-fund**  
14 **within the Power Fund.**

15 *Coates v. City of Tacoma*, 11 Wn. App.2d, at 690. (emphasis added)

16 The Plaintiff (Ratepayers) in *Coates* claimed Click! was not a utility, but rather a money  
17 losing “undertaking” for which the City’s general government (not the TPU Ratepayers) should  
18 be responsible for under the local government accounting statute, RCW 43.09.210(3).<sup>5</sup>

19 The City defended, arguing Click! was a “utility”, had been established as a utility and was  
20 certainly “part of” Tacoma Power —not a general government “enterprise.” The *Coates* court  
21 found, “we conclude that Click! and Tacoma Power's electric utility are one undertaking for  
22 purposes of RCW 43.09.210(3).” *Coates*, at 697, ¶31.

23 The *Coates* ruling confirm Click! is a utility system, and is “part of” Tacoma’s public  
24 utility, not a general government enterprise, undertaking or obligation, and that its operation as  
25 a part of the utility did not violate the Accountancy Act.<sup>6</sup>

26 As “one undertaking,” *Coates* establishes Click! is, at least, “any part thereof,” of a utility  
—triggering the mandatory vote requirement in McCarthy’s favor under both RCW 35.94 and  
City Charter § 4.6.

<sup>4</sup> Grifo Decl Part One, 5/18/22, Ex. 42(a), Pg. 723/932 -showing Click! service counter, separate from  
TPU counters in the lobby of TPU. Also, Ex. 26. Pg. 15/932, showing Click! Organization Chart,

<sup>5</sup> Losses were disputed a disputed issue and no finding on losses was ever made or required.

<sup>6</sup> E.g. City of Tacoma’s 4/20/19 MPSJ in *Coates v City of Tacoma*, Pierce County Superior Court 17-2-  
08907-4. Page-3.on The Nature or Mandamus Relief,

1 Given City Charter § 4.6 has no surplus clause, *Coates* supports McCarthy’s right to vote  
2 on disposal of the System regardless of surplus.<sup>7</sup> Any other reading leads to absurd results.

3 Most notably, the father of public power, the City of Tacoma own Honorable Judge Homer  
4 T. Bone was Chairman of the City of Tacoma’s 1926 Charter Committee.<sup>8</sup> The Committee could  
5 not have made City Charter’s Section §4.6 any clearer! “The City shall never sell, lease, or  
6 dispose of any utility system, or parts thereof essential to continued effective utility service.”  
7 Under the City Charter, if the disposal of Click! is a (1) *sale, lease, or disposal* of a (2) *utility*  
8 *system or essential part thereof*, Plaintiff must prevail on the merits of his claim.

### 9 Disposal of Utility Properties

10 Section 4.6 – The City shall never sell, lease, or dispose of any  
11 utility system, or parts thereof essential to continued effective  
12 utility service, unless and until such disposal is approved by a  
13 majority vote of the electors voting thereon at a municipal  
14 election in the manner provided in this charter and in the laws of  
15 this state.

16 City of Tacoma Charter § 4.6 (emphasis added).

17 Click! Network’s state of the art telecommunication service is not only a “utility service;”  
18 it is a vital and essential utility service. Clearly the System is “*essential to continued effective*  
19 *utility service*.” —a fact that so markedly demonstrated, to the world, by the harsh events of the  
20 recent Covid-19 pandemic.

21 Since *Coates* confirms that TPU’s Power Department and Click!’s telecommunications  
22 network are “one undertaking,” *Coates* establishes Click! is part of a “municipal utility”, which  
23 triggers the mandatory vote clause in RCW 35.94.040 in itself.

24 Click! simply needs to have been “*originally acquired for public utility purposes*” and  
25 required for “*providing continued public utility service*” —which Click! continues doing today!<sup>9</sup>

26 <sup>7</sup> See Grifo Decl Part Three, 5/18/22, Ex. 89, pg. 190/428 (Tacoma City Charter Article 4 -Utilities.)

<sup>8</sup> Grifo Decl. Part Two 5/18/22, Ex. 67, Pg. 78/499, Judge Bone unanimously elected Chair of Charter Committee.

<sup>9</sup> RCW 35.94.040 only authorizes surplusing of property, or equipment originally acquired for public utility purposes that “is not required for providing continued public utility service.”

1 Yes, Click!’s assets are actually “*providing continued public utility service*” today, under  
2 illegal privatization, nonetheless Click! is obviously “useful” and “*required*” for continued  
3 service.

4 McCarthy’s right to vote is thus protected under both City Charter Section 4.6 and  
5 Chapter 35.94 RCW. Click! cannot lawfully be “surplused.” Privatization that alienates a fully  
6 functioning public utility System requires an approving vote of the electorate.<sup>10</sup>

7 Thus, it is the municipal utilities’ acquisition, construction, operation and ownership of the  
8 Click! assets, along with the fact that the assets are serving a useful public utility purpose, that  
9 compels a public vote requirement.

10 The transfer of the Click! Network is an ultra vires act, and *void ab initio*. The Asset  
11 Purchase Agreement (APA) is void, and the City must hold a municipal election, and obtain the  
12 approval of the electorate, prior to vesting the System to any buyer. Here are similar cases:

13 where the mode of contracting is expressly provided by law, no other  
14 mode can be adopted which will bind the corporation. This principle  
15 results from the fact that municipal corporations derive all their powers  
16 from their charters.

17 *Arnott v. City of Spokane*, 6 Wash. 442, 33 P. 1063, (1893) (emphasis added)

18 As boards of county commissioners themselves are but creatures of the  
19 statute, they must pursue and exercise the powers conferred on them in  
20 strict compliance with the statutes. By so doing is the only way they  
21 can bind their principal. Contracts entered into in defiance of the  
22 manner pointed out by statutes, or which have no support in the  
23 statutes, bind no one.

24 *Green v. Okanogan County*, 60 Wash. 309, 111 P. 226, (1910) (emphasis added)

25 we are constrained to hold that the lease here in question was void ab  
26 initio, and that the warrants issued in payment therefor are invalid,  
because both the making of the lease and the issuance of the warrants,  
without the assent of the voters, were ultra vires of the town council.

*State v. Town of Newport*, 70 Wash. 286, 126 P. 637, (1912) (emphasis added)

It is well established that the power to ratify is coextensive only with  
the power to contract, and that an act which was illegal for want of  
authority on the part of the contracting powers cannot be ratified.

Also,

---

<sup>10</sup> Legislative intent for surplus under the Laws of 1917 may also be found and “harmonized” in the PUD laws of 1945, from which both the City and PUD surplus laws originated. See Anderson’s 5-16-22 MSJ, Pg.19, in this present case, showing the PUD laws under Chapter 54.16 RCW are analogous.

1 In the case at bar there was no power on the part of the municipality to  
2 enter into this contract. The power was conferred upon the voters. The  
3 city had authority only to put the machinery in motion which would  
4 elicit and determine the will of the voters. The discretion and authority  
5 were conferred upon the voters, and not upon the officers of the city.

6 *State v. City of Pullman*, 23 Wash. 583, 63 P. 265 (1900) (emphasis added)

7 This court, in the case of *State v. Pullman*, 23 Wn. 583, 63 P.  
8 265, 83 Am. St. 836, held ultra vires a contract by the city to purchase  
9 water pipe which had been laid by the state outside of the city limits,  
10 the city having no authority to contract for the erection, etc., of public  
11 works in an amount exceeding \$100, or to contract for the extension of  
12 its water system whereby an indebtedness should be created, without  
13 authority of the voters of the city. The state of Washington had agreed  
14 to sell to the city water piping which had been laid outside the city  
15 limits, the state bringing suit to enforce the contract, the same was held  
16 ultra vires and void,

17 *Jones v. Centralia*, 157 Wn. 194, 214 (Wash. 1930) (emphasis added)

18 In the case at bar, while the city commissioners had no power in  
19 law to act under the void election, the authority of the city  
20 commissioners must not be confused with the authority of the voters  
21 of the city, who did have, under the law, complete power and  
22 authority to direct the city officials to proceed to erect the power plant  
23 which is the subject-matter of the litigation now before us.

24 Appellant next cites the case of *State ex rel. Craig v. Newport*,  
25 70 Wn. 286, 126 P. 637, in which it was held that the town authorities  
26 having no authority to provide for a municipal water system without  
submission of the plan or system to the electors, the action of the  
town officers in leasing property to be used for that purpose, without  
submitting the matter to a vote, was ultra vires, and that the  
acceptance by the town of the benefits of the contract did not  
constitute such a ratification thereof as would estop the city from  
disputing the indebtedness illegally attempted to be incurred by the  
lease. This again is another instance of acts by the officials of a town  
which were wholly ultra vires and beyond their power. The court held  
the lease void ab initio, no election having ever been called at which  
the electors were afforded an opportunity of authorizing the execution  
thereof by the city officers.

*Jones v. Centralia*, 157 Wn. 194, 216 (Wash. 1930) (emphasis added)

1 **C. .Smart Meters are Not the Issue. A Fully Functional Public Utility System has Been**  
2 **Wrongfully Taken Without an Approving Vote of the City’s Electorate.**

3 1. Smart Meters are a Red Herring.

4 Defendant asserts Click! was built for Tacoma Power’s (“Power’s”) abandoned pilot meter  
5 program and that by removing these smart meters somehow McCarthy’s right to vote over  
6 disposal of his municipal telecom utility is extinguished. This is misleading and wrong. Try as  
7 the Defendant may to recast the facts, Defendant’s attempt to convert a cancelled pilot meter  
8 program into a surplus declaration over Click!’s entire telecommunication enterprise runs  
9 headlong into the undisputed material fact that Click! was expressly created, designed and built  
10 to fulfill the community’s pressing need for an advanced “Telecommunication System.”

11 Tacoma Power’s failed pilot program is totally unrelated to the community’s vital need for  
12 this essential utility System. Click!’s assets are not rendered “surplus,” or “excess capacity” by  
13 Power’s abandoned meter program, since the primary objective in creating Click! was to fulfill  
14 the community’s need for a modern telecommunication system and to provide an alternative to  
15 the incumbent monopoly provider. Consider Tacoma Mayor Baarsma and Professor  
Singleton’s Paper on Click!, entitled “Creating Capacity”

16 “The City built a broadband telecommunications system with the  
17 express purpose of providing competitive telecommunications  
18 services to businesses and residents within the City”).

19 See Grifo Decl Part Two 5/18/22, Ex. 70, Pg. 281/499

20 The pilot meter program was an afterthought, only developed in “the mid-2000s,” nearly 10  
21 years after policymakers first envisioned the community’s need for Click!. Tenzin Gyaltzen,  
Click! General Manager, confirms this, by saying:<sup>11</sup>

22 “*During the mid-2000s*, Tacoma Power developed Gateway  
23 Meters (Tacoma Power’s name for its smart meters) that could  
24 relay information from its electric customers to Tacoma Power  
headquarters via the HFC Network. At its peak, Tacoma Power  
had over 18,000 gateway meters deployed.”

25 Emphasis added

26 \_\_\_\_\_  
<sup>11</sup> Pierce County Superior Court Civil Case 19-2-11506-3, Declaration of Tenzin Gyaltzen, Dec. 12<sup>th</sup>,  
2019 Pg. 3, ¶ 7

1 The careful planning and construction of Click! included costly investments to secure  
2 “Additional Capacity,” which Click! utilizes and relies on today. TPU paid for these  
3 improvements. See Grifo Decl Part Three, 5/18/22, Ex. 85, Pg. 63/428 Tacoma Ord.#26141,  
4 10/28/97, providing additional \$67 million funding for additional capacity.

5 Click!’s System and facilities are not surplus. They are functional, useful “additional  
6 capacity.” The System is a valuable and vital municipal asset. The disposal of such  
7 sophisticated equipment, software, switches, fiber-optics, franchises, intellectual property,  
8 trademarks, IP addresses, customer accounts, contracts and “data pipes” —all of which are not  
9 “excess capacity” or “surplus” —must be a question for the voters of Tacoma, not their elected  
10 officials. See Grifo Decl Part Two, 5/18/22, Ex. 70, Pg. 283/499 (“Additional Capacity”  
11 created). Also, Grifo Decl Part Two, 5/18/22 Ex. 74 at Pg. 377/499, at Pg. 3, ¶¶ 7, 8, and 9, the  
12 May 5, 1997, the Declaration of Steve Klein regarding the Business Plan..

13 2. Facts behind the Creation of Click! Network –It Was the Community’s Need for a  
14 Modern Telecommunication System – Click! was Not Built for Smart Meters!.

15 Click! was established as a municipal communication utility, with a clear mandate to  
16 provide commercial communication services. The extensive Telecommunication Study and  
17 Business Plan prepared in creating Click!, and other historical evidence, demonstrate Click!  
18 was created for much more than supporting Tacoma Power’s aborted pilot meter program.<sup>12</sup>

19 The circumstances surrounding the creation of Click! reveal Tacoma’s desperate need for  
20 a municipal telecommunication utility system and explain why Click! was established.

21 The significance of the utility system’s creation is revealed in a 1998 letter, from TPU  
22 Director Crisson to City Council, along with his attached MSNBC article describing the City’s  
23 communications project. Director Crisson said, “I know the City Council, as well as the Board,  
24 will be proud of this national coverage.” The MSNBC article was titled, “*Tacoma Power to  
25 give TCI a jolt. Municipal utility prepares to jump into cable.*”<sup>13</sup> Some excerpts:

26 <sup>12</sup> Grifo Decl. 5/16/22 Part One, Ex. 10, (Excerpts from Business Plan and Telecommunication Study).

<sup>13</sup> Grifo Decl. 5/16/22 Part One, Ex. 14. Pg. 366/942 (Mr. Crisson’s Letter to City Manager Corpuz,  
MSNBC Article).

1 While AT&T officials congratulate themselves on their \$48 billion purchase of  
2 Tele-Communications Inc., they might want to keep an eye on the Northwest  
3 corner of TCI's sprawling cable empire. Tacoma Power, the city-owned utility  
4 of Tacoma, Wash. will soon turn on ***a \$100 million broadband  
communications network*** that will enable it to sell cable TV and Internet access  
5 as well as water and electricity - making it a direct competitor to TCI.

6 IF THE PROJECT is successful, it is sure to encourage more municipal  
7 utilities to take on TCI and other cable monopolies across the country. The  
8 effort is already getting attention from local governments weary of residents'  
9 complaints about ***high prices and poor service from their incumbent cable  
provider***. Tired of waiting for new competitors to shake things up, many cities  
10 and towns are thinking about either constructing their own cable network, or  
11 encouraging their local utility to do it for them. Tacoma Power's Click!  
Network is the largest such effort to date.

12 ***Concerned cable industry officials*** are launching a public relations counter-  
13 offensive, citing studies that question the viability of such projects and  
14 complaining that access to public funds give government-backed systems an  
15 unfair competitive edge.

16 The news article's very premise, "it is sure to ***encourage more municipal utilities*** to take on  
17 TCI and other cable monopolies across the country," shows Click! was revolutionary at the  
18 time. That "***Concerned cable industry officials*** are launching a public relations counter-  
19 offensive," demonstrates Click! was controversial for, famously, pioneering the public  
20 broadband movement now sweeping our nation and the world.<sup>14</sup> So much more than meters.

21 In April 2000, Mayor Baarsma and Dr. Singleton, of University of Puget Sound, authored a  
22 paper on Click!, Creating Capacity And Competition In Broadband Telecommunications: The  
23 City Of Tacoma's Initiative.<sup>15</sup> The paper asked: **Why not invest more dollars to expand the  
fiber optic pipe?**

24 Excerpts from their paper show Click! was not about meters:<sup>16</sup>

25 ABSTRACT: This paper describes the process by which the City of Tacoma,  
26 Washington came to build an open access, broadband telecommunications

27 <sup>14</sup> Grifo Decl. 5/16/22 Part Two, Ex. 74, Pgs. 394/499. Mr. Klein revealing political attacks on Click!'s  
initial formation -discussed Leo Hendery & Mike Crowley).

28 <sup>15</sup> Mayor Baarsma was a professor at the University of Puget Sound and on City Council at the time,  
even voting on the creation of Click! in 1996. Grifo Decl. 5/16/22 Part One, Ex. 11. Pg. 299/932.

29 <sup>16</sup> Grifo Decl. 5/16/22 Part Two, Ex. 70, pg. 282/499, "*Creating Capacity and Competition in Broadband  
Telecommunications: The City of Tacoma's Initiative*," April 2000. The title of this learned paper  
indicates Click! was more than a simple betterment, it was intentionally "created capacity."

1 system designed to promote effective competition in the provision of Internet  
2 and other telecommunications services.

3 The City of Tacoma has designed and built a broadband telecommunications  
4 system with the *express purpose of providing* competitive  
5 telecommunications services to businesses and residents within the City.

6 But before making the multi-million-dollar investment, the utility's director  
7 requested that Tacoma Power's citizen oversight body, the Utility Board,  
8 authorize an outside review by a consultant group--the Stanford Research  
9 Institute (SRI).

10 The Board approved and soon SRI's consultants came back with an  
11 interesting idea: *Why not invest more dollars to expand the fiber optic pipe?*  
12 Then Tacoma Power could offer its customers an array of services--cable  
13 television, competitive Internet access, telephony and data transport. The  
14 Telecommunications Act signed into law by President Bill Clinton in 1996  
15 had, in fact, given Tacoma Power this option by eliminating barriers to entry  
16 into the telecommunications market. This led Tacoma Power's superintendent  
17 to proclaim: "The new law afforded us the opportunity to embark on a  
18 broader strategy. . ."

19 The next step was to conduct a marketing survey. The findings forecast over  
20 33,000 cable customers in three years of operation. Within ten years time, the  
21 entire investment of \$100 million would be paid off. . . . But before  
22 embarking on this major undertaking, Tacoma Power borrowed once again  
23 from the private sector. The utility pulled together a panel of fourteen experts  
24 from an array of disciplines to review and pass on a final business plan. That  
25 plan, which was given the stamp of approval by the panel, called for retail  
26 and wholesale applications.

27 The political dynamics revolving around Tacoma Power's plans to build a  
28 fiber optic system soon changed once the management team broadened their  
29 strategy to include an array of telecommunications services. The manager of  
30 the incumbent cable provider (TCI) sent a scathing critique of the utilities'  
31 business plan to the Tacoma City Manager. The twenty-one page letter ended  
32 with the warning: "(Tacoma's policy makers should)...pause and let the  
33 euphoria of the benefits you may now expect be replaced by a realistic  
34 appreciation of the *pitfalls and risks associated with municipal ownership*  
35 of what is traditionally an entertainment service provided by private enterprise."  
36 After numerous public hearings, two declaratory judgements from the state  
superior court, a plea from the cable provider's national president and an  
additional due diligence review by three outside consultants, the city policy  
makers moved forward with the \$100 million overbuild. (emphasis added).

37 The Professors' Paper shows the System's primary objective was a "broader strategy," the  
38 community's need for advanced telecommunication services. The prospect of \$100 million in

1 **Additional Capacity** creating municipal competition was alarming to the incumbent, TCI, who  
2 warned Tacoma of “the *pitfalls and risks* associated with municipal ownership.”<sup>17</sup> (*supra*)

3 In preparing the Business Plan, a detailed “Marketing Survey” was conducted, to study  
4 “The Current Business Market.”<sup>18</sup> This Survey excerpt shows Click! was more than meters:

5 To help assess current business market support for advanced  
6 telecommunications services in the greater Tacoma area, Tacoma City  
7 Light pursued two avenues of consumer research: A telephone survey  
8 of 200 businesses, with 25 or more employees. . . This group represents  
9 a pool of "Potential Customers."

10 Based upon the results of 200 telephone interviews with medium to  
11 large Tacoma area businesses, the Potential Customer business market  
12 is on the brink of being ready for advanced telecommunications  
13 technologies. The money is there,. . .key findings show these customers  
14 account for more than \$5 billion dollars in annual revenues and 25,000  
15 jobs. What's more, they currently spend over \$10 million dollars  
16 annually on telecommunications services. They perceive  
17 telecommunications links are extremely important to the success of  
18 their businesses, and many believe their telecommunications needs will  
19 increase rapidly, particularly for Internet access and local data  
20 networks.

21 As the Business Plan and Marketing Survey indicate, Click!’s creation was seen as vital for  
22 Tacoma to remain economically competitive and prosper.<sup>19</sup> Like the arrival of the Northern  
23 Pacific railroad in Tacoma in the 1870’s, such infrastructure was considered essential for  
24 success in the digital era. A monopoly existed in Tacoma and policymakers wanted a better  
25 system and service. This was the primary reason for establishing Click!.

26 \_\_\_\_\_  
<sup>17</sup> Grifo Decl. 5/16/22 Part Two, Ex. 74, Pgs. 398/499, Pgs. 25, 28 ( TCI, later AT&T, President Leo Hindery opposed Click!’s creation, publicly scolded Superintended Klein and sponsored studies to discredit Click!)

<sup>18</sup> Grifo Decl Part One, 5/18/22, Ex. 10, Pg. 179/932, ( Market Demand Summary -Potential Market They are more concerned about reliability than price for their local phone service, and very concerned about getting quick response from any telecommunications vendor.).

<sup>19</sup> Grifo Decl Part One, 5/18/22 Ex. 10, Pg. 243/932 ( “One of the most significant ways a community and its economic base are intertwined is through an area's infrastructure. As a result, the evolution of a community's economy often depends upon the investments it makes in its transportation system, power system, and-given the shift to the information age-its telecommunication system.” (emphasis added).).

1 Defendant's MacGuffin, a failed pilot meter project, is a red herring attempting to conceal  
2 the true purpose for the creation of the System. Consider that, in April 2000, five years before  
3 the pilot meter program, in Price Waterhouse's "Performance Review" for Click!, it said:<sup>20</sup>

4 Click! continues to be at the forefront among public and private  
5 utility telecommunications efforts. This position has brought  
6 considerable national recognition to Tacoma, and also significant  
7 tangible benefits. From a review of local press clippings, at least  
8 400 new jobs, five building renovation projects, enhanced  
9 University of Washington and UPS academic programs, and several  
10 development projects are all linked to the development and  
11 presence of Click!. Establishing Click! prompted AT&T (TCI and  
12 Excite @home) to upgrade services to Tacoma residents much  
13 earlier than otherwise would have happened.

14 The success of Click! and its continuing value to the community  
15 depends on a team effort among business, civic and education  
16 leaders to create a unique region with considerable growth  
17 potential. The fiber/coax network is literally and figuratively the  
18 thread that ties them together and enables this potential. Working  
19 together, this team can leverage the Click! asset to attract major  
20 new businesses, create jobs, attract students to programs that  
21 provide the skills for those jobs and generally enhance the whole  
22 community.

23 This Review cites "significant tangible benefits" from leveraging Click! "to attract major  
24 new businesses, create jobs, attract students to programs that provide the skills for those jobs  
25 and generally enhance the whole community." All of which leads to more power and water  
26 sales, which have a clear nexus to TPUs other utilities.

27 *Even telecommuting was cited in the original plan.*<sup>21</sup> However, there is no mention of  
28 Power's pilot meter program. In the revolutionary excitement of creating "America's Most  
29 Wired City," smart meters were not even cited in the Performance Review, Business Plan,  
30 Marketing Study or other documentation relating to the creation of Click!.

31 Click! was revolutionary in 1996. All media reports, scholarly papers and professional

32 <sup>20</sup> Grifo Decl Part Two 5/18/22, Ex. 71, Pgs. Pg. 297/499. ( Click! Financial Performance Review ).

33 <sup>21</sup> *E.g.*, Today Tacoma maintains a robust Commute Trip Reduction Program. Tacoma Municipal Code  
34 Section 13.15.020 (Z). "Teleworking/telecommuting" means the use of . . . technology to permit an  
35 employee to work from home. *See also* RCW 70.94.521 (automotive traffic is the major source of  
36 emissions of air contaminants), (reduce single-occupant vehicle commuting.) RCW 28B.130.005 (Intent.  
Telecommuting -mitigate the adverse . . . effects of auto dependency and traffic congestion.)

1 evaluations, show that creating an advanced telecommunication utility system for the  
2 community was Click!’s primary purpose.<sup>22</sup> Click!’s creation was not about smart meters.

3 Defendant claims Click! is not a utility since the only utility is Tacoma Power and the need  
4 for the smart meters is the only purpose for Click!. *But* Power’s needs are not the issue. Click!  
5 was never intended to be “*essential*” for Power’s purposes. Click!’s assets were created as  
6 “additional capacity,” purchased and installed to enable the vital telecommunication services  
7 that the community needed. These assets remain essential for providing these same  
8 telecommunication services today.

9 For over 20 years, in TPU’s lobby, Click! maintained a separate customer service counter,  
10 operated Click! as a separate “department” and “system.” Click! has a life and brand of its own  
11 the Click! “System” is certainly an essential utility —especially to the Click! users. *See* Grifo  
12 Decl Part One, 5/18/22, Ex. 42 (a)(b), Pg. 724/932 (pictures of Click! Counter in TPU Lobby).

13 Click!’s enabling Ordinance #25930 provides: “The City **hereby creates** a separate system  
14 of . . . City Light.”<sup>23</sup> Click! was born as a “Separate System.” Click! is “Telecommunication  
15 System.” Click!’s “System” is essential to Click!’s users, who depend on the infrastructure in  
16 everyday life.<sup>24</sup> Click! was established to fulfill the community’s need for an advanced  
17 telecom system.<sup>25</sup> It is a municipal alternative to the incumbent monopoly provider, who, at the  
18 time, “could care less” about Tacoma.

19 In 1996, when TPU staff first proposed Click! to City Council, the incumbent monopoly,  
20 TCI (now Comcast), had no interest in upgrading their system. After repeated requests by the

21 \_\_\_\_\_

23 newspaper article.) *also* Ex. 71, (Auditors Review).

24 <sup>23</sup> Grifo Decl Part One, 5/18/22, Ex. 11, Pg. 299/932, Pg. 8 (Article II creates a separate system, adopts  
25 Click! business plan.”

26 <sup>24</sup> RCW 43.330.532 [B]roadband is critical to full participation in society and the modern economy . . .  
by enabling access to health care, education, and essential services, providing economic opportunities,  
and enhancing public health and safety.

*Also* Grifo Decl Part One, 5/18/22, Ex. 21, Pg. 425/932, & Grifo Decl Part One, 5/18/22, Ex. 37, Pg.  
659/932 Pierce County Broadband Connectivity and Access Evaluation

<sup>25</sup> *See generally*, Grifo Decl Part One, 5/18/22, Ex. 23, Pg. 473/932 (“[B]roadband is taking its place  
alongside water, sewer and electricity as essential infrastructure for communities”. Quoting USDA  
Report).

1 City, TCI's attitude was, "*go jump in the lake.*" Power Superintendent Steve Klein recalled  
2 TCI's attitude:<sup>26</sup>

3 [C]ity council, they're having a heck of a problem with the incumbent  
4 cable provider who still has the crummy system, refuses to upgrade it.  
5 And they don't come to the table to negotiate the franchise agreement.  
6 They can just tell the city government to jump in the lake. And if you  
7 don't like it, we'll just shut it -- we'll shut it down.

8 Monopoly incumbents can afford such cavalier arrogance.<sup>27</sup> Most consumers have no  
9 alternative for access. Monopoly and oligopoly control of broadband in America is the norm.  
10 FCC data shows nearly 85 percent of Americans have either one choice or no choice for speeds  
11 in excess of 100 Mbps.<sup>28</sup> This is why the FCC, FTC and DOJ closely regulate mergers of the  
12 powerful telecommunication conglomerates.<sup>29</sup>

13 Click!'s costly construction was never "excess capacity." Council prudently and  
14 specifically resolved to provide "Additional Capacity," with additional, incremental  
15 investment, funding equipment, abundant optical fiber, including dark fiber, and the skilled  
16 staff to cobble it all together.<sup>30</sup> required to create Click!'s essential services.<sup>31</sup> Click! was built  
17 to accommodate the community's anticipated, ever-increasing, need for the data flow and for  
18 the explosive growth projected in the future.

19 Power Superintendent Steve Klein, the "Father of Click! Network," explained the project's  
20 origins and cited the "further review" that led to the additional investment in additional capacity  
21 for "expanding the network." *see* Grifo Decl Part Two 5/18/22, Ex. 74, Pg. 384/499.

22 Tacoma Power originally planned to build a fiber-optic network to  
23 control its substations. Further review indicated that expanding the  
24 network and offering a wide range of telecommunications services  
25 would benefit our customers and our community.<sup>32</sup>

26 <sup>26</sup> Grifo Decl Part Two 5/18/22, Ex. 74, Pg. 394/499, Pg. 12. (Power Superintendent's Steve Klein deposition).

27 <sup>27</sup> Grifo Decl Part Two 5/18/22, Ex. 78, Pg. 450/499 (monopoly power monitored by DOJ and FTC.)

28 <sup>28</sup> FCC, Annual Internet Access Services Report (2018), *see also*, FCC Fact Sheet Communications Marketplace Report GN Docket No. 18-231 Report: GN Docket No. 18-231 Ex. D-3.

29 <sup>29</sup> *See* AT&T-DIRECTV Order, 30 FCC Rcd at 9141, para. 20, 21; Comcast-NBCU Order, 26 FCC Rcd at 4248, para. 24, (The FCC and DOJ, consider market power of incumbent and barriers to entry).

30 <sup>30</sup> Grifo Decl Part Three, 5/18/22, Ex. 85 Pg. 63/428 (City's 1997 Res. for \$69 Million for telecom).

31 <sup>31</sup> Grifo Decl Part One, 5/18/22, Ex. 11, Pg.301/932 Ex. 11, Pg. 4, Ord.# 25930 ("City has determined that it is prudent and economical to provide **additional capacity** on such telecommunications system").

32 <sup>32</sup> Grifo Decl Part Three, 5/18/22, Ex. 83 Pg. 50/428, ("About us" description of Click! and historical screen shots of Click!'s website form the Wayback Machine, digital archive of the World Wide Web.).

1 Fiber must be activated, or “lit,” to provide communication services. At great expense,  
2 TPU invested tremendous “additional” public resources in providing the optical equipment,  
3 modulating electronics, hub buildings and other equipment and staff necessary to light this  
4 fiber and make it capable of carrying telecommunications services. There is nothing “excess”  
5 or surplus in Click!’s enterprise or the fiber it owns.

6 Power’s incremental investment to establish Click!, created a functional telecom system,  
7 addressing the community’s need for Broadband services. The “lit” fiber, and the currently  
8 unused dark fiber, are not “excess” capacity. These assets were intentionally included, as  
9 “*additional capacity*” in the original Ordinance and Business Plan. It is worth remembering  
10 Mayor Baarsma and Professor Singleton’s Paper, which described that incremental  
11 investment.<sup>33</sup>

12 *Why not invest more dollars to expand the fiber optic pipe?* Then  
13 Tacoma Power could offer its customers an array of services--cable  
14 television, competitive Internet access, telephony and data transport.

15 Click!’s assets are performing their intended purpose and function. They are useful and  
16 required for Click’s current and future needs in delivering essential services to the community.

17 The fact Click!’s fiber, both lit and dark, which are included in the privatization scheme, in  
18 exchange for \$2.5 million a year, shows these are these fibers are not obsolete or surplus, rather  
19 they are clearly valuable assets protected from plunder by the necessary public vote  
20 requirement that must precede any separation or alienating privatization of public utilities.<sup>34</sup>

21 **D. Res Judicata Does Not Apply**

22 The Court has ultimate discretion in this matter. *See J.M. Weatherwax Lumber Co. v.*  
23 *Ray*, 38 Wash. 545, 80 P. 775 (1905); *see also* Phillip A. Trautman, Claim and Issue Preclusion  
24 in Civil Litigation in Washington, 60 WASH. L. REV. 805, 806, 842 (1985).

25 1. Res Judicata Is An Equitable, Court-Created Doctrine Established At Common Law.

26 <sup>33</sup> Grifo Decl Part Two 5/18/22, Ex. 70, Pg. 298/499, Creating Capacity and Competition in Broadband Telecommunications.

<sup>34</sup> Click Business Transaction Agreement, Indefeasible Right of Use, or “Privatization Agreements.”

1 The City is attempting to perpetrate the ultimate inequity, by extinguished McCarthy’s right  
2 to vote upon the disposal of his public utility’s vital municipal telecommunications assets. The  
3 City seeks claim preclusion, while pointing to Mr. Shook’s stipulated settlement in a separate  
4 Pierce County Superior Court case. To allow res judicata in this instance would be a  
5 misapplication of the res judicata doctrine, because two of the four elements required for res  
6 judicata are missing in this instance. Res judicata requires a concurrence of identity in four  
7 respects: (1) of subject-matter; (2) of cause of action; (3) of persons and parties; and (4) in the  
8 quality of the persons for or against whom the claim is made. *Northern Pac. Ry. v. Snohomish*  
9 *County*, 101 Wash. 686, 688, 172 P. 878 (1918).

10 In this case, both the identity of the persons and the “quality” of the parties are different. The  
11 doctrine of res judicata cannot be applied where the identity of the parties, or the quality of the  
12 parties, is different. *Seattle-First Nat’l Bank v. Kawachi*, 91 Wn.2d 223, 588 P.2d 725 (1978).

13 Mr. McCarthy shares no “identity” with Mr. Shook or Mr. Bowman. Their interests are not  
14 similar or aligned with McCarthy. They do not share the same “quality” as McCarthy. Mr. Shook  
15 operated as an Internet Service Provider over the Click! Network. Mr. Shook’s motivation in  
16 bringing his case was that of a business person trying to avoid the financial ruin of losing his  
17 company’s access to Click! Network and all of his customers. Mr. Shook sought the assistance of  
18 his business associate, Mr. Bowman, to join him in saving his company. See Decl. of McCarthy,  
19 8-15-22, Exhibit C.

20 Mr. Shook ultimately succeeded in receiving a large financial payout from the City in  
21 exchange for abandoning his case and entering into a stipulated dismissal with the City prior to a  
22 full and fair determination of McCarthy’s “right to vote” on the merits by the Court of Appeals.  
23 Mr. Bowman participated in the case at Mr. Shook’s request. When Mr. Shook negotiated his  
24 settlement, Mr. Bowman dropped his claim also, and no full, fair and final determination, on the  
25 merits of the matter, was ever reached. See Decl. of McCarthy, 8-15-22, Exhibit E.

1       McCarthy’s sole and true desire is to have his right to vote determined, in a full and fair  
2 hearing, with a final judgment based on the merits of the case —not based on the amount the  
3 City’s willing to pay off in a back-room settlement.

4       Mr. Shook’s motivation was to avoid financial ruin, which he succeeded in doing, as  
5 evidenced by the fact that Mr. Shook abandoned his claims upon entering into a negotiated  
6 dismissal. That is not a full and fair hearing or final judgement on the merits.

7       The doctrine of *res judicata* is meant to provide an equitable opportunity for a fair outcome.  
8 There is no equity in denying McCarthy his day in court, nor in denying the citizens of Tacoma  
9 their lawful right to vote. This issue represents a matter of great public policy importance, and  
10 the issue of McCarthy’s right to vote should ultimately be settled by the laws and the peoples last  
11 safeguard, the Courts —not by some back-room payoff.

12       2. Clarification on The Issue of ‘Two-Way Communications’ and the True Definition of  
13 ‘Telecommunications’

14       The Defendant argues that this Court is only interested in finding out about the current  
15 deployment of “smart meters” —that the matter of smart meters and their removal from the  
16 System is the only issue remaining. However, certainly the Court would also be interest in an  
17 *equitable outcome*? Indeed, the Court commented that “It isn’t clear to me that the cable  
18 television is purely a one-way communication item.” See Decl. of Robert Christie, Pg. 118/133.  
19 For this reason it is important to help the Court understand that cable television is certainly not  
20 telecommunications or “two-way communications.”

21       As noted in the following verbatim transcript, this Court also recognized that the issue of  
22 “telecommunications vs Cable TV” (one-way vs two-way communication) has not been settled  
23 by *Issaquah*. Judge Chushcoff stated:

24               When there was a motion to reconsider my July order, the  
25 issue of two-way communications versus one-way  
26 communication was raised for the first time. I discussed that in  
my ruling in a couple of ways. It seemed to me what I said -- if  
memory serves, it was something like, first of all, I have no reason  
to believe that a cable television system is a purely one-way

1 communication. It is different from telephone. It is different from  
2 the internet, but I can order a movie on my cable television  
3 system. In order to do that, the communication has to go the other  
4 direction. It isn't clear to me that the cable television is purely a  
5 one-way communication item.

6 No. 2, the Issaquah case -- the Supreme Court did not analyze  
7 that problem in an idea of a one-way versus two-way  
8 communication sort of way. Of course, the third problem was, at  
9 least for purposes of the motion to reconsider was, that that had  
10 never been raised in any of the prior pleadings or argument or  
11 anything else until the motion to reconsider. It was entirely new  
12 and not supported by any particular evidence. As I say, given that  
13 I think that I can order a television movie through my cable  
14 television system, it seems to me, that, of itself, suggests that it's  
15 more than a one-way communication system.

16 See Decl. of Robert Christie, 7-29-22 Pg. 118/133, Transcript of Judge  
17 Chushcoff's Hearing on the City's Motion for Summary.

18 As a legal matter, Click! is, by definition a "*Telecommunications System*" which must not be  
19 confused with a *Cable TV System*. Comparison of Click! to cable TV under *Issaquah*, are  
20 irrelevant, unhelpful and erroneous.

21 Every Ordinance, Resolution, Franchise Agreement, Court Case, Contract, Federal, State  
22 and Municipal filing relating distinctly identifies Click! as a "Telecom System."<sup>35</sup>

23 Tacoma Municipal Code Title 16 B., states "Telecommunications service" does not  
24 include television and video programming service.

25 RCW 80.36.630 shows State law mirrors federal code. "Telecommunications has the same  
26 meaning as defined in 47 U.S.C. Sec. 153."

Under 47 U.S.C. Sec 153 (53) "telecommunications services are treated as  
telecommunications services regardless of the facility used to provide them."

Also consider, 47 U.S.C. § 522(6). Cable Service is one-way transmission to subscribers of  
video programming, and subscriber interaction for the selection or use of such video

---

<sup>35</sup> Grifo Decl. Part One, 5/18/22, Ex. 6, Pg. 102/932, , (TPU Annual Report, describes "telecommunications system"), also Ex. 11, (Ordinance creating Click!), Ex. 12, 13, (1996 and 1997 Orders affirming System and utility funding), Ex. 17, (Installation Contract). Ex. 62 403/932, (Century Link Contract) Ex. 64 (Library Contract) Ex. 65. (County Franchise) *E.g.,*).

1 programming or programming service. *Compare with*, 47 USC § 153(50) telecommunications”  
2 means the transmission, between or among points specified by the user, of information of the  
3 user’s choosing.

4 Telecom is not cable television under state law. RCW 82.04.065 (27) provides  
5 “Telecommunications service does not include television and video programming service.”  
6 Also, see Television is also expressly distinguished.

7 *See* RCW 35.99.010 (1) "Cable television service" means the one-way transmission to  
8 subscribers of video programming and other programming service and subscriber interaction, if  
9 any, that is required for the selection or use of the video programming. (emphasis provided)

10 Click! is a telecom system, with *two-way communications*, capable of sending and  
11 receiving data, of the user’s choosing, to and from all “end points” of the World Wide Web.<sup>36</sup>

12 Cable TV (“cable system”) is a closed-off, “one way” system, with “closed transmission  
13 paths.”<sup>37</sup> One-way capability is not telecommunications under the law . *Compare* 47 U.S.C. §  
14 522(7), with 47 USC § 153(50). Click!’s physical infrastructure, “the pipes,” is a wire  
15 “communication system.”<sup>38</sup>

16 As a telecom system, with vast underground facilities, as seen in the APA, Click! is a  
17 “communication utility” by the definition in RCW 35.96.020.

18 While the statutes, legalities and complexities of advanced telecommunications technology  
19 and regulations can be perplexing, some recent cases are helpful. For example, *Community*  
20 *Telecable’s ruling* differentiates cable TV from Click!’s “two-way” telecommunications.<sup>39</sup> see  
21 *Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008).

22  
23  
24 <sup>36</sup> Grifo Decl. Part One, 5/18/22, Ex. 59 , Pg. 927/932, (Telecommunications definition by Mr. Dillon,  
retired Click! Manager).

25 <sup>37</sup> 47 U.S.C. § 522(7). ( Cable System: a facility, consisting of closed transmission paths).

26 <sup>38</sup> 47 USC § 153(59) “wire communication” or “communication by wire” means the transmission of  
... pictures, and sounds of all kinds by aid of wire, cable, or like connection.”

<sup>39</sup> *E.g. Community Telecable V. City Of Seattle* 164 Wn.2d 35 (Wash. 2008) differentiates TV from  
Telecom. *See also*, 47 USC § 153(50) *compare with* 47 U.S.C. § 522(6), *E.g.* RCW 82.04.065 (27),

1 Finally, allow the Oregon State Supreme Court to help us distinguish cable TV and telecom  
2 systems, in explaining why Comcast’s cable modem services should be taxed as telecom and  
3 not cable TV. As seen in *City of Eugene v. Comcast*, here:

4 Thus, considering the Telecommunications Act in context, we  
5 conclude that it created a regulatory scheme that focuses on the  
6 function of the service provided rather than on the communications  
7 facility used to provide it. Within that scheme, telecommunications  
8 services are generally treated as telecommunications services and  
9 cable services as cable services, regardless of who provides the  
10 service or how. *Id.* at 551

11 The FCC has recognized that, as it relates to distinguishing cable,  
12 telecommunications, and information services, none of those  
13 classifications “rests on the particular types of facilities used. Rather,  
14 each rests on the function that is made available.” *In re Inquiry*  
15 *Concerning High-Speed Access to the Internet*, 17 FCC Rcd 4798 at  
16 4821; *see also* 47 USC § 522(6) (defining “cable services”); 47 USC  
17 § 153(53) (defining “telecommunications service”); 47 USC §  
18 153(24) (defining “information service”). That is expressly the case  
19 for “telecommunications service,” which the Act defines as “the  
20 offering of telecommunications for a fee directly to the public, or to  
21 such classes of users as to be effectively available directly to the  
22 public, *regardless of the facilities used.*” 47 USC § 153(53)  
23 (emphasis original) *Id.* at 551.

24 *City of Eugene v. Comcast of Oregon II, Inc.*, 359 Or. 528, 375 P.3d 446 (2016).

25 Many municipalities are now building their own public utility telecommunications systems.  
26 Even the City of Anacortes has established a telecommunications utility.<sup>40</sup>

This case is a matter of great public concern and importance.<sup>41</sup>

---

24 <sup>40</sup> See Grifo Decl. Part One, 5/18/22, Ex. 58 (a)(b)(c), Pg. 912 of 932, Anacortes Resolution  
25 <sup>41</sup> Grifo Decl. 5/16/22 Part One, Ex. 18, Pg. 408/932 A Sampling of Municipal Broadband Utilities in the  
26 USA. *See also* Grifo Decl. 5/16/22 Part One, Ex. 21, Pg. 425/942, Appendix 1: (U.S. Municipalities with  
Broadband Networks, Report from The Executive Office of the President. Benefits Of Competition And  
Choice For Community Development And Highspeed Internet Access. (January 2015)). *Compare with*,  
Grifo Decl. 5/16/22 Part Two, Ex. 60, pg. 3/499 (Australia’s NBN, open access project passes 11 million  
homes).

1 **VII. Conclusion**

2 In closing, please consider that the Citizens of Tacoma have reserved, exclusively unto  
3 themselves, the right to vote upon the disposal of their municipal utility assets, see *Clark v. City*  
4 *of South Haven*, 8 Mich. App. 74 (1967), 153 N.W.2d 669  
5

6 [W]hen the voters of South Haven granted the privilege to  
7 generate power, they were not content to divest themselves of  
8 every managerial function normally associated with the  
9 operation of a business concern. By their city charter they have  
10 retained express power over the discontinuance of their public  
11 utility. The contract in question has the effect of violating  
12 section 13.5 of the charter for the city of South Haven

AFFIDAVIT OF SERVICE

I declare under penalty of perjury of the laws of the State of Washington that on August 15, 22, I served true and correct copies of:

- 1). PLAINTIFF's RESPONSE TO DEFENDANT's Motion For Summary Judgement.
- 2). The 8-15-22 Declaration of Tom McCarthy.

These documents were delivered via the Court's e-serve system and additionally thru Email to the Attorneys for the Defendant's Council, Robert Christie and the other parties in this case.

Respectfully submitted,

This 15 day of August 2022

Tom McCarthy, Plaintiff

MITCHELL SHOOK,  
Plaintiff,

v.

CITY OF TACOMA,  
Defendant.

**NO. 19-2-07135-0**

**DECLARATION OF MITCHELL  
SHOOK**

THOMAS McCARTHY and CHRISTOPHER  
T. ANDERSON,  
Plaintiffs,

v.

CITY OF TACOMA,  
Defendant.

I, Mitchell Shook, hereby declare as follows:

1. I offer this declaration not in support of, or in opposition to, any of the arguments or claims now before the Court, but simply to clarify a fact that has become an issue in this case.
2. I am over the age of 18, and competent to testify to the following based upon my personal knowledge.
3. I filed several lawsuits against the City of Tacoma to challenge the lease of Click! Network

1 to Rainier Connect, which was a competitor of my business, Advanced Stream. I litigated all of my  
2 cases against the City of Tacoma to save my business, which was my life's work and my livelihood.

3 I certify and declare under penalty of perjury under the laws of the State of Washington that  
4 the foregoing is true and correct.

5 Signed this 15<sup>th</sup> day of August 2022, in Tacoma, Washington.

**DECLARATION OF DARREL  
BOWMAN**

THOMAS McCARTHY and CHRISTOPHER  
T. ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,  
Defendant.

I, Darrel Bowman, hereby declare as follows:

1. I am over the age of 18, and competent to testify to the following based upon my personal knowledge.

2. I have been a personal friend and business advisor to Mitchell Shook for many, many years.

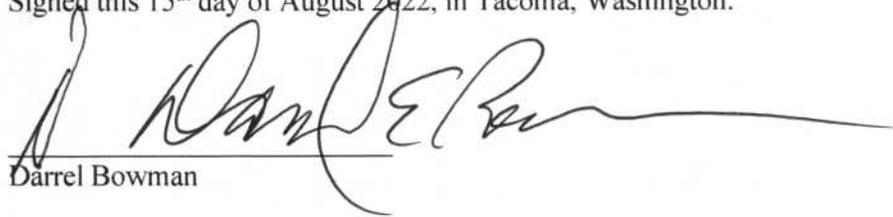

I was also a customer of Advanced Stream until the City gave control of Click! Network to Rainier Connect.

Darrel Bowman Declaration

1 3. I filed a lawsuit against the City at the request of Mitchell Shook, to support him, and to help  
2 protect his business and the company that provided me with broadband internet service. When  
3 Mitchell Shook agreed to dismiss all of his lawsuits against the City, I too agreed to dismiss my case  
4 against the City. I then changed my mind and asked the Court of Appeals to disregard the stipulated  
5 dismissal of my case, but it was too late, and I never had an opportunity to have Judge Speir's ruling  
6 considered by the Court of Appeals.

7 I certify and declare under penalty of perjury under the laws of the State of Washington that  
8 the foregoing is true and correct.

9 Signed this 15<sup>th</sup> day of August 2022, in Tacoma, Washington.

**PLAINTIFF ANDERSON'S REPLY IN  
SUPPORT OF ANDERSON'S  
MOTION FOR PARTIAL SUMMARY  
JUDGMENT**

14 THOMAS McCARTHY and CHRISTOPHER  
15 T. ANDERSON,  
16 Plaintiffs,

17 v.

18 CITY OF TACOMA,  
19 Defendant.

20 **I. INTRODUCTION**

21 The City of Tacoma's ("the City's") Consolidated Response to Anderson ("Anderson") and  
22 McCarthy's ("McCarthy's") Motions for Summary Judgment ("Response") fails to respond to the  
23 substantive arguments raised in Plaintiffs' moving papers. Instead, the City has elected to rest its  
24 opposition on its assertion that Plaintiffs' claims are barred by the equitable doctrine of *res judicata*. Since  
25 the City has offered no meaningful arguments in opposition to the issues raised in the Plaintiffs' moving  
26 papers, then if this case is not barred by *res judicata* the Plaintiffs should prevail. This case should not be  
barred by the equitable doctrine of *res judicata*, and Plaintiff Anderson incorporates Anderson's Response

PLAINTIFF ANDERSON'S REPLY IN SUPPORT OF  
MOTION FOR PARTIAL SUMMARY JUDGMENT

- 1 -

THE LAW OFFICE OF JAMES P. GRIFO, LLC  
164 Dougherty Lane  
Friday Harbor, WA 98250  
(P): 360-370-5186

1 to the City of Tacoma’s Motion for Summary Judgment by this reference.

2 The primary legal questions before the Court are: (1) whether the City’s hybrid fiber coaxial  
3 telecommunications network and broadband internet service (“Click!”) is a public utility subject to vote  
4 requirements set forth in RCW 35.94.020 and Section 4.6 of the Tacoma City Charter; and, (2) whether  
5 the City had the authority to unilaterally declare this fully and still functioning public utility to be “surplus”  
6 in order to evade having to submit the proposed lease of Click! to the voters. This Court does not need  
7 to look any further than the plain language of RCW 35.94.010, RCW 35.94.020, the Washington Supreme  
8 Court’s decision in *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 130 P.2d 367 (1942), and Section  
9 4.6 of the Tacoma City Charter to see that the law required the City put the question of leasing Click! to  
10 a vote prior to its unilateral disposition of this important public utility. This case is not as complicated as  
11 the City would have the Court believe, and the Court should not be distracted by the City’s red-herring  
12 arguments. For all of the reasons set forth in the pleadings and filings of record in the above-captioned  
13 matter, which are incorporated herein, and as follows, this Court should deny the City’s Motion for  
14 Summary Judgment, and grant Anderson’s Motion for Partial Summary Judgment in its entirety.

15 **II. EVIDENCE RELIED UPON**

16 This motion is based on all of the pleadings and papers filed in this action, which are incorporated  
17 herein by this reference.

18 **III. LEGAL AUTHORITY AND ARGUMENT**

19 **A. The City Has Failed to Ever Meaningfully Respond to Plaintiffs’ Argument that Click! is**  
20 **a Public Utility Subject to RCW 35.94.010 and 35.94.020.**

21 The City has never offered any legal authority interpreting RCW 35.94.010 and RCW 35.94.020,  
22 which are the main statutory provisions at issue in this case. RCW 35.94.010 plainly states a city “may  
23 lease for any term of years or sell and convey **any public utility works, plant, or system owned by it**  
24 **or any part thereof, . . .**” RCW 35.94.010 (emphasis supplied). As explained in Anderson’s moving  
25 papers, the construction of this statute requires consideration of this statute’s original text in RRS § 9512.  
26 Since RRS § 9512 finds its present iteration in RCW 35.94.010, the primary question in this case is whether

1 the City’s hybrid fiber coaxial telecommunications system is “similar or dissimilar” to a “telephone or  
2 telegraph plant and lines.” RRS § 9512. The City has never disputed that Click! meets this statutory test;  
3 because it cannot. Therefore, the Court need go no further than applying this statutory test to Click!  
4 because if “plain language [of a statute] is subject to only one interpretation, [a court’s] inquiry is at an  
5 end.” *G-P Gypsum Corp. v. State Dept. of Revenue*, 169 Wn.2d 304, 317, 237 P.3d 256 (2010) (Sanders, J.  
6 dissenting).

7 An extensive analysis of the legislative history of RCW 35.94.010 is in Anderson’s Motion for  
8 Partial Summary Judgment, which is incorporated here in its entirety. Briefly, RRS § 9512,<sup>1</sup> which  
9 contained an illustrative list of utilities, was editorially rewritten by the State Revision and Recompilation  
10 Committee (“Code Committee”) for brevity and then codified into RCW 80.48.010 in 1951 when the  
11 Legislature first enacted the Revised Code of Washington. The RCWs were enacted with an express rule  
12 of construction that “in case of any omissions or any inconsistency between any of the provisions of the  
13 revised code as so supplemented or modified and the laws existing immediately preceding this enactment,  
14 the previously existing laws shall control.” RCW 1.04.020 (emphasis supplied). Thus, RCW 80.48.010,  
15 as it existed from 1951 to 1965, provided that “A city may lease for any term of years or sell and convey  
16 any public utility works, plant, or system owned by it or any part thereof, together with all or any  
17 equipment and appurtenances thereof,” but its meaning was still controlled by RRS § 9512. The existing  
18 statutory language of RCW 80.48.010 in 1965, immediately preceding the enactment of 1965 Senate Bill  
19 No. 3, was therefore identical to the language in RCW 35.94.010 as it appeared after the enactment of the  
20 1965 bill.

21 In 1965, the Legislature passed Senate Bill No. 3, which repealed every single existing law in  
22 Washington governing cities and towns and then “reenact[ed]” the same into Title 35 “without changing  
23 the substance of the law.” *See* 1965 Wash. Sess. Laws 454 (cities and towns explanatory note); *see also*

---

24  
25 <sup>1</sup> The full text of RRS § 9512 is as follows: “It is and shall be lawful for any city or town in this state now or hereafter  
26 owning any water works, gas works, electric light and power plant, steam plant, street railway line, street railway plant,  
telephone or telegraph plant and lines, or any system embracing all or any one or more of such works or plants or any  
similar or dissimilar utility or system, to lease for any term of years or to sell and convey the same or any part thereof, with  
the equipment and appurtenances, in the manner hereinafter prescribed.” *Id.* (emphasis supplied).

1 Wash. AGO 1965–1966 No. 26 (Wash. A.G.) (Senate Bill No. 3...merely re-enacts Title 35 of the Revised  
2 Code of Washington...[and] makes no substantive change in the statutory law governing cities and  
3 towns). As a result, the 1965 Bill contained an express provision regarding the “continuation of existing  
4 law.” *Id.*, at 444; *see also* RCW 35.98.010. Specifically, that section provided:

5           The provisions of this title insofar as they are substantially the same as  
6           statutory provisions repealed by this chapter, and relating to the same  
7           subject matter, shall be construed as restatements and continuations, and  
8           not as new enactments.

9 1965 Wash. Sess. Laws 444 (emphasis supplied); RCW 35.98.010. RRS § 9512, in its rewritten and  
10 codified form at RCW 80.48.010, was therefore restated and continued in RCW 35.94.010, because the  
11 language in the repealed RCW 80.48.010 was identical to the language in RCW 35.94.010. *See* 1965 Wash.  
12 Sess. Laws 442; RCW 80.48.010 (stating that RCW 80.48.010 was “Repealed by 1965 c 7 § 35.98.040.  
Now codified as chapter 35.94 RCW.”); RCW 35.94.010.

13           If there were any remaining doubt as to the effect of the 1965 Bill, which there is not, the Attorney  
14 General restated the scope of the 1965 Bill later that same year—noting that the “legislation merely re-  
15 enacts Title 35 of the Revised Code of Washington relating to cities and towns.” Wash. AGO 1965–  
16 1966 No. 26 (Wash. A.G.) (“1965 AGO”). The 1965 AGO then cited section 35.98.010 as “spell[ing]  
17 out the legislature’s intent as to construction.” *Id.* Based on that provision, the 1965 AGO concluded  
18 that “nothing contained in Senate Bill No. 3 (chapter 7, Laws of 1965) should be regarded as altering  
19 existing status...[s]ince this legislation makes no substantive change in the statutory law governing cities  
20 and towns.” *Id.* Therefore, RRS § 9512 still controls the meaning of RCW 35.94.010 today.

21           **B. The Washington State Supreme Court’s Decision in *Bremerton Municipal League v.***  
22           ***Bremer* is the Only Binding Authority Relevant to the Issues in this Case and It Clearly**  
23           **Holds that a Vote was Required Before the City Could Lease Click!, Which is Supported**  
24           **Entirely by Arguments the City Made to Prevail in *City of Tacoma v. The Taxpayers and***  
25           ***the Ratepayers of the City of Tacoma.***

26           The City has never been able to distinguish or otherwise explain how the Supreme Court’s  
decision in *Bremer* does not control the outcome of this case. The parties have spilt much ink fighting  
about the definition of “public utility” as it is used in Chapter 35.94 RCW and the Tacoma City Charter.

1 However, the Supreme Court in *Bremer* provides this Court with the definitional test:

2 “This, we think includes any kind of utility in whose operations the public has an interest,  
3 that is to say, any public utility.”

4 *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231, 237, 130 P.2d 367 (1942). In *Bremer*, after the City of  
5 Bremerton had constructed a wharf, the City later leased the wharf and the buildings located on it, along  
6 with surrounding harbor areas, to the Bremerton Terminal Company, without a vote of the people. *Id.*,  
7 at 232. The validity of the lease was challenged based on the arguments that the City was not the owner  
8 of the harbor areas and therefore did not have the authority to lease that area, that wharves are public  
9 utilities that cannot be leased without a vote of approval, and that the city was without power to make  
10 certain agreements. *Id.*, at 235. The trial court held the lease invalid since the City was not the owner of  
11 the harbor area occupied by the wharves. *Id.*, at 235-6. The Supreme Court heard the appeal and agreed  
12 with the result reached, but concluded that RRS §§ 9512-9514 controlled the outcome. *Id.*, at 237. “We  
13 are of the opinion that these sections of our statutes provide the only procedure by which the city can  
14 lawfully sell or lease municipal wharves.” *Id.* The Court went on to explain that despite the fact that the  
15 statute specifically enumerates a long list of utilities – which did not include wharves or docks – is  
16 irrelevant, since the statutes clearly included any kind of utility in whose operation the public has an  
17 interest. *Id.*

18  
19 Here, there can be no dispute that the citizens of Tacoma (read: the public) have an interest in  
20 Click!<sup>2</sup> In fact, this Court should take judicial notice of the City’s arguments in *City of Tacoma v. The*  
21

22  
23 \_\_\_\_\_  
24 <sup>2</sup> The Court should also take judicial notice of the City of Tacoma’s Complaint filed in *City of Tacoma v. Comcast Cable*  
25 *Communications, LLC et al*, Pierce County Superior Court Cause No. 19-2-06715-8, in which the City plead: “Now, and for  
26 all relevant times herein stated, Click! Network is a division of Tacoma Power, a division of Tacoma Public Utilities, a  
department of the City of Tacoma, that provides internet service to the public and cable facilities to other divisions of  
Tacoma Power.” The City claimed *inter alia* that Defendants’ insertion of their own cable in Click! Network’s conduit  
constituted a gift of public funds and the conversion of public property to private use. The City further averred that the  
“Click Network Conduit at issue now, and for all relevant times herein stated, has always had “TPU Telecom,” permanently  
marked on it,” and expressly admitted that “the Conduit had been installed for a public benefit.”

1 *Taxpayers and the Ratepayers of the City of Tacoma*, Pierce County Superior Court Cause No. 96-2-09938-0, in  
2 which the City itself successfully argued that the City lawfully issued bonds under Ordinance No. 25930  
3 to construct Click! – **because it was a public utility!** Grifo Decl. Part One, Ex. 11, 12, 13.

4 Ordinance No. 25930 provided in relevant part:

5 Establishment of Telecommunication System. The City hereby creates a separate system  
6 of the City’s Light Division to be known as the telecommunications system (“the  
7 Telecommunications System”). **The public interest, welfare, convenience and  
8 necessity require the creation of the Telecommunications System.**

9 Grifo Decl. Part One, Ex. 11 (emphasis supplied). In that same Ordinance, the City authorized the  
10 issuance and sale of the City’s Electric System Revenue Bonds to provide part of the funds “. . . necessary  
11 for the acquisition, construction and installation of additions and improvements to the  
12 telecommunications system.” *Id.* In *Taxpayers*, the defendants claimed that a vote of the people was  
13 required for the City to incur general indebtedness for Click!, but the City rightly argued that under the  
14 Charter, “no vote of the people is required **for utility system** acquisitions unless ‘general indebtedness  
15 in incurred by the city.’” *Id.*, Ex. 13 (emphasis supplied). The City highlighted that the bonds would not  
16 be obligations of the general fund since they were issued under RCW 39.46.150. *Id.* RCW 39.46.150(3)  
17 states in relevant part:

18 The governing body may obligate the local government to set aside and pay into a  
19 special fund or funds created under subsection (2) of this section a proportion or a  
20 fixed amount of the revenues from the following: . . . or (b) the public utility or system,  
21 or an addition or extension to the public utility or system, where the improvements,  
22 projects, or facilities financed by the revenue bonds are a portion of the public utility  
23 or system; . . .

24 The City of Tacoma successfully argued in 1997 that it had the authority to build a  
25 Telecommunications System and to issue bonds for its construction without a vote of the people,  
26 since the bonds were revenue bonds to be paid by revenues from the public utility; but, the City is  
here now arguing (nearly thirty years later) that Click! is not a public utility. The City cannot have it

1 both ways: either (1) the bonds issued under Ordinance 25930 were lawful and properly funded “the  
2 public utility or system” – as the City successfully argued; or, (2) Click! is not a public utility and the  
3 voters should have had the opportunity to vote on the issuance of the bonds to construct the  
4 Telecommunications System. While the City struggles to find consistency in its legal arguments, the  
5 City unfailingly appears to do whatever may be necessary to avoid letting its citizens vote. Based on  
6 the City’s own arguments in *Taxpayers*, the City should be estopped from arguing that Click! is not a  
7 public utility for the purposes of Chapter 35.94 RCW and/or Section 4.6 of the Charter.  
8

9 **C. *Coates v. City of Tacoma* Offers this Court Little Guidance on Whether Click! is a Public**  
10 **Utility Subject to the Vote Requirements Set Forth in RCW 35.94.020 and Section 4.6 of**  
11 **the Tacoma City Charter.**

12 The City suggests that the *Coates* decision somehow informs the issues presented to the Court in  
13 this case. Response, at 2. According to the City, the *Coates* decision dictates whether Click! is a public  
14 utility system under RCW 35.94.010 and the City Charter. While *Coates* briefly discussed whether Click!  
15 was separate from Tacoma Power—as opposed to a betterment—in the context of determining whether  
16 the financial structure of Click! violated the City Charter, no party to the *Coates* case took the position that  
17 Click! was itself a public utility system either for the purposes of Section 4.6 of the City Charter or RCW  
18 35.94. And no party to the *Coates* case raised any of the arguments raised in Plaintiffs’ Motions for  
19 Summary Judgment with respect to whether Click! is a public utility system under City Charter § 4.6 or  
20 RCW 35.94. As a result, the *Coates* decision does not help the Court (unlike *Bremer*, see argument above).

21 The portion of the *Coates* decision, which discussed whether Click! was separate “utility” or a  
22 separate “undertaking” from Tacoma Power was ancillary to the main issue in the case: whether the  
23 funding of Click! was a violation of the Washington Accountancy Act. The portion of the *Coates* decision  
24 that discusses whether Click! is separate “utility” or a separate “undertaking” from Tacoma Power is  
25 barely over a single page of the eleven-page majority opinion, and the twenty-two-page dissent never  
26 discussed the issue. *See Coates*, 11 Wn. App.2d 688, 698, 457 P.3d 1160 (2019) (only portion discussing  
separate utility or undertaking). This Court on the other hand is tasked with deciding whether Click! is a

1 public utility for the purposes of Chapter 35.94 RCW and Section 4.6 of the Charter. None of the major  
2 arguments Plaintiffs rely upon for the proposition that Click! is a public utility under the City Charter and  
3 RCW 35.94 were ever briefed or mentioned in *Coates*. See *Coates*, 11 Wn. App.2d 688, 457 P.3d 1160  
4 (2019). Neither party—nor the *Coates* court—discussed the meaning of “public utility,” performed  
5 statutory interpretation on the relevant statutory provisions, or cited any of the applicable case law. See  
6 *Id.* Chapter 35.94 RCW and Section 4.6 of the Charter were never mentioned, cited, nor analyzed at any  
7 point in *Coates*, which focused exclusively on funding provisions of the City Charter outside the public  
8 vote requirement in City Charter § 4.6. *Id.* Simply put, the *Coates* court did not consider any authority in  
9 any way relevant to the question of whether Click! is a public utility system under Section 4.6 of the City  
10 Charter and RCW 35.94. As a result, the opinion simply has no value to the Court in this case.

11 As explained above, this Court is not bound by *Coates*, and *Coates* has no meaningful value in this  
12 case. However, should this Court choose to follow any portion of *Coates*’ reasoning, it is important to  
13 recognize that *Coates* does not by its terms apply to Chapter 35.94 RCW. *Coates* only analyzed portions  
14 of the City Charter in the decision, and did not cite, discuss, nor analyze Section 4.6 of the Tacoma City  
15 Charter or Chapter 35.94 RCW in any way. See generally *id.* (no citation to RCW 35.94 or Tacoma City  
16 Charter § 4.6).

17 **D. *Issaquah v. Teleprompter* Does Not Help Answer the Questions Now Before the Court**  
18 **and Must be Considered in Light of Binding Precedent Set Forth in *Bremer*.**

19 This Court has suggested that *Issaquah v. Teleprompter*, 93 Wn.2d 567, 611 P.2d 741 (1980), helps  
20 to answer the question of whether the telecommunications aspect of Click! is a public utility. Christie  
21 Decl., Ex. D. Respectfully, *Issaquah* is not helpful or instructive in this case, and if the Court is going to  
22 construe *Issaquah* in this case, then it must harmonize that interpretation with binding precedent from the  
23 Supreme Court in *Bremerton Municipal League v. Bremer*. As an initial matter, *Issaquah* did not interpret or  
24 construe the actual statute at issue in this case. *Issaquah* interpreted Chapters 35A.90 and 35.92 RCW<sup>3</sup>.

25 \_\_\_\_\_  
26 <sup>3</sup> RCW 35.92’s express grant of power to exercise specific utilities does not shed any light on the meaning of public utility  
in RCW 35.94.

1 *Bremer*, on the other hand, actually interpreted RRS § 9512—the historical statute that controls the  
2 meaning of modern-day Chapter 35.94 RCW. *Bremer*, therefore, is the controlling authority on the  
3 interpretation of RCW 35.94, not *Issaquah*. And *Bremer* establishes definitively that monopoly  
4 characteristics are not required for something to be a public utility under RCW 35.94.

5 In *Bremer*, the court found that a municipal wharf was a “public utility” for purposes of RRS §  
6 9512. *Bremer*, 15 Wn.2d at 237. The municipal wharf was located directly next to a private wharf operated  
7 by the plaintiff, *Bremer*. *Id.* at 232–33. Notwithstanding that fact, the court determined that the municipal  
8 wharf was a “public utility” under RRS § 9512. *Id.* at 237. Put simply, if being a monopoly were an  
9 essential requirement to being a public utility under RCW 35.94, then the *Bremer* court could not have  
10 determined that the municipal wharf was a public utility because it had direct, next-door, private  
11 competition. Based on *Bremer* alone, it is clear that a public utility does not have to be a monopoly. As  
12 explained above, the *Bremer* Court tells us that the statute simply applies to “any kind of utility in whose  
13 operations the public has an interest.” *Bremer*, 15 Wn.2d 231, 237 (1942). Similarly, *Issaquah* does not  
14 stand for the proposition that a public utility must be a monopoly either. The *Issaquah* court never  
15 mentioned nor discussed the word monopoly.

16 **E. The Court Should Consider both the Physical Infrastructure and the Services Provided**  
17 **Therewith When Deciding Whether Click! is a Public Utility Under Chapter 35.94 RCW**  
18 **and Section 4.6 of the Tacoma City Charter.**

19 Click! is a hybrid fiber coaxial telecommunications system comprised of physical components,  
20 which as of 2014 included 1,426 miles of coaxial lines and 369 miles of fiber. Grifo Decl. Part One, Ex.  
21 56; Ex. 7. This physical infrastructure has allowed the City to make essential telecommunications services  
22 available directly to the public<sup>4</sup> to provide the people of Tacoma with essential public services. The  
23 Covid-19 pandemic highlighted the essential need for broadband telecommunication services, and even  
24 resulted in the creation of the Governor of Washington’s Statewide Broadband Office. RCW 43.330.532.

25  
26 <sup>4</sup> Consistent with 47 USC § 153(53) (defining telecommunications services).

1 This office was created to “encourage, foster, develop, and improve affordable, quality broadband within  
2 the state in order to: (a) drive job creation, promote innovation, improve economic vitality, and expand  
3 markets for Washington business; (b) serve the ongoing and growing needs of Washington’s education  
4 systems, health care systems, public safety systems, transportation systems, industries and businesses,  
5 governmental operations, and citizens; and (c) improve broadband accessibility for unserved communities  
6 and populations.” RCW 43.330.532. The Washington State legislature specifically found:  
7

8 **Findings—2019 c 365:** "The legislature finds that:

- 9 (1) Access to broadband is critical to full participation in society and the modern  
10 economy;  
11 (2) Increasing broadband access to unserved areas of the state serves a fundamental  
12 governmental purpose and function and provides a public benefit to the citizens of  
13 Washington by enabling access to health care, education, and essential services,  
14 providing economic opportunities, and enhancing public health and safety;  
15 (3) Achieving affordable and quality broadband access for all Washingtonians will  
16 require additional and sustained investment, research, local and community  
17 participation, and partnerships between private, public, and nonprofit entities;  
18 (4) The federal communications commission has adopted a national broadband plan  
19 that includes recommendations directed to federal, state, and local governments,  
20 including recommendations to:  
21 (a) Design policies to ensure robust competition and maximize consumer welfare,  
22 innovation, and investment;  
23 (b) Ensure efficient allocation and management of assets that the government controls  
24 or influences to encourage network upgrades and competitive entry;  
25 (c) Reform current universal service mechanisms to support deployment in high-cost  
26 areas, ensuring that low-income Americans can afford broadband, and supporting  
efforts to boost adoption and utilization; and  
(d) Reform laws, policies, standards, and incentives to maximize the benefits of  
broadband in sectors that government influences significantly, such as public  
education, health care, and government operations;  
(5) Extensive investments have been made by the telecommunications industry and  
the public sector, as well as policies and programs adopted to provide affordable  
broadband services throughout the state, that will provide a foundation to build a  
comprehensive statewide framework for additional actions needed to advance the  
state's broadband goals; and  
(6) Providing additional funding mechanisms to increase broadband access in  
unserved areas is in the best interest of the state. To that end, this act establishes a  
grant and loan program that will support the extension of broadband infrastructure to  
unserved areas. To ensure this program primarily serves the public interest, the  
legislature intends that any grant or loan provided to a private entity under this

1 program must be conditioned on a guarantee that the asset or infrastructure to be  
2 developed will be maintained for public use for a period of at least fifteen years.

3 2019 Ch. 365 § 1. Furthermore, the goals of the Broadband Office are as follows:

4 It is a goal of the state of Washington that:

5 (1) By 2024, all Washington businesses and residences have access to high-  
6 speed broadband that provides minimum download speeds of at least twenty-five  
7 megabits per second and minimum upload speeds of at least three megabits per  
8 second;

9 (2) By 2026, all Washington communities have access to at least one gigabit  
10 per second symmetrical broadband service at anchor institutions like schools,  
11 hospitals, libraries, and government buildings; and

12 (3) By 2028, all Washington businesses and residences have access to at least  
13 one provider of broadband with download speeds of at least one hundred fifty  
14 megabits per second and upload speeds of at least one hundred fifty megabits per  
15 second.

16 RCW 43.330.536. The City of Tacoma was well on its way to providing its citizens with this important  
17 public utility. That the City of Tacoma had the foresight decades ago to construct its own  
18 Telecommunications System, which was designed to accomplish the same goals now espoused by the  
19 state legislature is incredible. The City invested tremendous resources to create a state-of-the-art  
20 municipal telecommunications system, which system is still providing the exact same services today  
21 that it was when it was under the operation and control of the City. Not only is the physical plant of  
22 Click! a public utility for the purposes of Chapter 35.94 RCW and Section 4.6 of the Charter, but so  
23 are the services that were (and still are) provided on the physical infrastructure. *See*, 43.330.532.

24 **F. The City Has Admitted at Least One of the Issues Raised in this Case was Never  
25 Considered by Judge Speir, and Therefore This Case Cannot be Barred by the Doctrine  
26 of *Res Judicata*.**

There is limited case law defining when the subject matter of related cases differs. *Weaver v. City  
of Everett*, 194 Wn.2d 464, 450 P.3d 177, 185 (2019). The Supreme Court has “repeatedly held that ‘the  
same subject matter is not necessarily implicated in cases involving the same facts.’” *Id.* In this case the  
Court and the City have both acknowledged the consideration of new issues in this case:

COUNTY CLERK  
NO. 19-2-07135-0  
Date: 8/24/22

IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE

MITCHELL SHOOK,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

No. 19-2-07135-0

DEFENDANT CITY OF  
TACOMA'S REPLY IN SUPPORT  
OF MOTION FOR SUMMARY  
JUDGMENT

THOMAS MCCARTHY and CHRISTOPHER  
T. ANDERSON,

Plaintiffs,

v.

CITY OF TACOMA,

Defendant.

**Noted for Consideration:  
August 26, 2022  
Oral Argument Requested**

Defendant City of Tacoma respectfully requests this Court grant the City's motion for summary judgment. Plaintiffs Anderson and McCarthy make several factually and legally incorrect arguments as to why the City's motion should be denied: (1) applying res judicata would be to deny

DEFENDANT CITY OF TACOMA'S REPLY  
IN SUPPORT OF MOTION FOR SUMMARY  
JUDGMENT - 1 (19-2-07135-0)

**CHRISTIE LAW GROUP, PLLC**  
2100 WESTLAKE AVENUE N., SUITE 206  
SEATTLE, WA 98109  
206-957-9669

1 Plaintiffs their day in court and their due process rights, (2) the Shook/Bowman suit involved different  
2 parties than the current case because Mr. Shook and Mr. Bowman did not bring their lawsuit as  
3 general taxpayers, and (3) *Coates v. City of Tacoma*, 11 Wn. App.2d 688, 457 P.3d 1160 (2019) does  
4 not apply to this case. The record and the law do not support any of these arguments. Further, and as  
5 explained in the City’s motion to strike, Plaintiffs have failed to file admissible evidence to support  
6 their responses. This Complaint should be dismissed with prejudice.

7 **I. Application of Res Judicata Will Not Work an Injustice on the Plaintiffs nor Deny Them**  
8 **Their Day in Court or Due Process Rights.**

9 Plaintiffs assert that the application of res judicata is inequitable and will deny them their day  
10 in Court. Plaintiffs ignore how this case has been ongoing since 2019, and they have had ample time  
11 to move their case forward in the three years since. Indeed, Plaintiff Anderson only filed his motion  
12 for partial summary judgment after this Court issued a notice for dismissal for want of prosecution on  
13 April 11, 2022 because no action had been taken by Plaintiffs in twelve months. Further, Plaintiffs’  
14 assertions that litigating in federal court was somehow unfair is belied by the fact both Anderson and  
15 McCarthy filed a motion for a temporary restraining order in federal court raising the same arguments  
16 asserted in their motions before the Court. Not only did both Plaintiffs litigate in federal court, but  
17 McCarthy and Anderson easily could have filed motions to intervene in cause number 19-2-11506-3  
18 before Judge Spier. *See CR 24; see also Columbia Gorge Audubon Society v. Klickitat County*, 98  
19 Wn. App. 618, 623, 989 P.2d 1260 (1999) (the requirements of CR 24 are “liberally construed to  
20 favor intervention.”) Any suggestion these Plaintiffs have been “sidelined” during the course of  
21 litigation is not supported by the record or the law.

22 As laid out in the City’s motion for summary judgment, Judge Spier already decided all of

1 these issues in this lawsuit when she granted the City’s Motion for Summary Judgment in cause  
2 number 19-2-11506-3. The purpose of res judicata is to avoid inconsistent judgments and repetitive  
3 litigation, protect the integrity and resources of the judicial system, and permit successful and  
4 interested parties to rely on final judgement. *Reeves v. Mason County*, 22 Wn. App.2d 99, 116,  
5 509 P.3d 859 (2022). Allowing Plaintiffs’ lawsuit to proceed when Judge Spier has already issued  
6 a final decision on the issues Plaintiffs raise would undermine all of the goals of res judicata. *See*  
7 *also Emeson v. Dep’t of Corrections*, 194 Wn. App. 617, 626, 376 P.3d 430 (2016) (for the  
8 purposes of res judicata, “[a] grant of summary judgment at a prior proceeding is considered a  
9 final judgment on the merits.”) The only reason this Court did not grant the City’s prior motion  
10 for summary judgment arguing res judicata was because of the Court’s concerns about the smart  
11 meter programs. But as discussed in the City’s motion, those concerns have now been addressed.  
12 Accordingly, the City’s motion for summary judgment should be granted and this case should be  
13 dismissed with prejudice.

14 **II. All of the Elements of Res Judicata Have Been Established.**

15 Plaintiff Anderson also asserts the third and fourth elements of res judicata, “persons and  
16 parties,” and “the quality of the persons for or against whom the claim is made.” *Eugster v.*  
17 *Washington State Bar Ass’n*, 198 Wn. App. 758, 786, 397 P.3d 131 (2017). This argument rests on  
18 the notion Mr. McCarthy and Mr. Anderson brought their claims as citizen taxpayers, while Mr.  
19 Shook and Mr. Bowman brought their claims for personal business interests. However, this  
20 argument is contradicted by Plaintiff’s own allegations. Paragraph 1.1 of of Mr. Bowman’s  
21 complaint in Pierce County cause number 19-2-11506-3 states:

22 [Bowman] is a resident of the city of Tacoma, county of Pierce, state of Washington.

1 Mr. Bowman is a residential customer and ratepayer of Tacoma Power. Mr. Bowman  
2 also subscribes to residential Internet access over Click! Network.

3 Similarly, paragraphs 1.1 and 1.2 of the Complaint in this case describes Mr. McCarthy and

4 Mr. Anderson as:

5 [McCarthy] is a resident of the city of Tacoma, county of Pierce, state of Washington.  
6 Mr. McCarthy is a residential customer and ratepayer of Tacoma Power. Mr.  
7 McCarthy also subscribes to residential Internet access over Click! Network.

8 [Anderson] is a resident of the city of Tacoma, county of Pierce, state of Washington.  
9 Mr. Anderson is a residential customer and ratepayer of Tacoma Power. Mr. Anderson  
10 also subscribes to residential Internet access over Click! Network.

11 Mr. McCarthy's and Mr. Anderson's own allegations show how elements three and four of  
12 res judicata are satisfied here. McCarthy, Anderson, and Bowman all asserted the same legal interests  
13 as citizens of the State. *Snyder v. Munro*, 106 Wn.2d 380, 383–84, 721 P.2d 962 (1986); *In Re*  
14 *Coday*, 156 Wn.2d 485, 501 130 P.3d 809 (2006); *see also City of Tacoma v. Taxpayers of*  
15 *Tacoma*, 357 U.S. 320, 340–41, 78 S. Ct. 1209, 2 L. Ed. 2d 1345 (1958). Further, Plaintiff  
16 Anderson's argument that res judicata can only be applied to subsequent actions based on date of  
17 filing ignores how a res judicata analysis looks to **prior judgments**, not filing dates. *E.g. Reeves*,  
18 22 Wn. App.2d at 116; *Eugster v. Washington State Bar Ass'n*, 198 Wn. App. 758, 786, 397 P.3d  
19 131 (2017); *Rains v. State*, 100 Wn.2d 660, 663, 674 P.2d 165 (1983); *Berschauer Phillips*  
20 *Construction Co. v. Mutual of Enumclaw Insurance Co.*, 175 Wn. App. 222, 227-28, 308 P.3d 681  
21 (2013). Robotic adherence to chronology of filing dates would elevate form over substance and  
22 undermine the purposes of res judicata. As discussed above and in the City's motion, all four  
elements of res judicata have been established, and the Court should dismiss this case with  
prejudice.

1 **CERTIFICATE OF SERVICE**

2 I hereby certify that on August 22, 2022, I electronically filed the foregoing with the Clerk  
3 of the Court using the LINX system. I also hereby certify that I have mailed by US Postal Service  
4 the document to the following non-LINX participants:

CONSTANCE R. WHITE  
COUNTY CLERK  
NO: 19-2-07135-0

THE HONORABLE JUDGE BRIAN CHUSHCOFF  
Hearing Date: August 26, 2022

**IN THE SUPERIOR COURT OF THE STATE OF WASHINGTON  
IN AND FOR THE COUNTY OF PIERCE**

MITCHELL SHOOK,  
Plaintiff Pro Se, NO. 19-2-07135-0

v.

CITY OF TACOMA,  
Defendant.

**PLAINTIFF MCCARTHY'S REPLY TO  
DEFENDANT CITY OF TACOMA'S  
RESPONSE TO MCCARTHY'S MOTION  
FOR SUMMARY JUDGEMENT.**

THOMAS MCCARTHY; and  
CHRISTOPHER T. ANDERSON,  
Plaintiffs,

v.

CITY OF TACOMA,  
Defendant.

**I. RELIEF REQUESTED**

Plaintiff McCarthy ("McCarthy") requests that this Court deny Defendant City of Tacoma's Motion for Summary Judgment and grant Plaintiffs' Motions for Summary Judgment.

**II. EVIDENCE RELIED UPON**

Plaintiff McCarthy's Reply To Defendant's Response

Thomas McCarthy  
801 S Cushman Ave,  
Tacoma, WA, 98405

1 This motion is based on the pleadings and papers already on record in this case, the filings  
2 pertaining to the motions for summary judgment in the *City of Tacoma v. Taxpayers and Ratepayers of*  
3 *Tacoma*, under cause number 96-2-09938-0, and the filings pertaining to the motions for summary  
4 judgment the *Bowman v. City of Tacoma* case under cause number 19-2-11506-3.

### 5 **III. RESTATEMENT OF ISSUES PRESENTED**

6 The following issues are presented for resolution by the Court:

7 **1.** When a municipal Public Utility Ordinance establishes a Telecommunication System for  
8 the “*public interest, welfare, convenience and necessity*” to provide a “*public service*” and  
9 “*public benefit,*” to make telecommunications services available directly to the public, must that  
10 System be considered a “utility system” or “part thereof” and subject to the public vote  
11 requirements of City Charter § 4.6 and RCW 35.92 ? (Yes).

12 **2.** Does a plain reading of Ordinance 25930 support the conclusion that Tacoma City  
13 Council created a “utility system”, or parts thereof, to provide “effective public utility service”  
14 as the term “*utility service*” is intended in City Charter § 4.6 and/or RCW 35.92? (Yes).

15 **3.** Does regulation of “telecommunications” under Title 80 RCW “PUBLIC UTILITIES”  
16 demonstrate legislative intent for telecommunications services to be considered a “public utility  
17 service” under the RCW in Washington State ? (Yes).

18 **4.** Does RCW 80.04.010(23)’s definition of a "Public Service Company" as including  
19 “every gas company, electrical company, telecommunications company, wastewater company,  
20 and water company” demonstrate legislative intent for TPU’s telecommunication system to be  
21 considered a “public utility” under Washington state laws? (Yes).

22 **5.** Does RCW 80.04.010(28)’s definition of "Telecommunications Company" as including  
23 “every corporation, company, association, joint stock association, partnership and person, . . .  
24 and every **city or town** owning, operating or managing any facilities used to provide  
25 telecommunications for hire, sale, or resale to the general public within this state” demonstrate  
26

1 clear legislative intent compelling a designation of City’s telecommunications service as a  
2 “public utility service” under Washington State’s RCW ? (Yes).

3 **6.** Does **Federal Code** Title 47 U.S.C. Sec 153 (53) distinguish “*Telecommunications*  
4 *Services,*” from “*Cable TV Services*” as defined under Title 47 U.S. Code § 522 (6)? (Yes).

5 **7.** Does **State Code** RCW 35.99.010(7) distinguish “*Telecommunications Services,*” from  
6 “*Cable Television Services*” as defined under RCW 35.99.010(1) ? (Yes).

7 **8.** Does **Tacoma City Code** TMC 16B.01.030 (U)(V)(W) distinguish “*Telecommunications*  
8 *Services,*” from “*Cable Services*” as defined under TMC 16B.01.030 (C) ? (Yes).

9 **9.** Is a modern telecommunications system distinguishable from a cable tv system and does  
10 *Issaquah v. Teleprompter* have any bearing on the City’s right to create, declare surplus, or  
11 dispose of a municipal utility’s fiber optic Telecommunications System without a vote of the  
12 citizens under City Charter § 4.6 and/or RCW 35.92? (No).

13 **10.** Is “television” but one of many services or types of “information” that can be delivered  
14 over a modern telecommunications system? (Yes).

15 **11.** Was TPU’s telecommunications system originally established as a “public service,” for a  
16 public utility purpose, “necessary,” to provide a “public benefit” of making modern  
17 telecommunications services available for hire, sale, or resale to the general public? (Yes)

18 **12.** Does a municipal telecommunications system established to provide a “public service”  
19 and “public benefit,” by making telecommunications services available directly to the public,  
20 provide “utility service” as intended by City Charter § 4.6 and RCW 35.92 ? (Yes).

21 **13.** Did Ordinance #25930, authorizing TPU’s funding with utility “Revenue Bonds” for:

22 “Establishment of a Telecommunication System. *The City hereby*  
23 *creates a separate system of the City's Light Division to be known as*  
24 *the telecommunications system (the "Telecommunications System").*  
25 *The public interest, welfare, convenience and necessity require the*  
26 *creation of the Telecommunications System, contemplated by the plan*  
*adopted by Section 2.2 hereof, for the purposes set forth in Exhibit A”*

create a “utility system,” or parts thereof, providing “utility services” as the term “utility” is  
intended in Charter § 4.6 and RCW 35.92? (Yes).

1 **14.** Did TPU’s Telecommunications System deliver broadband internet and data transport  
2 services to ratepayers for over 20 years, under the direct operational control of the TPU Board  
3 and Tacoma Power management, with rates set by Tacoma City Council under authority of the  
4 Tacoma Municipal Code [TMC] Title 12 – Utilities ? (Yes).

5 **15.** Has TPU’s publicly owned Telecommunications System been privatized and separated  
6 from TPU’s operational control, and is that control, including setting rates, now solely vested in  
7 the private company, Rainier Connect (“Rainier”), under the “separation agreements”, i.e. the  
8 Asset Purchase Agreement (APA) and Indefeasible Right of Use (IRU) agreement? (Yes).

9 **16.** Since transfer of operational control to Rainier, does the System still provide *continued*  
10 *effective* public broadband internet and data transport services to TPU ratepayers? (Yes).

11 **17.** Is Rainier using the System to continue providing these same telecommunications  
12 services to the same customers, TPU’s ratepayers, post privatization and separation? (Yes).

13 **18.** Is TPU’s Telecommunication System still “useful,” and continuing to provide the very  
14 same public service benefits, to the very same ratepayers, for which it was created? (Yes).

15 **19.** Does the IRU provide TPU with a reversionary interest in the Telecommunications  
16 System requiring Rainier to return the System’s underlying physical fiber plant and all rights in  
17 the System’s IP addresses, Click! brand name, physical plant facilities, coax cables, conduit,  
18 easements, public right of way, communication and signal lines, usage of hub facilities,  
19 equipment cabinets, equipment poles, wires, lines, cables, equipment, braces, guys, anchors,  
20 vaults, and all attachments, appurtenances, and appliances necessary or incidental to the  
21 distribution and use of telecommunications services? (Yes).

22 **20.** Do the reversionary requirements in the IRU demonstrate such telecommunication  
23 system assets, originally acquired for public utility purposes, are still useful in providing  
24 continued public utility service *and are in fact* continuing to serve an effective *public purpose*,  
25 and are therefore not surplus under City Charter § 4.6 and/or RCW 35.92? (Yes).

1 21. Can valuable assets be considered “surplus” under Charter § 4.6 and RCW 35.92 when  
2 the agreement separating the public’s interest in those assets [the IRU] also requires the return  
3 of those same valuable assets upon termination of the agreement? (No).

4 22. Is City Council’s surplus declaration of TPU’s telecommunications system *ultra vires*  
5 and contrary to law under RCW 35.94.040 or City Charter § 4.6 ? (Yes).

6 23. Prior to approving the APA and IRU and transferring operation control over the System  
7 to Rainier, did City seek approval from voters of the city by submitting the matter of the  
8 System’s disposal to a vote as required under City Charter § 4.6 or RCW 35.92,? (No).

9 24. Where the mode of contracting for the separation of useful, in service, public utility  
10 assets, requires an approving public vote under City Charter or State statue, can any other mode  
11 be substituted to bind the City to a contract for the conveyance of such utility assets? (No)

12 25. Without an approving vote of the people on the disposal of their useful utility assets, as  
13 required under City Charter § 4.6 or RCW 35.92, did City Council have *legal authority* to  
14 execute the APA and IRU divesting TPU’s municipal telecommunication system (No).

15 26. Did City Council *exceed its legal authority* by conveying operational control over TPU’s  
16 telecom system to Rainier prior to obtaining an approving public vote as required under RCW  
17 35.94.040 or City Charter § 4.6 ? (Yes).

18 27. Is City Council’s separation of useful public utility assets, by conveying them to Rainier  
19 for a period of 20 years, without a public vote Charter § 4.6, necessarily *ultra vires*? (Yes)

20 28. Is an *ultra vires* contract *void ab initio*? (Yes).

21 29. Is *Res judicata* an equitable doctrine that must not be applied so rigidly as to work an  
22 injustice, or defeat important public policy goals of protecting public utility assets from  
23 collusion, fraud, favoritism, corruption, extravagance, and improvidence by public officials,  
24 officers and servants of the city ? (Yes).

25 **IV. BACKGROUND**

26 Click! Network, A Municipal Telecommunication System Born In Controversy.

1 In 1996 the City established the nation's first municipal broadband telecommunications  
2 system, Click! Network. It was both revolutionary and divisive.<sup>1</sup> Click! created competition in an  
3 industry dominated by monopolistic incumbents. Offering lower rates, faster internet speeds and a  
4 choice of providers over a competitive open access system, the City touted the Systems' virtues by  
5 promoting Tacoma as "America's #1 Wired City."<sup>2</sup> Incumbent monopolists, in large and small  
6 localities (Rainier among them), were publicly hostile, organizing efforts and conspiring to kill off  
7 the upstart municipal competitor. Tacoma Power Superintendent at the time, Mr. Steve Klein,  
8 described the opposition in those early days of Click! Network, in his 2017, deposition taken by  
9 Plaintiff's attorney, David Jurca, in *Coates v Tacoma 11 Wn. App. 2d 688; 2019*:

10 (Klein) A. My sense -- and this is my sense when I was there, and it's  
11 fairly accurate -- is the people in Click were wonderful. The service was  
12 wonderful. It was a local utility trying to do and doing good. How do  
13 you attack something like that? And so basically the opposition came up  
14 with, well, how do you attack it? You make people feel like they're being  
15 ripped off. And so every so many years, this theme would build up again,  
16 and here -- here it was again.

17 (Jurca) Q. When you refer to the local politicians, are you referring to  
18 people on the city council?

19 (Klein) A. Yes.

20 (Jurca) Q. Okay. Anyone in particular or . . .

21 (Klein) A. I would say, for the most part, the ones that were the most  
22 negative were Kevin Phelps and Michael Crowley. But they were very  
23 influential, and so they were able to oftentimes get others to -- to join  
24 them, but they were the two main individuals. And they also were -- kept  
25 in touch with Leo Hendery and AT&T then and that sort of thing.<sup>3</sup>

26 *see 5/18/22 Grifo Decl Part 2, Ex. 74, Pg. 398/499.*

Mr. Brian "Skip" Haynes, operator of incumbent telecom company Rainier Connect, who  
ironically now has full operational control over Click!, was another vocal opponent of Click! at the

---

<sup>1</sup> 5/16/22, Grifo Decl. 1, Ex. 47, Pg. 804/932 Editorial on Rainier's opposition to creation of Click!.

<sup>2</sup> *See 5/18/22 Decl. of Grifo Part 2, Ex. 71, Pg. 313/499 Price Waterhouse Cooper's Summary on Click! Performance "you have provided the substance to the reality of Tacoma, America's #1 Wired City."*

<sup>3</sup> Michael Crowley's opposition continued thru 2019, as he was a co-plaintiff in *Coates v Tacoma 11 Wn. App. 2d 688; 457 P.3d 1160; 2019*, a case that attempted to derail Click! by accusing Click! of violating the accountancy act. Interestingly, Leo Hendery [the owner of TCI . . . which became Comcast in Tacoma] and Mike Crowley attended high school together at Bellarmine Prep, see Mr. Klein's deposition, in the 5/18/22 Decl. of Grifo Part Two at Pg 395/499. The cozy and insular nature of the Tacoma political establishment is well known and it is public knowledge that Judge Speir's sister Tiffany Speir is a long-time associate of Mr. Crowley's, having worked closely with Mr. Crowley at Master Builders Association in Tacoma for many years. See 8/22/22 Decl. of McCarthy, Ex. F

1 time. Mr. Haynes even authored an Op-Ed piece for The News Tribune arguing government had  
2 no business competing with private telecom companies. *see* Grifo Decl. Part One, 5/18/22, Ex. 47,  
3 Pg. 804/932, a 2008 News Tribune article, “*From Critic of Click! to Business Partner*”

4 To curry favor for privatization, Rainier’s principals provided large campaign contributions  
5 supporting Tacoma’s Mayor Woodards, who subsequently guided the Council and personally  
6 voted for surplusing Click!, and approving the APA and IRU transferring Click! operational  
7 control to Rainier Connect. *see* 5/18/22Grifo Decl. Part One, Ex. 47(a)(b), Pg. 804/932.

8 The tireless political and legal maneuvering by monopolist telecom operators and their  
9 lobbyist lackeys, to prevent municipal telecommunication competition is nothing new. It’s  
10 common knowledge that incumbent telecommunications providers protect their market share by  
11 seeking to prevent creation of such municipal networks.

12 Municipal utilities threaten incumbent’s monopoly profits, and municipal operation of  
13 telecommunication systems remains controversial across our nation today. <sup>4</sup> <sup>5</sup> Consider the  
14 Institute for Local Self Reliance’s paper, “Comcast Spends Big on Local Elections: Would  
15 Lose Millions in Revenue from Real Broadband Competition” *see* Grifo Ex. 69:

16 Comcast has a lot to lose from a competitive market in broadband Internet  
17 access. The cable firm is often the only option for broadband Internet access as  
18 defined by the Federal Communications Commission today. Comcast faces no  
19 competition in four out of ten census blocks where it offers broadband service  
20 and in 73 percent of the blocks that have competition, there is only one other  
21 option. The cable giant joined incumbent telephone company CenturyLink in  
22 Seattle with a \$50,000 donation to their preferred candidate, who just happens to  
23 oppose a municipal fiber network

24 A few tens of thousands of dollars is a small price to pay to secure tens of  
25 millions in monopoly profits per year. Massive firms monopolizing single  
26 industries threatens our political system because of the large incentive they have  
to protect their turf. They can justify spending more single-handedly to influence  
elected officials than all sides typically spend in a campaign. And campaign

---

24 <sup>4</sup> 5/18/22 Decl. Grifo, Ex. 69(a), Broad-Banned: The FCC’s Preemption of State Limits on Municipal  
25 Broadband, Vol. 68 Emory L.J. 407 (2018). Municipal utilities threaten incumbent monopoly’s  
26 (“Broadband Trust”). profits. This Trust lobbies fiercely to preserve entrenched cartel market power.

<sup>5</sup> Nineteen states have laws restricting municipalities from establishing telecommunication utilities. The  
Supreme Court confirmed state authority to preempt municipal competition in *Nixon v. Mo. Mun.  
League*, 541 U.S. 125, 140–41 (2004). The FCC attempted to preempt such state laws, but was overruled  
in *Tennessee v. FCC*, 832 F.3d 597, 610 (6th Cir. 2016).

1 expenditures are only one of many tools firms like Comcast use to protect their  
2 business from competition. Comcast also has regular access to decisionmakers  
via direct meetings, trade associations, and via their “philanthropic” pursuits.

3 *see* ILSR’s paper, 5/18/22 Decl. of Grifo Part Two, Ex. 69, Pg. 187/499 )

4 The Click! controversy is another chapter in the never-ending saga of monopoly interests  
5 seeking to eliminate competition and preserve anticompetitive cartel control thru political influence.

6 The vast influence and endless political payola of monopolist incumbents, has succeeded  
7 in sidelining Click! as an open access municipal competitor and silenced all attempts by the  
8 public to secure their rightful vote in protecting their municipal telecom system from illegal  
9 privatization. No full, fair and final determination of the right to vote has been made. Mr.  
10 Shook’s settlement, for financial necessity, cut short any appeal that might have determined the  
11 issue, and his negotiated settlement did not fully and fairly determine Mr. McCarthy’s (or the  
12 Tacoma electorates’) right to vote on disposal of their public utility.

14 Public policy issues in this case are of far-reaching importance. The prevention of collusion,  
15 fraud, favoritism, corruption, extravagance, and improvidence on the part of public officials,  
16 officers and servants of the city, along with the public’s right to vote on such issue must be fully  
17 and fairly litigated to a final decision on the merits, inclusive of McCarthy’s right to the appellate  
18 review process. If a fully functional state-of-the-art public utility System, such as Click!, can be  
19 disposed of by an illegal designation of “surplus,” then no utility is safe from privatization! A  
20 water or power system could be wrongfully “surplused” and privatized next. Sound public policy  
21 and judicial integrity require protecting such public utility assets from plunder.

## 23 **V. LEGAL AUTHORITY AND ARGUMENT**

### 24 **A. Click! Network Was Created as a Public Utility**

25  
26

1 Click! was created as a public utility, by a public utility, for the purpose of providing public  
2 utility services to TPU’s ratepayers. The City’s Business Plan for Click! and Ordinance #25930  
3 authorizing Utility Bonds to fund the System are more clear evidence: <sup>6 7</sup>

4 ORDINANCE NO. 25930

5 AN ORDINANCE of the City of Tacoma, Washington establishing a  
6 **telecommunications system** as part of the Light Division, supplementing  
7 Ordinance No. 23514 and providing for the issuance and sale of the  
8 ***City's Electric System Revenue Bonds*** in the aggregate principal  
9 amount of not to exceed \$1,000,000 to provide part of the funds  
10 necessary for the acquisition, construction and installation of additions  
11 and improvements to the telecommunications system.

12 Establishment of a Telecommunication System. The City hereby creates  
13 a separate system of the City's Light Division to be known as the  
14 telecommunications system (the "**Telecommunications System**"). The  
15 public interest, welfare, convenience and necessity require the creation  
16 of the Telecommunications System, contemplated by the plan adopted  
17 by Section 2.2 hereof, for the purposes set forth in Exhibit A”

18 *Emphasis added*

19 Using public utility funds, the City created a “*utility system*” to provide “*utility services*” as  
20 the term “utility” is intended to be construed in Charter § 4.6 and RCW 35.92. No general  
21 government funding was used.<sup>8</sup>

22 RCW Chapter 35.92 -MUNICIPAL UTILITIES, provides at RCW 35.92.070 a procedure for  
23 Cities to hold an election for funding utilities, *unless* the City has an ordinance allowing for  
24 *acquiring, opening, or operating **public utilities***. (emphasis added)

25 When the governing body of a city or town deems it advisable that  
26 the city or town purchase, acquire, or construct any such public utility,  
or make any additions and betterments thereto or extensions thereof, it  
shall ..... be submitted for ratification or rejection by majority vote of  
the voters of the city or town at a general or special election.

(1) No submission shall be necessary:

(b) When in the charter of a city a provision has been adopted  
authorizing the corporate authorities thereof to provide by ordinance for  
acquiring, opening, or operating any **of such public utilities**;

<sup>6</sup> 5/16/22 Decl. of Grifo, Ex 10(a), Pg. 126/932, Ex. 10(b) Pg. 143/932 -Business Plan.

<sup>7</sup> 5/16/22 Grifo Decl. Ex. 11, Pgs. 299 to 325 of/932, Ordinance #25930

<sup>8</sup> RCW 39.46.150 (b) “the public utility or system, or an addition or extension to the public utility or  
system, where the improvements, projects, or facilities financed by the revenue bonds are a portion of the  
public utility or system;”

1 The City obtained a declaratory judgement, in 1997's *City of Tacoma v. The Taxpayers and*  
2 *the Ratepayers of Tacoma*, Superior Court No. 96-2-09938-0, confirming authority to construct  
3 Click! as a "public utility" with "utility bonds," thereby avoiding the public vote requirement of  
4 RCW 35.92.070. Also, *see* RCW 39.46.150(3) Revenue Bonds the "Alternative method of  
5 issuance," which allows City funding of a "utility" without a public vote on issuing bonds, when  
6 the "facilities financed by the revenue bonds are a portion of the public utility or system. Further  
7 clear evidence a "public utility" system was created, and that the City intended to created Click!  
8 as a "*public utility system*" to provide effective "*public utility services*."

9 The enabling City Ordinance #25930<sup>9</sup>, and related TPU Resolutions U-33668<sup>10</sup> and  
10 Resolution U-9258<sup>11</sup> all cite "*public purpose*," "*public benefits*," and "*public interest, welfare,*  
11 *convenience and necessity*." This is fully briefed in McCarthy's Response to Defendant's Motion  
12 of Summary Judgement, beginning on page 2.

13 **B. Click! Operated as an Integrated Public Utility Department.**

14 For over 20 years TPU operated Click! Network as one of four integrated utility services, all  
15 operated under four distinct brands, Tacoma Water, Tacoma Power, Tacoma Rail and Click!  
16 Network. These operational units shared lobby space in TPU's headquarters. *See* 5/16/22 Decl.  
17 Grifo Part 1, Ex. 42(a), Pg. 723/932, photo of the lobby at TPU headquarters in 2019.

18 Besides sharing the lobby space, TPU's four effective utility brands shared a presence on  
19 TPU's website, where TPU self-describes its services, saying: "Tacoma Public Utilities Provides  
20 Services that are "Vital to Our Quality Of Life." TPU lists the "vital" services as: "Our Services:  
21 Power, Water, Rail and Click! Network. *See* 5/16/22 Decl. Grifo Part 1, Ex. 1(a) 65/932.

22 Click!'s wholesale telecommunication rates were set by City Council under the rules of  
23 Tacoma Municipal Code "Title 12 UTILITIES." *See* TMC Chapter 12.13 CLICK! Network.<sup>12</sup>

24 All of these facts demonstrate Click! is a "public utility," operating a "public utility system"  
25 and providing a "public utility service."

26 **C. By Definition Telecommunication is "Public Utility" and "Utility Service"**

<sup>9</sup> 5/16/22 Grifo Decl. Ex. 11, Pgs. 299 to 325 of/932,

<sup>10</sup> 5/16/22 Grifo Decl. Ex. 10, Pgs. 121 to 296 of/932 (includes business plan).

<sup>11</sup> 5/16/22 Grifo Decl. Ex. 11, at of 133/932.

<sup>12</sup> 5/16/22 Grifo Decl. Ex. 8, Pg. 112/932. TMC Title 12 UTILITIES.

1 **Federal Code** defines Click! as a “utility.” See 47 USC § 224(a)(1), where “Utility” means:

2 The term “utility” means any person who is a local exchange carrier or an  
3 electric, gas, water, steam, or other public utility, and who owns, or  
4 controls poles, ducts, conduits, or rights-of-way used, in whole or in part,  
5 for any wire communications.<sup>13</sup> (*Emphasis added*).

6 Federal Code Title 47 U.S.C. Sec 153 (53) defines “telecommunications service” as the  
7 offering of telecommunications for a fee directly to the public, *or to such classes of users as to*  
8 *be effectively available directly to the public, regardless of the facilities used.*

9 RCW Title 80 defines “PUBLIC UTILITIES.” see RCW 80.04.010(23), a “Public Service  
10 Company” includes “every gas company, electrical company, telecommunications company,  
11 wastewater company, and water company.”

12 RCW 80.04.010(28), a “Telecommunications Company,” includes “every corporation,  
13 company . . . and every city or town owning, operating or managing any facilities used to  
14 provide telecommunications for hire, sale, or resale to the general public within this state”.<sup>14</sup>

15 Our Supreme Court defines “public utility” as a service that will “subserve a *public use*.”  
16 *Winkenwerder v. City of Yakima*, 52 Wn.2d 617, 328 P.2d 873, (1958). Ask, The crucial and  
17 final test is, does the use “does the use — utility — subserve a public purpose — does it furnish  
18 a natural need of the city or its citizens — does it contribute to his comfort, prosperity, or  
19 happiness?” *Id.* at 328. Compare with *Bremerton Municipal League v. Bremer*, 15 Wn.2d 231,  
20 130 P.2d 367 (1942), the court found a “public utility” was “any kind of utility in whose  
21 operations the public has an interest.” *Bremer*, at 237.

22 The definition of a “utility system” is found in the plain meaning of the terms “utility” and  
23 “system.” Courts may also “look to standard English language dictionaries.” *North Pacific Ins.*  
24 *Co. v. Christensen*, 143 Wn.2d 43, 48, 17 P.3d 596 (2001). Black’s Law Dictionary’s defines  
25 “public utility” as, “a company that provides necessary services to the public, such as telephone  
26 lines and service, electricity and water.”<sup>15</sup> Merriam Webster provides “system” is “a regularly

24 <sup>13</sup> The 1996 Federal Telecommunications Act.

25 <sup>14</sup> Moreover, consider that Click! telecommunication system allows services that are the modern  
26 equivalent of the “telephone.” Transmitting and receiving ordinary-language messages is widely  
accomplished with VoIP service, a technology replacing traditional switched telephone technologies.  
Click! offers a “Voice Package”, or VoIP with QoS (“quality or service” features). that prioritize VOIP  
“data packets.” 5/16/19 Grifo Decl. Ex. 44, Pg. 752/932

<sup>15</sup> *Black’s Law Dictionary* Eleventh Edition 2019 P. 1859.

1 interacting or interdependent group of items forming a unified whole.” Click! is represented by  
2 2156 pages in the Click Business Transaction Agreement (CBTA)<sup>16</sup> plus the IRU. These assets  
3 constitute a “system.” Click! is a “Public Utility System” by the plain meaning of the term.

4 **D. Issaquah V. Teleprompter Provides No Definition Of “Utility” and Has No Bearing On The**  
5 **City’s Right to Declare the City’s Municipal Fiber Telecommunications System Surplus.**

6 *Issaquah* has no bearing on the City’s right to declare the City’s fiber System surplus, or on  
7 the right of the City to dispose of the System without a vote of the citizens under Charter § 4.6  
8 and RCW 35.92, because Click! is not a Cable TV System, *but rather* Click! is a  
9 “Telecommunications System.” *compare* RCW 35.99.010(1) with RCW 35.99.010(7). Also,  
10 *compare* Tacoma City Code TMC 16B.01.030 (U)(V)(W), defining “Telecommunications  
11 Services,” with TMC 16B.01.030 (C) and “Cable Services.” Finally, Title 47 U.S. Code §522  
12 (6), defines the term “cable service”: as:

13 (A) the one-way transmission to subscribers of (i) video programming,  
14 or (ii) other programming service, and; (B) **subscriber interaction**, if  
15 any, which is **required for the selection or use of such video**  
16 **programming or other programming service.** (emphasis added)

17 Telecommunications system *are* “public utility systems” that provide “public utility service.”

18 **E. Click!’s Ongoing Operation and Reversionary Interest Demonstrate System is Not Surplus.**

19 Since transfer of operational control to Rainier, the System continues to provide the same  
20 telecommunications services for which it was created, to the same TPU ratepayers. Moreover,  
21 under the terms of the IRU, TPU maintains a reversionary interest in the underlying assets of the  
22 Telecommunications System, requiring Rainier to return usage of the System’s physical fiber  
23 plant to TPU upon completion of the agreement. The IRU also compels Rainier to return all of  
24 the City rights to the System’s IP addresses, Click! brand<sup>17</sup>, physical telecommunications plant,  
25 coax cables, conduit, easements, rights of way, communication lines, hub facilities, equipment

26 <sup>16</sup> See 5/16/22 Decl. of Grifo, Ex. 2(b), Pg 88/932, also, Ex29, Pg. 508/932, citing the complete CBTA, a total 2156 pages, and referencing the 11/1/2019 Decl. of Shook, Ex. 29, in *Bowman v City of Tacoma, Pierce County Superior Court* NO. 19-2-11506-3.....

<sup>17</sup> See 5/18/22 Decl. Grifo Part 3 Pg. 384/428, 4.1 Licensee acknowledges that the Marks are valid, are the exclusive property of Licensor, and Pg. 391/248 See 5.3 Upon termination of this Agreement, Licensee shall permanently discontinue all use of the Marks and refrain from using any other service mark, trademark, trade name, corporate name,.

1 cabinets, poles, wires, cables, braces, guys, anchors, vaults, and all attachments, appurtenances,  
2 and appliances necessary or incidental to the distribution and use of telecommunications  
3 services.<sup>18</sup> The IRU’s reversionary interest demonstrates the System, and its assets are not  
4 “surplus,” but still provide continued public utility service. As such, City Council’s surplus  
5 declaration of TPU’s municipal telecommunications system is *ultra vires* and contrary to law.

6 Council has exceeded its legal authority, by authorizing execution of the APA and IRU to  
7 separate Click! and convey operational control to Rainier Connect prior to a public vote.

8 Where the mode of contracting for such a lease, sale or conveyance of public utility assets, is  
9 provided under the law, no other mode can be substituted to bind the City to a contract.

10 **VI. CONCLUSION**

11 Click Network’s fiber optic system continues to provide effective public utility service and  
12 Tacoma City Council’s surplus declaration of the System under RCW 35.94.040 is *ultra vires*.  
13 City Council is without any legal authority to bind the City to the terms of the IRU and APA  
14 absent a public vote under Tacoma City Charter § 4.6 and RCW 35.94.020. Execution of the  
15 APA and IRU is *void ab initio* and conveyance of Click!, a useful public utility asset, to Rainier  
16 for a period of 20 years is null and void. Click! assets and customers shall be returned to TPU  
17 until the protective public vote provides for disposal of the municipal public utility system.<sup>19</sup>

18 Respectfully Submitted this 22 day of August 2022

19 

20  
21  
22  
23 Thomas McCarthy

24  
25 <sup>18</sup> 5/19/22 Decl. of Grifo Part 3, Exhibit B, Pg. 265/428 The IRU requires: “The IP addresses assigned to  
26 Operator by Tacoma Power will continue to be proprietary to Tacoma Power. Upon termination of the  
IRU Agreement, Operator must return Tacoma Power-assigned IP addresses.”

<sup>19</sup> See *Bremer*, 237 “We are of the opinion that these sections of our statutes provide the only procedure  
by which the city can lawfully sell or lease municipal wharves.”

### What became of Tacoma Click?

*If there is anything we learned since 2020, it is that web access is an essential utility*

*By Morf Morford mmorford@soundpublishing.com • August 19, 2022 1:30 am*

Tags: [Featured](#)

In the early 2020s we all found ourselves spending more time in front of screens. (Photo by Morf Morford)

*By Morf Morford, Tacoma Daily Index*

From about mid-2020, many of us, from elementary school students to those of who could work from home, became more dependent on the internet than any of us could have imagined just a few months before.

From Zoom meetings to online schooling or shopping, or binge video streaming, staring at a screen became something almost all of us did almost constantly.

For many of us, our online existence was economic or even mental health salvation, for others it was yet another set of endless learning curves.

Our online presence provided income, distraction and something approximating social interaction, and most of the time, most of us were glad to have it.

And we were willing to pay for it.

Oddly enough, before the pandemic, Tacoma had its own city-wide, hard-wired, internet system.

Our public relations term for our city owned (Tacoma Public Utilities, TPU) system and how it defined us was “The most wired city”.

Click Network – formally known as Click! Cable TV – was the city of Tacoma’s municipally-owned cable and broadband internet network.

It began in the 1990s and grew out of a fiber optic network built by Tacoma Power to improve maintenance and efficiency of the power grid.

With excess capacity built in, TPU could give Tacoma-area cable customers an alternative to TCI, which had a monopoly in the area and was renowned for its erratic service – and unreasonable prices.

Click internet was sold indirectly to customers through two internet service providers – Advanced Stream and Rainier Connect – who leased space on the Click network.

Advanced Stream and Rainier Connect were/are local businesses with immediate access for customers.

Click’s lower-than-average rates back then also benefited Comcast customers in the Tacoma area – Comcast’s rates back then tended to be lower here than in other cities.

Click management estimated that their costs were 15 to 30 percent lower than what Comcast charged.

Since Click was a public utility, any rate increases had to be approved by Tacoma’s City Council.

Toward the end of 2016, the Tacoma City Council ordered an independent audit of Click’s finances.

Depending on how you interpret their findings, Click either made or lost money for the city.

To put it mildly, it is was crazy complicated.

In the end, Click was parted-out and sold to the highest/lowest bidder.

As is usual with Tacoma politics and processes, questions abound.

Based on precedent, if not law, any disbursement of a public utility (or part of a utility) should have gone to a public vote.

As we know now, web access became even more essential, if not universal since 2020.

Even if Click had not been profitable before 2020, it certainly would have been after that year.

There is something remarkable about public utilities – they provide a range of essential services, not for profit, but for the benefit of members/owners.

In a way, it’s kind of a crazy idea, but one that keeps prices low and allows for longer range investment in infrastructure for the provision of services far into the future.

Investment in the “wired” future of Tacoma was visionary.

I’m not convinced that getting rid of Click was a such a good idea.

\*\*\*\*

In the spirit of full-disclosure, I was a subscriber to Click via Advanced Stream for many years.

Their service was exceptional and reliable – and affordable.

Their office (on 6th Avenue) was always open with immediate assistance.

We have since then been with Rainier Connect and, to put it diplomatically, their service (and speed) is not even close to Advanced Stream.

But, from what I hear from friends, it is better than Comcast.

As in many other cases, local is almost always better than some distant corporate office.

## Master Builders Association Executive Officer Retires- New EO Named

Mike Crowley, Executive Officer for the Master Builders Association of Pierce County since 2001, has announced his retirement effective October 1, 2011. Former Tacoma Mayor and Council Member, and former downtown Tacoma retail businessman, Crowley is a longtime contributor to Tacoma's political and economic arenas.

"The MBA has benefitted from Mike's talents and standing in our community during his time at MBA," stated MBA President Rick Hjelm. "He brought the association to a new level and cultivated a strong staff that will keep MBA in good stead into the future. Mike will be missed by our members as well as those who worked with him as elected leaders and industry allies."

"I have enjoyed my time with MBA immensely," stated Crowley. "I have made some great friends

and had the opportunity to work for and represent a group of people essential to the local economy and community – homebuilders. My next steps? I plan to remain active in the community while spending more time with my wife and four grandchildren."

MBA's Board of Directors named Tiffany Speir as the new Executive Officer beginning October 1. "Tiffany has been with MBA since 1998 and has served as Government Affairs Director and

800 such local associations throughout the United States (15 in the state of Washington), the MBA's purpose is to promote through membership involvement, legislative action, networking and education, the opportunity for affordable housing to all while striving to maintain the highest ethical standards. The Master Builders Association believes that home ownership is the cornerstone of family security, stability, and prosperity. It strengthens the nation's communities, encourages civic responsibility and provides a solid foundation from which to work. The Master Builders Association is concerned with and has a stake in the quality of life here in Pierce County. It stresses community involvement as a means to an end--homes for all.

**NO. 19-2-07135-0  
APPEAL NO. 57246-0 [DIV. II]**

**DESIGNATION OF CLERK'S PAPERS**

**[CLERK'S ACTION REQUIRED]**

THOMAS McCARTHY and CHRISTOPHER  
T. ANDERSON,  
Plaintiffs,

v.

CITY OF TACOMA,  
Defendant.

COMES NOW, Appellant, Christopher T. Anderson, by and through his counsel of record, and pursuant to RAP 9.6 submits the following Designation of Clerk's Papers. The Appellant respectfully requests the Clerk of the Court transmit the following Clerk's Papers<sup>1</sup> to Division II of the Washington State Court of Appeals:

<sup>1</sup> Appellant acknowledges that a "Sub No." or other numerical indexing system is typically included; however, Pierce County Superior Court does not make any such information available on its Linx platform and therefore the same is not included in this table.
